HOUSTON (JULY 23) BUSINESS WIRE - MAXXAM Inc. (MAXXAM) (ASE/PSE/PhSE:MXM) Monday reported net income of $94.1 million, or $9.89 per share, for the six months ended June 30, 1990 as compared with net income of $33.7 million, or $3.97 per share, for the same period in 1989.

Sales for the six months ended June 30, 1990 were $1,182.3 million compared with $1,148.7 million for the same period in 1989.

For the three months ended June 30, 1990, MAXXAM reported net income of $60.3 million or $6.34 per share, compared with net income of $26.7 million or $3.15 per share for the second quarter of 1989. Sales in the second quarter of 1990 were $610 million compared with $576.5 million for the second quarter of 1989.

MAXXAM operates in three industry segments: aluminum operations, forest product operations and real estate management and development.

Operating income increased in the second quarter and first half of 1990 as

compared with the same periods of 1989, reflecting an increase in alumina shipments and reduced unit production costs, partially offset by a drop in market prices for alumina and primary aluminum.

The 1990 results also included above-market prices for significant quantities of alumina and primary aluminum sold forward in prior periods under long-term contracts.

When compared with the second quarter and first six months of 1989, production costs in the 1990 periods decreased due to the indexing of a portion of domestic production costs to the market price of primary metal and to greater operating efficiencies.

Sales revenues increased 4 percent in the second quarter and 1 percent in the first half of 1990 from the same periods of 1989, despite lower primary aluminum volume caused by the sale of interests in two overseas smelters in the third quarter of 1989, and lower average realized prices.

MAXXAM is engaged in aluminum operations through Kaiser Aluminum & Chemical Corp., a fully integrated aluminum producer and a subsidiary of KaiserTech. Forest products operations are conducted through MAXXAM's wholly owned subsidiary, The Pacific Lumber Co., and real estate management and development operations are conducted through several wholly owned subsidiaries.

SAN DIEGO (JULY 23) BUSINESS WIRE - Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) Monday announced it has been selected as a private sector sponsor by the California Competitive Technology Program to receive funding for a Phase 2 clininical trial with the ESA System that will be performed at Scripps Clinic and Research Foundation in La Jolla.

Gensia is one of 41 companies receiving a grant out of 105 companies that applied in fiscal year 1990, according to David F. Hale, president and chief executive officer.

The California Competitive Technology (CompTech) Program was initiated in 1989 by the state Department of Commerce to enhance the competitiveness of California firms by fostering technology transfer from the laboratory to the marketplace.

In order to be considered, projects must meet several criteria that focus on strengthening relationships between the public and private technology sectors and promoting business growth in California.

''Gensia and Scripps have been granted approximately $80,000 out of a total project budget of $142,000 to undertake a clinical study to compare exercise stress testing with electrocardiography and pharmacological stress testing with Gensia's ESA System in patients with cardiovascular disease,'' said Hale.

''Dr. Charles Dennis, director of Cardiac Rehabilitation at Scripps Clinic is acting as project manager of this Phase 2 clinical study for our ESA System.''

Dennis held joint appointments as assistant professor of medicine (cardiology division) at Stanford University and was director, Cardiac Care Unit/Medical Intensive Care Unit, at the Palo Alto VA Hospital prior to joining Scripps Clinic and Research Foundation in 1989. He has served as a consulting cardiologist to Gensia since 1987.

Gensia Pharmaceuticals Inc. is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel drugs for the diagnosis and treatment of human diseases.

MILPITAS, CALIF. (JULY 23) BUSINESS WIRE - Adaptec Inc. (NASDAQ:ADPT) Monday became the first company to bring to market Small Computer Systems Interface (SCSI) software compatible with Microsoft Corp.'s layered device driver architecture (LADDR) for the OS/2 operating system.

With the introduction of the ASW-1420 1.21 SCSI Manager software, Adaptec also debuted its Advanced SCSI Programming Interface/2 (ASPI/2) line of software for OS/2.

ASPI/2 and LADDR form a bus-independent SCSI software architecture with built-in support for up to seven SCSI hard disks, as well as a variety of connectivity options for other peripherals.

The ASW-1420 1.21 is the first SCSI manager to fully utilize the multitasking capabilities of SCSI in OS/2 environments. The ASW-1420 1.21, which provides SCSI disk support and an ASPI/2 layer that interfaces with a range of LADDR device modules, works with Adaptec's AHA-154X (AT-to-SCSI) and AHA-1640 (Micro Channel-to-SCSI) host adapters.

The device modules -- which provide support for a variety of other peripherals including SCSI tape, WORM, CD-ROM, DAT, printer -- are in development from various sources, including Adaptec.

The ASW-1420 1.21 is targeted at original equipment manufacturers (OEMs), resellers and systems integrators of microcomputer systems using OS/2. Typical applications for the software are LAN Man-based file servers and multi-user systems.

Adaptec is a leading supplier of high-performance I/O solutions. Produce offerings include a broad line of SCSI host adapters and SCSI- and ESDI-based controller boards for personal computers, SCSI software, proprietary VLSI circuits, a family of SCSI development and test systems, and laser printer controllers.

#90204b0664 07/23/1990 ~Business Wire

CLEVELAND (JULY 23) BUSINESS WIRE - Eaton Corp. Monday announced financial results for the second quarter and first half of 1990.

For the second quarter, net income was $53.6 million, or $1.49 per share, on sales of $953 million. This compares with 1989 second quarter earnings of $63.4 million, or $1.72 per share, on sales of $969 million.

For the first six months, net income was $107.3 million, or $2.97 per share, on sales of $1,894 million. This compares with 1989 first half net income of $130.6 million, or $3.53 per share, on sales of $1,927 million.

James R. Stover, Eaton chairman and chief executive officer, said, ''Eaton constructed a respectable second quarter performance from markets that were largely weaker than a year earlier. Operating profits were lowered by changes in product mix, but nonetheless reflect the rigorous control of costs and an improvement in inventory management.

''Production of heavy trucks in North America--a bellwether market for Eaton components--has been down for the past four quarters and has now reached the lowest levels in almost four years. Activity levels for heavy trucks are also low in Europe, particularly in the United Kingdom.

''Many of Eaton's controls markets are flat or down with the notable exception of the strong commercial aircraft market. Our semiconductor equipment business, which had an exceptional first half in 1989, has declined following the industry itself.

During the quarter the company acquired Opcon, a manufacturer of electronic sensors for industrial and commercial applications. Opcon, based in Everett, Wash., strengthens the company's position as a supplier of sensors for industrial markets.

With 42,000 employees in 20 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles engine components, electrical equipment and controls.

#90204b0668 07/23/1990 ~Business Wire

SAN FRANCISCO (JULY 23) BUSINESS WIRE - Homestake Mining Co. (NYSE:HM) announced that second-quarter net income increased to $37.3 million, or 38 cents per share, from $20.9 million, or 22 cents per share, in the same period last year.

Second-quarter net income included a $41.8 million after-tax gain from the sale of the company's interest in the Doe Run base metals partnership. The gain was reduced by an $11 million charge ($7.5 million after tax) which resulted from a review of future holding costs following the closure of the uranium mines.

Second-quarter income in 1989 included a $14.2 million after-tax gain on the sale of a portion of the company's oil and gas interests. Base metals and oil and gas operations have been reclassified as discontinued operations.

Second-quarter income from continuing operations showed a $7.7 million loss principally due to the uranium business charge which included estimated future year's holding costs. Income for the same period in 1989 was $1.3 million. Although gold sales reached a record level of 309,025 ounces, the gains were offset by somewhat lower realized gold prices of $366 per ounce and a moderate increase in average cash production costs to $270 per ounce.

Net income for the first half of 1990 was $50.5 million, 51 cents per share, compared with $28.1 million, 29 cents per share, in 1989. Income from continuing operations was $1.2 million, an increase from $0.9 million in 1989. Although gold prices were essentially unchanged at $385 per ounce, income from gold operations was higher as sales volumes increased 27 percent to 583,762 ounces.

Gold Operations: Gold production for the second quarter reached a record 297,866 ounces principally due to increased volumes from Homestake's Australian properties and the Round Mountain mine.

Homestake Gold of Australia's Kalgoorlie Operations increased production to 55,273 ounces up 39 percent from the prior year's quarter, and the newest Australian operation, the Fortnum mine, added 16,102 ounces at an average cash cost of $171 per ounce.

Homestake Mining Co. is an international gold mining company holding significant interests in the United States, Australia, Canada and Chile.

Homestake Mining Co. is located at 650 California St., San Francisco,

Calif. 94108.

#90204b0672 07/23/1990 ~Business Wire

SAN FRANCISCO (JULY 23) BUSINESS WIRE - Grubb & Ellis Realty Income Trust (NASDAQ/NMS:GRIT) Monday reported 1990 second quarter net income of $341,000, or 12 cents per share, from revenue of $734,000.

This compares to net income of $341,000, or 12 cents per share, from revenue of $646,000 for the like period last year.

The REIT reported net income of $719,000, or 27 cents per share, from revenue of $1,490,000 for the first six months of 1990. Net income for the comparable period in 1989 was $684,000, or 25 cents per share, from revenue of $1,282,000.

A per share dividend of 18 cents also was declared payable Aug. 17, to shareholders of record Aug. 3. The dividend is a distribution from operations as opposed to the per share distribution of $1.50 paid June 29 from the liquidation of assets associated with the dissolution of the REIT.

A decrease in mortgage loan investments, which provide a higher yield, and an increase in equity investments in 1989, resulted in approximately the same net income in the 1990 periods despite an increase in revenue.

The REIT also indicated that costs related to the cleanup of certain toxic wastes are being determined as part of the negotiations for the sale of the Livermore Arcade Shopping Center to Hopkins Development Co. The marketing of the REIT's other assets is still being actively pursued.

Grubb & Ellis Realty Income Trust is advised by Grubb & Ellis Realty Advisers Inc., a wholly owned subsidiary of Grubb & Ellis Co., one of the nation's largest real estate services firms.

#90204b0677 07/23/1990 ~Business Wire

PALO ALTO, CA (JULY 23) BUSINESS WIRE - Varian Associates Inc. (NYSE:VAR) Monday reported earnings from continuing operations of $13.0 million (67 cents per share) for the third quarter of 1990, prior to an after-tax restructuring charge of $31.9 million ($1.65 per share) for steps announced in May to refocus the company's activities.

After the charge, Varian had a third-quarter 1990 loss from continuing operations of $18.9 million (98 cents per share).

Earnings from continuing operations for the year-ago period were $9.0 million (44 cents per share).

In addition, the company took an aftertax charge of $15.2 million (78 cents per share) for discontinued operations to exit several non-core businesses in the 1990 quarter. As a result, Varian reported a net loss of $34.1 million ($1.76 per share) for the period.

Sales from continuing operations for the quarter were up 13 percent to $344 million from 1989's $304 million. Third-quarter orders rose to $330 million, up 14 percent from the prior year's $290 million. Order backlog at the end of the first nine months remained strong at just over $750 million.

For the first nine months of fiscal 1990, Varian had a loss from continuing operations of $2.0 million (10 cents per share), including the third-quarter restructuring charge of $31.9 million ($1.65 per share), vs. 1989 earnings of $31.6 million ($1.52 per share).

Net losses after the charge for discontinued operations were $18.7 million (96 cents per share). Sales for the period totaled $926 million versus 1989's $886 million. Orders amounted to $944 million compared to the year-ago's $909 million.

Nine-month sales and orders for Varian's continuing Electron Device operations rose modestly from the prior year's levels, due to a large order for radar equipment for the U.S. Navy and slightly better commercial volume.

Varian's Instrument business had higher sales and orders for the year-to-date, reflecting good international volume and improved demand in the United States. Operating profit before restructuring remained similar to 1989's first nine months, which included higher than usual royalty income.

NEW YORK (JULY 23) BUSINESS WIRE - Time Warner Inc. announced record second-quarter and record first-half 1990 earnings before interest, taxes, depreciation and amortization (EBITDA) of $536 million and $1.072 billion, respectively.

Due primarily to interest expense and the accounting treatment for the amortization of the purchase cost related to the acquisition of Warner Communications Inc. (WCI), Time Warner reported a second-quarter net loss of $51 million, or $3.29 per share after preferred dividends, on revenues of $2.585 billion. For the six months ended June 30, 1990, Time Warner reported a net loss of $102 million, or $6.54 per share after preferred dividends, on revenues of $5.326 billion.

In the financial results released today, Time Warner presented comparative 1989 figures on a historical and a pro forma basis. The following discussion assumes the pro forma purchase of 100 percent of WCI as of January 1, 1989. For the quarter ended June 30, 1990, total EBITDA of the company's operating units increased to $536 million compared with $519 million for the same period last year. For the first six months, total EBITDA increased to $1.072 billion compared with $980 million a year ago.

SOUTHBOROUGH, MA (JULY 23) BUSINESS WIRE - AT&T Transaction Services, Lincroft, N.J., has selected Bytex UNITY 10 matrix switches to be used to control and monitor remote sites within its expanding distributed transaction processing network.

The network provides nationwide credit card authorization and related business services and can be tailored to a broad range of requirements for companies in the elctronic payments business.

One of the major selling points of AT&T's service is its 24 hour, 365 day availability. With UNITY 10 systems installed at remote locations, AT&T Transaction Services' network personnel can spare a broad range of equipment in the event failures occur and monitor all circuits in real time from a central site. Without the matrix switches, this level of network availability could not be offered at an attractive price.

''We are using the UNITY 10 systems to enhance our capabilities to switch over and monitor communications lines between our network processors to maximize network availability,'' says Priscilla Cronin, AT&T Transaction Services product manager.

''Network management software also provides the flexibility to manage and control network operations according to specific customer applications.''

This AT&T network represents the largest application to date for Bytex pioneering Remote Center Management products, and is indicative of how major corporations are using Bytex network management and control solutions to keep their networks available.

Bytex designs, manufactures, markets and supports fault-tolerant electronic matrix switching systems and related data communications products. Bytex is the leading worldwide supplier with an installed base of more than 4,000 switches.

According to International Data Corp., Bytex has approximately 36 percent of the U.S. market and 32 percent worldwide. Bytex is traded on the NASDAQ National Market System under the symbol BYTX.

#90204b0682 07/23/1990 ~Business Wire

STAMFORD, CT (JULY 23) BUSINESS WIRE - American Television and Communications Corp. (NASDAQ:ATCMA), the nation's second largest cable television operator, reported record results for the second quarter of 1990 because of continued strong performance by its operating divisions.

Revenues for the three months ended June 30 were $275.3 million, a 14.7 percent increase compared with the second quarter 1989 revenues of 240.1 million. Net income for this year's second quarter rose 16.1 percent to $28.4 million, or 26 cents per share, compared with $24.5 million, or 22 cents per share, for the same period last year.

Operating cash flow (operating income before depreciation and amortization) for the second quarter was $126 million, up 19.3 percent from $105.6 million recorded for the second quarter of 1989. Operating cash flow margin (operating cash flow as a percentage of revenues) reached 45.8 percent, up from 44 percent for last year's second quarter. Operating income of $75.2 million was 18.2 percent higher than the $63.6 million recorded for the same period a year ago.

Depreciation and amortization expense rose in the second quarter and first half of 1990 over the same periods last year. The increase came largely as a result of the third quarter 1989 acquisition of 14 central Florida cable television systems from Centel Cable.

Interest expense increased primarily because of higher levels of average debt outstanding stemming from the Central acquisition.

Equity in losses of affiliates increased to $6.5 million for the second quarter of 1990 compared with $5.3 million in the same period a year ago, despite improved operating results for ATC's cable affiliates. The increase came principally from higher losses in ATC's non-cable affiliates.

Revenues for the first six months of 1990 were $541.8 million, a 14.6 percent increase compared with the first half of 1989 revenues of $472.8 million. Net income for this year's first half rose 22.8 percent to $55.2 million, or 50 cents per share, compared with $44.9 million, or 41 cents per share, for the same period a year ago.

Operating cash flow for the first six months was $246.4 million, up 19.7 percent from $205.8 million recorded for the first six months of 1989. Operating cash flow margin reached 45.5 percent, up from 43.5 percent for the same period last year. Operating income rose to $145.8 million for the first half of 1990, a 19.3 percent increase from $122.2 million during the first six months of last year.

ATC, an 82 percent-owned subsidiary of Time Warner Inc., owns or manages cable television operations serving approximately 4.5 million basic cable customers with 3.21 million premium subscriptions in 33 states and is a unit of the Time Warner Cable Group.

#90204b0683 07/23/1990 ~Business Wire

FORT LAUDERDALE, FL (JULY 23) BUSINESS WIRE - Record revenue and earnings for the second quarter of 1990 were reported Monday by BLOCKBUSTER Entertainment Corp. (NYSE:BV), the world's largest video retailer.

This is the company's 14th consecutive profitable quarter.

Revenue for the three months ended June 30, 1990 was $148,977,000, a 68 percent increase over the $88,719,000 reported for the similar period in 1989. Systemwide revenue for the second quarter of 1990 was $267,179,000, for an increase of 99 percent over the $134,349,000 generated during the like three-month period in 1989.

Net income increased 84 percent to $14,840,000 from the $8,054,000 recorded during the quarter ended June 30, 1989.

Earnings per share for the three-month period ended June 30, 1990 were 19 cents, a 90 percent increase over the 10 cents reported for the comparable three-month period in 1989.

For the six-month period ended June 30, 1990, BLOCKBUSTER Co. revenue totaled $288,127,000, a 74 percent increase over the $165,728,000 reported for the first two quarters of 1989. Systemwide revenue for the six-month period ended June 30,1990 was $514,154,000, an increase of 97 percent over the $261,062,000 for the comparable period in 1989.

Net income for the first half of 1990 was $28,289,000, an 83 percent increase over the $15,443,000 reported for the six-month period ended June 30, 1989.

The first half of 1990 saw earnings per share of 35 cents compared to 20 cents for the like period a year earlier, an increase of 75 percent.

H. Wayne Huizenga, chairman and chief executive officer of BLOCKBUSTER Entertainment Corp., said: ''We are pleased with the results of the quarter and for the first six months of 1990 because they indicate that the goals we have set for the year are within our reach and our expected growth for the year is on track.''

In another development, Zev Bufman, sports and entertainment impresario and BLOCKBUSTER have formed a joint venture, Amphitheater Entertainment Corp., for the development of BLOCKBUSTER amphitheaters in Phoenix and Charlotte, N.C. Construction began in March on the first project, a publicly-financed $12,750,000 facility in Phoenix, which is due to open in November.

In September, the joint venture will break ground for a $12,500,000 amphitheater in Charlotte which will open in the Spring of 1991. BLOCKBUSTER will be arranging third-party financing for the Charlotte project. In addition, the venture is currently evaluating other sites.

The joint venture will be managed by Bufman, its president and chief executive officer, who is a prominent Broadway, London and national tour producer. Bufman has mounted over 100 productions, while garnering 27 Tony Award nominations.

BLOCKBUSTER Monday also announced the recent acquisitions with stock of Applause Video Inc. of Omaha, Neb., from video industry veterans Allan Caplan and Bruce Shackman, and Video Express Inc. of Kansas City, Mo., owned by Don Cahail, an Applause franchise owner.

The company also acquired Movie Emporium in Orlando, Fla., and certain franchise operations in Arizona, California and Texas.

As of June 30, there were 1,300 stores in the BLOCKBUSTER system, of which 632 were company-owned and 668 were franchise-owned. The BLOCKBUSTER system currently operates in 43 states, the District of Columbia, Guam, Puerto Rico, Canada and the United Kingdom.

Attached is a summary of earnings for the second quarter and first six-month periods of 1990 and 1989.

MARLBORO, MA (JULY 23) BUSINESS WIRE - Stratus Computer Inc. Monday reported that revenue for the second quarter ended July 1, 1990 totalled $94.1 million, up 13 percent from $83.3 million in the previous year's second quarter.

Earnings and earnings per share for the second quarter of 1990 were $7.1 million and 34 cents, respectively, compared to $9.0 million and 43 cents for the previous year's second quarter.

Revenues for the first six months ended July 1, 1990 were $181.2 million, 14 percent higher than the $159.5 million Stratus reported for the first six months of 1989. Earnings and earnings per share for the period were $13.8 million and 66 cents, respectively, compared to $16.8 million and 81 cents for the same period a year ago.

At the beginning of the quarter Stratus introduced a new generation of products, 13 in all, reaffirming the company's position as the provider of the broadest range of fault-tolerant systems -- computers specifically designed for critical online business applications. The new products included the company's first mainframe-class systems, which make the company more competitive with other large-system vendors and open new and broader sales opportunities.

The company signed a reseller agreement with Ericsson, a worldwide leader in telecommunications systems and networks, headquartered in Stockholm, Sweden. Under the terms of this long-term, worldwide agreement, Stratus XA2000 Continuous Processing Systems running the UNIX operating system will be included in Ericcson's network operation system, TMOS.

Ericsson is marketing the system as a core product offering for the worldwide public telecommunications market in the 1990s. The agreement is a milestone in Stratus' entry into the UNIX marketplace and positions the company for future revenue growth in telecommunications industry, one of the most promising markets for fault-tolerant systems.

During the quarter, Stratus also announced that it has established relationships and distributors in Saudi Arabia, Turkey, and Greece. In addition to large OEMs/resellers and its direct sales force, Stratus now has 10 international distributors, covering the globe.

Stratus Computer Inc., is a leading supplier of fault-tolerant systems for critical online applications, such as online transaction processing and online data communication and telecommunication applications.

#90204b0688 07/23/1990 ~Business Wire

DAYTON, OH (JULY 23) BUSINESS WIRE - Philips Industries Inc. Monday announced that net earnings for its first quarter ended June 30, 1990, were $13.1 million or 46 cents per share vs. last year's $15.6 million or 54 cents per share.

Sales for the quarter ended June 30, 1990, of $247.2 million were 3 percent less than last year.

Joseph W. Deering, president and chief executive officer, stated, ''The company's markets were generally weak, but most major operating units maintained or improved their profitability. The recently announced

organizational restructurings are being implemented as planned and, although there was no significant impact on earnings in this quarter, these changes should favorably affect the company's earnings in the future.''

He further stated, ''Despite the weak market conditions, sales for the quarter were second only to last year's record first quarter. Shelter Products, Lasco, and Air Distribution Group sales were comparable to or ahead of last year. Except for Mid-West and Shelby Wheel, Industrial Components and Transportation Group sales were also comparable to or ahead of last year. Sales at Mid-West were down by $13 million, however, backlog for this division increased by $47 million during the quarter to a level $27 million greater than last year.''

The company also announced that the board of directors declared a regular quarterly dividend of 15 cents per share on the company's common stock, payable Aug. 29, 1990, to shareholders of record on Aug. 8, 1990.

A special meeting of shareholders of Philips to vote on the proposed merger of Philips with a subsidiary of Tomkins PLC is expected to be held in mid-August 1990. Philips announced that the special meeting and therefore the effective date of the merger, if all conditions to its closing are satisfied or waived, will be after Aug. 8, 1990. Accordingly, the common dividend will be paid to shareholders of record on Aug. 8, 1990.

Philips Industries is a leading manufacturer of components for the building and transportation industries and is a leading supplier of material handling components and systems for a broad range of manufacturing and distribution applications. The company is listed on the New York Stock Exchange under the ticker symbol PHL.

FORT MYERS, FL (JULY 23) BUSINESS WIRE - First Federal Savings and Loan Association of Fort Myers announced Monday that the board of directors declared a quarterly cash dividend of 15 cents per share payable on Aug. 13 to stockholders of record on Aug. 3.

In a news release dated July 11, First Federal reported net earnings for the quarter ended June 30, were $1.4 million or 45 cents per share compared to $1.8 million or 57 cents for the quarter ended June 30, 1989. The Association reported that the lower earnings was a result of a decrease in net interest income.

For the nine-month period ended June 30, net earnings were $5.1 million or $1.62 per share compared to $4.5 million or $1.45 per share for the like period one year ago. This increase resulted primarily from a gain from the disposition of a mortgage-backed bond in December 1989, which more than off set a decrease in net interest income.

First Federal serves Southwest and Central Florida through its 24 offices and reported assets at June 30, of $896 million dollars. The shares of common stock of the Association are traded in the over-the-counter market and quoted through the NASDAQ National Market System under the symbol ''FFMY.''

DAKOTA CITY, NE (JULY 23) BUSINESS WIRE - Increased sales and earnings marked IBP's (NYSE: IBP) financial performance during the second quarter of 1990, IBP Chairman Robert L. Peterson announced Monday.

Sales for the period, which ended June 30, totaled $2.6 billion, up from the $2.3 billion recorded in 1989. Income from operations was $37 million compared to the $27 million realized last year.

Net earnings for the second quarter were $15.8 million or 34 cents per share. That compares to $8.6 million or 18 cents per share in 1989.

''Continued strong consumer demand for both beef and pork led to the improvement in margins,'' according to Peterson. ''A reduction in live cattle prices during the quarter was also a factor, however, livestock prices remain high, especially on the pork side.''

Peterson added that: ''Our quarterly results are especially pleasing, given we began operations at our newest and largest pork plant during the second quarter.'' IBP's new pork complex at Waterloo, Iowa opened May 3. ''It's progressing well,'' he said. ''In fact, the initial phase of the plant startup was one of the best ever experienced by our growing pork division.''

Sales for the first six months of fiscal 1990 totaled $5.0 billion, up from $4.6 billion last year. Net income for the first six months was $20.2 million, or 43 cents per share, compared to net income of $9.9 million, or 21 cents per share in 1989. Income from operations for the first half of 1990 was $54.9 million compared to $41.1 million in 1989.

Income from operations and net earnings continue to be adversely affected by the results of amortizing amounts paid by Occidental Petroleum in excess of book value when it purchased IBP in 1981. Six months results were reduced by approximately $5.5 million, or 12 cents per share.

IBP is the world's largest producer of fresh beef and pork, employing 24,000 people nationwide and overseas.

#90204b0699 07/23/1990 ~Business Wire

NEW CASTLE, IN (JULY 23) BUSINESS WIRE - Ameriana Bancorp (NASDAQ/NMS: ASBI), the holding company for Ameriana Savings Bank, Monday announced a 20 percent increase in net income and a 17 percent increase in earnings per share for the second quarter of 1990, compared with the same period last year.

Other highlights of the quarter included higher total assets, loans outstanding and mortgage-backed securities, and deposits, compared with both the preceding quarter and year-earlier amounts.

Net interest income for the quarter ended June 30, 1990, rose four percent to $2,369,000 compared with $2,281,000 in the same quarter last year. Net income totaled $651,000 or 34 cents per share compared with earnings of $543,000 or 29 cents per share in the second quarter of 1989, representing an increase in net income and earnings per share of 20 percent and 17 percent, respectively.

For the first half of 1990, Ameriana posted a three percent increase in net interest income to $4,606,000. Earnings for the six-month period rose 21 percent to $1,285,000 or 68 cents per share.

Paul W. Prior, chairman of the board, noted that Ameriana's higher earnings for the quarter reflected continued improvement in its net interest spread and lower operating expenses compared with the 1989 periods. "We are indeed encouraged by the continued strength of our core banking operations, which have demonstrated steady improvement for several quarters," said Prior.

"Our growth has been particularly significant in that it has occurred at the same time we have placed greater emphasis on expense control to

improve overall profitability."

Prior pointed out that Ameriana's provision for loan losses remained at a traditionally low amount for the quarter, reflecting Ameriana's conservative lending policies. "Recently the Office of Thrift Supervision completed its periodic review of Ameriana's lending operations and loan portfolio," Prior remarked.

"Their comments to us were to the effect that our loss reserves were adequate and no adjustments were considered necessary. We believe this affirms the high quality of Ameriana's assets."

Ameriana Bancorp, through its wholly owned subsidiary, Ameriana Savings Bank, offers an extensive line of banking services to the east central Indiana area through offices in New Castle, Knightstown, Middletown and Greenfield.

#90204b0702 07/23/1990 ~Business Wire

WASHINGTON (JULY 23) BUSINESS WIRE - The Communications Satellite Corp. (COMSAT) Monday announced that consolidated net income for the quarter ending June 30, 1990 was $18.7 million or $1.00 per primary share, an increase of $1 cent over the second quarter of 1989.

Revenues for the 1990 second quarter were $116.8 million, an increase of $14.0 million from the second quarter of 1989. Operating income was $26.4 million, compared to $27.4 million for the same quarter of 1989.

All business segments with the exception of Video Entertainment continued to record good revenue growth. Video Entertainment's uanticipated revenues decline resulted largely from a problem, which has since been corrected, in newly installed software programming that operates its hotel pay-per-view television system, partially offset by price increases instituted during the first quarter.

Operating income was higher for the International and Systems businesses. International revenue growth was partially offset by depreciation expense associated with the launch of the new Intelsat Satellite series. Video Entertainment's higher operating loss resulted from the decline in revenues and higher expenses, including expenses related to the expansion of this business.

COMSAT also announced the declaration of a regular quarterly dividend of 33 cents per share, payable Monday, Sept. 10, 1990 to shareholders of record Friday, Aug. 10, 1990.

This dividend is the 80th consecutive quarterly dividend declared by the corporation to its shareholders.

COMSAT is a publicly traded corporation which provides international, domestic and maritime communication and information and entertainment services and conducts research on advanced communications techniques. COMSAT represents the U.S. in the International Telelcommunications Satellite Organization (INTELSAT) and the International Maritime Satellite Organization (INMARSAT).

#90204b0711 07/23/1990 ~Business Wire

RICHARDSON, TX (JULY 23) BUSINESS WIRE - Convex Computer Corp. (NYSE:CNX) Monday announced record revenues and profits for the second quarter ended June 30.

The company reported revenue of $51.9 million, an increase of 39 percent from the second quarter of 1989 and up seven percent from the first quarter of 1990. Profit performance continues to be strong with the company reporting net profits of $4.4 million for the quarter, or 22 cents per share. This represents a 69 percent increase from the second quarter 1989 net of $2.4 million, or 13 cents per share.

The second quarter results mark the company's 23rd quarter of uninterrupted growth in revenues. This growth was fueled primarily be record demand for Convex C2 Series supercomputers which accounted for 39 of the 41 systems shipped in the quarter. Nearly 700 Convex systems are now owned by more than 400 customers worldwide.

Also during the quarter, Convex continued adding UNIX-based software applications to its comprehensive library. Since the beginning of the year, more than 200 applications have been ported to Convex supercomputers bringing the total number available to more than 600.

International sales increased compared to the first quarter and accounted for 50 percent of total revenues. Several sales during the quarter illustrate the breadth of applications for which the company's customers use Convex supercomputers.

The Alfred Wegener Institute, a German government research institution, uses a Convex system on board an ocean-going vessel, the Polarstern, to conduct polar oceanographic studies. In France, GEC-Alsthom installed a

C220 supercomputer to help design the next generation of ''bullet'' or very high-speed trains.

At Merlin-Gerin, a subsidiary of a leading French electronics manufacturer a Convex C230 is used as a central resource for mechanical, electromagnetic, thermal engineering, and fluid dynamics research.

As a result of the marketing and sales agreement with Control Data Corporation (CDC) in 1989, market penetration increased in both the United States and Europe. During the quarter, CDC installed four Convex systems in the United States, Germany and Sweden.

Convex Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market, and service high performance systems.

#90204b0714 07/23/1990 ~Business Wire

SALISBURY, N.C. (JULY 23) BUSINESS WIRE - Omni Capital Group Inc. (NASDAQ: OCGI) Monday announced financial results for the fourth quarter and the fiscal year ended June 30, 1990

For the three months ended June 30, net income was $1,309,000, or 52 cents per share, an increase of 38 percent over 1989 fourth quarter results of $948,000 after adjusting 1989 net income for a pre-merger write down of an investment at Home Federal-Kings Mountain. The write down resulted in a $940,000 after tax charge to operations for the three months ended June 30 1989.

For the fiscal year ended June 30, 1990 net income rose 43 percent to $4,784,000, or $1.91 per share, compared with net income of $3,334,000, or $1.34 per share, reported for fiscal 1989. Net income per share for fiscal 1989 has been retroactively adjusted to reflect the 50 percent stock dividend declared in July 1989.

At June 30, total assets were $530,525,000 (an increase of 4.6 percent over 1989), net loans and mortgage-backed securities were $469,606,000 (an increase of 5.6 percent over 1989), and deposit accounts were $449,221,000 (an increase of 5.3 percent over 1989). Stockholders' equity was $54,688,000, or 10.3 percent of total assets, as of June 30.

Omni's asset quality remained extremely high, with non-performing assets amounting to less than four tenths of one percent (0.4 percent) at June 30.

Jordan also announced that on July 16, the board of directors of Omni declared a quarterly cash dividend of 7 cents per share payable on Aug. 13 to stockholders of record at the close of business on April 30.

Omni Capital Group Inc. is a multi-thrift holding company headquartered in Salisbury, with three wholly owned subsidiaries: Home Federal Savings Bank of Salisbury, Citizens Savings, FSB of Concord, and Home Federal Savings Bank of Kings Mountain.

On July 18, 1989, the board of directors of Omni declared a 3-for-2 stock split of common stock effected in the form of a 50 percent stock dividend. Accordingly, net income per share has been retroactively adjusted to reflect the split.

MERRIMACK, NH (JULY 23) BUSINESS WIRE - Chemical Fabric Corp. (CHEMFAB) (OTC:CMFB) Monday announced that it has entered into an agreement with the Wire and Cable Group of Du Pont to jointly develop new aircraft wire insulation materials comprised of Du Pont's polyimide films and Chemfab's fluoropolymer claddings and films.

The joint development effort is intended to lead to the offering of a new generation of high-performance airframe wire insulation systems to the aircraft industry.

Commenting on the agreement, Duane C. Montopoli, Chemfab's president and chief executive officer, stated that ''We are extremely pleased to have the opportunity to work with Du Pont in this area.

''Today's commercial jetliners require smaller and lighter weight wire constructions that nevertheless exhibit outstanding performance properties.

''Chemfab and Du Pont, working together, are ideally suited to meet this challenge by developing new wire insulation materials and systems which provide an optimum balance of key performance properties such as temperature rating, abrasion and cut-through protection, arc-track resistance and solvent resistance.''

Commenting further, Montopoli stated that ''The market opportunity for high-performance wire insulation materials is substantial considering that each new comerical jetliner requires more than one million linear feet of airframe wire, and approximately ten thousand new jetliners are forecasted

to be purchased worldwide through the turn of the century.

Chemfab is an international advanced performance materials company that designs, manufactures and markets flexible composite products intended for use in extreme environments. Typical products consist of woven fiberglass or other high-strength reinforcements coated or laminated with thermoplastics and elastomers, and specialty fluoropolymer films.

Worldwide end-use applications are in industrial, architectural, communications, military and protective clothing markets.

NEW YORK (JULY 23) BUSINESS WIRE - General American Investors Co. Inc., a publicly traded investment fund listed on the New York Stock Exchange (GAM), Monday reported total net assets as of June 30, of $443,488,206, as compared with net assets of $381,932,574 at Dec. 31, 1989, and $340,964,785 at June 30, 1989.

The figure for June 30, is after deductions of $11,619,317, representing the portion of the 1989 year-end dividends paid in cash on Dec. 27, 1989, and $1,962,732, representing the 1989 spill-over dividends paid in cash on Feb. 6.

Net asset value per share of common stock at June 30, 1990, was $25.05, as compared with $21.30 per share at Dec. 31, 1989, adjusted to reflect a deduction for the dividends paid in February, and with $19.80 per share at

June 30, 1989.

During the six months ended June 30, 139,900 shares of the company's common stock were purchased at an average discount from net asset value of 16.3 percent for $2,572,468 and are in the Treasury.

The company reported that it had made new commitments during the second quarter in Gitano Group and Transatlantic Holdings. In addition, it had increased its holdings in American International Group, Applied Bioscience International, Barnett Banks, Chili's, Ford and Manpower PLC.

The holdings of Baldwin Technology, Fisons PLC, Measurex, Premier Industrial and Rouse were eliminated, while reductions were made in the holdings of Bristol-Myers Squibb, McDonald's and Wal-Mart Stores.

The largest stock holdings in the company's portfolio at June 30 included Wal-Mart Stores Inc., The Home Depot Inc., Toys R Us Inc., The Limited Inc. and American International Group Inc. T

DALLAS (JULY 23) BUSINESS WIRE - Northern Telecom (NYSE:NT) has joined Project Bluebonnet, a statewide consortium for research and development of advanced educational communications and computing systems.

''We're pleased to be part of Project Bluebonnet,'' said Jim Brown, vice president, marketing, Southwest region, Northern Telecom Inc.

''Northern Telecom has a great deal of expertise to offer in advanced networking solutions for education, particularly in the areas of digital switching and fiber-optic technology.''

''Northern Telcom's ability to deliver education programs via advanced telecommunications complements our research initiatives quite well,'' said Bob Bell, president, Project Bluebonnet.

Northern Telecom, with 2,300 employees and two major operating groups located in the Dallas area, becomes the 35th member of Project Bluebonnet, and the 10th to join since March of this year. Member organizations include universities, research organizations, government agencies, associations, high technology companies and private firms.

''The diverse and competent membership we have attracted to date validates our vision to create a holistic research team to effectively generate more

advanced telecomputing systems,'' said Bell.

Northern Telecom is already assisting the Texas Association of School Boards (TASB) and other member organizations in the definition of ''SchooLINC,'' Project Bluebonnet's first major undertaking. SchooLINC is a pilot telecommunications network for remote, interactive curriculum delivery.

''SchooLINC will be a showcase for distance learning -- the first, digital fully interactive network of its king in Texas,'' said Brown. ''Northern Telecom will assist the participating business and education partners in systematically researching, analyzing and implementing the entire network.''

Northern Telecom is involved in similar projects in several states, including Mississippi, Oklahoma and Minnesota.

''Distance learning networks are a good example of how telecommunications can help improve the quality of education for students, and the quality of the educational environment for teaching professionals,'' said Brown.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

Project Bluebonnet is a nonprofit education and research corporation founded to enhance the economic competitiveness of Texas through leading-edge communications and computing.

#90204b0737 07/23/1990 ~Business Wire

DEERFIELD, IL (JULY 23) BUSINESS WIRE - Baxter (NYSE:BAX) Monday reported second-quarter sales of $2.0 billion, an 8 percent increase over the 1989 second quarter.

Operating income increased 28 percent to $241 million. Net income and earnings per common share increased 6 percent to $110 million and 37 cents. Net income and earnings per common share for the second quarter

of 1989 of $104 million and 35 cents included substantial gains from divestitures.

''Our performance this quarter was excellent,'' said Vernon R. Loucks Jr., chairman and chief executive officer. ''The strong improvement in operating income is the result of increased sales, a higher gross profit rate and continued leveraging of operating expenses.

''The improved gross profit rate reflects increasing efficiency in manufacturing and improved pricing on selected products. These results are consistent with our projection for at least a 15 percent increase in operating income for the full year, excluding our restructuring program costs.''

Sales for the first six months of 1990 were $3.9 billion. The company reported a net loss for this period of $273 million or $1.22 per common share. This loss resulted from a pre-tax provision of $566 million to cover the cost of the company's previously announced restructuring program. Sales, net income and earnings per common share for the first six months of 1989 were $3.6 billion, $205 million and 69 cents.

Domestic sales for the second quarter were approximately $1.5 billion; sales from international markets were $486 million. For the first six months, domestic sales were approximately $3.0 billion and international sales were $918 million. International sales growth in local currency was approximately 12.5 percent for the quarter and 13 percent for the first six months.

Baxter International Inc. is the leading worldwide manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries.

DALLAS (JULY 23) BUSINESS WIRE - Capstead Mortgage Corp. (NYSE:CMO) announced today earnings of $7,290,000, or 59 cents per share (54 cents per fully diluted share), for the quarter ended June 30, 1990, as compared to $4,603,000, or 53 cents per share, for the same quarter in 1989.

Net income for the six months ended June 30, 1990, was $14,618,000, or $1.18 per share ($1.07 per fully diluted share), as compared to $8,970,000 or $1.03 per share, for the same period in 1989.

The company has qualified as a real estate investment trust by

distributing at least 95 percent of its net income in the form of dividends to its stockholders. On June 29, 1990, a dividend of 57 cents per common share and 40 cents per share on the $1.60 cumulative preferred stock, Series A was distributed by the company to its stockholders.

Subsequent to the end of the quarter the company increased its line of credit to $90 million with the addition of one commercial bank for $15 million.

Capstead Mortgage Corp. invests in long-term, single-family residential mortgages for the purpose of offering investors the opportunity to participate in the income generated from the management of a portfolio of mortgage loans utilizing pooling and the issuance of collateralized mortgage obligations and other portfolio management strategies.

It is managed by Capstead Advisers, a subsidiary of Lomas Mortgage USA. The comparative results of operations are as follows (in thousands, except per share amounts):

	Quarter Ended June 30		Six Months Ended June 30		
	1990	1989	1990	1989

ATLANTIC CITY, NJ (JULY 23) BUSINESS WIRE - Resorts International Inc. and its subsidiaries Monday announced that their note and debenture holders have voted by an overwhelming margin to accept the company's proposed plan of reorganization.

The plan, which covers holders of notes and debentures issued by Resorts International Inc. (RII), Griffin Resorts Inc. (GRI), and Resorts International Financing Inc. (RIFI), was approved by percentages far in excess of the Bankruptcy Code requirement of a majority of holders of each class, representing over two-thirds of the principal amount of each class.

It was approved by 89.8 percent of the RII holders and general unsecured creditors voting on the plan, representing 93.6 percent of the principal amount of those securities which were voted; 98.4 percent of GRI Mortgage Noteholders voting on the plan, representing 99.9 percent of the principal amount of those securities which were voted; 89.4 percent of GRI Reset Noteholders voting on the plan, representing 99.8 percent of the principal amount of those securities which were voted; and 90 percent of RIFI Debenture Holders voting on the plan, representing 98.5 percent of the principal amount to those securities which were voted.

''Now that our bondholders have approved our plan, we are looking forward to obtaining the court's approval,'' said David Hanlon, president of Resorts International Inc. ''Our reorganization should be complete by the end of the summer, and we will focus all of our energy on making Resorts the finest resort, and the best investment, it can be.''

The remaining steps in the reorganization process include confirmation of the Plan by the Bankruptcy Court and receipt of any necessary regulatory approvals by the New Jersey Casino Control Commission and regulatory officials of the Government of the Bahamas. A confirmation hearing, at which Resorts will officially file the results of the vote, is scheduled for July 24 in the U.S. Bankruptcy Court in Camden, N.J.

LOS ANGELES (JULY 23) BUSINESS WIRE - Mobil Oil Corporation and EDS, owner and operator of the Instant Teller Network, announced today the signing of an agreement that will give Instant Teller's two million ATM (automated teller machine) cardholders access to Mobil's nationwide debit card network.

''The real news of this agreement is the savings and convenience for our customers,'' says R.J. McCool, Mobil's vice president for U.S. Marketing. ''We are pleased that more of our customers will now be able to enjoy the convenience of plastic and also receive the Discount for Cash on gasoline purchases. Debit cards are safe, fast and easy to use. They're especially attractive because you don't have to use up your available cash to make a gasoline purchase.''

''EDS views this agreement as an opportunity to provide added benefits and services to our Instant Teller cardholders,'' says Neil Marcous, vice president of EDS' Payment Services Division. ''Using an ATM card for gas purchases is more convenient than paying cash. The transaction is similar

to a cash withdrawal, in that the funds are automatically transferred from the cardholder's checking account at the time of the sale, and every transaction is detailed on the customer's monthly bank statement.''

The agreement marks a significant addition to Mobil's six-year-old POS (point-of-sale) debit card network. The Mobil system continues to be the largest retail debit card network in the nation with a total cardholder base now exceeding 60 million.

EDS' Instant Teller Network is a regional network serving more than 400 financial institutions in eight western states. EDS, which is based in Dallas and has operations in 27 countries, is the leader in providing information technology services to customers around the world.

Debit cards are accepted at 5,200 Mobil stations in 24 states. Participating Mobil stations may be identified by their green CardOption Network signs.

BOSTON (JULY 23) BUSINESS WIRE - Boston Security Counsellors Inc., a subsidiary of The Advest Group Inc., announced the filing with the SEC of a registration statement for a new mutual fund, the Scottish Widows International Fund.

The Scottish Widows International Fund has been established to allow American investors to participate in the international equity markets (outside the United States and Canada) through a professionally-managed investment vehicle. Its objective is long-term capital appreciation.

Investment advice concerning the Fund's portfolio will be furnished by Scottish Widows Investment Management Limited, a subsidiary of Scottish Widows' Fund and Life Assurance Society of Edinburgh, Scotland. Scottish Widows was founded in 1815 and is today a major international mutual and pension fund manager with over $20 billion in assets under management.

The Scottish Widows International Fund is the first mutual fund to offer American investors the opportunity to take advantage of that experience and expertise.

The initial offering of Scottish Widows International Fund will extend

until Sept. 21, 1990. The fund will then be closed until March 1991, during which time only investors from the initial offering period may buy or sell shares. The Fund will reopen on a continous basis in March 1991.

TORONTO (JULY 23) BUSINESS WIRE - Andersen Consulting and the Ontario Ministry of Consumer and Commercial Relations (MCCR) Monday announced a multi-year $7 million full systems-integration effort to develop an optical imaging system to capture the province's over 10 million vital statistical records.

Andersen Consulting, as the systems integrator, will be responsible for the information plan, technical architecture design, hardware selection and acquisition, system software installation, custom software development communications network and training.

Currently, the Ministry's Office of the Regitrar General stores over 18 miilion birth registrations, marriage licenses, name change forms and death registrations in thousands of bound volumes at its Toronto headquarters.

Andersen Consulting has taken the lead role in more than 150 advanced imaging projects. ''At first glance imaging appears rather elegant, clearly offering benefits that other technologies cannot, but organizations must understand all of the implications to ensure that the advantages clearly outweigh the investment in technology.

Andersen Consulting, a leader in the installation of advanced-imaging systems in the commercial marketplace, develops document-imaging applications for banking, insurance, transportation, utilities, government healthcare, pharmaceuticals, and manufacturing. Andersen Consulting evaluates, designs and implements imaging solutions for difficult business problems using its imaging methodology - IMAGE/1.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954, when it installed the first computer application for commercial use. The firm helps clients use information in all phases of their management activities - strategic, industry, operations and financial. The organization's worldwide client base has access to more than 18,000 consulting professionals serving clients through 157 offices in 45 countries. Andersen Consulting is a business unit of the Arthur Andersen Worldwide Organization.

BLUE BELL, PA (JULY 23) BUSINESS WIRE - Unisys Corp. Monday announced the availability of new mainframe computers that offer users of its A Series and 1100/2200 systems significantly greater performance and resiliency than current models, yet require as little as 40 percent of the energy to operate.

These Unisys mainframes include three new series, the A16, the 2200/600 Evolutionary System (ES), and the 2200/100, as well as four new models in the existing A12 series. According to Dennis Kosinski, vice president of Mainframe Program Management in the Unisys Computer Systems Products Group the A16 and the 2200/600ES raise the industry's standard for mainframe reliability.

All of the new Unisys mainframe systems are object-code compatible with all other systems in their respective architectures. Applications developed for any current model of an A Series or 1100/2200 Series system can be run without modification on these new systems. No other mainframe systems vendor offers the conversion-free range of processing power offered by Unisys Corp.

#90204b0766 07/23/1990 ~Business Wire

DALLAS (JULY 23) BUSINESS WIRE - DSC Communications Corp. (NASDAQ:DIGI) announced Monday income before an extraordinary item of $8.9 million, or 21 cents per share, for the three months ended June 30, 1990, compared to $8.1 million, or 19 cents per share, for the second quarter of 1989.

Revenue grew 18 percent to $122.6 million in the 1990 second quarter from $104 million for the same period in 1989. For the six months ended June 30, 1990, revenue and income before the extraordinary item were $237.3 million and $15.8 million, or 37 cents per share, respectively, compared to $194.1 million and $13.3 million, or 32 cents per share, respectively, for the first half of 1989.

Second quarter 1990 net income of $1.2 million, or 3 cents per share, and first half 1990 net income of $8.0 million, or 19 cents per share, are net of an extraordinary charge of $7.7 million, or 18 cents per share.

Revenue grew strongly in the quarter as demand for the company's products continued to increase. Intelligent network equipment, such as signal transfer points and digital cross-connect systems contributed to the higher volume product shipments. While margins showed improvement from the first quarter of 1990, they continue to reflect the shift in product mix to newer products which initially have lower gross margins.

The extraordinary item represents the estimated cost, net of income taxes, for the settlement of a shareholders' class action lawsuit orginally filed in 1985.

DSC chairman and chief executive officer, James L. Donald, stated that, ''We are pleased with second quarter's revenue and earnings performance. We are also encouraged by the quarter's strong bookings levels and the continued successfull diversification of both our product and customer bases.''

DSC Communications Corp. designs, develops, manufactures, markets and services digital switching, transmission and private network system products for the worldwide telecommunications industry.

WAYNE, NJ (JULY 23) BUSINESS WIRE - Worldwide Computer Services Inc. (NASDAQ:WCSI) announced Monday that revenues for the second quarter ended June 30 were $4,444,336 vs. the $4,640,547 of a year ago.

Net income of $113,303 rose 34 percent over the $84,261 last year. Earnings per share of 6 cents on 9 percent greater number of shares outstanding compares to the 5 cents of the second quarter in 1989.

For the six months ended June 30, revenues were $8,834,681 vs. $9,096,962 for the first half period last year. First half net income of $197,031 compares to $186,124. Earnings per share of 10 cents on 5 percent greater number of shares outstanding compares to 10 cents for last year's six month period.

Thomas E. Miller, president, Worldwide Computer Services Inc., stated, ''The benefits of the management restructuring initiated this year continue to be in evidence. For the last two consecutive quarters revenues, gross profit, and net income have improved steadily. Second quarter earnings were above the level of the three preceding quarters. The outlook for Worldwide's future is a promising one.''

Worldwide Computer Services Inc. specializes in supplying clients, primarily Fortune 500 companies, with temporary and on-site, computer software, and communications professionals.

CAMBRIDGE, MA (JULY 23) BUSINESS WIRE - At the company's Annual Meeting of Shareholders and product exhibition held Monday, Dynatech Corp. (NASDAQ:DYTC) announced the recent acquisition of two applied technology firms -- Qualimetrics Inc. of Sacramento, Calif. and U.S. Computer Systems Inc. of Cincinnati, Ohio.

The terms of the acquisitions were not disclosed. Dynatech also reported financial results for the first quarter of fiscal 1991.

President and Chief Executive Officer, J.P. Barger, noted at the product exhibition, which displayed products from 38 Dynatech companies: ''For more than thirty years, Dynatech has stood apart from the 'boom-bust' syndrome of many high-tech companies by focusing on a broad range of niche-oriented technology businesses. Today, we have put these businesses on display to demonstrate to our shareholders the diversity of products and technology that make up Dynatech.''

''Dynatech is committed to growing and acquiring firms in the business of collecting, analyzing, processing, and displaying information,'' added John F. Reno, executive vice president and chief operating officer. ''During the past decade, the need for this technology has led us into such growth areas as telecommunications test, video graphics, and automotive diagnostics.

Qualimetrics is a leading supplier of complete weather systems that integrate meteorological data sensing, transmission, and display functions at non-towered airports in the United States. Qualimetrics also manufactures climatological instruments which monitor such factors as

temperature, humidity, precipitation, wind speed, and cloud height.

U.S. Computer Systems manufactures and markets electronics devices used to enhance productivity in fast-food restaurants. U.S. Computer Systems' products include a wireless radio transmitter and receiver belt pack worn by restaurant workers to communicate with drive-through customers and kitchen, which enables the worker to accomplish other tasks while taking orders.

With fiscal 1990 sales of $433 million, Dynatech Corp. is a diversified supplier of high-technology products and systems used in the collection, processing, analysis, and display of information. LONDON (JULY 23) BUSINESS WIRE - Tomkins PLC (NASDAQ:TOMKY), the international industrial management company, announced Monday that its pending 325 million pound acquisition of Philips Industries Inc. has been cleared under applicable United States antitrust and national security laws.

The last remaining material condition to the transaction is obtaining the approval of Philips' shareholders at a special meeting to be held to vote on the acquisition.

Tomkins anticipates that proxy materials with respect to the special meeting will be cleared by the United States Securities and Exchange Commission and mailed to shareholders within approximately two weeks, and that the meeting will be held in mid-August. If the Philips' shareholders approve the acquisition, the acquisition will be consummated promptly following the meeting.

The Tomkins group comprises a broad range of low-risk technology companies. Its U.S. interests include Smith & Wesson Corp., Springfield, Mass, manufacturer of handguns, handcuffs and the Identi-Kit system and The Murray Ohio Manufacturing Co., Brentwood, Tenn, one of the leading U.S. producers of power lawnmowers and bicycles. Listed on the London Stock Exchange, Tomkins shares also trade on the NASDAQ National Market System under the symbol TOMKY.

LAS VEGAS (JULY 23) BUSINESS WIRE - Jackpot Enterprises Inc. (NYSE:J) announced Monday the execution of an agreement for a joint venture involving the acquisition of three video gaming device and amusement device operation and distribution businesses located in Montana.

The joint venture also intends to pursue opportunities involving the

operation of video gaming devices in a number of states west of the Mississippi where such operations are permitted or may be legalized.

The estimated initial commitment to this joint venture will be approximately $10 million.

The joint venture will initially require regulatory approval in both Nevada and Montana to consummate its plans. Jackpot hopes to obtain all necessary approvals for the joint venture to consummate the acquisition of the three Montana operations in the fall of 1990.

Effective July 23, 1990, Jackpot's 8.76 percent convertible subordinated debentures due 2014 will be listed on the New York Stock Exchange. The symbol for the debentures will by J 14.

LAS VEGAS (JULY 23) BUSINESS WIRE - Bristol Holdings Inc. (NASDAQ:BRST) announced Monday that during May 1990 the company sought and obtained the Order of the Nevada Gaming Commission terminating its registered status with the Nevada Gaming Commission.

This action was appropriate in light of the reduction of the number of shares Jackpot Enterprises Inc. held by the company. The company presently owns less than 5 percent of the outstanding stock of Jackpot Enterprises Inc. and is therefore no longer required by Nevada law to be registered with the Nevada Gaming Commission. Previous restrictions on the company that had been imposed by the Nevada Gaming Commission pertaining to the issuance of securities and its non-gaming activities by Bristol have therefore been eliminated.

Bristol is currently investigating opportunities for the acquisition of non-gaming businesses.

#90204b0799 07/23/1990 ~Business Wire

DALLAS (JULY 23) BUSINESS WIRE - Oryx Energy Co. Monday announced a net loss of $3 million, or 3 cents per share, for the quarter ended June 30, 1990, compared to net income of $17 million, or 16 cents per share, for the same quarter a year ago. Revenues for the 1990 quarter were $378

million vs. $304 million for the 1989 quarter.

''Weak oil prices during the second quarter led to lower earnings,'' said Edward W. Moneypenny, chief financial officer, at a meeting today with security analysts in New York. ''But our discretionary cash flow is still strong and our outlook for the remainder of the year is quite positive.''

In addition to weaker oil prices, the 1990 second-quarter results were negatively affected by lower domestic oil and gas volumes and the incremental interest expense associated with the company's recent overseas acquisition.

Discretionary cash flow (operating cash flow plus the cash portion of exploration expenses) for the 1990 second quarter was $146 million, up $9 million from the 1989 second-quarter level of $137 million. The company's foreign operations are included in the 1990 results and account for most of the increases in discretionary cash flow, revenues and expenses.

Net income for the six months ended June 30, 1990, was $37 million, or 35 cents per share, compared with $119 million, or $1.12 per share, for the first six months of 1989. Net income for 1989 included an $85 million cumulative benefit for changes in accounting principles.

Revenues were $847 million for the first six months of 1990 compared to $610 million for the first six months of 1989.

''Excluding the accounting changes in 1989, our earnings from operations are up by $3 million, or about 10 percent, for the first half of 1990 compared with the same period a year ago,'' continued Moneypenny. ''That performance is due largely to strong energy prices in the first quarter. The good news is that prices have begun to strengthen again.''

Discretionary cash flow for the six-month period was a strong $363 million up more than 25 percent over the $290 million reported for the first half of 1989.

Dallas-based Oryx Energy Company is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P., of which it is the managing general partner and 98-percent owner. Oryx Energy trades on the New York Stock Exchange with the symbol ''ORX'' and the partnership with the symbol ''SLP.''

NEW YORK (JULY 23) BUSINESS WIRE - ''Reaching the biggest little market in the world'' is the theme for Time Warner CityCable Advertising's first trade advertising campaign as a new entity.

Created by Frankfurt Gips Balkind, the campaign theme focuses on the ''small city'' aspects of New York, and the unique quality of the New York City cable subscriber upscale, highly educated, active and involved.

Developed to expand the national agency media buyers' and local marketers' interest in New York's cable reach, the campaign will run throughout the year in various trade and consumer publications. The ad campaign, in excess of six figures, is reported the first such campaign to directly advertise for advertisers.

According to Larry Fischer, president of Time Warner CityCable Advertising Frankfurt Gips Balkind was chosen ''based on its integrated approach to marketing, its current involvement with Time Warner, (including the innovative 1989 Time Warner Inc. annual report,) and its prior track record with a variety of national cable networks.'' As part of the sales support program, Frankfurt Gips Balkind will produce a media kit, sales promotion video, and other awareness building projects.

The Time Warner CityCable Advertising sales team now sells local advertising on five cable systems (a) in the boroughs of Manhattan, Queens and Brooklyn, all part of Time Warner's New York City Cable Group serving approximately 670,000 households. This represents 80 percent of the New York City cable universe.

#90204b0805 07/23/1990 ~Business Wire

DALLAS (JULY 23) BUSINESS WIRE - Oryx Energy Co. Monday announced the addition of 42 million net equivalent barrels (EQB) of proved reserves from its Austin Chalk program.

In 1990, 28 million EQB have been booked, supplementing the 14 million EQB recorded in 1989. To date, the company has drilled 46 horizontal wells.

The Dallas-based independent also announced a 1,700-barrel-per-day (BOPD)

discovery, the latest success in its exploratory program in the Pearsall Field.

Oryx Energy currently has seven rigs drilling in the Austin Chalk. The company had expected to drill 85 horizontal wells by year end, based on an average of one well with a lateral displacement of 2,500 feet being drilled every 30 days.

However, field experience has enabled Oryx Energy to drill longer-reach wells. The average drilling time is now 40 days, so the company has revised its year-end total down to 75 wells.

''With the longer horizontal displacements, wells can drain reservoirs more efficiently,'' said James E. McCormick, president and chief operating officer. ''Lateral displacement was less than 1,000 feet when the program began. Our newer wells can stretch out more than 4,000 feet.''

McCormick said the reserve addition is based on well performance and reservoir simulation studies. The studies postulated hyperbolic decline curves for horizontal wells as compared to straight-line declines previously supposed. ''Horizontal wells have higher initial production volumes. The hyperbolic curves show that, on a percentage basis, the production rate declines more slowly with each passing year,'' said McCormick.

Oryx Energy now owns or holds an option on some 240,000 acres in the Pearsall Field. More than 200 well locations have been identified on its acreage and the company plans to drill them over the next several years.

''The outlook for this program is much brighter than when we began. The Austin Chalk horizontal play is larger and longer lived than we had thought; we're busy looking for ways to extend it,'' continued McCormick.

McCormick added that, as a result of production from the Austin Chalk, year-end output from the recently re-opened Big Wells Gas Plant is expected to double to 2,000 barrels of processed liquid per day from 20 MMcf/D of wet gas.

The latest discovery well, the Lloyd W. Booth No. 1, flowed 1,697 BOPD and 744,000 cubic feet of gas per day through a 20/64-inch choke at a flowing tubing pressure of 490 pounds per square inch. The well has a horizontal displacement of 4,204 feet and produces through open-hole intervals between 6,165 and 10,126 feet.

Total measured depth was 10,126 feet. The Booth No. 1, located on Section 37 about five miles north of Big Wells (TX) on the Zavala-Dimmit County line, extended Oryx Energy's proven acreage base northwesterly in the Pearsall Field.

Dallas-based Oryx Energy Co. is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion EQB. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P., of which it is the managing general partner and 98-percent owner. Oryx Energy trades on the New York Stock Exchange with the symbol ''ORX'' and the partnership with the symbol ''SLP.''

OAK BROOK, ILL. (JULY 23) BUSINESS WIRE - McDonald's Corp. Monday announced its decision to cook the company's french fries in cholesterol-free 100 percent vegetable oil.

The decision was based on the very positive results from more than eight years of extensive research and customer tests of the new vegetable oil.

''The best french fries in the world have just gotten better,'' said Ed Rensi, president of McDonald's U.S.A. ''Now our customers can enjoy the same great taste they've known and loved for 35 years, but without any cholesterol and with 45 percent less saturated fat per serving. This means that a small order of McDonald's world famous french fries is now lower in saturated fat than a glass of 2 percent lowfat milk.''

Rensi said 1990 has been marked by many significant nutrition initiatives at McDonald's, signaling the company's continuing commitment to keep pace with customers' increasing interest in nutrition.

''Our customers want to be comfortable that they're getting not only great-tasting food but good nutrition, too. At McDonald's, they get both!'' Rensi said.

Since January this year, McDonald's has introduced no-fat, no-cholesterol apple bran muffins and whole grain cereal; replaced its regular milk shakes and soft serve ice cream with lowfat milk shakes and lowfat yogurt: switched from 2 percent to 1 percent lowfat milk; and announced that complete nutrition and ingredient information will be posted in the lobby of every U.S. restaurant by the end of July.

McDonald's is the world's largest quick-service restaurant organization, serving 22 million customers each day in more than 11,300 restaurants in 52 countries. Seventy-five percent of McDonald's restaurant businesses

are locally owned and operated by independent entrepreneurs.

NEW YORK (JULY 23) BUSINESS WIRE - RPM Inc. today announced at a special meeting of security analysts in New York that, for the fiscal year ended May 31, 1990, it had achieved its 43rd consecutive record year of sales, earnings and earnings per share.

Sales for the year totaled $444,823,880, an 18 percent gain over $376,116,999 in the 1989 fiscal year. Earnings totaled $27,710,369, a gain of 14 percent over earnings of $24,243,325 in the 1989 fiscal year, with earnings per share totaling $1.23, a 14 percent gain over the prior year's $1.08.

Management stated that RPM was very pleased with the sales and earnings gains of the 1990 fiscal year. Nearly all individual RPM operating groups performed at record levels in the 1990 fiscal year and are well positioned for continued growth in RPM's fiscal 1991.

Sales in the 1990 fiscal year were positively impacted by the Jan. 5, 1990 acquisition of Kop-Coat Inc. As expected, Kop-Coat did not contribute to fiscal 1990 earnings. Further sales gains are expected from the Kop-Coat acquisition in fiscal 1991 although, as previously reported, Kop-Coat's contribution to earnings will not be fully realized until RPM's 1992 fiscal year.

The board of directors, on July 2, 1990, declared the regular quarterly dividend of 17 cents per share to shareholders of record July 16, 1990, and payable on July 31, 1990. This cash dividend represents a 10 percent increase over the adjusted quarterly dividend rate of $.155 paid at the same time last year.

RPM Inc. is a widely diversified manufacturer of specialized products for structural waterproofing and corrosion control, along with products for the do-it-yourself/homeowner and hobby and craft markets. RPM markets products to approximately 75 countries annually and operates 44 plants in the United States, Canada and Europe. RPM shares are traded on the NASDAQ National Market System under the symbol RPOW.

PROVIDENCE, RI (JULY 23) BUSINESS WIRE - Fleet/Norstar Financial Group has elected three executive vice presidents to the position of vice chairman and broadened the responsibilities of four other executive vice presidents, it was announced Monday by Terrence Murray, chairman and chief executive officer.

Named vice chairman are Charles W. Carey, John W. Flynn and Robert L. Mushkin. Carey has responsibility for the corporation's commercial banking and real estate activities, investment banking subsidiary, and asset-based lending line of business.

Flynn is chief financial officer; chairman of the Assets and Liabilities Committee; and has responsibility for the corporation's public policy, legal, controllers, corporate communications and treasury functions.

Mushkin is responsible for the nine banks that comprise the New England and New York State Banking Groups.

''Each of the corporation's new vice chairmen are seasoned executives who have made major, lasting contributions to Fleet/Norstar's success over many years,'' Murray said. ''Their promotions recognize not only their past achievements, but also the fact that they are taking on added responsibilities. Fleet/Norstar is fortunate to have senior executives with the quality and depth of management experience and skill that these three individuals possess.''

Executive vice presidents given broader responsibilities are Robert J. Higgins, John B. Robinson, H. Jay Sarles and Michael R. Zucchini.

''These four executive vice presidents, along with a number of other key executives, represent Fleet/Norstar's future. They have been given additional management duties because, in the particularly challenging environment of the past several years, they have clearly demonstrated their ability to handle broader line responsibilities.

''The expansion of their roles in the organization reflects my confidence, and the confidence of the board of directors, in these talented executives '' Murray said.

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Excahnge (NYSE: FNG). Fleet/Norstar has approximately 1,000 offices in 40 states. Its lines of business include commericial and consumer banking, consumer finance, asset-based lending, trust banking, student loan processing, and investment banking.

CLEVELAND, OH (JULY 23) BUSINESS WIRE - The Lubrizol Corporation announced that consolidated revenues for the second quarter which ended on June 30 were $357.8 million, an increase of 9 percent over the same period last year. Specialty Chemicals shipments for the quarter were 1 percent above last year.

Consolidated net income was $33 million, or $.92 per share. Consolidated net income for the second quarter of 1989 was $26 million, or $.70 per share.

For the first six months of 1990, consolidated revenues were $715 million, an increase of 6 percent over last year. Consolidated net income was $62.2 million, or $1.72 per share. For the same period last year, net income was $56.7 million, or $1.52 per share. Specialty Chemicals shipments for the six months were 1 percent below last year.

L. E. Coleman, Chairman, said, ''The second quarter was the best quarter in the company's history in terms of revenues and shipments. Specialty Chemicals volume exceeded by 1 percent the very strong 1989 second quarter. The increase occurred in our international business. North American volume was lower. A price increase that was effective March 1, 1990, had a positive impact on second quarter margins. Higher operating costs partially offset the effects of the price increase.

''The Agribusiness segment continued to show improvement. Revenues increased by 14 percent for the quarter and 5 percent for the six months. Research expenses have been reduced to more appropriate levels.

''The second quarter is traditionally Lubrizol's strongest. In recent years, Agribusiness, which has most of its revenues and all of its earnings in the first six months of the year, has increased our seasonality. We expect improved Specialty Chemicals results in the last half of 1990 as compared with last year.''

Lubrizol is a specialty chemical company using chemical, mechanical and biological technologies to develop products for world markets in transportation, industry and agriculture.

MECHANICSBURG, PA (JULY 23) BUSINESS WIRE - Continental Medical Systems Inc. (NASDAQ: CONT) (''CMS'') announced Monday that Denny Lehman has joined CMS as vice president and chief financial officer.

The 34-year-old Lehman comes to CMS from the Houston office of the accounting and consulting firm of Price Waterhouse where he was employed for 12 years.

Prior to the firm's restructuring, Lehman was responsible for directing its national healthcare financial consulting practice. He conducted strategic financial planning services for healthcare organizations, including evaluation of capital formulation strategies resulting in excess of $1 billion successful debt/equity issuances.

Lehman also was responsible for developing strategies and financial plans for hospital/physician joint ventures and providing merger and acquisition services to multiple clients, including stock versus asset acquisition, structural analysis, financial and operational impact, due diligence services, market and financial feasibility studies, etc.

Continental Medical Systems Inc. is one of the nation's leading providers of comprehensive medical rehabilitation. CMS operates 12 rehabilitation hospitals and one specialty facility for a system total of 942 beds in Arkansas, California, Colorado, Florida, Kansas, Kentucky, Louisiana, Massachusetts and Texas.

CMS has 10 community-based rehabilitation hospitals under construction in Arkansas, California, Colorado, Indiana and Texas.

In addition, CMS supplies physical, occupational and speech therapy services in 25 states nationwide through its California Physical Therapy

Inc. in Southern California; VTA Management Services Inc. of New York City; Pro Therapy of America in Birmingham, Mich.; and RehabWorks Inc., headquartered in Clearwater, Fla.

ACTON, MA (JULY 23) BUSINESS WIRE - The Co-operative Bank of Concord (NASDAQ:COBK) announced it has entered into an agreement to sell the deposits of its Cohasset office to South Shore Bank, headquartered in Quincy, Mass., subject to the receipt of regulatory approvals.

The Cohasset office of the Co-operative Bank has $15,000,000 in deposits. These deposits will be transferred to the Cohasset office of South Shore Bank located within the same shopping center. South Shore Bank's Cohasset office currently has $18,000,000 in deposits.

''The discussions for this transaction have been underway for some time,'' stated David E. Bradbury, chairman. ''The sale presents an opportunity to consolidate two retail banking offices in essentially the same location and should provide some efficient service for all. We are confident the Cohasset customers will continue to be well served by South Shore Bank and will benefit from the availability of their drive-up window.''

It is anticipated that this transaction will be completed by the end of 1990.

The Co-operative Bank of Concord, with assets of $677 million, is a state chartered, FDIC insured co-operative bank with headquarters in Action, Mass. and fourteen retail banking offices in Middlesex, Norfolk and Plymouth counties.

WILLOUGHBY, OH (JULY 23) BUSINESS WIRE - Figgie International Inc. announced that its Waite Hill Holdings insurance unit has acquired Hamilton Insurance Company, a Washington, D.C.-based carrier specializing in non-standard personal lines automobile insurance. Terms of the acquisition were not disclosed.

Waite Hill Holdings, headquartered in Richmond, Virginia, operates two

specialty property/casualty insurance subsidiaries, Colony Insurance and Cardinal Casualty, and an insurance services subsidiary, Waite Hill Services.

Hamilton Insurance is licensed in 16 states. Sales are generated through general agents. Robert M. Neidecker, president of Hamilton, will remain in that position, reporting to David Klaitz, president of Waite Hill Holdings.

''We are very pleased to have Hamilton Insurance become part of Waite Hill Holdings,'' said Klaitz. ''Hamilton's line of non-standard auto insurance will nicely complement our commercial product lines.''

Figgie International Inc. is a diversified Fortune 500 operating company serving consumer, industrial, technical and service markets worldwide. Sales in 1989 were $1.3 billion.

#90204b0841 07/23/1990 ~Business Wire

ATLANTA (JULY 23) BUSINESS WIRE - ''Our financial performance was strengthened by strong demand for energy in June, but our earnings through the first half of this year remain below the results we reported for the first six months of 1989,'' Southern Company President Edward L. Addison said Monday.

The Southern Company (NYSE:SO) is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Savannah Electric. The Southern Company's common stock is one of the 20 most widely held corporate stocks in America.

Addison announced that net income for the first six months of this year was $329 million or $1.04 per share - down $55 million or 18 cents per share from the first half of 1989.

For the 12 months ending June 30, 1990, earnings totaled $791 million or $2.51 per share - off $121 million or 39 cents per share from the comparable 12 months a year ago. Earnings for the 12 months ending May 31 1990, were $2.39 per share.

Addison also reported that last week the Georgia Court of Appeals - in a five to four decision - upheld a 1987 ruling by the state public service commission disallowing a portion of Georgia Power's investment in unit 1 of Plant Vogtle. ''We're disappointed by the court's action in this matter,'' Addison said, ''And after reviewing this decision, Georgia

Power has decided to ask the court for reconsideration.''

If the disallowance is not overturned by the courts, The Southern Company will have to take an additional charge against earnings - now estimated at some $190 million after taxes for both Vogtle units.

In other rate matters, Addison said the Mississippi Public Service Commission recently approved two rate schedules designed to restore Mississippi Power's rates and revenues to the levels that had been set under the state's Performance Evaluation Plan. The plan - in place since 1986 - allowed quarterly adjustments in electric rates based on Mississippi Power's financial condition and the company's performance in key areas. The plan was ruled invalid in April by the Mississippi Supreme Court. Mississippi Power has asked the court to reconsider its decision.

In June, the Mississippi legislature passed legislation to correct the technicality on which the Supreme Court based its ruling. The governor of Mississippi has signed the new measure into law.

Concluding his discussion of rate developments, Addison noted that the Florida Public Service Commission is expected to issue a ruling in August on Gulf Power's request to increase retail rates by $26.3 million annually. An interim increase of $5.8 million - subject to refund with interest - was approved by the commission in February.

Reviewing system operations, Addison said that electricity use by retail customers in the four state area rose 3 percent during the first half of 1990. Electricity sales to commercial customers - offices, stores, and other non-manufacturing firms - gained 4.1 percent to 14.0 billion kilowatthours. In-home electricty needs were up 3.1 percent to 14.7 billion kilowatthours. Industrial energy use rose 2.3 percent to 22.6 billion kilowatthours.

Energy sales under long-term contracts with neighboring utilities totaled 10.3 billion kilowatthours during the first six months of this year - an increase of 5 percent.

The energy needs of wholesale customers - municipalities and cooperatives in the service area - were down 10.7 percent. These sales are expected to remain below prior levels because many wholesale customers in Georgia are meeting an increasing portion of their energy needs through joint ownership of facilities with Georgia Power.

Overall, sales of electricity to customers of The Southern Company were up 2.2 percent in the first six months of 1990 compared with the same period in 1989.

BURLINGTON, MA (JULY 23) BUSINESS WIRE - Monday afternoon, Rule Industries announced operating results for the periods ended May 31, 1990:

Nine Months:	1990	1989
Revenues	$39,970,000	$37,090,000
Operating income	3,835,000	4,659,000
Net income	887,000	1,512,000
Earnings per share	39 cents	65 cents
Average shares	2,266,194	2,331,702
Three Months:		
Revenues	$15,478,000	$15,256,000
Operating income	1,443,000	2,501,000
Net income	411,000	945,000
Earnings per share	19 cents	41 cents
Average shares	2,218,775	2,331,754

The serious industry downturn in recreational boating continues to obscure strong performance in the hardware products division, where revenues posted a 16 percent increase in the third quarter. Despite lower third quarter net income which was heavily impacted by weak marine product revenues and litigation expenses, primarily relating to the U.S. Anchor suit, the $3,219,000 nine month cash flow from net income and non-cash expenses equalled fiscal 1989's performance.

The Disston Co., in which Rule has a $4,500,000 covertible investment, continues to make exceptional progress in reorganizing its primary production facility in Danville, Va. and has reestablished its excellent customer service level in consumer hardware markets. Disston's operating results are not consolidated with the company's.

Rule Industries is a diversified manufacturer of products for marine and hardware markets. Through Phillips Screw Co., a wholly-owned subsidiary, Rule licenses patents and trademarks on threaded fastening devices throughout the world.

MILWAUKEE (JULY 23) BUSINESS WIRE - Autotrol Corp. (NASDAQ:AUTR) today reported net income for the second quarter ended June 30, 1990 of $943,276 up 65 percent from $571,287 in the same period of 1989.

Net income per share rose by 30 percent to 39 cents from 30 cents per share a year earlier. Sales were up 13 percent to $10,582,160 from $9,333,804.

Percentage gains in net income and net income per share are not directly comparable due to the additional 780,000 shares issued on completion of the company's rights offering on May 7, 1990.

For the six months ended June 30, 1990 net income rose by 36 percent to $1,800,448 from $1,320,601 with net income per share rising 21 percent to 82 cents from 68 cents a year earlier. Sales rose by 10 percent to $19,690,795 from $17,946,605 for the first half of 1989.

''The principal reasons for the earnings gain were increased sales and significantly improved operating performance in both our Controls Group and Aquatrol operations,'' James W. Schwerdt, president, said.

Autotrol Corp. designs and manufactures process controls and systems used principally in the treatment of water and wastewater. The company serves residential, industrial, commercial and municipal markets and over one-third of its business is in international sales.

     #90204b0879 07/23/1990 ~Business Wire
BEDFORD, MASS. (JULY 23) BUSINESS WIRE - Progress Software Corp. Monday introduced PROGRESS Version 6, a significantly enhanced new release of its fourth-generation language (4GL) and relational database management system (RDBMS) that opens the product's architecture to alternative databases, distributed database capabilities, 3GL access, and popular window managers.

In Version 6, the PROGRESS architecture allows users to now access and change data in PROGRESS, Oracle, and Digital Equipment Corp.'s Rdb

databases, as well as DEC's RMS file system. These PROGRESS, Oracle, Rdb and RMS data structures can be connected either singly or simultaneously, thereby providing a high level of data integration.

The PROGRESS RDBMS itself has also been enhanced to include distributed database support that allows users to dynamically connect up to 240 databases simultaneously, and a two-phase commit architecture that provides data integrity when updates across databases occur.

''We are very impressed with the full-fledged, distributed database capabilities of PROGRESS Version 6,'' said Butch Sakashita, vice president of Integrated Management Support, a Southern California-based systems integrator and Version 6 beta user. ''We have evaluated many products, and consider the PROGRESS database to be equal to, or better than, Oracle and Sybase on a point-by-point comparison.''

PROGRESS Version 6's open architecture also supports embedded ANSI-standard SQL, and includes a dynamic SQL interface. ''C'' application developers can now run existing and new programs using embedded SQL statements against the same PROGRESS database as new PROGRESS 4GL applications.

Dynamic SQL provides an open interface to the PROGRESS database that enables developers of other tools (such as spreadsheets, CASE products, and word processing packages) to interface them to PROGRESS.

Applications written in PROGRESS Version 6 also run under popular window managers such as MOTIF, Open Look, Open Desktop, DEC Windows, and Presentation Manager.

Progress Software Corp. is a rapidly growing supplier of application development software whose sales have more than quadrupled in two years from $6.1 million in 1987 to $25.4 million in 1989. The Bedford, Mass.-based company was ranked number 38 on Inc. Magazine's 1989 list of the 500 fastest-growing private companies in America, and is projecting sales of $40 million for 1990.

#90204b0881 07/23/1990 ~Business Wire

IRVINE, CA (JULY 23) BUSINESS WIRE - AST Research Inc. (NASDAQ: ASTA) Monday announced price reductions from four to 26 percent on its Premium line of personal computers, including 386SX, 386 and i486-based desktop and tower configurations.

"AST continues to expand its market share of 386SX, 386 and i486-based systems, demonstrating the growing acceptance of Cupid-32 architecture which allows users to upgrade easily to higher-performance systems," said Jim Ashbrook, AST senior vice president of marketing.

"AST's objective is to extend its leadership position in advanced personal computer technologies. With these price changes, Compaq's comparably configured DESKPRO 486/33L now costs 34 percent more than AST's Premium 486/33E system. AST will continue to introduce high-performance products that offer customers excellent value."

The retail price reductions affect select models of AST's Premium line of computers, including 16-, 25- and 33-MHz Premium systems based on ISA (Industry Standard Architecture) and EISA (Extended Industry Standard Architecture).

Price reductions on the EISA-based Premium 486/33 tower and desktop systems range from nine to 12.5 percent. Premium 486/25 EISA systems were reduced up to 23 percent in price.

The ISA-based Premium 486/33 desktop models were reduced in price up to $1,700. Price reductions on the ISA-based Premium 486/25 desktop and tower models range from $1,500 to $2,250.

The ISA-based Premium 386/33 desktop and tower models were reduced in price from $1,100 to $1,950. Price reductions on the ISA-based Premium 386/25 average 23 percent. Premium 386SX/16 systems were reduced in price up to $400. The new prices are effective Aug. 1.

AST's proprietary Cupid-32 (Completely Universal Processor, I/O Design) architecture eliminates obsolescence in its Premium line of personal computers. Cupid-32 computer systems may be upgraded to higher-performing microprocessors with the simple exchange of an innovative plug-in processor card. Cupid-32 systems also allow for upgrades from ISA to EISA with a simple board swap.

AST is a leading worldwide manufacturer of high-performance computing solutions. The AST systems product line ranges from cost-effective Bravo systems to the 386-based and i486 Premium line of personal computers, including the new EISA bus architecture.

NEW YORK (JULY 23) BUSINESS WIRE - Loral Corp. announced Monday that its bid for Ford Aerospace Corp. has been selected by Ford Motor Co.

A final contract is expected to be completed shortly.

Loral said financing for the cash acquisition has been arranged and will not create a large debt burden for the company. The acquisition will be anti-dilutive. A new corporation formed to acquire Ford Aerospace will be owned jointly by two initially equal partners, Loral Corp. and the merchant banking partnerships of Shearson Lehman.

Each will contribute about $150 million of equity to the acquisition company. The balance of the purchase price will be financed by bank borrowings which are non-recourse to Loral. Loral will have the option to increase its equity in the future. Lazard Freres & Co. is acting as financial advisor to Loral.

SYDNEY, AUSTRALIA (JULY 23) BUSINESS WIRE - Westpac Banking Corp. (NYSE: WBK) has welcomed approval to establish a representative office in Thailand and pledged to continue efforts to open a full commercial branch in that country.

Westpac's General Manager, Asia Pacific Group, Darcy Ford, said the representative office would open Monday July 23.

''We are very pleased to have been given permission to establish a representative office in Thailand, but we see it as a first step towards ultimate branch status,'' Ford said.

''We stress that Westpac is in no way retreating from its earnest desire and commitment to open a full commercial branch in Thailand,'' Ford said.

Westpac is the only Australian bank, and one of a number of select foreign banks, invited to apply for the first domestic licences to be issued in Thailand for 17 years.

The Bank is currently represented in Thailand through the operations of its subsidiary, AGC (Thailand) Finance & Securities Ltd.

Chief Representative of the new office, which will be located at Level 23, C.P. Tower, 313 Silom Road, Bangkok, 10500, will be Phillip Forrest.

Westpac Banking Corp. is an international financial services group headquartered in Australia, with operations extending offshore to 29

countries. Westpac ranks among the top 65 banks worldwide in terms of assets. In its home markets of Australia, New Zealand, Papua New Guinea and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through the Westpac offices in Asia, Europe, and the United States.

PURCHASE, N.Y. (JULY 23) BUSINESS WIRE - IBM United States Monday announced a realignment of responsibilities in its headquarters operations and the formation of a new division responsible for worldwide development and U.S. manufacturing of all IBM storage products, high-end printers and related software.

Patrick A. Toole, IBM senior vice president, has been named general manager, operations IBM United States, a new position, reporting to Terry R. Lautenbach, IBM senior vice president and general manager, IBM United States. Toole was general manager, Technology Products line of business.

Paul R. Low, IBM vice president, has been named general manager, Technology Products line of business, also reporting to Lautenbach. Low was president, General Products Division.

The new Storage Systems Products Division will be headed by IBM Vice President Ray S. AbuZayyad and will report to Carl J. Conti, IBM senior vice president and general manager, Enterprise System line of business. AbuZayyad was president and chief executive officer of ROLM Systems of Santa Clara, Calif. The new division will have its headquarters in Somers N.Y.

''Our headquarters realignment allows us to place even greater management focus on the continuing transformation and consolidation of IBM's U.S. operations,'' Lautenbach said. ''Our new Storage Systems Products Division brings together all of IBM's storage products under a single management focus and will help us become more market-driven in the storage marketplace.''

FACT SHEET BIOGRAPHICAL NOTES FOR IBM UNITED STATES EXECUTIVE CHANGES

PATRICK A. TOOLE, IBM senior vice president and general manager, operations, IBM United States, joined IBM in 1960 as an engineer at IBM's

Endicott, N.Y., facility. He was named project quality engineer in 1964 and development quality engineer in 1965. He became functional manager of Components Division (CD) systems and programming in 1967 and CD materials manager in 1969. In July 1970, he became planning manager for the Systems Manufacturing Division (SMD) and was named SMD plant services manager later that year. In 1980, he was named Endicott laboratory director. In 1982, he became Endicott site general manager. In 1983, he was named Systems Technology Division president and was elected an IBM vice president in 1984. He became vice president of corporate manufacturing in 1985, was named assistant group executive of development and manufacturing for the Information Systems Technology Group (ISTG) in February 1986, and group executive of ISTG in May 1986. In January 1988, he was named general manager IBM Technology Products. He was appointed to his present position in July 1990.

DR. PAUL R. LOW, IBM vice president and general manager Technology Products, joined IBM in 1957 at the Poughkeepsie, N.Y., facility where he was engaged in the development of logic systems and advanced IBM products. He received his Ph.D. in electrical engineering at Stanford University in 1963, following an IBM fellowship. Dr. Low was named IBM East Fishkill laboratory director in 1969. He was appointed assistant general manager of manufacturing for IBM Burlington in 1970 and was named general manager of IBM Burlington in 1971. In 1974, Dr. Low was appointed System Products Division director of development, and became SPD vice president of development and manufacturing in 1975. He was named development laboratory director of logic and packaging at East Fishkill in 1979 and general manager of the East Fishkill facility in September 1980. Dr. Low was named a General Technology Division vice president in 1981 and in 1983 was appointed GTD president. He was elected an IBM vice president in 1984 and became president of the General Products Division in 1987. Dr. Low is an IEEE Fellow and a member of the Sigma Xi and Nu Beta Pi academic honor societies. He assumed his present position in July 1990.

RAY S. ABUZAYYAD, IBM vice president and president, Storage Systems Products Division, joined IBM in 1962 as an engineer in San Jose, California. He held various engineering and managerial positions there and, in 1980, became assistant general manager, technology manufacturing. In 1981, he was named general manager, manufacturing, General Products Division. In 1982, he was appointed San Jose site general manager, GPD, and in 1983, a division vice president. In 1985, he was named president of the General Products Division and the following year was elected an IBM vice president. He became president of IBM's ROLM Division in 1987 and in 1988, when ROLM was integrated into IBM's Communication Systems line of business, Mr. AbuZayyad became assistant general manager, ROLM Systems, Communication Systems. Later in 1988, he was named president and CEO of ROLM Systems, a Siemens Company. He assumed his current position in July 1990.

WASHINGTON (JULY 23) COMTEX - The 8-K report filed at the SEC shows on July 23, 1990, Semicon Inc.(TICKER:SEME) announced that it was suspending interest on its 13% convertible subordinate debentures due in the year 2001.

Semicon stated that all cash flow from operations must be devoted to business operations as a result of its current sales levels. 2001 debentures aggregating to $4.13 million were outstanding at the time of the 8-K filing.

As Harold W. Mahar, Jr., president of Semicon, explained, "Because of the continuing recession in the discrete semiconductor industry, Semicon's

annual revenues have been reduced to the $10 million level. At this level of sales, we cannot continue as a viable company without a significant reduction in debt expense."

In attempts to reduce debt expenses, Semicon has contacted with its debenture trustee and its banks and expects to continue discussions.

#90204c0059 07/23/1990 ~Comtex
STAMFORD, CT (JULY 23) COMTEX - North Lily Mining Co.(TICKER: NLMC) of San Bruno, Calif., announced that a final feasibility study on the Taltal

joint venture property in northern Chile has indicated that there are no technical obstacles from either mining, processing or environmental standpoints.

The study focused on the Yumbes and Yolanda pampas of the property, according to a Securities and Exchange Commission filing.

Combined ore reserves for these two pampas exceed 120 million tons, with an estimated yield of 40,500 tons of iodine and sufficient sodium nitrate to produce 13.3 million tons of potassium nitrate.

North Lily operates and has a 10 percent net-profits interest in the property.

This 8-k Filing was submitted to the Securities and Exchange Commission on JULY 20, 1990

GROUP LED BY LEONARD M ROSS OWNS 804,300 SHARES (6.60%) OF HOTEL INVESTORS CORP & TRUST (TICKER: HOT) OF WOODLAND HILLS, CA.

ANNOUNCEMENT:

The shares of Hotel Investors Trust and Hotel Investors Corp. are traded as paired securities. The principal business office of HIC is San Diego, CA. L M Ross believe that overhead and fees incurred by Hotel Investors Corp. & Trust are excessive and injurious to the value of shares. In addition, L M Ross think that recent actions by management indicate a reluctance to sell all of their hotel properties and that both managements have not disclosed their plans for operation of Hotel Investors Corp. and Trust in the future. L M Ross have proposed to acquire all hotel and

gaming properties which are not included under an existing agreement to sell 27 other properties. They are aware that management has adopted certain bylaws amendments concerning shareholder rights but have not been able to review the amendments. L M Ross may propose, at the annual meeting, to repeal any amendments restricting shareholder rights that have been adopted with shareholder approval.

#90204c0074 07/23/1990 ~Comtex

WASHINGTON (JULY 23) COMTEX - The 6-K report filed at the SEC shows Modatech Systems Inc. reported earnings of $104,176, or $0.02 per share, on revenues of $1.50 million for the six months ended May 31, 1990.

This compares with earnings of $4,945, or $0.00 per share, on revenues of $739,055 for the same period in 1989.

In July of 1990, the company's financial position was improved with the addition of a private placement of 400,000 shares for an aggregate $1.32 million (U.S. dollars). Management anticipates using the added capital to expand and consolidate the company's position in the sales force automation industry.

On May 1, 1990, a new director of sales was appointed, and additional sales representatives were added upon July 1, 1990.

During the most recent quarter, Modatech signed a contract with Inglis Ltd., a manufacturer of well-known household appliances. Inglis is a subsidiary of Whirlpool Corp.

#90204c0077 07/23/1990 ~Comtex
WASHINGTON (JULY 23) COMTEX - The 6-K report filed at the SEC shows Deprenyl Research Ltd. announced the approval of a $0.12 per share dividend, payable on August 27th, 1990, to each share of record on July 27 1990.

-30- 371
#90204c0078 07/23/1990 ~Comtex
WASHINGTON (JULY 23) COMTEX - The 8-K report filed at the SEC shows in accordance with a merger agreement dated Oct. 18, 1990, Atico Savings Bank merged with and into Intercontinental Bank. Both institutions are wholly-owned subsidiaries of Atico Financial Corp.

With the merger, Intercontinental Bank, a Florida-chartered commercial bank that is not a member of the federal reserve system, became the sole depository institution subsidiary of Atico Financial. As a result of the merger, Atico Financial, though still a bank holding company subject to examination and regulation by the Board of Governors of the Federal Reserve System, ceased to be a savings and loan holding company subject to the examination, regulation and supervision of the Office of Thrift Supervision. Atico does remain subject to regulation and supervision by both the Florida Department of Banking and Finance and the Federal Deposit Insurance Corporation.

-30- 347

#90204c0082 07/23/1990 ~Comtex

WASHINGTON (JULY 23) COMTEX - The 8-K report filed at the SEC shows in a press release dated July 17, 1990, Deprenyl Research Ltd. announced that it had miscalculated its previously announced results for the six months ended June 30, 1990. The error amounted to the allocation of gains from the sale of Shulman Diversified Ltd., a wholly-owned subsidiary of Deprenyl, to profit rather than to contributed surplus.

Though correction of the error did not reduce shareholders' equity, it did cause a downward correction of earnings for the six month period from $2.18 million, or $0.47 per share, to $1.50 million, or $0.32 per share, with contributed surplus of $681,039, or $0.15 per share.

Revenues for the six month period were unaffected, at $4.79 million, as compared to revenues of $542,747 during the same period in 1989. Also during that 1989 period, earnings for Deprenyl were $2.67 million, or $0.61 per share.

-30- 1102

#90204c0083 07/23/1990 ~Comtex

WASHINGTON (JULY 23) COMTEX - The 10-Q report filed at the NASD shows U.T.I. Chemicals Inc. earned $238,677, or $0.01 per share, on revenues of $906,833 for the quarter ended March 31, 1990, as reported in an amended earnings statement dated of July 16, 1990.

This compares with losses of $127,700, or $0.01 per share, on revenues of $521,382 for the same period in 1989.

-30- 539

#90204c0084 07/23/1990 ~Comtex

By JENNIFER LACH

TOKYO (JULY 23) UPI - Fifteen-year-old Ryoko Ishida rushed to her high school's entrance, hearing a teacher yell that the iron gate would be slammed shut in exactly 10 seconds.

Ishida never made it to the classroom on the morning of July 6. Trapped between the gate and a gatepost, her head was crushed when a teacher rolled the heavy steel barrier shut to keep out latecomers.

''She should have come to school 10 minutes earlier,'' the school's principal said at a school assembly after the girl's death. ''Let this be a time for you to rethink your behavior.''

The fatal accident has been taken up on television and radio talk shows and in newspapers in a nationwide debate over Japan's strict education system.

Japanese schools have a reputation for producing highly capable students, but at a cost many Japanese educators are beginning to question.

''(Our) system is economically efficient because it produces high-quality manpower,'' said Kaoru Okamoto, a spokesman for the Education Ministry. ''But at the same time, the personality and flexibility of the student are

being suppressed.''

According to witnesses at the Takatsuka High School in Kobe, 300 miles southwest of Tokyo, the teacher, Toshiko Hosoi, 39, pushed the gate shut when another teacher using a bullhorn reached zero in a 10-second countdown.

Hosoi allegedly kept his eyes focused on the ground while rolling the 18-foot steel gate shut and ignored the students pushing their way through.

The high school's teachers used their gate countdown to emphasize the importance of being on time, school officials said. Students said there had been occasions when some of them were injured by the gate, but the practice continued.

''The reason for these rules is to teach children good behavior,'' said Atsuo Nomura, the principal of Takatsuka High School.

Over the airwaves and in letters to newspapers, the use of strict school rules was generally supported but with a caution against taking them to extremes.

Japan is a country that places great value on being on time and many comments supported the actions of the Takatsuka High School teachers.

''Being late to school is a despicable habit,'' wrote Yoshihito Egawa, a high school teacher, in a letter to the Asahi Shimbun newspaper. ''It is the cause of all evil. Spoiling a student is not the way to show kindness.''

Japanese youth are showing more signs of rebellion at a time when their society is undergoing rapid change because of its increasing wealth.

Teachers, who have been traditionally given utmost respect in Japanese society, now fear an erosion of their power.

Perhaps as a consequence they have increasingly resorted to corporal punishment to bring students in line.

Between 1984 and 1988, the number of cases of physical punishment in Japanese schools jumped almost 150 percent, according to a report by the Justice Ministry.

''Maybe the teachers don't know how to control students in a better way,'' said the Education Ministry's Okamoto.

In another recent incident, seven teachers buried two male students in wet sand with their heads exposed because of their consistent bad behavior.

''In the process of education, sometimes actions like this are necessary '' the school's principal said.

In another case, a physical education teacher punched three students in the face several times. He said the students were not taking the game seriously. The teacher was scolded by school administrators but was not dismissed.

''Teachers, in general, have little common sense for protecting human rights,'' said Masato Miyake of the Japanese Teachers Union. ''They are number one in the classroom and they don't want to lose that respect.''

TOKYO (JULY 23) - Japan's mammoth trading company, Mitsubishi Corp. said Monday it planned to open offices this year in Vietnam, a country viewed as a strong potential market for foreign businesses.

Mitsubishi officials said the company hopes to open offices in Hanoi and Ho Chi Minh City, subject to the approval by the Hanoi government, in the fall.

Mitsubishi's move followed other major Japanese trading companies such as Nissho Iwai, Japan's sixth-large trading firm, and the second largest Mitsui and Co., which opened representative offices in Vietnam.

Japan is Vietnam's second-largest trading partner after the Soviet Union, with trade between the two countries reaching 519 million dollars in 1989, Vietnam's army daily, the Quan Doi Nhan Dan reported last month.

#90204d0790 07/23/1990 ~French/German News Agency

BEIJING (JULY 23) - China produced 280,000 tons of copper in the first six months of the year, up 12 percent over the same period last year, it was reported Monday.

The official China Daily, quoting the China National Non-ferrous Metals Industry Corp., said the figures from January to June indicated that China could surpass its total 1989 output of 540,000 tons.

Despite a general slowdown in the economy and cash shortages at many

smelters, copper has fared better than other non-ferrous metals in China, it said.

Prices have been steady, and supplies of raw materials and electricity "favorable."

Copper demand outstrips supply in China, and though the world's biggest copper ore deposits are found at Dexing, in eastern Jiangxi province, it still must import some of its needs.

-30- 985

#90204d0840 07/23/1990 ~French/German News Agency

TOKYO (JULY 23) - Japanese motor vehicle production in June totaled 1,179,285 units, down 11,539 units or 1.0 percent from 1,190,824 units a year earlier, the Japan Automobile Manufacturers Association said on Monday.

Car output rose 4.0 percent from a year earlier to 869,104 units, a record for the month of June, but truck production fell 12.7 percent to 306,701 units, and bus production also declined 11.4 percent to 3,480 units.

Meanwhile, motorcycle producton in June fell 15.3 percent from the same month last year to 233,930 units, registering the fourth consecutive monthly decline, it said.

#90204d0970 07/23/1990 ~French/German News Agency

GOETTINGEN, WEST GERMANY (JULY 23) - A west German man has burned his seven-month-old daughter alive, police here believe.

Police said Monday they thought the man made a woodpile alongside a country lane the previous evening, poured inflammable liquid, probably petrol, over the little girl and set her alight.

Two men passing by found the little girl's body still burning. A doctor who rushed to the scene established she was already dead.

The father turned himself in to police late Sunday evening and was placed under arrest. Police in Goettingen, south of Hamburg, said his motive remained unclear.

#90204d0980 07/23/1990 ~French/German News Agency

TOKYO (JULY 23) - Japan's six major steelmakers have agreed to export bout one million tons of rolled steel to China in the second hal year,

Nippon Steel Corp. (NSC) said Monday after talks which had begun here June 13.

The agreement was between the six - NSC, Kawasaki Steel, NKK Corp., Kobe Steel, Sumitomo Metal Industries and Nisshin Steel Co. - and the China National Metals and Minerals Import and Export Corp., they said.

Under the agreement, Japanese ordinary steel exports to China will total a little less than one million tons in the second half of this year, with shipments slated for between September and January next year.

Japan also agreed to discount prices by an average of two to three percent from the first half on a dollar basis in consideration of China's shortage of foreign currency, they said.

As a result, Japan's total steel exports to China in 1990 will be less than 20 million tons, or half the volume of the previous year, they said.

#90204d1190 07/23/1990 ~French/German News Agency

CAIRO (JULY 23) - Moslems mark their new year Monday with fasting during the daytime and, for many, lavish feasting after sundown as year 1411 of the Islamic era commences.

The era is calculated from the Hejira, the departure of the Prophet Mohammed from his birthplace of Mecca for Medina in the year 622 of the Christian era. Medina, site of the Prophet's tomb, is the second-most-important place of pilgrimage for Moslems.

For Egyptians, New Year this year coincides with the 38th anniversary of the 1952 coup by young officers, led by Gamal Abdel-Nasser, which installed General Mohammed Nagib in power.

-30- 788

#90204d1260 07/23/1990 ~French/German News Agency

Munich (JULY 23) - Siemens Ag, the West German electronics conglomerate, reported a five percent increase in after-tax profits in the first nine months of the 1989-90 business year, outpacing a three percent boost in world turnover.

Profits after taxes grew to 1.136 billion marks (692.7 million dollars) in the nine months ending June 30, the Munich and West Berlin-based stock corporation reported.

Global turnover in the same period rose to 45.3 billion marks (27.6 billion dollars).

The figures represented a sharp drop from the half-year report, which had recorded growth of 15 percent in profits after tax and 16 percent in turnover.

Siemens attributed the decline to the deduction of costs for a four-billion-mark (2.4-billion dollar) nuclear power plant, Neckar 2, in West Germany.

-30- 1005

#90204d1390 07/23/1990 ~French/German News Agency

BEIJING (JULY 23) - China plans to concentrate its electronics industry in two large production bases by the end of 1995 with the help of foreign investment, the China Daily said Monday.

One center will be on the outskirts of Beijing, and the other near the eastern metropolis of Shanghai, according to Chen Xingxin, who heads the microelectronics department of the Ministry of Machinery and Electronics Industry.

The China Daily quoted Mr. Chen as saying that the two centers were envisaged in China's 1991-1995 five-year plan.

The two production bases would encompass about a dozen firms capable of mass-producing semi-conductors and five or six factories making integrated circuits, Mr. Chen said.

He said the Beijing-based Capital Iron and Steel Corp. was holding talks with Japan's NEC Corp. about setting up a joint venture in Beijing to produce integrated circuits.

The project, involving an initial investment of 200 million dollars, is expected to produce 50 million circuits a year.

The U.S. Motorola Co. is considering setting up a solely funded factory in Tianjin, in the northeast, producing semi-conductors and integrated circuits, Mr. Chen said.

China's largest producer of integrated circuits, the Wuxi Huajing Microelectronics group, has signed a contract for an unspecified amount with the West German firm Siemens to import technology and equipment.

The group expects to increase its production capacity to 100 million circuits from the current 40 million, the English-language paper said.

The production value of the electronics industry has jumped from 10 billion yuan (2.1 billion dollars) in 1980 to nearly 63 billion yuan (13.4 billion

dollars), the daily said.

It noted that the fact that the industry is scattered throughout China has hurt investment and performance.

The semiconductor industry employs 230,000 people, the paper said.

HARARE (JULY 23) - An estimated 1.993 million tons of maize are expected to be delivered to the Zimbabwe Grain Marketing Board, GMB, this season, an increase pf 3.2 percent compared to last year's total intake, a GMB report said on Monday.

According to the report, the total maize intake to the GMB for this season stood at 124,325 tons by the end of June while the total maize production is estimated at nearly two million tons this year.

Export targets for the 1990-1991 marketing year were set at 350,000 tons. "Should exports be as good as last year, the closing stock will be around 1.3 million tons which is equivalent to the gross requirement for nine months in the 1990-1991 marketing year," the report added.

LUSAKA (JULY 23) - Zambia, whose foreign debt totals some seven billion dollars, won debt relief totalling 2.4 million dollars at a recent meeting of the Paris Club of western creditor countries, Finance and Development Planning Minister Gibson Chigaga said Monday.

Some 1.9 billion dollars of the debt relief covered arrears to Paris Club countries, and the remaining 0.5 billion "is in current debt service up to the end of 1991," Mr. Chigaga said on his return from meetings of the Paris Club and the World Bank-sponsored Consultative Group for Zambia in Paris over the past two weeks.

Zambia will now sign bilateral agreements with the various donor countries, "so that the terms of debt relief are embodied in bilateral agreements as well as in the agreements signed after the Paris Club meeting," Mr. Chigaga said.

He also said that Zambia will soon be approaching its non-Paris Club creditor countries for debt relief.

Mr. chigaga said that at the Paris Club meeting France agreed to cancel one third of Zambia's debt to it, with repayments of the remaining two-thirds

delayed until 1999.

Belgium, the Netherlands and the United States gave Zambia a grace period of 14 years before it starts repaying its loans, while Austria, Canada, Britain,

West Germany, Switzerland and Italy gave a grace period of nine years and reduced the interest rates on the loans to be determined by the market rate.

The Consultative Group meeting which followed the Paris Club talks confirmed the availability of 500 million dollars from the donor community for Zambia's structural adjustment economic programme.

Mr. Chigaga said this would be disbursed in December when the next Consultative Group meeting will be held.

JOHANNESBURG (JULY 23) - Tourism could become South Africa's biggest moneyspinner this decade with up to two million tourists a year expected to visit the country by 1999, Tourism Minister Kent Durr said Monday.

This would be double the number of overseas visitors presently flocking to South Africa and could net the country more foreign revenue than that earned by gold, Mr. Durr told hoteliers attending a conference here.

"I have just returned from Europe and can state unequivocally that the changes in South Africa are now fully accepted and encouraged," Mr. Durr said.

President Frederik de Klerk has been praised for major reforms which include the February 2 unbanning of the anti-apartheid African National Congress (ANC) and the release on February 11 of ANC deputy-president Nelson Mandela after 27 years in South African prisons.

Mr. Durr said South Africa was now being seen in a new light as a respectable tourist destination.

"We are therefore planning large new industrial investments in concert with European partners, as well as strengthening tourism links in a variety of ways as the market expands," Mr. Durr added.

LONDON (JULY 23) - Britain had a current balance of payments deficit of

1.36 billion pounds (2.47 billion dollars) in June, according to provisional figures released Monday by the central statistical office.

The deficit was below market forecasts of a 1.4 billion pound deficit.

The better than expected figures immediately saw the pound rise to 1.8212 dollars from 1.8195 ahead of the announcement, and to 2.9820 Deutsche marks from 2.9785.

A trade deficit of 1.56 billion pounds (2.8 billion dollars) against forecasts of 1.6 billion (2.9 billion dollars) was compensated by an invisibles surplus estimated at 200 million pounds (363 million dollars), the central statistical office said.

NAIROBI (JULY 23) - Kenya is to receive a 144-million Kenyan shillings (6.26 million U.S. dollars) assistance from Belgium to finance various programmes following an agreement signed here Monday, the official Kenya News Agency (KNA) reported.

Under the agreement, signed by Kenyan Vice President and Finance Minister George Saitoti and Belgian ambassador to Kenya Funes-Noppen, 109-million shillings (4.73 million dollars) would be a grant under Belgium's contribution to the special programme of assistance to sub-Saharan African nations, KNA said.

The remaining 35 million shillings (1.53 million dollars) would be a soft loan to enable Kenya to purchase a PABX telephone system for installation in various government offices, KNA added.

PRETORIA (JULY 23) - The rate of growth in South Africa's broad-based M3 money supply dropped to 17.66 percent in the lowest since 1987, according to preliminary figures released here by the Reserve (central) Bank.

The year-on-year figure for May was adjusted downwards to 19.12 percent from the preliminary 19.3 percent given by the bank last month.

Economists said the latest M3 figures showed that South Africa's economic slowdown was deepening and that demand for credit was falling off - the main aim of tough monetary policies and high interest rates introduced by the government last year.

They predicted that by the end of the year the M3 growth rate could hit the

target of between 11 and 15 percent set by the Reserve Bank.

The M3 money supply is determined by all notes and coins in circulation plus all the deposits in banks, building societies and the post office.

Comparative M3 figures in billions of rand with the dollar equivalents in brackets, using month-end exchange rates: 37.6 U.S. cents to the rand in June, 37.5 cents in May and 36 cents in June 1989.

Wiesbaden, West Germany (JULY 23) - Group trade by the Organisation of Petroleum Exporting Countries, or Opec, with West Germany declined last year in real terms, with imports sagging and exports giving a dull performance, official figures showed on Monday.

The latest report by the Federal Bureau of Statistics on trade with developing states showed that West Germany's chief trade partners in the Third World were the so-called threshold countries.

Overall West German exports to the Third World totalled 61.8 billion marks (35.5 billion dollars) and imports from the same countries amounted to 62.3 billion marks in value, the bureau said.

For the second year in a row the bureau identified Brazil as West Germany's most important Third-World supplier, with 5.7 billion dollars' worth of goods shipped, followed by Taiwan, Hong Kong and South Korea.

As recently as 1980, Opec members Saudi Arabia, Libya and Nigeria headed the list of suppliers to West Germany.

Opec shipments to West Germany last year dropped 3 percent in real terms compared to 1988, compared to growth of 7.1 percent in total West German imports from the Third World.

During the same period, exports to the Opec realm grew by only a slight 1.2 percent despite an inflation-adjusted rise of 11 percent in overall shipments to developing countries, the bureau said.

West Germany's prime customers in the developing world last year was Hong Kong with 4.3 billion marks in imports, followed by South Korea and Hong Kong. A decade ago, the main importers of West German goods in the Third World were Saudi Arabia, Nigera and Iraq.

SYDNEY (JULY 23) - Commonwealth Bank, one of Australia's four largest banks, on Monday announced that it was cutting its overdraft reference rate by half a point to 18 percent.

The cut is to take effect Wednesday and brings the overdraft rate into line with the new prime rates for corporate borrowers announced by ANZ and National Australian Bank on Friday.

Commonwealth's chief general manager for institutional banking, Campbell Ker, said the bank's loan reference rate would remain unchanged at 18 percent.

The country's biggest bank, Westpac, is reviewing its rates.

ANZ's chief executive, Will Bailey, said Sunday that conditions in the Australian economy favoured a further two percent cut this year in all interest rates except for housing loans.

#90204d2240 07/23/1990 ~French/German News Agency

SOFIA (JULY 23) - Bulgarian petrol prices were doubled on Monday, in the wake of a cut in Soviet oil deliveries.

The price of super grade petrol was increased from 1.20 to 2.40 leva (from 40 to 80 U.S. cents) a litre, normal grade rose from 1 leva to 1.8. leva (35 to 64 cents) and diesel prices tripled from 0.4 leva to 1.2 (14 to 40 cents).

Bulgaria has been suffering a severe fuel shortage for the past 10 days, with queues up to a kilometer (half a mile) long forming outside service stations in Sofia and petrol virtually unavailable in the provinces.

The situation is not expected to return to normal in the immediate future, according to officials quoted by the television station.

-30- 895

#90204d2260 07/23/1990 ~French/German News Agency

SOFIA (JULY 23) - Bulgaria, which in March suspended payment on its 10.3 billion dollar foreign debt, on Monday for the first time released details of the debt and its creditors.

The country owes some 1.8 billion dollars to West Germany, 1.4 billion to Japan and about a billion to Austria and Britain, the socialist party newspaper Douma said Monday.

The country's foreign debt is owed to some 200 foreign banks, with 46 per

cent of it denominated in dollars, 33 per cent in Deutsche marks, eight per cent in Swiss francs, six per cent in Austrian schillings, six per cent in yen and the remaining one per cent in various other currencies.

Bulgaria had a foreign debt of only 2.9 billion dollars in 1984, after 15 years of stable economic development.

But this rose to 4.1 billion dollars in 1985 and has been rising ever since, largely due to increased hard currency investment in industries which did not bring in hard currency.

At the same time, industries that were bringing in foreign currency were not given access to hard currency.

Bulgaria is owed some 2.3 billion dllars by Iran, Iraq, Ethiopia, Syria, Mozambique and Angola, all of which "do not intend to pay," the newspaper said.

PRAGUE (JULY 23) - Czechoslovakia and Britain are to cooperate in fighting terrorism, drug trafficking and organized crime under a pact signed here Monday, the official news agency CTK said.

British Foreign Minister Douglas Hurd, here on an official visit, has also proposed opening talks on ending the visa requirement for tourists from both countries.

Under an anti-crime agreement signed Monday by Mr. Hurd and his Czechoslovak counterpart Jiri Dienstbier, police and customs are to exchange information and aid each other's investigations.

Mr. Hurd, who arrived Sunday on a two-day official visit, was to lunch with President Vaclav Havel at his home in Lany, near Prague, before meeting with Prime Minister Marian Calfa and parliamentary speaker Alexander Dubcek.

Earlier Monday he travelled with Mr. Dienstbier to Lidice, a Czech village north of here, bombed by the Nazis in 1942 in retaliation after a Czechoslovak commando based in London assassinated the leader of Bohemia-Moravia, Reinhart Heydrich.

Mr. Hurd is to visit Bratislava Tuesday to meet with other figures in the federal and Slovak republic's governments.

MOSCOW (JULY 23) - Some 150 students from Niger staged a sit-in at their embassy here Monday for the second time in eight days, demanding Niamey pay overdue scholarships and give them plane tickets home.

Members of the Union of Niger Students and Trainees in the Soviet Union moved into the embassy with their luggage and vowed to remain there until their government paid allowances ranging from 85 dollars to 120 dollars apiece which they said were six months overdue.

They also wanted plane tickets back to Nigeria which they said they were entitled to once every two years.

Embassy officials promised to work out a solution after a similar protest last Monday, but failed to do so, the students said.

Niger's Ambassador Pierre Ausseil told Agence France-Presse his government's finance ministry was having trouble freeing up the funds but should be able work out the problem later in this week.

#90204d2980 07/23/1990 ~French/German News Agency

BUDAPEST (JULY 23) - The Hungarian government said Monday it had agreed to return land to its pre-1947 owners if the latter were still farmers and pledged to cultivate it.

The question had been one of the most controversial within the post-communist coalition government of Jozsef Antall, but the three coalition partners told a press conference they had now agreed a compromise.

The small landowners' party, one of the major victors in recent elections had initially said that land taken over by the state in 1947 after the communists came to power should be returned to its original owners or their heirs without exceptions.

But they have now agreed to the compromise whereby former landowners who are still farmers can reclaim land, but only up to 100 hectares (240 acres), without payment.

Heirs to former landowners can also claim up to 100 hectares, on condition that they promise to farm the land themselves and pay death duties on the property.

Farm workers currently working in state farms or cooperatives will be able to buy between one and one and a half hectares (2.4 to 3.6 acres) of land. The compromise is to be put to parliament before August 20.

"This decision restores the landowning rights of Hungarian farmers, unjustly dispossessed of their land by the communists," said Imre Konya, spokesman of coalition partner the Democratic Forum party.

Some 1,250 cooperatives currently cultivate some 90 per cent of Hungary's six million hectares (14 million acres) of farmland. Before World War II, the country's farmland was divided between some 20 major landowners.

LUANDA (JULY 23) - U.S. government officials arrived here Monday for talks about getting the Angolan authorities and the rebel movement UNITA to resume their peace parley in Portugal.

The peace moves have stalled over the rebel National Union for the Total Independence of Angola's insistence on being recognised as a political party.

The State Department's number two for African affairs, Jeffrey Davidow, said Washington wanted to help both sides come together as soon as possible and reach a successful conclusion.

With Pentagon official Jim Woods, he is scheduled to meet Foreign Minister Pedro de Castro van Dunem and army chief of staff Antonio France.

Mr. Davidow said the serious shortage of food in central and southern Angola would also be studied in order to boost cooperation so that relief to drought-stricken areas got to those in need.

UNITA leader Jonas Savimbi said during a visit to Abidjan on Sunday that the end is "near" in Angola's civil war.

"If the government in Luanda agrees to recognize us as the opposition, we are prepared to move towards a cease-fire," Mr. Savimbi said, adding that he hoped a cease-fire would take effect in August.

#90204d3290 07/23/1990 ~French/German News Agency

OTTOBRUNN, West Germany (JULY 23) - West German aeronautics and defence group MBB, bought last year by industrial group Daimler-Benz, said Monday its results were down in 1989.

Operating profit was down from 121.7 million Deutsche marks (76 million dollars) to 79.5 million Deutsche marks (49.6 million dollars), the group said in its annual report.

The fall was due to the dividing up of the group's activities, the report said.

Consolidated turnover was down 12.8 percent at 6.27 billion Deutsche marks after the restructuring of the group's activities.

MBB's transport aircraft division has been attached to Deutsche Airbus, the West German subsidiary of European consortium Airbus Industrie.

As a result, defence activities now account for 55 percent of the group's sales, up from 46 percent.

Exports accounted for only 55 percent of turnover last year, against 63 per- cent in 1988, and the payroll was slimmed from 39,800 to 23,900 people.

The report said that as of the end of 1989 MBB's order book totalled 13 billion Deutsche marks, a 34 percent increase over the previous year.

Orders linked to the European 90 fighter, the Ariane space rocket and the PAH-2 military helicopter had helped boost the order book, MBB said without giving figures.

PARIS (JULY 23) - Electronics group Thomson is to receive three billion francs (545 million dollars) in French state aid to help finance research and development into high definition television (HDTV), the industry ministry said Monday.

The five-year aid is being granted under an agreement which commits Thomson to a specific research programme with timetables for developing and launching products, the ministry said.

Thomson has already set aside six billion francs for HDTV.

The French company has signed an agreement with Dutch electronics giant Philips under which the two are to invest 20 billion francs (3.6 billion dollars) over five years, with 11 billion of it coming from Philips.

-30- 895

#90204d3320 07/23/1990 ~French/German News Agency

LONDON (JULY 23) - Brent North Sea crude prices breached the 19 dollars a barrel level in London Monday for the first time in four months, largely due to tension between Iraq and Kuwait, analysts said.

Crude for September delivery stood at 19.15 dollars a barrel mid-afternoon, up from 18.75 at Friday's close.

Richard Jones, an analyst with County NatWest, said the dispute between Iraq and Kuwait seemed to worsen over the weekend and this "continued to push prices up."

Baghdad has accused Kuwait of stealing its oil, and of depriving it of resources by flooding the oil market and provoking a fall in prices, along with the United Arab Emirates.

Mr. Jones said expectations of a positive result of this week's Organisation of Petroleum Exporting Countries meeting in Geneva had also contributed to the rise in prices.

OPEC members "have a very good chance of coming up with a good agreement and to stick to it," he said.

Reports that Iraq was in favour of an OPEC reference price of 25 dollars a barrel instead of the current 18 had had a "very bullish" effect.

He said OPEC members were likely to raise the reference price to 20 dollars a barrel and set a production ceiling of 22.5 million barrels a day, which would have an "extremely bullish" effect if the United Arab Emirates respected it.

Current OPEC production is estimated at between 22.5 and 23 million barrels a day, he said.

-30- 1625

#90204d3360 07/23/1990 ~French/German News Agency

PANGKOR, Malaysia (JULY 23) - A state assemblyman, Datuk S. Rajasegaram, Monday expressed concern over the large number of Malaysian fishermen being attacked by armed pirates in international waters.

He called on the navy and marine police to increase patrols at once.

''About 60 trawlers leave here for deep sea fishing in the Straits of Malacca each day and their safety should be guaranteed by the authorities '' he told reporters.

''The livelihood of about 1,000 families of the Pangkor fishermen depends on their catch and it is imperative their safety be given priority,'' Rajasegaram said.

Rajasegaram said he was prompted to demand maximum protection for fishermen

because pirates Monday attacked four Pangkor fishermen in the Straits.

The pirates pushed three fishermen into the sea after robbing them of their personal belongings and catch totaling several thousand dollars. They were rescued by a passing vessel while the fourth fisherman escaped in a boat.

CAIRO (JULY 23) - Pakistani Foreign Minister Sahabzada Yakub Khan Monday cut short his three-day visit to Egypt to return home after talks here with his Cairo counterpart Esmat Abdel Meguid, Mena news agency reported.

No reason was given for his unexpected return. Political observers said they believed a hastily-convened conference in Alexandria Monday of King Hussein of Jordan, Egyptian President Hosny Mubarak and Iraqi Foreign Minister Tariq Aziz was the reason for his departure.

The conference was arranged only over the weekend.

Khan, who arrived here Sunday, and Meguid discussed the July 31 to August 4 conference in Cairo of the Organisation of Islamic Conference foreign ministers and the diuspute between India and Pakistan over the troubled region of Kashmir, Mena added.

#90204d3470 07/23/1990 ~French/German News Agency

GENEVA (JULY 23) - An international conference on the return of South African refugees opened here Monday at the World Council of Churches (WCC) headquarters.

Chaired by South African Council of Churches secretary general Frank Chikane, the conference brings together about 40 delegates representing the African National Congress (ANC), the Pan-African Congress (PAC), the Conference of South African Bishops and Zapo.

The delegates will meet until Tuesday afternoon to share information and work out a plan for the return of refugees to South Africa, the WCC said.

Between 30,000 and 40,000 South Africans are now refugees from their country, primarily in Zambia, according to a spokesman for the United Nations High Commissioner for Refugees (HCR) in Geneva.

The HCR is only an observer at the conference, considering the current conditions unsuitable to organise a return of the refugees, primarily because of the "discriminatory legislation" of apartheid and the absence of a general amnesty.

PARIS (JULY 23) - French haute couture and ready to wear fashion house Ted Lapidus has joined a long list of prestigious fashion names to be taken over by financiers or industrialists, it was announced here Monday.

Financier Alain Mallart said that Hamlet, a subsidiary of his financial company Alain Mallart, had taken a 51 percent controlling stake in Paris-Eco, which controls 100 percent of Lapidus, at the weekend.

It brings the Lapidus label within a major group whose interests include paper retail and packaging firm Novalliance, which last year had a turnover of three billion francs (550 million dollars).

Ted Lapidus is following in the footsteps of such names as Dior, Lacroix, Givenchy, Lanvin and Balmain, which have all recently passed into the hands of financiers or industrialists seeking to add an up-market label to their stables.

The price of the Lapidus deal was not given, but Hamlet has pledged to inject 80 million francs to increase Lapidus capital to 200 million francs (36 million dollars).

Paris-Eco had acquired Lapidus at the beginning of last year from luxury goods and spirits group Moet Hennessy Louis Vuitton.

Like many relatively small Parisian haute couture houses, Ted Lapidus had experienced difficulties recently, with an aging image and strong competition seeing losses rise to 14 million francs (2.5 million dollars) in 1988.

The situation showed a marked improvement last year, when the company showed a profit of 1.7 million francs.

Items sold under the Lapidus label have sales totalling 1.4 billion francs a year, but the haute couture house itself has sales of only 40 to 50

million francs.

The Lapidus purchase is part of Mr. Mallart's strategy of building up a core of luxury goods labels. He has already bought Chateau Listrac, a prestigious Bordeaux wine label, and is planning other purchases, possibly abroad.

#90204d3620 07/23/1990 ~French/German News Agency

WARSAW (JULY 23) - Hundreds of thousands of residents of the Katowice region of southern Poland are to be issued with gas masks to protect them from pollution in the industrial region, the newspaper Kurier Polski said Monday.

The first 100,000 gas masks will be issued by the region's civil defence unit before the end of the year to protect citizens in the event of "exceptional risk," the evening paper said.

Upper Silesia of which Katowice is the capital produces 98 per cent of Poland's coal and more than half of its steel. Pollution in the area is among the worst in Europe.

Ten per cent of Poland's population, some 3.8 million people, live in the area where air-pollution is frequently at several times permitted levels, according to official figures.

#90204d3630 07/23/1990 ~French/German News Agency

ALGIERS (JULY 23) - Algerian President Chadli Bendjedid was instructed to mediate in the oil row between Iraq and Kuwait at a summit of the five-nation Maghreb Arab Union here Monday.

The Union, which Mr. Bendjedid heads, expressed concern over deteriorating relations between Iraq on the one side and Kuwait and United Arab Emirates on the other.

It called on them to seek peaceful ways of settling their dispute which erupted Tuesday when Iraqi President Saddam Hussein threatened to use force against its Gulf neighbours which he accused of exceeding their OPEC oil quotas. He said this weakened prices and hurt Arab countries that depended on oil revenue.

Maghreb Union members Mauritania, Morocco, Algeria, Tunisia and Libya called on the three nations "to avoid exacerbating their differences" and seek "dialogue" instead.

The appeal came in a closing statement after a final round of talks in Zeralda, near Algiers.

Mr. Bendjedid was asked to mediate in his capacity as the Union's new acting chairman, a post he will hold for six months.

At their summit, heads of state from the five countries agreed they should support the Palestinian uprising in the Israeli-occupied Arab countries "morally, materially and diplomatically".

They urged Arab countries "to support the Palestine Liberation Organization's conditions" for resuming a U.S.-Palestinian dialogue.

On Lebanon, they urged Arab states to help reconstruct the war-town country and back "the legitimate government" of President Elias Hraoui.

The union, formed in February last year, failed to choose a secretary general or reach agreement on where to site a headquarters.

However its members adopted accords on issues such as investment, customs union, agricultural trade, avoiding double taxation, and passenger and goods transport.

-30- 2039

#90204d3640 07/23/1990 ~French/German News Agency

WASHINGTON (JULY 23) - The U.S. Central Intelligence Agency (CIA) Monday denied charges on Italian television that it was involved in a wave of terror-bombing in Italy during the 1970's and the murder of Swedish Prime Minister Olof Palme.

The allegations, in a television documentary, were attributed to persons claiming to be former CIA agents.

The CIA Monday identified one of them as Richard Branneke, but said he had never worked for the spy agency.

"The agency flatly denies that Mr. Branneke was ever an agent of the CIA or associated in any way with the CIA," said spokesman Peter Earnest. "We repeat this publicly now because of the outrageous nature of his claims."

The denial came a day after Italian President Francesco Cossiga called for clarification of allegations that the CIA and P2 Masonic lodge master Licio Gelli were behind a series of terrorist attacks in Italy during the 1970s and in other European countries.

Mr. Cossiga issued his statement Sunday at the height of a controversy over the acquittal by a court of appeal in Bologna last week of four people

previously convicted of organising the Bologna railway station bombing in which 85 people died on August 2, 1980.

The same court quashed the convictions and 10-year jail terms handed down to Mr. Gelli and another defendant for complicity.

The president's call for an inquiry, made on July 3 but only made public Sunday, was prompted by a series of interviews broadcast on June 28 and 30 and on July 2 by the Italian state-run television channel TG-1.

In them, several unidentified and masked individuals, presented as U.S. Central Intelligence Agency agents, claimed that Mr. Gelli, the former leader of the P2 lodge, had been paid millions of dollars by the CIA to organise a terror campaign in Italy.

According to the same "CIA agents" Mr. Gelli, at the instigation of the CIA and of leaders of the U.S. Republican Party, including George Bush, helped to organise subversive activities in other parts of Europe including the assassination of Sweden's prime minister Olof Palme.

In his statement, President Cossiga said that "if these reports are true they must be investigated. If they are not, those responsible for the television broadcast must be sanctioned."

In Washington, Mr. Earnest -- referring again to Mr. Branneke -- said, "Allegations attributed to him regarding agency involvement in terrorist activities in Italy or the Palme assassination are absolute nonsense."

-30- 2727

#90204d3650 07/23/1990 ~French/German News Agency

CAIRO (JULY 23) - The leaders of Egypt and Jordan met Monday in the Mediterranean port of Alexandria to examine the Iraq-Kuwait conflict over territorial and oil issues and adopted a resolution which they said would safeguard Arab interests.

President Hosni Mubarak and King Hussein of Jordan met for nearly five hours, with parts of their discussions attended by Iraqi Foreign Minister Tareq Aziz. King Hussein and Mr. Aziz later left for home.

In a brief news conference after the talks, Mr. Mubarak told reporters he was "optimistic" that a solution to the conflict would be found and charged that the international media had been making an unnecessary "noise" about it.

"What we agreed upon during these talks today meets the interests of the Arab nation and those of unerstanding between Arab brothers," King Hussein said. He did not elaborate.

According to Kuwaiti press reports, Egypt has drafted a four-point plan to resolve the increasingly bitter row in the Gulf, which also involves the United Arab Emirates (UAE).

The Egyptian plan calls for Iraq and Kuwait to renounce any recourse to military action and expresses Egypt's readiness to act as a mediator.

It proposes a meeting in Cairo of the Kuwaiti, Iraqi and UAE foreign ministers, along with those of other major Arab states, in a bid to resolve the conflict before an Arab summit in the Egyptian capital this November.

The proposal, finally, appeals for an immediate end to hostile press comment among the three parties to the feud.

Baghdad last week accused Kuwait of encroaching on its territory, stealing some 2.4 billion dollars worth of Iraqi oil and joining the UAE in flooding oil markets in order to reduce Iraqi oil revenue.

Kuwait and the UAE have denied the charges and Kuwait in turn has accused Iraq of pumping oil from Kuwaiti wells.

Geneva (JULY 23) - Negotiators in the Uruguay round of the General Agreement on Tariffs and Trade (Gatt) opened crucial talks in Geneva Monday in a bid to agree on ways in which the world conducts its trade.

The Uruguay round on liberalising world trade, which began four years ago and is due to end later this year, covers 15 main areas, including agriculture, services and textiles.

Farm subsidies are at the centre of dispute. The United States has insisted that farm subsidies must be scrapped. But the 12-member European Community (E.C.) says it can not entirely eliminate its huge subsidies for the European agricultural sector.

Negotiators were agreed Monday that talks on the controversial issue of farm subsidies be postponed until the end of August.

SYDNEY (JULY 23) - Around 800 warders at Long Bay Prison in the Australian state of New South Wales went on a 24-hour strike Monday after one of their colleagues was jabbed with a hypodermic syringe used by an inmate suffering from the dreaded disease Aids.

The prisoner, who has been diagnosed as carrying in his blood the Hiv virus which causes Aids, sank the needle of the syringe into the buttock of a 21-year-old prison warder during a scuffle.

Blood from the Hiv-infected inmate was said to have been in the syringe at the time of attack.

State justice minister Michael Yabsley said the inmate would be charged with attempted murder if the warder turned out to be Hiv-positive.

Around 150 staff at the Mulawa prison for women went out on strike in sympathy with their Long Bay colleagues. Warders are demanding that inmates suffering from the Acquired Immune Deficiency Syndrome should be segregated inside prisons.

Justice authorities had ordered all prisoners to undergo an Aids test from September but has refused to separate inmates found to be suffering from the disease.

MOSCOW (JULY 23) - Soviet military authorities have tightened state of emergency restrictions in the central Asian city of Osh where fighting in the streets has continued during the last few days, the government newspaper Izvestia reported here Monday.

It said houses had been torched and buses stoned. One man was shot dead near the university during attempts to disperse a crowd. But the paper have no further details.

A curfew has been extended by an hour and is now in force from 2100 to 0600, while meetings of more than three people in the streets of the southern Kirghiz city are banned.

House gatherings are also banned and the army has been authorized to carry out house searches without warrants.

Soldiers also check the identity on all those entering the city.

Public transport started to run again Monday, though irregularly, while some shops and factories also resumed work, the paper said.

Meanwhile, in Uzgen, also near the border with Uzbekistan, army and interior ministry forces repelled a 3,000-strong crowd which tried to enter the city, the paper said.

According to Tass news agency, Uzgen remains sealed off by barricades, while vehicles entering the city are stoned in spite of their army escorts.

More than 200 people have been killed and scores more injured since clashes started in June in Kirghizia over the allocation of building land, on the outskirts of Uzgen.

A Soviet parliament fact-finding commission has ended its work in the region and the government has voted to increase aid to the republic, in part to ease the unemployment situation, Tass reported.

The agency said there were currently about 80,000 people jobless in Kirghizia, nearly half of them in the Osh region.

MOSCOW (JULY 23) - Indian Prime Minister Vishwanath Pratap Singh and Soviet President Mikhail Gorbachev Monday signed a joint statement calling for a nuclear-free world and international cooperation to protect the environment, Tass news agency reported.

The statement, signed after Mr. Singh arrived here on the first of a four-day visit, stressed that reliance on military force was counter-productive and underscored the importance for all states -- both nuclear and non-nuclear -- to be involved in the arms reduction process.

The statement also called for protection of the environment and control of population growth.

#90204d3860 07/23/1990 ~French/German News Agency

HAVANA (JULY 23) - Cuban leader Fidel Castro suspects that Spain and the United States are using the recent spate of refuge-taking in Havana embassies to exert pressure on Cuba's internal policies, Cuban officials said Monday.

As of last Wednesday, Cuban authorities were not particularly worried over three Cubans who turned up seeking asylum at the Spanish Embassy, said the officials who spoke on condition of anonymity.

But the number of disaffected Cubans seeking asylum quickly climbed to 18, creating the most serious crisis in Cuban-Spanish relations since Mr. Castro seized power in 1959 and instituted a Marxist regime.

Spain's Ambassador to Cuba Antonio Serrano de Hero, who returned to Madrid Monday to brief Foreign Minister Francisco Fernandez Ordonez on the

situation, had few comments for the nearly 100 journalists waiting for him.

In Havana, the diplomatic impasse over the refugees has heightened tensions as the two countries traded barbs over each other's handling of the situation.

Police threw up barbed wire and created a 100-meter (yard) "no-man's land" Sunday around the Spanish Embassy and scores of police dressed in olive-green uniforms belonging to the special forces surrounded the area.

Spain, one of Havana's few remaining European supporters, recalled its ambassador and suspended a 2.5-million-dollar economic program, a hard blow to Cuba that had been looking to Spanish investment to boost tourism.

Havana blames the growing tensions with Madrid on Mr. Fernandez Ordonez for making statements in Brussels that Cuban officials said echoed the last 30 years of U.S. policy of politically isolating and pressuring Cuba.

Mr. Ordonez responded that he was "unhappy that Cuba did not get caught up in the great wave of democracy that has swept all of Latin America" and Eastern Europe.

#90204d3940 07/23/1990 ~French/German News Agency

VEVY, Switzerland (JULY 23) - Swiss group Nestle said Monday it had acquired British company RHM Breakfast Cereals in association with General Mills of the United States for 93 million pounds (169 million dollars).

London-based RHM Breakfast Cereals, the cereals division of Rank Hovis McDougall, is the third largest British breakfast cereals concern, with a more than 15 percent market share.

Its companies include Shredded Wheat Co., Viota Foods and A.C. Finken Ltd, which each have their own factory.

The purchase was carried out by Cereal Partners Worldwide, a joint venture set up early this year by Nestle and General Mills.

The acquisition means an instant solid footing in the sector, Nestle said,

and marks an important stage in Cereal Partners' target to reach an annual turnover of a billion dollars by the turn of the century.

The European breakfast cereals market is currently worth some 1.6 billion dollars a year, and this should increase to 6.5 billion by the year 2000, Nestle said.

#90204d3960 07/23/1990 ~French/German News Agency
LONDON (JULY 23) - Sugar prices weakened in London on Monday in the wake of the New York market, destabilised by a plunge in U.S. share prices.

Raw sugar was quoted at 249.6 dollars a ton for October delivery in late afternoon, eight dollars below Friday's close but slightly ahead of its lowest point of 247.6 dollars hit earlier in the day.

White sugar for October delivery was down 10 dollars a ton at 306.5.

Dealers said there were no significant factors in the sugar market itself Monday, and it had followed the stock market.

The partial recovery at the end of the day was the result of sentiment that liquidations had been too heavy.

#90204d4030 07/23/1990 ~French/German News Agency
SIDON, LEBANON (JULY 23) - Rival Shiite militiamen Monday traded violent artillery duels leaving one person dead and four wounded as their battle for dominance over their community entered its second week.

The artillery battles between the pro-Syrian Amal militia and the Iranian-backed Hezollah movement engulfed the Iklim al-Touffah district, 20 kilometers (12 miles) southeast of here, before giving way to sporadic fire.

Amal said it lost one of its militiamen in the combat while another was hurt as shells rained on the villages it controls in the region. Three civilians were also wounded.

Hezbollah reported no casualties but said its positions had come under heavy shelling.

A total of 77 people have been killed -- most of them combatants -- and 225 wounded since fighting broke out Monday with most of the clashes centering on the town of Jarjouh, an Amal stronghold that fell to Hezbollah.

Civilian inhabitants, deprived of water in blistering summer heat, streamed out of the region in droves Sunday following ferocious combat around Jarjouh the day before.

Some 500 combatants from the mainstream Fatah movement of the Palestine Liberation Organisation (PLO) have been deployed as a buffer force but have been unable to stop the onslaught.

The Iranian charge d'affaires in Beirut, Gholamreza Valizadeh, met here Sunday with pro-Iranian Islamic groups and the Fatah Revolutionary Council a Palestinian faction deeply hostile to PLO leader Yasser Arafat.

He was quoted in press reports Monday as saying Iran was prepared to intervene "to settle the inter-Shiite conflict on the basis of the Damascus agreement."

The January 1989 accord, which has never been implemented, outlined an Amal-Hezbollah settlement that would have allowed fundamentalist Hezbollah fighters to return in strength to southern Lebanon, from which they were largely evicted by Amal in April 1988.

Fighting between Hezbollah and the more secular and moderate Amal movement has raged on and off for two years in southern Lebanon and around Beirut, leaving nearly 900 people dead.

The two groups are fighting for dominance in Lebanon's Shiite community, the country's largest religious group.

#90204d4060 07/23/1990 ~French/German News Agency

NAIROBI (JULY 23) - Dissident Kenyan lawyer Paul Muite surfaced briefly here Monday to make a statement to the press urging the release of political prisoners, before going back into hiding.

Mr. Muite ducked out of sight after the July 5 detentions of his clients Kenneth Matiba and Charles Rubia, two former cabinet ministers who spearheaded calls for multi-party democracy in one-party Kenya.

Their detentions without trial under the country's tough security laws sparked five days of anti-government riots this month that cost 22 lives.

The detentions prompted another pro-democracy lawyer, Gibson Kamau Kuria, to leave Kenya for the United States after a week in refuge at the U.S. Embassy here. There was speculation that Mr. Muite would also try to leave.

Mr. Muite walked into the offices of the Nation, one of Kenya's three national English-language dailies, accompanied by his wife, Edith, who has been under police surveillance since he disappeared. He urged President Daniel arap Moi to order "the release of all detainees."

He emerged a day after Mr. Moi challenged him to come out of hiding and apologise for his alleged role in stirring up the riots.

Mr. Muite, however, condemned the "violence, destruction of property,

burning of vehicles and other acts of hooliganism."

"Neither myself nor my clients (Mr. Matiba and Mr. Rubia) had any prior knowledge and were not privy to the instigation, precipitation andor fermenting of that violence."

He said there would have been no bloodshed if Mr. Moi's government had not denied Mr. Matiba and Mr. Rubia permission to hold a public meeting.

"A peaceful meeting would have taken place at which those attending would have had the oppportunity to express their support or otherwise for the multiparty system. The violence and subsequent killings and loss of life would have been avoided."

#90204d4170 07/23/1990 ~French/German News Agency

MOSCOW (JULY 23) - A nuclear reactor at Smolensk power station, sited some 300 kilometres southwest of here, shut down automatically Sunday after a fire broke out, the Soviet news agency Tass reported here Monday.

Quoting the government Izvestiya newspaper, the agency said the fire, started by the ignition of a cable leading to a stand-by boiler house, was put out.

The reactor affected was the number two generating unit.

The Soviet Ministry of Atomic Energy had formed a commission to investigate the cause of the blaze, Izvestiya said.

An April 1986 accident at the Chernobyl nuclear power plant in the Ukraine left at least 31 people dead and spread a cloud of radiation over Europe.

#90204d4180 07/23/1990 ~French/German News Agency

LONDON (JULY 23) - British Prime Minister Margaret Thatcher carried out a minor government reshuffle Monday, a spokesman for her office said.

The reshuffle, which had been expected, affected about 10 junior ministers.

Francis Maude, minister of state at the Foreign Office with special responsibility for Hong Kong, was appointed financial secretary at the treasury, replacing Peter Lilley.

Mr. Maude was in Hong Kong on Monday en route to Beijing for talks with Chinese leaders.

Mr. Lilley took over as trade and industry secretary when Nicholas Ridley resigned July 14 after making anti-German and anti-European Community remarks in a magazine interview.

Secretary of State for Sports Colin Moynihan was named secretary of state for energy.

The reshuffle was planned before Mr. Ridley resigned.

#90204d4320 07/23/1990 ~French/German News Agency

JOHANNESBURG (JULY 23) - Ignorance was to blame for a recent outcry over a Taiwan businessman's plans to "harvest" 30,500 South African seals, Environment Minister Gert Kotze said Monday.

The plan was halted temporarily on July 4 by Mr. Kotze, who, while in Portugal, said he wished to examine all objections to the proposed cull.

But addressing a press conference Monday on his return from Europe, Mr. Kotze hinted that the cull, at Kleinsee on the Cape West coast, might go ahead after all -- despite the battering he had already received from nature lovers and environmentalists.

He said seal culling in the northern hemisphere had resulted in television footage of "lots of blood on ice," adding "but here we are not dealing with the same kind of seal."

A massive public outcry both in South Africa and abroad, backed by French actress and animal rights campaigner Brigitte Bardot, forced the government to temporarily halt the culling.

Although the government realised that it had a "problem", "we have to manage this marine resource and cannot let the seal population increase as it had in the past," Mr. Kotze said.

The Taiwan businessman, Hsien-I Hsu, reportedly cancelled his plans on July 14 after it was reported that he had bowed to pressure from the Taiwan government.

KABUL (JULY 23) - The Afghan resistance has stepped up rocket attacks on the capital almost three weeks after the Soviet-backed government said it had pushed pack the rebels outside the defended city limits.

Officials here said the mujahedeen guerrillas fired 17 missiles at Kabul

Sunday and the rocketting continued through Monday. At least three people died and 20 were injured in Sunday's attacks, they said.

The officials said details of Monday's attacks were not immediately known, but residents said they heard more than a dozen rockets hitting different parts of the city.

The renewed rocketting came after a three-week lull in guerrilla attacks which the authorities attributed to their military operations in pushing back the mujahedeen from their makeshift bases around the city.

The government had claimed that it captured the strategic Paghman Mountain region, just 20 kilometres (12 miles) north-west of here, which the mujahedeen had been using as a launching pad for the rocket attacks on Kabul.

Diplomats said some rockets were still coming from the Paghman while Afghan air force jets, each carrying four 500-kilogram (1,100-pound) bombs, have been flying in the direction of the mountains in the past few days.

"What we saw in the past three weeks was the calm before the storm," one diplomat said.

The guerrilla attacks also coincided with President Najibullah's offer Sunday to transfer "certain powers" of the defence and interior ministries to a joint council that would conduct nation-wide elections to end the Afghan civil war.

Mr. Najibullah said the joint body would including mujahedeen guerrilla factions and will pool their military forces to ensure peace during a United Nations-supervised election.

The mujahedeen have rejected Mr. Najibullah's proposal, saying no deal could be made with "war criminals". The rebels accuse Mr. Najibullah's Soviet-backed government of committing genocide during the 12 years of the Afghan war.

LONDON (JULY 23) - The U.S. dollar fell sharply here Monday after share prices on Wall Street tumbled more than 100 points in early trading.

The pound also lost out to currencies like the Swiss franc and Deutsche mark after having moved little following the announcement of a better than expected 1.36-billion-pound (2.47 billion dollar) current balance of payments deficit in June.

The big winner was gold, which jumped eight dollars an ounce.

The dollar closed at 1.6275 Deutsche marks against Friday's 1.6410 marks, at 1.3865 Swiss francs (1.4090), 5.4575 French francs (5.5040) and 148.40 yen (148.85).

The pound closed at 1.8215 dollars (1.8135), 2.9645 Deutsche marks (2.9786), 2.5255 Swiss francs (2.5552), 9.9408 French francs (9.9815) and 270.31 yen (269.93).

Gold rose to 368.25 dollars an ounce from 360.25 dollars.

The three-month Eurodollar rate remained unchanged at 8.062 percent, as did the three-month British interbank rate at 14.9375 percent.

In Frankfurt, the dollar plunged to 1.6280 Deutsche marks from Friday's 1.6420 marks.

In Zurich, the dollar also closed lower at 1.3900 Swiss francs, compared with Friday's 1.4075 francs, while gold rose by seven dollars, closing at between 368.50 dollars an ounce compared with the previous 361.50 dollars an ounce.

#90204d4520 07/23/1990 ~French/German News Agency

JOHANNESBURG (JULY 23) - The African National Congress was plunged into controversy Monday as police warned that senior ANC officials faced arrest and an ANC guerrilla eluded police to seek sanctuary at the U.S. consulate in the eastern port city of Durban.

Amid a growing row over the ANC's continued espousal of violence, police also revealed that ANC supporters had fought running battles with rival blacks in Sebokeng black township, south of here, which left at least 19

people dead.

Sparking the controversy were reports at the weekend that scores of heavily-armed ANC guerrillas had entered South Africa and had established arms caches across the country.

Up to 40 guerrillas have been arrested and dozens of rifles, mines and a rocket launcher recovered, according to police and the ANC, the main organisation fighting to overthrow Pretoria's white minority government.

A police spokesman, Captain Peet Bothma, warned Monday that more arrests would follow and could include high-ranking members of the ANC and its chief ally-in-arms, the South African Communist Party (SACP).

The revelations prompted a call by the right-wing Conservative Party Monday for the government to call off planned August 6 talks with the ANC.

But a spokesman for Constitutional Affairs Minister Gerrit Viljoen told Agence France-Presse that "at least for now" the talks are still on track.

ANC internal leader Walter Sisulu has defended the infiltration, warning at the weekend that it will continue until the ANC calls off its 29-year armed struggle against Pretoria's apartheid policies.

This would only happen once the government had removed what the ANC has identified as obstacles to full negotiations -- among them the release of all political prisoners, the return of exiles and an end to political trials.

The row Monday entered the international arena when Bhekumusa Jabulani Ximbe, 38, a sub-lieutenant in the ANC's armed wing, Umkhonto we Sizwe (MK), sought refuge at the U.S. Consulate in Durban.

By late Monday the consulate had not yet decided on whether to grant his request for asylum or not, a U.S. Information Service spokesman said.

Last week police raided Mr. Ximbe's home in Durban's Umlazi black township and uncovered a large arms cache, including hand grenades and limpet mines ANC sources said. Mr. Ximbe was not home at the time and, forewarned, went underground, emerging only when he arrived at the consulate Monday.

#90204d4600 07/23/1990 ~French/German News Agency

ATHENS (JULY 23) - Hundreds of demonstrators clashed with police on Crete Monday against a new U.S. bases agreement which will mean a transfer of operations to Greece's southernmost island.

Extra troops were flown from Athens to quell the protest, in which police were besieged at their headquarters in Chania as a nearby court house went up in flames.

Furious demonstrators accused the Athens government of a ''sell-out'' of Crete to U.S. military interests in the protest, which coincided with the ratification in Athens due late Monday of the pact signed July 8.

Under it, U.S. air bases at Nea Makri in eastern Attika and at Hellinikon outsoide Athens will be shut down and operations moved to Souda, near Chania,
 and outside Iraklion, Crete's main town.

-30- 953
#90204d4630 07/23/1990 ~French/German News Agency
BERLIN (JULY 23) - East German Liberals and Social democrats Monday called on their parliamentary groups to vote for a pullout of the coalition government of Prime Minister Lothar de Maiziere.

The East German premier has been under mounting pressure to concede in a row over pan German elections on December 2.

He said he "regretted" the decision of his coalition partners but did not believe the coalition was dead yet.

Both parties said in letters to the prime minister that they had recommended a pullout to their parliamentary parties failing concessions from Mr. de Maiziere's Christian Democratic Union, their spokesmen said.

The crisis which has brought the East German coalition government to the brink of collapse is over voting technicalities which could determine who holds power in a unified Germany.

The Liberal and Social democrat leaders boycotted a coalition leaders' meeting, where a resolution to the crisis was due to be tackled with Mr. de Maiziere.

Mr. de Maiziere had been "ready to negotiate", his spokesman said.

The parliamentary groups will consider the pullout recommendation in separate meetings Tuesday.

"If the coalition breaks-up, Mr. de Maiziere will be to blame," said Social democrat leader Wolfgang Thierse.

The deadlock is between supporters of elections being held in a single electoral territory comprising all Germany, and those who want elections

in the two Germanies.

The matter is crucial, since a party which fails to get five per cent of votes has no representation in parliament. The conservative Social Union (DSU) and the reformed communists (PDS) which operate only in East Germany would lose any chance of gaining seats if the poll was staged in a single territory.

-30- 1952
#90204d4730 07/23/1990 ~French/German News Agency
TEHERAN (JULY 23) - Iranian spiritual guide Ali Khamenei on Monday ruled out any compromise with the United States saying such a move would lead Iran into "captivity."

"A regime that bows, in the name of Islam and the Koran, in front of the enemies of God is not an Islamic Republic but an American republic," Ayatollah Khamenei said in statements broadcast by Teheran Radio.

Any such compromise would mean "captivity for Iran and it is unthinkable for the enemies of God to see us in such a situation," he added during a meeting with Iranian ambassadors and senior-ranking diplomats based abroad.

Ayatollah Khamenei also denounced what he said were "efforts by the enemies of Iran" for suggesting that a significant section of the Iranian population in favoured a "revision of the Revolutionary principles."

He said the country was still the "aggressive one it was ten years ago" when the former shah was toppled.

His remarks come less than a week after a blistering attack by leading hardline MP and former Interior Minister Ali Akbar Mohtashemi against the current administration.

Mr. Mohtashemi implicitly accused Ayatollah Khamenei and President Ali Akbar Hashemi Rafsanjani of trying to take over the 83-man Council of Experts, which is charged with naming the country's spiritual guide and authorised to revoke his mandate.

The council, whose membership is due to be renewed in October, appointed Ayatollah Khamenei to succeed Iran's former spiritual leader the Ayatollah Ruhollah Khomeini after his death in June 1989.

TUNIS (JULY 23) - Arab League Secretary General Chedli Klibi was due to arrive in Baghdad Tuesday in an attempt to resolve Iraq's oil and territory

dispute with Kuwait, the League officially announced here Monday.

Mr. Klibi visited the Gulf emirate over the weekend to examine Iraqi accusations that it had encroached on Iraqi territory and had stolen 2.4 billion dollars worth of its oil.

An Arab diplomatic source said Mr. Klibi was expected to travel from Kuwait to Baghdad, but his return here overnight Sunday led to Kuwaiti speculation that Iraqi leaders were opposed to the visit.

A spokesman for the Arab League said the visit was delayed because Iraqi Foreign Minister Tareq Aziz had left Sunday for talks in Cairo with Egyptian President Hosni Mubarak.

In a memorandum last week to the Arab League, Iraq also accused Kuwait and the United Arab Emirates (UAE) of flooding the market with crude oil in a bid to weaken Iraq's economy. All three are oil-producing states.

Kuwait and the UAE deny the charges.

Kuwait in turn accused Iraq of trying to drill for oil on its territory and called on the Arab League to set up a commission to define their unmarked border.

#90204d5020 07/23/1990 ~French/German News Agency

PANAMA CITY (JULY 23) - The military government of deposed Panamanian strongman Manuel Antonio Noriega provided identification documents to the chief money manager of Colombia's Medellin cocaine cartel, it was reported Monday.

The pro-government newspaper Panama-America cited unnamed sources as saying that Cuban-American Ramon Milian Rodriguez, the cartel's financial chief, bribed military officers here to obtain a Panamanian identity card and passport in the name of Alejandro Mela.

Mr. Milian Rodriguez' false documents indicated he was born August 3, 1953, in the central Panamanian province of Los Santos, west of the capital. The false documents were discovered in a safe deposit box at a local bank, the daily reported.

Mr. Milian Rodriguez is currently jailed in the United States following his conviction for laundering drug money.

Mr. Noriega, who was captured by U.S. forces during the December 1989 U.S. invasion of Panama, was taken to the United States for trial on drug-trafficking charges. U.S. prosecutors there allege that the Medellin

cartel paid the ousted general around 10 million dollars to permit them to launder some 200 million dollars through Panamanian banks.

Last month, a source at Panama's Public Registry office revealed that Mr. Noriega also expedited the processing of false Panamanian documents for Medellin cartel chief Pablo Escobar as well as for Jorge Ochoa Vasquez, alleged leader of another cocaine cartel based in Cali, Colombia.

Sunday, Panama's police chief, Colonel Eduardo Herrera, said Colombian drug traffickers were planning to kill him.

The U.S. Southern Command -- a Panama-based military force responsible for all U.S. forces operating in Latin America, warned the Panamanian Government of the Colombian assassination plot, Col. Herrera said.

#90204d5510 07/23/1990 ~French/German News Agency

LONDON (JULY 23) - Amnesty International Monday welcomed Cameroon President Paul Biya's decision to release all political prisoners, but called on the government to change its detention practices.

The human rights organisation was responding to Mr. Biya's comments in an interview on Radio Monte Carlo Saturday, when he pledged to release all political prisoners "within one or two weeks."

Amnesty also welcomed Mr. Biya's decision to allow its representatives to visit Cameroon and meet members of the government.

A communique from the human rights organisation said it was nonetheless concerned about future detention policy in Cameroon.

"The government frequently holds people in administrative detention without charge or trial, tries them unfairly before military tribunals or keeps them in jail after they have been acquitted by a court or have finished their prison term," it said.

In a report published Monday, Amnesty called for the release of two men convicted by a military court of subversion and insulting the president in what it described as a "travesty of justice".

The London-based pressure group said the men, Yondo Mandengue Black, former president of a lawyers' association, and Anicet Ekane, a businessman, were sentenced for three to four years and maltreated in custody because of their involvement in an opposition movement.

Amnesty said many political prisoners were still detained in Cameroon following an attempted coup d'etat in 1984, despite the president's promise in April to release them.

VERDUN, France (JULY 23) EFE - Some 20 graves were desecrated early Monday in a centuries-old village cemetery in northeastern France, municipal sources said.

The vandals broke crucifixes and uprooted tombstones, some dating back to the 12th century, in the graveyard of Marville, declared a historic site.

Police found no inscriptions or clues to indicate who was responsible for the desecration.

Last May, 34 tombs were profaned and a body impaled in a Jewish cemetery in southern France, causing outrage among residents, religious leaders and political groups.

Since then there have been several other cases of vandalism in both Jewish and Roman Catholic graveyards in different French towns.

PALMA (JULY 23) EFE - Spanish police Monday arrested 25 rowdy tourists, including 19 Britons, after scuffles in a resort town on the Mediterranean holiday island of Majorca.

Officials said one policeman and several of those arrested were injured in the violence which broke out after midnight as police tried to disperse a gang of rowdy tourists who were arguing and shouting on a street in the resort town of Magaluf.

They said residents, fearing an outbreak of fighting, had called in the police.

The situation was eventually brought under control when police reinforcements were sent in.

Authorities said the 25, which included 19 Britons, four Swedes, a Dutchman and a Belgian, would be brought before a judge on Tuesday.

VALENCIA, SPAIN (JULY 23) EFE - An Indian travelling on a false British passport was arrested Monday at a Spanish airport carrying almost two kg of heroin in his luggage, officials said.

Suspicion was aroused at the airport near Valencia, 300 km southeast of Madrid, when the traveller arrived carrying a British passport with an English name and his photograph pasted on top of the original photo.

The suspect, identified only as 23-year-old Suramania S., had arrived on a flight from Paris.

A search of his luggage revealed 1.7 kg of heroin with an estimated street value of around dlrs 300,000, authorities said.

Bilbao (JULY 23) EFE - British insurance company Norwich Union has acquired two per cent of the Spanish insurance market with the purchase of Plus Ultra, an insurance subsidiary of the major Spanish bank Banco Bilbao Vizcaya (BBV), bank officials announced Monday.

BBV president Emilio Ybarra agreed to the 36 billion pesetas (dlrs 353 million) sale on condition that senior management remained in place, BBV sources said.

During 1989, Plus Ultra insurance premiums brought in 20.5 billion pesetas (dlrs 201 million).

MOSCOW (JULY 23) EFE - The curfew has been lengthened in the Osh region of the Soviet Central Asian republic of Kirghizia where ethnic clashes between Kirghiz and Uzbeks flared up again last week, the Soviet news agency Tass reported Monday.

Osh military commander Gen. Victor Gonchorov has added two hours to the curfew and has forbidden groups of more than three people to be in the streets despite a reduction in violence in the last few days.

The curfew, which used to run from 10:30 p.m. to 5:30 a.m. now runs from 9 p.m. to 6 a.m..

Gen. Goncharov has also forbidden meetings in private residences which can be registered without judicial authorization.

At least 212 people have been killed in ethnic clashes between Kirghiz and Uzbeks and some 400 people are still missing after violence erupted last month when authorities distributed land belonging to an Uzbek cooperative farm to Kirghiz families.

Another 400 people have been reported missing and over 1,200 have been hospitalized.

Uzbeks form a minority in Kirghizia whose present borders with Uzbekistan were arbitrarily established in 1926 by Soviet dictator Josef Stalin.

The government has decided to increase aid to Kirghizia, Tass reported. Help will principally be directed towards unemployment among young people.

According to official figures, Kirghizia has about 80,000 unemployed, nearly half of whom live in the Osh region.

Sao Paulo (JULY 23) EFE - At least four people died over the weekend in the Brazilian city of Sao Paulo as temperatures plummeted to three degrees Celsius, police said Monday.

The four dead, who were not identified, were said to be beggars sleeping out on the street.

The temperatures were not official, however, as Sao Paulo's only weather station was unstaffed over the weekend due to lay-offs as part of government cut-backs.

Officials said the cold spell, brought on by Antartic winds and which has also affected Uruguay, could last for some days.

Buenos Aires (JULY 23) EFE - Industrial production in Argentina has plunged in the yoffs and the highest rate of unemployment in 15 years, according to figures released Monday by chambers of commerce.

Industrial production dropped 8.9 percent for the first three months of this year compared to the same period last year.

The automotive industry, one of the most important in the Argentine economy, has been particularly hard hit with 5,000 layoffs in the first half of the year following a 28 percent drop in sales.

Some 100,000 vehicles were produced in 1989 compared to 290,000 in 1973.

The recession has also been felt in the household goods sector where sales dropped 45.5 per cent in the first six months of this year, according to the figures.

Fuel sales also fell 45.8 percent over the first half of the year while demand for natural gas dropped 11.4 percent.

According to a recent report by the World Bank, Argentina's GDP, which totaled dlrs 79.44 billion in 1989, has fallen by an average of 0.3 per cent over the past 15 years while its population has risen from 20 million to 33 million over the same period.

The jobless rate in May in the Buenos Aires area increased 8.8 percent compared to the same period last year, according to figures released last week by the government statistics office.

More than one third of the country's working population of 12.2 million live in the Buenos Aires area.

According to figures released in May by the Ministry of Labor, only 7.96 million Argentinians are currently in full-time employment.

Since taking office in July last year, Argentine President Carlos Menem has embarked on a series of tough economic austerity measures, including

price hikes for utilities, aimed at taming endemic hyperinflation.

Belt-tightening moves succeeded in bringing down inflation to a single-digit figure last October but a new round of price increases began a few months later.

The recent drop in industrial output comes on top of an accumulated rate of inflation for the first six months of this year of 715.9 percent.

#90204e0033 07/23/1990 ~Latin America New Agency

BUENOS AIRES (JULY 23) EFE - A scant majority of Argentines rate President Carlos Menem's administration as "excellent" or "good," despite soaring inflation and the government's unpopular policy of privatizing state-run industries.

According to an opinion poll published Monday in the Buenos Aires daily La Nacion, 51 percent of those surveyed believe the administration is "excellent," or "good," while 40 percent give their government an unfavorable rating.

Despite efforts by Menem to cut state spending, Argentina's accumulated inflation rate for the past six months hit 715 percent. Twenty percent increases in prices for basic foodstuffs over a period of a few days have become common.

The survey clearly demonstrated the low opinion that Argentines have of their legislators, who received only a 17 percent approval rating as a group.

But surprisingly, Economy Minister Antonio Erman Gonzalez received an approval rating of 39 percent, the highest in the administration.

The poll was published after the sale of Argentina's state-owned telecommunications company (ENTel) to Spain's Telefonica and Bell Atlantic of the United States.

The Spanish flag carrier Iberia is also set to take over Aerolineas Argentinas.

Menem's privatization plans for the future include the break-up of the state-owned petroleum company YPF, which has held monopoly control over the nation's oil fields for 40 years amd the sale of the states railroads, energy sources, and a third of the country's highway system.

ALGIERS (JULY 23) EFE - The summit of the five Maghreb heads of state closed Monday with some agreement reached on economic integration issues but basic steps toward a full union left unresolved.

The five North African leaders failed to agree on such fundamental matters for their proposed common market as the country where they would build the secretariat of the Maghreb Arab Union or the name of its secretary general.

Presidents Chadli Bendjedid of Algeria, Zin el Abidin ben Ali of Tunisia, Libya's Moammar Gaddafi, Muaiya ould Sidi Ahmed Taya of Mauritania and Morocco's King Hassan did, however, sanction several common market measures prepared in advance by their foreign ministers.

The most important of these was the decision to go ahead with unified customs arrangements by 1995.

The leaders also decided that their Ministers of Foreign Affairs, Finance and Agriculture would together define a common development strategy.

No general agreement was reached on the unrestricted movement of people and goods throughout the Maghreb, although the leaders endorsed a list of certain agricultural products which would enjoy free circulation.

They also agreed to support inter-Maghreb investment and the elimination of double taxation.

The presidents declared themselves, without giving details, in favor of a Maghreb airline but postponed further studies on its establishment and proposed the founding of a joint university and science academy.

The Arab world must provide moral, material and diplomatic support for the Palestinian people, as manifested in the so-called +intifadah+ uprising in the Israeli Occupied Territories, as well as for the Palestine Liberation Organization, said the final summit declaration.

The declaration deplored the Iraq-Kuwait conflict over oil prices, and applauded the recent reduction in tension between Iraq and Iran.

#90204e0036 07/23/1990 ~Latin America New Agency

PALMA, SPAIN (JULY 23) EFE - Four Swedish tourists were flown home in an ambulance plane Monday from the Spanish resort island of Majorca and may be ill with Legionnaire's disease, a hospital spokesman said.

The four Swedes were staying in a hotel in the island town of Alcudia before being hospitalized ten days ago. The spokesman said that tests carried out so far have not confirmed Legionnaire's disease.

Tests on the hotel water system carried out by local health authorities have been negative, a health department spokesman said.

Legionnaire's disease is an illness produced by a strain of bacteria and leads to acute pneumonia and can cause death in some cases.

Outbreaks of Legionnaire's disease in Spanish resorts have been reported in the past.

The bacteria is found in water and is transmitted when people drink infected water or breath in water droplets, including those given off by air conditioning systems.

DHAKA (JULY 23) XINHUA - BANGLADESH AND BHUTAN ARE EXPLORING POSSIBILITIES OF A BOOST IN THEIR BILATERAL TRADE, OFFICIAL SOURCES SAID HERE TODAY.

R.B. BASNET, MANAGING DIRECTOR OF THE STATE TRADING CORPORATION OF BHUTAN, IS NOW LEADING A BHUTANESE TRADE DELEGATION ON A WEEK-LONG VISIT TO BANGLADESH.

THE OFFICIAL SOURCES SAID THE BHUTANESE DELEGATION, DURING ITS SERIES OF TALKS WITH BANGLADESH TRADE OFFICIALS, HAD SHOWN KEEN INTEREST IN IMPORTING PETROLEUM PRODUCTS, GARMENTS, CROCKERIES, ANIMAL FEED AND ASSEMBLED VEHICLES.

THE NEGOTIATIONS ARE LIKELY TO BE FOLLOWED BY SIGNING OF AGREEMENTS BETWEEN DHAKA AND THIMPU SHORTLY FOR EXPANSION OF BILATERAL TRADE, THEY SAID.

BANGLADESH'S ENERGY AND MINERAL RESOURCES MINISTER ZIAUDDIN AHMED IS EXPECTED TO VISIT BHUTAN SHORTLY TO FURTHER PROMOTE THE TRADE RELATIONS BETWEEN THE TWO COUNTRIES.

BANGLADESH EXPORTS JUTE PRODUCTS AND ELECTRICAL GOODS TO THE TINY HIMALAYAN KINGDOM OF BHUTAN AGAINST HER IMPORT OF FRUITS, CEMENT, BOULDERS AND LIMESTONE.

THE BHUTANESE TRADE DELEGATION ARRIVED HERE ON JULY 18 AND IS EXPECTED TO FLY BACK HOME ON JULY 25.

#90204h0075 07/23/1990 ~Chinese News Agency

DHAKA (JULY 23) XINHUA -- THE BANGLADESH GOVERNMENT HAS LISTED COMPUTER SOFTWARE AS ONE OF THE COUNTRY'S MAJOR EXPORT ITEMS, ACCORDING TO A RANKING BANGLADESH OFFICIAL.

VICE-PRESIDENT IN CHARGE OF THE INDUSTRIES MINISTRY M. AHMED, MADE THIS ANNOUNCEMENT SUNDAY AT THE INAUGURAL CEREMONY OF THE DEVELOPMENT CENTER OF INTEGRATED BUSINESS COMPUTER SYSTEM-PRIMAX SOFTWARE (BANGLADESH) LIMITED, THE FIRST EXPORT ORIENTED COMPUTER SOFTWARE HOUSE IN THE COUNTRY.

HE SAID BANGLADESH SHOULD TRY TO MOVE FAST INTO THE COMPUTER WORLD WITH AN AIM TO CHANGE THE LONG-DRAWN IMPOVERISHED IMAGE OF THE NATION.

THE COUNTRY SUFFERED MAINLY FROM MANAGEMENT HAZARDS, HE SAID, ADDING THAT THE STATE-OF-THE-ART TECHNOLOGY LIKE COMPUTER WOULD SOLVE THE PROBLEM, BRINGING ABOUT SUBSTANTIAL DEVELOPMENT OF THE COUNTRY.

INTEGRATED BUSINESS COMPUTER SYSTEM AND PRIMAX ARE THE TWO LEADING COMPUTER COMPANIES OF ENGLAND WHICH HAVE GONE INTO JOINT VENTURE WITH BANGLADESH ENTREPRENEURS.

OFFICIALS SAID THIS JOINT VENTURE WHICH WENT INTO OPERATION IN FEBRUARY HAD ALREADY EARNED ABOUT 80,000 U.S. DOLLARS BY SELLING SOFTWARE TO ENGLAND SINCE ITS INCEPTION AND ANOTHER OFFER WORTH NEAR TWO MILLION U.S. DOLLARS WAS COMING FROM ENGLAND.

BESIDES THE SOFTWARE BUSINESS, THE COMPANY PROVIDED COMPUTER DATA ENTRY SERVICES, HARDWARE AND SOFTWARE MAINTENANCE SERVICE AND TRAINING SERVICE IN THE COUNTRY AND ABROAD.

#90204h0108 07/23/1990 ~Chinese News Agency
BEIJING (JULY 23) XINHUA -- CHINA'S IMPORTS AND EXPORTS IN THE FIRST HALF OF THIS YEAR GREW SLIGHTLY OVER THE SAME PERIOD OF 1989 TO TOTAL 37.38 BILLION U.S. DOLLARS, ACCORDING TO LIU XIANGDONG, SPOKESMAN OF THE MINISTRY OF FOREIGN ECONOMIC RELATIONS AND TRADE (MOFERT), AT A NEWS BRIEFING HERE TODAY.

LIU SAID, CHINA'S EXPORTS IN THE FIRST SIX MONTHS OF THIS YEAR INCREASED 21.7 PERCENT TO 24.05 BILLION U.S. DOLLARS, WHILE ITS IMPORTS DROPPED 23.7

PERCENT TO 13.33 BILLION U.S. DOLLARS.

CHINA'S EXPORTS IN JUNE ALONE HIT A RECORD MONTHLY FIGURE OF 5.32 BILLION U.S. DOLLARS, UP 29.3 PERCENT, LIU ADDED.

AS A RESULT OF ADJUSTING THE IMPORT AND EXPORT MIX, THE PROPORTION OF RAW MATERIALS DECREASED WHILE THAT OF MANUFACTURED GOODS WENT UP FOR THE SIX MONTHS, AND TECHNOLOGICAL EXPORTS INCREASED 3.5 FOLD.

DURING THE JANUARY-MAY PERIOD, LIU SAID, CHINA'S EXPORTS OF MACHINERY AND ELECTRONIC GOODS ROSE BY 44.6 PERCENT, TEXTILES AND LIGHT INDUSTRIAL GOODS BY 11.4 PERCENT, GRAIN WAS DOWN 27.4 PERCENT AND COTTON DOWN 5.4 PERCENT.

WHILE CHINA'S EXPORTS TO VARIOUS MAJOR TRADE PARTNERS ALL REPORTED GROWTH IN THE PERIOD, LIU NOTED, ITS IMPORTS FROM MAJOR INDUSTRIALIZED NATIONS DROPPED DRAMATICALLY, DUE TO ECONOMIC SANCTIONS IMPOSED AGAINST CHINA.

DESPITE A SLOWING-DOWN OF IMPORTS FROM DEVELOPING COUNTRIES IN THE FIRST HALF OF THIS YEAR, LIU PLEDGED THAT CHINA WILL GIVE PRIORITY TO IMPORTING GOODS FROM LESS-ADVANTAGED NATIONS UNDER SIMILAR TRADE TERMS.

AT THE BRIEFING, LIU ALSO EXPLAINED THE DISCREPANCIES BETWEEN THE MOFERT FIGURE AND THE CUSTOMS FIGURE RELEASED EARLIER THIS MONTH, SAYING THE FORMER REPRESENTS TRADE TRANSACTIONS INVOLVING FOREIGN EXCHANGE PAYMENT, WHILE THE LATTER INCLUDES ALL IMPORTS AND EXPORTS.

ACCORDING TO THE CUSTOMS FIGURE, CHINA'S EXPORTS IN THE SIX MONTHS ROSE 15.4 PERCENT TO 25.7 BILLION U.S. DOLLARS WHILE IMPORTS DROPPED 17.7 PERCENT TO 23.1 BILLION U.S. DOLLARS.

Inside Business (CNN) July 22, 1990

An interview with guest T. Boone Pickens of Mesa Limited Partnership and the largest shareholder of Japanese auto part maker Koito Manufacturing. Pickens explains what he is looking to do for Koito and why he was so angry at the stockholders meeting in Japan, as well as why Mesa Limited Partnership is currently so low. Myron Kandel and panelists also discuss the Bush announcement that the budget deficit is $168 billion and possible consequences of raising taxes, the Gramm-Rudman-Hollings Bill and the

prospects for a balanced budget amendment. (Transcript #29)

Moneyline (CNN) July 20, 1990

Wall Street is finding a 3,000 point Dow as uncomfortably high as the 90 degree temperature outside; with the Dow riding high again, traders at the Chicago Board Options Exchange have something to shout about, but investors remain leery of stock options; Joseph McAlinden, Director of Equity Research at Dillon Read, talks more about the market climate and other developments; the Nikkei average fell almost 2 percent, the biggest one-day drop since April; Brazilian officials have been in New York talking about repaying some of that country's foreign debt.

TOKYO (JULY 23) KYODO - JAPAN'S CRUDE OIL IMPORTS ROSE 4.1 PERCENT IN JUNE FROM A YEAR EARLIER TO 14.35 MILLION KILOLITERS, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID MONDAY.

SAUDI ARABIA WAS LARGEST OIL SUPPLIER FOR JAPAN, WITH ITS SHIPMENTS SURGING 67.3 PERCENT TO ACCOUNT FOR 21.1 PERCENT OF TOTAL IMPORTS.

IMPORTS FROM THE UNITED ARAB EMIRATES INCREASED 21.9 PERCENT FROM THE PREVIOUS YEAR'S LEVEL TO ACCOUNT FOR 20.1 PERCENT OF THE TOTAL.

IMPORTS FROM INDONESIA ALSO PICKED UP 14.5 PERCENT. SUPPLIES FROM LATIN AMERICA AND CHINA DECLINED BY 15.0 PERCENT AND 9.8 PERCENT RESPECTIVELY FROM THE SAME PERIOD A YEAR BEFORE.

JAPAN'S DEPENDENCE FOR CRUDE OIL SUPPLIES ON THE ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES (OPEC) WAS 81.7 PERCENT.

IMPORTS OF FUEL OIL FELL 4.7 PERCENT FROM A YEAR BEFORE TO 3.66 MILLION KILOLITERS, WITH PRODUCTION OF FUEL OIL RISING 8.5 PERCENT TO 12.44 MILLION KILOLITERS.

TOKYO (JULY 23) KYODO - A MAJOR SWISS PHARMACEUTICAL MAKER SAID MONDAY IT HAS FILED SUIT IN JAPAN AGAINST 11 DOMESTIC DRUG MANUFACTURERS FOR PATENT INFRINGEMENT.

SANDOZ, BASED IN BASEL, SWITZERLAND, SAID IT IS SEEKING AN INJUNCTION AGAINST PRODUCTION BY THE COMPANIES OF ITS ZADITEN ALLERGY MEDICINE.

SHIRATORI PHARMACEUTICAL CO. AND FUJIWAKA AND CO., AN IMPORTING FIRM, ARE AMONG 18 JAPANESE COMPANIES IT HAS WARNED NOT TO FOLLOW THROUGH ON PLANS FOR ILLEGAL PRODUCTION OF THE DRUG.

THE OTHER SEVEN COMPANIES NOTIFIED BY SANDOZ WILL NOT PROCEED WITH PRODUCTION, IT ADDED.

TOKYO, JULY 23 KYODO - SEIKO INSTRUMENTS INC. SAID MONDAY ITS PLANT IN LIVINGSTON, SCOTLAND, HAS BEGUN PRODUCTION OF SMALL THERMAL PRINTERS USED IN THE PRODUCTION OF COMPUTERS AND ELECTRONIC CASH REGISTERS.

THE PLANT WAS SET UP TO BEEF UP PRODUCTION IN EUROPE IN ADVANCE OF THE MARKET INTEGRATION OF THE EUROPEAN COMMUNITY (EC), COMPANY OFFICIALS SAID.

SEIKO CURRENTLY HAS PRINTING FACTORIES IN SPAIN AND ITALY AS WELL AS IN SCOTLAND.

THE FIRM HOPES TO PRODUCE 10,000 PRINTERS MONTHLY AND EXPECTS SALES FOR THE FIRST YEAR TO REACH 400 MILLION YEN.

THE NECESSARY PARTS WILL BE SUPPLIED FROM JAPAN FOR THE FIRST TWO YEARS.

BUT APPROXIMATELY 60 PERCENT OF THE PARTS USED AT THE PLANT SHOULD BE PROCURED LOCALLY BY 1992, THE OFFICIALS SAID.

SEIKO WILL MARKET THE FINISHED PRODUCTS THROUGHOUT EUROPE VIA ITS WHOLLY OWNED WEST GERMAN SUBSIDIARY, ESTABLISHED TO MARKET ELECTRONIC MACHINES, THEY SAID.

#90204k0071 07/23/1990 ~Japanese News Agency

MANILA (JULY 23) KYODO - PRESIDENT CORAZON AQUINO ON MONDAY REJECTED SUGGESTIONS FROM LEGISLATORS TO SUSPEND FOREIGN DEBT PAYMENTS IN THE WAKE OF LAST WEEK'S STRONG EARTHQUAKE.

AQUINO MADE THE STATEMENTS IN HER "STATE OF THE NATION" ADDRESS AT THE OPENING SESSION OF THE TWO-HOUSE PHILIPPINE CONGRESS.

SHE APPEALED FOR IMMEDIATE APPROVAL OF A BILL PROVIDING 10 BILLION PESOS (426 MILLION U.S. DOLLARS) FOR GOVERNMENT EFFORTS TO REBUILD WIDE AREAS IN THE NORTHERN LUZON REGION DEVASTATED BY THE QUAKE.

THE TEMBLOR FLATTENED BUILDINGS, TRIGGERED LANDSLIDES, AND CREATED

FISSURES IN NINE CITIES AND 39 MUNICIPALITIES, AQUINO SAID. SHE ADDED THAT DAMAGE TO PROPERTIES WAS EXPECTED TO REACH 15 BILLION PESOS (638 MILLION DOLLARS).

LEGISLATORS HAVE CALLED FOR THE SUSPENSION OF PAYMENTS OF THE COUNTRY'S 26-BILLION-DOLLAR FOREIGN DEBT, WHICH EATS UP 40 PERCENT OF THE NATIONAL BUDGET, SO FUNDS COULD BE USED FOR RECONSTRUCTION OF QUAKE-RAVAGED AREAS, BUT AQUINO SQUASHED THE PROPOSAL.

SHE SAID THE GOVERNMENT HAD MANAGED TO REDUCE FOREIGN DEBT BY 4.3 PERCENT LAST YEAR AND EARNED GOODWILL AMONG ITS CREDITORS, ENABLING THE ECONOMY TO SUSTAIN ITS GROWTH SINCE SHE ASSUMED POWER.

"THIS HAS BEEN POSSIBLE ONLY BECAUSE OUR CREDITORS BELIEVE THAT THEY CAN COUNT ON OUR WORD AND COMMITMENT," AQUINO SAID. "YOU AND I MUST WORK TOGETHER TO KEEP IT THAT WAY."

TO GENERATE MORE FUNDS INTERNALLY, AQUINO ASKED THE CONGRESS TO APPROVE MEASURES IMPOSING AN "AFFLUENT CONSUMPTION TAX" AND REDUCING THE AMOUNT OF TAX DEDUCTIONS GRANTED TO BUSINESSES.

SHE ALSO APPEALED FOR PASSAGE OF A BILL CREATING THE "BASELANDS DEVELOPMENT AUTHORITY," WHICH WILL IMPLEMENT A CONVERSION PLAN DRAWN UP BY A GOVERNMENT BODY IN CASE THE PHILIPPINE AND U.S. GOVERNMENTS DECIDE NOT TO EXTEND THE LEASE ON AMERICAN MILITARY FACILITIES HERE.

U.S. AND PHILIPPINE PANELS ARE TO RESUME DISCUSSIONS NEXT MONTH ON THE FUTURE OF THE BASES, WHOSE LEASE EXPIRES IN SEPTEMBER 1991.

SHE ALSO URGED SUPPORT FOR A NEW POLICY ON POPULATION ''WHERE OUR PEOPLE MAKE THE CHOICE, WHERE THE FINAL JUDGMENT ON THE MORALITY OF THEIR CHOICES IS LEFT TO THE FREEDOM OF THEIR CONSCIENCE.''

THE POPULATION ISSUE IS CONTROVERSIAL IN THIS PREDOMINANTLY ROMAN CATHOLIC COUNTRY, WHERE THE CHURCH HAS ACTIVELY OPPOSED THE PROMOTION OF ARTIFICIAL CONTRACEPTION IN FAMILY PLANNING PROGRAMS.

#90204k0075 07/23/1990 ~Japanese News Agency

TOKYO (JULY 23) KYODO - THE FINANCE MINISTRY WILL PROPOSE A 0.3 PERCENTAGE POINT HIKE IN THE COUPON RATE ON THE AUGUST ISSUE OF 10-YEAR GOVERNMENT BONDS TO 6.7 PERCENT PER ANNUM, MINISTRY SOURCES SAID MONDAY.

THE MINISTRY WILL PRESENT THE PROPOSAL TO THE GOVERNMENT BOND UNDERWRITING SYDICATE TUESDAY AND HOLD AN AUCTION THE SAME DAY, THEY SAID.

THE RAISE IN THE COUPON RATE, THE FIRST SINCE THE APRIL ISSUE, FOLLOWS THE

RECENT SHARP FALLS IN BOND PRICES AMID PROSPECTS OF HIGHER INTEREST RATES.

THE MINISTRY PLANS TO ISSUE ABOUT 800 BILLION YEN WORTH OF 10-YEAR GOVERNMENT BONDS FOR THE MONTH.

-30- 792

#90204k0079 07/23/1990 ~Japanese News Agency

TOKYO (JULY 23) KYODO - NIPPON OIL CO., JAPAN'S LARGEST DISTRIBUTOR OF PETROLEUM PRODUCTS, AND TOMEN CORP., A GENERAL TRADING COMPANY, SAID MONDAY THEY AND AN AUSTRALIAN COAL MINER PLAN TO OFFER A JOINT TAKEOVER BID OF AUSTRALIA'S FOURTH LARGEST COAL COMPANY.

THE THREE FIRMS PLAN TO BUY A CONTROLLING INTEREST OF OAKBRIDGE, CAPITALIZED AT 138 MILLION AUSTRALIAN DOLLARS, FOR 260 MILLION AUSTRALIAN DOLLARS OR 31 BILLION YEN, THE FIRMS SAID.

IF THE DEAL IS SUCCESSFUL, NIPPON OIL WILL BUY A 23 PERCENT STAKE IN THE FIRM, WITH TOMEN ACQUIRING 25 PERCENT. THE REMAINING 52 PERCENT WILL BE PURCHASED BY SYDNEY-BASED MCILWRAITH MCEACHARN LTD., THEY SAID.

PURCHASE OF THE FIRM'S STOCK IS SCHEDULED TO BE COMPLETED BY EARLY SEPTEMBER.

OAKBRIDGE OWNS MANY RICH COLLIERIES IN NEW SOUTH WALES AND ITS COAL RESERVES ARE ESTIMATED AT 600 MILLION TONS, THEY SAID.

NEW ZEALAND'S ELDERS RESOURCES NZFP LTD. CURRENTLY OWNS A 75 STAKE IN OAKBRIDGE, THE COMPANIES SAID.

NIPPON OIL DECIDED TO JOIN THE BIDDING CONSORTIUM, LED BY MCILWRAITH, TO TAKE OVER OAKBRIDGE, AFTER HEARING OF ELDERS' PLANS TO SELL THE FIRM'S STOCK PROMPTED BY ITS FINANCIAL DIFFICULTIES.

#90204k0080 07/23/1990 ~Japanese News Agency

TOKYO (JULY 23) KYODO - SHIPMENTS OF LARGE AND SMALL OFFICE COMPUTERS SHOWED SIZABLE GROWTH IN FISCAL 1989 WHILE SALES OF MEDIUM-SIZED COMPUTERS WERE DEPRESSED, AN INDUSTRY ASSOCIATION SAID MONDAY.

THE JAPAN ELECTRONIC INDUSTRY DEVELOPMENT ASSOCIATION SAID SHIPMENTS OF OFFICE COMPUTERS VALUED AT MORE THAN 40 MILLION YEN PER UNIT GREW 93 PERCENT OVER THE PRECEDING YEAR AND THOSE PRICED AT BELOW 3 MILLION YEN INCREASED 25 PERCENT.

BUT SHIPMENTS OF MOST OF OFFICE COMPUTERS VALUED BETWEEN 3 MILLION AND 40 MILLION YEN SHOWED NEGATIVE GROWTH, IT SAID.

ASSOCIATION OFFICIALS ATTRIBUTED THE TREND TO THE FACT THAT OFFICE COMPUTER MAKERS IN THE PAST FEW YEARS HAVE PUT NUMEROUS NEW LARGE-CAPACITY MODELS ON THE MARKET IN SUCCESSION, AND USERS HAVE TENDED TO PURCHASE WORK STATIONS VALUED AT LESS THAN 3 MILLION YEN AS TERMINALS FOR LARGE COMPUTERS.

FOR THE CURRENT BUSINESS YEAR, WHICH STARTED ON APRIL 1, THE ASSOCIATION FORECASTS OVERALL OFFICE COMPUTER SHIPMENTS OF 185,735 UNITS, AN INCREASE OF 14.5 PERCENT OVER THE PRECEDING YEAR.

IN VALUE THE SHIPMENTS WILL SHOW A DROP OF 2.6 PERCENT TO 598.2 BILLION YEN, THE OFFICIALS SAID.

THE DECLINE IN VALUE IS EXPECTED BECAUSE IBM JAPAN HAS STOPPED RELEASING DATA THIS YEAR. ACTUAL VALUE IS EXPECTED TO SHOW A DOUBLE-DIGIT GROWTH, THE OFFICIALS SAID.

-30- 1492

#90204k0082 07/23/1990 ~Japanese News Agency

TOKYO (JULY 23) KYODO - NEC CORP. MONDAY ANNOUNCED THE ESTABLISHMENT OF A STRATEGIC INFORMATION SYSTEM (SIS) FOR ITS SEMICONDUCTOR DEVICE GROUP TO MAINTAIN ITS SUPERIORITY IN THE BUSINESS.

IN THIS SIS, A KIND OF MANAGEMENT INFORMATION SYSTEM, SEMICONDUCTOR PRODUCTION AND SALES OUTPOSTS THROUGHOUT THE WORLD ARE NETWORKED ON-LINE, USING 50 GENERAL-PURPOSE COMPUTERS AND ABOUT 5,000 TERMINALS, OFFICIALS SAID.

THE SYSTEM, NAMED "GAINS" (GLOBAL AND INTEGRATED INFORMATION SYSTEM FOR NEC SEMICONDUCTOR GROUP), MANAGES ALL THE INFORMATION, COVERING THE RECEIPT OF ORDERS, PRODUCTION AND SHIPMENTS OF SEMICONDUCTOR DEVICES.

THE OFFICIALS SAID THAT UNDER THE NEW SYSTEM, NOW IN FULL OPERATION, NEC MAY IMMEDIATELY REPLY TO CUSTOMER INQUIRIES ABOUT DELIVERY DATES, AND OFFER CLIENTS QUICKER LEAD TIMES (THE TIME NEEDED FROM THE RECEIPT OF AN ORDER TO DELIVERY).

-30- 1041

#90204k0093 07/23/1990 ~Japanese News Agency

OSAKA (JULY 23) KYODO - A TOP EXECUTIVE OF KUBOTA LTD. ON MONDAY DENIED THAT HIS COMPANY USED ITS FINANCIAL STAKE IN A SILICON VALLEY SUPERCOMPUTER FIRM TO ILLEGALLY TRANSFER TECHNOLOGY TO A WHOLLY OWNED KUBOTA SUBSIDIARY.

MASAHIRO YOSHIDA, MANAGING DIRECTOR OF THE OSAKA-BASED TOP MAKER OF FARM

MACHINERY AND STEEL PRODUCTS, SAID HIS COMPANY WOULD FIGHT A 50 MILLION DOLLAR DAMAGE SUIT FILED IN CALIFORNIA ON JULY 12 BY ALLEN MICHELS AND MATTHEW SANDERS, FOUNDERS OF ARDENT COMPUTER COMPANY.

THE PAIR ALLEGES IN THE LAWSUIT THAT KUBOTA USED THE STAKE IT BOUGHT IN ARDENT IN 1986 TO FORCE THE SUNNYVALE, CALIFORNIA FIRM INTO AN EVENTUAL MERGER WITH THE FINANCIALLY TROUBLED STELLAR COMPUTER COMPANY OF NEWTON, MASSACHUSETTS.

KUBOTA THEN USED ITS 22 PERCENT STAKE IN THE MERGED COMPANY, CALLED STARDENT COMPUTER INC., TO TAKE CONTROL OF THE FIRM'S GRAPHICS COMPUTER TECHNOLOGY AND TRANSFER IT TO KUBOTA'S WHOLLY OWNED CALIFORNIA SUBSIDIARY, ACCORDING TO THE PLAINTIFFS.

THE SUIT ALLEGES THAT KUBOTA ''SECRETLY PLANNED TO DEVELOP PRODUCTS THAT WOULD COMPETE WITH STARDENT,'' DESPITE ASSURANCES THAT IT WOULD NOT DO SO.

YOSHIDA SAID KUBOTA IS WILLING TO REACH A FINANCIAL SETTLEMENT WITH THE PLAINTIFFS IF THEY RESCIND THEIR CHARGES OF WRONGDOING AGAINST THE JAPANESE COMPANY.

#90204m0001 07/23/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 23) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The Nikkei average fell 526.73 to 31,894.79. ... The FT 100 is down 3.8 at 2396.3 in light trading. ... The DAX index has fallen 6.48 at 1940.45. ... TEXAS INSTRUMENTS reported a 98% plunge in second- quarter earnings on Friday and ADVANCED MICRO DEVICES INC., announced it lost money for the quarter. The news sent both stocks into a tailspin and many other technology stocks followed. ... BOEING says it is holding discussions with government-owned aircraft companies in Italy and France about selling its de HAVILLAND division. ... AMERICAN BRANDS INC. says its MASTERBRAND INDUSTRIES subsidiary has agreed to purchase MOEN GROUP INC., a maker of kitchen and bathroom faucets, from FORSTMANN LITTLE & CO. for $975 million in cash. ... CATERPILLAR says its second-quarter earnings fell 67% from last year, confirming expectations and in line with its projection for stagnant earnings for the full year. The RESOLUTION TRUST CORP. agrees to pay $21 million to holders of now-worthless bonds sold by AMERICAN CONTINENTAL CORP., parent of the failed LINCOLN S&L, to settle $350 million in claims.

WHAT'S AHEAD:

FEDERAL RESERVE CHAIRMAN ALAN GREENSPAN appears before the HOUSE BANKING COMMITTEE tomorrow to discuss monetary policy and the LABOR DEPARTMENT releases its second-quarter employment cost index. ... Also due tomorrow is the mid-July report on auto sales. ... The COMMERCE DEPARTMENT reports on durable goods Wednesday and issues its advance report for second-quarter gross national product on Friday. today to take over part of EASTERN AIRLINES assets and sell the rest to the benefit of Eastern creditors.

FROM THE BULLS:

JON FOSSEL, president and chief executive officer of OPPENHEIMER MANAGEMENT CO., is bullish on the broad market, although not necessarily the Dow. "My view is that, in the shorter term, the Dow is very close to, or has reached the top. ... I don't think the market has reached the top. There's a lot of stocks underneath that 'Thriving 30,' ... the 30 Dow stocks, that just haven't done well at all and I think there is a lot of upside" for these stocks here in the United States and abroad. ("Wall Street Week", 7/20)

FROM THE BEARS:

Columnist JOHN CRUDELE takes a look in "The Washington Post" at several so-called "cyclists" who see a skidding stock market ahead. "The big decline should start by the end of this year," says PETER ELIADES, author of "Stock Market Cycles" newsletter. He believes the Dow will be down to 1000 by 1992 or 1993. WALTER STUDNICKI, who writes the "Turning Point" newsletter, sees the Dow in the 1500-to- 1700 range by 1992. MICHAEL JENKINS, author of "Stock Cycles Forecast," says a 1,000-point fall is likely to start as soon as the current optimism fades -- perhaps as early as this week. He sees the Dow settling at about 1400 in two or three years. "The current Dow pattern seems to be following a pattern that is eerily similar to both 1987 and 1929 and both ended in complete collapses of the stock market," says Jenkins. ("The Washington Post", 7/22)

STOCK MARKET:

KEN DUCEY, chief trader at S.G. WARBURG, is among those looking for a choppy week ahead in the market. "What happened Friday could spill over and it could last for a while, until earnings [problems] work their way out of everyone's system," says Ducey. ("USA Today", 7/23)

The market's failure on Friday to trade above the previous day's high of 3006 disturbs COURTNEY SMITH at PINNACLE CAPITAL MANAGEMENT, who says the sell-off at the close was no confidence builder. "I look for the market to chop sideways-to-lower over the coming week, but I think we might see some bull move the week after that." (FNN "World Business Update", 7/23)

"As long as the Dow stays above 2940," the rally will continue, says PHILIP RETTEW of MERRILL LYNCH. "You should stay with that until various important stocks start cracking their trendlines." (CNBC "Market Wrap-Up" 6/20)

"They are making mincemeat out of some of the tech stocks," says TRUDE LATIMER of JOSEPHTHAL & CO. "I don't think this is good news for anyone in the stock market." Still, she says she does not see the sell-off in technology stocks snowballing into a general decline. "The Dow may consolidate in the high 2900s. And if it does, it will be able to go much higher if it breaks through resistance" at 3006. ("Investor's Daily", 7/23)

"Today would be better described as deck-the-tech day," says MARSHALL ACUFF, portfolio strategist at SMITH BARNEY, HARRIS UPHAM & CO., on the Dow's route of technology stocks in the last half-hour of trading Friday. (Reuters, 7/20)

"As the market has been rallying, institutions have been coming in and putting in buy programs," says JOSEPH LEO of STOVALL/TWENTY-FIRST ADVISERS. Leo says there "was not enough premium to roll forward," on options contracts, and therefore Friday's expirations created selling pressure to "lock in profits." He sees a fall to around 2890 "with no problem." (CNBC "Market Wrap-Up", 7/20)

"It has become an extremely fragile market," says BRADLEY TURNER of McDONALD & CO. "We've seen lots of disappointments the past few days and you need better earnings to drive the market at these levels." ("USA Today", 7/23)

The budget summit is "weighing on the market," according to BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "The affluent among us - who are very important in the stock market - are a little worried that their taxes are going to go up ... with good reason," says Wolman. (CNBC "Market Wrap-Up", 7/20)

"The thing that amazes me is the fixation on this [Dow] 3000," says HARVEY EISEN. "The broad market has not participated in rally in the Dow at all. ... One of two things has to happen: Either these blue chips have to drag the rest of the market up with it, or the reverse. ... I think we probably are in a correction, but I've never been able to figure that out." ("Wall Street Week", 7/20)

ROBERT FARRELL, chief market strategist for MERRILL LYNCH, suspects corporations are on the verge of becoming net sellers of stock after seven years of being net buyers. "Now corporations will start using any opportunity they get to sell equity in order to pay down debt and reduce interest costs," says Farrell. (NYT, 7/23)

"There is a continuing, slow groundswell of people trying to put money to work in equities," says MICHAEL LIPPER of LIPPER ANALYTICAL SERVICES. "I think there's a little fear that they may be missing this market." (CNBC "Market Wrap-Up", 7/20)

"As various companies and industries are coming up with disappointing earnings, they lose favor with investors, and the group that is consistently showing good, stable earnings is getting smaller and smaller " says MARY FARRELL. "We're moving towards that 'Nifty 50' like we saw 20 years ago. But she says "we've turned the corner on earnings" and if interest rates drop "we could move ahead." ("Wall Street Week", 7/20)

STOCK TIPS:

MARY FARRELL says the real growth for the 1990s will be overseas and that means investors should look at companies like PHILIP MORRIS, COCA-COLA and MCDONALD'S because "they have a whole world open to them and can continue earnings growth." ("Wall Street Week", 7/20)

MICHAEL ROSEN, who tracks the defense industry for SMITH BARNEY, says now is "not [the] time to do any bottom fishing" among defense stocks. "We are going to continue to see significant defense budget cuts over the next three to four years and I don't really think that this is yet fully reflected in the prices of these stocks. ... I see a long down cycle." He has BOEING rated as a hold because he says it is positioned to "fare quite well" over the long-term. But GENERAL DYNAMICS, NORTHROP, LOCKHEED, GRUMMAN and McDONNELL DOUGLAS are all on his sell or avoid list. ("Barron's", 7/23)

An emerging industry that specializes in helping customers reduce health care costs is featured this morning in the "Investor's Corner" section of "Investor's Daily." The paper lists the following companies as "promising:" MICRO HEALTHSYSTEMS, HEALTHCARE COMPARE, EMPLOYEE BENEFIT PLANS, AMERICAN CLAIMS EVALUATION INC., PREFERRED HEALTH CARE LTD., POLICY MANAGEMENT SYSTEMS CORP. and CIS TECHNOLOGIES INC. ("Investor's Daily", 7/23)

ROBERT NATALE, editor of STANDARD & POOR'S "Emerging & Special Situations" newsletter, says investors who are thinking about jumping on the new-issues bandwagon had better jump quick. "In the beginning of the year you could buy an IPO in the immediate aftermarket and still expect a very good return over the next three months," he says. "Now, much of the performance is compressed into the first day." (WSJ, 7/23)

"I've got a rule of investing I call the cocktail party or barbecue index " says JON FOSSEL, president and chief executive officer of OPPENHEIMER MANAGEMENT CO. "You go to cocktail parties and barbecues and when you

hear people talking about something, that's what you don't buy. And when you hear them saying, 'I just sold this or I'm not buying that' that's what you do buy. Today they're not talking about investing in capital appreciation and growth stocks, so maybe that is what you should buy." Fossel continues, "Biotechnology ... is going to be as big in 20 years as the semiconductor industry is today." He adds that he can't predict which companies will do best so "I just buy them all." Even though some will be losers, others will be big winners, he says, and for a long-term industry, investment biotech is "like shooting fish in a barrel." ("Wall Street Week", 7/20)

-30- 10088

#90204m0002 07/23/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 23) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

So why are long-term interest rates higher a week after the Fed eased monetary policy? "The fed has eased and the [bond] market is questioning the Fed's motives," says CHARLES LIEBERMAN, managing director at MANUFACTURERS HANOVER SECURITIES CORP. "They are worried that the Fed has eased because of political pressures and that more inflation will result if in truth the economy does not really need more easing." Among those worrying is WILLIAM SULLIVAN, director of money market research at DEAN WITTER REYNOLDS. "Now we have the chairman of the Federal Reserve playing riverboat gambler and guaranteeing us better July consumer price numbers," says Sullivan. He says the Fed is not showing "the same commitment to fighting inflation" that it did previously. ("Investor's Daily", 7/23)

And why is the bond market getting all worked up over fears the Fed is abandoning the fight against inflation? EDWARD YARDENI of PRUDENTIAL-BACHE suggests it could be the humid, summer weather that has settled over New York City. "The bond market is a collection of humans who are prone to emotional mood swings," he says. "Right now, it's hot and everybody's a little cranky." (WSJ, 7/23)

"This new attention to sustaining the economic expansion and offsetting unintended restrictions in credit availability suggests that there is now less hope that the inflation premium in United States bond yields will be eliminated soon," says RICHARD BERNER, an economist at SALOMON BROTHERS. "Accordingly, bond investors are presented with a standoff: Although a sluggish economy likely will not boost inflation, policy makers likely will not wring it out. This closes off the possibility that yields will dip significantly further." (NYT, 7/23)

"FEDERAL RESERVE CHAIRMAN ALAN GREENSPAN wants a reason to cut interest rates," says DONALD RATAJCZAK, economist at GEORGIA STATE UNIVERSITY. "Rates will come down, but not enough to warrant sitting on a house contract for three months." ("USA Today", 7/23)

Long-term rates are moving higher even though the Fed has moved to ease credit. "The moves the Fed has undertaken to ease credit have really been quite minimal," says ABBY COHEN of BARCLAYS DE ZOETE WEDD. She says Greenspan's actions on the Fed funds rate have more to do with easing credit availability to specific borrowers and less to do with the overall economy. Continuing inflation concerns in the United States and comparatively high overseas interest rates have continued to maintain upward pressure on domestic interest rates. (FNN "World Business Update", 7/23)

"Betting on politicians is not some place that you make any money, but I really think that for the first time the odds of having a significant budget compromise, and having it in a matter of a very few weeks, and then having Greenspan follow it with reducing rates, I think, are very high," says JON FOSSEL, president and chief executive officer of OPPENHEIMER MANAGEMENT CO. "And if that were to happen, bond prices are going to go way up. ... I think within the next two years, you are going to see short rates under 6%, maybe closer to 5, and I think you're going to see long rates down to 7 or 7 1/2." ("Wall Street Week", 7/20)

The RESOLUTION TRUST CORP's unveiling of its junk bond inventory depressed prices, but analysts say the news has finally removed uncertainty that has been looming over the high-yield market for months. "I think it's a positive for the market. This lifts the uncertainty about what the RTC holds," says BOB LUPO, managing director at FIRST CHICAGO CAPITAL MARKETS. (Reuters, 7/20)

"We've had a very quiet [currency] market here," in Japan, says JOHN LILLEY of MMS INTERNATIONAL. "They basically are trading the ranges until they can see another big move on the side of the Fed or an actual clear signal from the [Bank of Japan]." (CNBC "World Business Update", 7/23)

"Sterling is really reflecting dollar weakness," says PAUL CHERTKOW of CITIBANK. "There's a general feeling that when the dollar weakens in Europe, the best play is the higher yielding one and that means people are going into the U.K." (FNN "World Business Update", 7/23)

THE ECONOMY:

"We're really talking about a sluggish quarter," says DONALD RATAJCZAK, economist at GEORGIA STATE UNIVERSITY, in looking ahead to Friday's second-quarter GNP report. "And the odds are about one in three that we'll have a recession next year." ("USA Today", 7/23)

"If the employment cost numbers [tomorrow] are above 5%, it's kind of hard to see how inflation is coming down," says WILLIAM GRIGGS, a managing director at GRIGGS & SANTOW INC. "From our point of view, we think there is a continuing inflation problem. But the Fed seems more inclined to ease policy." (NYT, 7/23)

MONTE GORDON of DREYFUS CORP. says President Bush's willingness to accept a tax increase to reduce the federal budget deficit, coupled with the Fed's signal that a meaningful budget deal would spur lower interest rates are "very significant developments of watershed proportions." ("Wall Street Week", 7/20)

IN WASHINGTON:

"The thing the administration's bill to transfer jurisdiction [over stock-index futures to the SECURITIES AND EXCHANGE COMMISSION] has done is to galvanize the securities industry in a manner I haven't seen in my 20 years in the business," says JOSEPH HARDIMAN, president of the NATIONAL ASSOCIATION OF SECURITIES DEALERS. ("Investor's Daily", 7/23)

Investment advisors now pay a one-time registration fee of $150 to the SECURITIES AND EXCHANGE COMMISSION. SEC COMMISSIONER MARY SCHAPIRO would like Congress to give the SEC the authority to charge a higher annual fee to cover the actual cost of regulating investment advisors. "If Congress was willing to do that, we would have the funds necessary to inspect investment advisors on a regular basis," says Schapiro. (CNN "Business Day", 7/23)

Mirroring concern about a seven-fold rise in foreign investment in United States companies in the last decade, Congress is considering 21 bills that would help the government assess the extent of foreign ownership and its impact on the economy. (NYT, 7/23)

#90204p7256 07/23/1990 ~PR Newswire

NEWPORT BEACH, CA (JULY 23) PR NEWSWIRE - Pacific Scientific Company (NYSE: PSX), a manufacturer of applied-technology products for industry and aerospace, today reported results for the second quarter and six months ended June 29, 1990. According to the announcement made by Chairman, President & Chief Executive Officer Edgar S. Brower, the company reported a 12 percent quarterly revenue increase and the company's highest quarterly net income since 1985, with quarterly revenues of $46.9 million and net income of $1.8 million or $0.30 per share, compared to revenue of $41.9 million with net income of $859,000 or $0.14 per share for the second quarter of the previous year. The previous year's second quarter included an extraordinary gain of $474,000 or $0.09 per share realized based on the repurchase, at a discount, of approximately $2.1 million of the company's outstanding convertible subordinated debentures.

For the six months, revenue was $91.7 million with net income of $2.7 million or $0.45 per share, compared to the previous year's six month revenue of $84.3 million with net income of $1.7 million or $0.29 per share. The previous year's six-month period included an extraordinary gain of $989,000, or $0.18 per share, from the repurchase of outstanding debentures.

In commenting, Brower said, "Pacific Scientific should, based on current economic indicators, continue to report improved earnings for the remainder of the year. Prospects for our aerospace products remain good, and new products are being developed to increase orders from the commercial aircraft industry. We are especially encouraged by the performance of our brushless motors and our electrical utility products."

Second-quarter orders totalled $46 million; company backlog stood at $98 million at quarter's end. For the six months, orders in the Aerospace segment totalled $49 million, an increase of 11 percent over the previous year. Orders for brushless motors used primarily in factory and robotics automation increased by 18 percent, but orders for motors used in data processing declined as did orders for motors used primarily in consumer

products. Orders for equipment sold to electric utilities increased 18 percent. Overall, orders for the company's industrial products totalled $43 million for the six months, a decrease of 8 percent when compared to 1989.

Included in the quarter's results were two unusual items: the sale of the Sigma Division's relay product line, and a recall of a product line from the same division, newly renamed the Fisher Pierce Division, to provide additional safety features. The sale of the relay product line added $0.11 per share, while the recall diminished earnings by $0.06 per share.

Pacific Scientific's core business is designing, manufacturing and marketing technology based proprietary products for niche markets. The principal industrial products include electric motors and controls, and measurement and control instruments and devices. Aerospace products include fire detection and suppression systems, aircraft equipment and electric generators and alternators.

DENVER (JULY 23) PR NEWSWIRE - Unique Mobility Inc. (OTC "Pink Sheets") announced today that all 18 of the solar race cars powered by UNIQ(R) motor and controller systems completed the GM Sunrayce USA which began July 9 in Lake Buena Vista, Fla., and ended July 19 at the GM Tech Center in Warren, Mich.

GM Sunrayce USA was North America's largest ever competition for solar vehicles, with cars built by 32 teams of college students following a 1,600-mile route of country and secondary roads through eight states.

Finishing first overall was the University of Michigan's "Sunrunner" with an average speed of just over 22 mph and a cumulative elapsed time of 72 hours, 51 minutes, 14 seconds. The first UNIQ(R)-powered car, Western Washington University's "Viking XX," finished second, approximately 90 minutes behind. Also on UNIQ(R) power were the third and fourth place finishers, the University of Maryland's "The Pride of Maryland," and Cal State, Los Angeles' "Solar Eagle," respectively.

The "Pride of Maryland" was the top qualifier at 52 mph and finished first on four of the 11 days of racing. Other teams winning daily races on UNIQ(R) power were Cal State (2), Western Washington (1), and Worcester Polytechnic (1), for a total of eight out of 11 daily wins. Worcester Polytechnic and Maryland finished one-two in the half-mile hill climb at Churchill Downs, Ky.

For their accomplishments, the top three finishing teams will be sponsored by General Motors to compete in the 1990 World Solar Challenge race in Australia in November.

Unique and its venture partner, Alcan Aluminum Ltd., developed the UNIQ(R) solar car drive system from a highly efficient, electronically controlled power dense permanent magnet motor that develops nearly two horsepower per pound of motor weight -- a virtual breakthrough in efficient traction drives for electric vehicles of the future. The GM Sunrayce USA was its first -- but by no means its last -- demonstration of performance and reliability in a rugged over-the-road environment.

Unique Mobility, a publicly-held Colorado-based engineering company, is currently involved in a variety of electric and hybrid electric vehicle programs designed to improve vehicle operating efficiency while reducing pollution.

NEWARK, CALIF. (JULY 23) PR NEWSWIRE - California-based Ross Stores Inc. (NASDAQ: ROST) is continuing its expansion in the Orlando area. The off-price retailer announced today that the region's seventh Ross "Dress For Less" store will grand open in Altamonte Springs, Fla. on Sunday, July 29.

Ross chose the 25,000 square foot site because of its excellent location in Renaissance Centre, near the intersection of State Route 436 and I-4, at the entrance to Altamonte Mall, one of the most successful malls in Florida. Cotenants at the new center include J. Byron's, Linens 'n Things and J.C. Penney Portfolio.

"This is a premier site for Ross," stated Norman A. Ferber, president and chief executive officer. "We love Orlando, and this new store enables us to better meet the needs of our valued customers in this market." The off-price retailer is also opening a new store this month in the Miami area, and will now operate a total of 22 stores in Florida.

The new Altamonte Springs location is one of eight new Ross "Dress For Less" stores grand opening this month. This latest group of openings keeps the company on track with its plans to add a total of approximately 30 stores during 1990. The other new stores are opening during July in existing markets in California, Washington, New Mexico and Maryland. In addition, Ross is entering the Philadelphia/South New Jersey area, its first major new market since 1986, with a new store near Princeton, N.J.

In commenting on the company's strategy, Ferber continued, "In an effort to differentiate Ross in today's competitive environment, we offer our customer an off-price shopping experience that emphasizes terrific values not only on the individual item, but also on in-depth assortments of recognizable, name brand merchandise, in styles and colors that reflect current fashions. In addition, all new stores feature an innovative layout that was introduced last year to create a more exciting and pleasant atmosphere, as well as make our stores easier and quicker for the customer to shop."

Including the eight new locations being opened this month, Ross will now

operate a total of 169 stores in 16 states coast-to-coast. During 1989, the company posted profits of $30 million on sales of $741 million. The off-price retailer offers first quality, in-season, branded apparel and footwear for the entire family at 20 percent to 60 percent less than department and specialty store prices, as well as complete departments for accessories, cosmetics and fragrances at similar savings.

NEWARK, CALIF. (JULY 23) PR NEWSWIRE - California-based Ross Stores Inc. (NASDAQ: ROST) today announced that eight new ROSS "Dress For Less" stores will grand open on Sunday, July 29. This latest group of openings keeps Ross on track with its plans to add a total of approximately 30 stores during 1990.

Seven of the eight stores are located in the retailer's existing markets in the states of California, Washington, New Mexico, Florida and Maryland. Ross will also be entering the Philadelphia/South New Jersey market, with the grand opening of its store in Lawrenceville, N.J., three miles southeast of Princeton. "This is our first major new market since 1986," stated Norman A. Ferber, president and chief executive officer, "and we plan to open an additional three to five stores in this region in the fall of this year."

In commenting on the company's strategy, Ferber continued, "In an effort to differentiate Ross in today's competitive environment, we offer our customer an off-price shopping experience that emphasizes terrific values not only on the individual item, but also on in-depth assortments of recognizable, name brand merchandise, in styles and colors that reflect current fashions. In addition, all new stores feature an innovative layout that was introduced last year to create a more exciting and pleasant atmosphere, as well as make our stores easier and quicker for the customer to shop."

NEWARK, CALIF. (JULY 23) PR NEWSWIRE - California-based Ross Stores Inc. (NASDAQ: ROST) is entering its first major new market since 1986. The off-price retailer announced today that a new Ross "Dress for Less" in Lawrenceville, N.J. will grand open on Sunday, July 29.

The 24,000 square foot store is situated in Mercer Mall, an established strip center located at the northwest corner of Quaker Bridge Road and Route 1 in Lawrenceville. The site is only one mile from the I-295/I-95 highway loop and three miles southeast of Princeton University. Mercer Mall cotenants include K-Mart, T.J. Maxx, Kids R Us and Drug Emporium. The regional Quaker Bridge Mall is directly across U.S. 1 from the new Ross location.

"It is very important that our first store in this new market for Ross be successful," stated Norman A. Ferber, president and chief executive officer, "and this is why we chose Mercer Mall, with its excellent location and strong assortment of cotenants. We believe this premier site will provide us with instant recognition and strong visibility." An additional three to five Ross "Dress for Less" stores will also open in the South New Jersey and Philadelphia area in the fall of this year.

The new Mercer Mall location is one of eight new Ross "Dress for Less" stores grand opening this month. This latest group of openings keeps the company on track with its plans to add a total of approximately 30 stores during 1990. The other new stores are opening during July in existing markets in California, Washington, New Mexico, Florida and Maryland.

NEWARK, CALIF. (JULY 23) PR NEWSWIRE - The Ross (NASDAQ: ROST) "Dress For Less" store at the intersection of Market and Fourth Streets in downtown San Francisco has added a new third floor and completed a total remodel. Special grand opening events to celebrate the bigger and better Ross will be held throughout the week of Sunday, July 29.

The newly remodeled store is now almost 40 percent larger and features several new departments, including children's apparel and shoes and fashion lingerie. Gift Express will also be added on the third floor, offering gift items such as china, silver, glassware, framed art, and picture frames.

The existing space has also been totally redesigned with new fixtures and larger departments to better meet the needs of the customers in this downtown market. The main level is devoted to expanded merchandise offerings of career Misses Sportswear and Dresses as well as Cosmetics, Fragrances and Accessories. Traditional Men's and Attitudes for Her, Women's World, Petites and active Misses Sportswear assortments will be featured on the new third level.

This Ross "Dress For Less" is the retailer's only downtown urban location and one of its largest and best performing stores. Ross also operates existing stores nearby on Geary Street between 16th and 17th Avenues in San Francisco and at Serra Center in Daly City.

The Market Street store joins eight other new Ross "Dress For Less" stores grand opening this month. This latest group of openings keeps the company on track with its plan to add a total of approximately 30 stores during 1990. The other new stores are opening during July in California, Washington, New Mexico, Florida and Maryland. In addition, Ross is entering the Philadelphia/South New Jersey area, its first major new market since 1986, with a new store near Princeton, N.J.

NEWARK, CA (JULY 23) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today announced that a new Ross "Dress For Less" store will grand open in Kendall, Fla., on Sunday, July 29.

The 26,000 square foot store is located in the new Kendall I Plaza near the intersection of U.S. 1 and Kendall Drive, across from the Dadeland Mall. Ross will co-anchor the center with Lionel Playworld.

The Dadeland store is the second Dade County site for the off-price retailer. The Ross "Dress For Less" at Kendall Town and Country Mall, located approximately five miles west of the new Kendall I Plaza store, opened in November of last year. To capitalize on the strong retail sales in this dynamic market, Ross has targeted the Dade County area for future growth. The company plans to open two more stores in the fall of this year at Westchester Shopping Center in Miami and Westland Promenade in Hialeah.

Another Florida Ross "Dress For Less" is also grand opening this month in Altamonte Springs, near Orlando. The company will now operate a total of 22 stores in this state.

The new Dadeland location is one of eight new Ross "Dress For Less" stores grand opening this month. This latest group of openings keeps the company on track with its plans to add a total of approximately 30 stores during 1990. The other new stores are opening during July in existing markets in California, Washington, New Mexico and Maryland. NEWARK, CA (JULY 23) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today announced that a new Ross "Dress For Less" store will grand open in Bellingham, Wash., on Sunday, July 29.

The 26,000 square foot Ross "Dress For Less" is in Meridian Village, an existing shopping center conveniently located across from Bellis Fair Mall on Meridian Street, near Interstate 5 at Telegraph Road. Ross cotenants include Safeway, Ernst Home Center and Pay N' Save.

The off-price retailer currently operates nine existing stores in Washington, concentrated mostly in the Seattle area. Bellingham is the tenth Ross "Dress For Less" store in the state and broadens the retailer's

geographic presence in the Northwest. This is a key location for Ross, allowing the retailer to capitalize on the strong growth in this market.

The new Bellingham location is one of eight new Ross "Dress For Less" stores grand opening this month. This latest group of openings keeps the company on track with its plans to add a total of approximately 30 stores during 1990. NEWARK, CALIF. (JULY 23) PR NEWSWIRE - California-based Ross Stores Inc. (NASDAQ: ROST) is continuing its aggressive expansion in the Washington metropolitan area. The off-price retailer announced today that the region's eighth Ross "Dress For Less" will grand open on Sunday, July 29, in Waldorf, Md.

The 25,000 square foot store is opening in the recently renovated and expanded Festival at Waldorf center. The site is conveniently located at the intersection of U.S. Route 301 and Maryland Route 5, about 22 miles southeast of Washington. Cotenants include A&P Super Fresh, Circuit City Roses, Sears Outlet and Lionel Kiddie City Toys.

This is a key location for Ross, allowing the company to capitalize on the strong growth in this market. The off-price retailer operates existing

Ross "Dress For Less" stores in Greenbelt and Rockville, Md., as well as Burke, Potomac Mills, South Alexandria, Fairfax and Manassas, Va.

The Festival at Waldorf location is one of eight new Ross "Dress For Less" stores grand opening this month. This latest group of openings keeps the company on track with its plans to add a total of approximately 30 stores during 1990. Six other new stores are opening during July in existing markets in California, Washington, New Mexico and Florida. In addition, Ross is entering the Philadelphia/South New Jersey area, its first major new market since 1986, with a new store near Princeton, N.J.

In commenting on the company's strategy, Norman A. NEWARK (CALIF. JULY 23) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today announced that a new Ross "Dress For Less" store will grand open in Albuquerque, N.M., on Sunday, July 29.

The 26,250 square foot store is located in Market Center West, at the northwest corner of Coors Boulevard and Paseo del Norte. Target will join Ross Stores as an anchor in the first phase of the new regional center. This is a key location for Ross, allowing the retailer to capitalize on the strong growth in this market.

Market Center West is the second Albuquerque store for Ross, with an existing store in the Vista Grande Shopping Center, five and a half miles east of the new Market Center West location. The off-price retailer will now operate a total of 19 stores in the mountain states of New Mexico, Arizona, Colorado and Utah.

The new Albuquerque location is one of eight new Ross "Dress For Less" stores grand opening this month. This latest group of openings keeps the company on track with its plans to add a total of approximately 30 stores during 1990. Six other new stores are opening during July in existing markets in California, Washington, Maryland and Florida. ELMIRA, N.Y. (JULY 23) PR NEWSWIRE - Schweizer Aircraft has announced plans to fly the prototype of its new Model 330 turbine helicopter to Buffalo, N.Y. on Friday in conjunction with the national conference of the Airborne Law Enforcement Association. The Schweizer 330 will land at the Buffalo Naval Park at 6:30 p.m. on July 27 and is scheduled to be on static display at the park for approximately one hour.

As an additional bonus, at 7:15 p.m. the Erie County Sheriff's Department will demonstrate the water rescue capabilities of its Schweizer Model 300C helicopter.

Schweizer is currently working on production engineering, production tooling, and certification of the Model 330. The first production Model 330 is under way and deliveries are expected to begin in the fall, 1991. The company anticipates a strong commercial market for the 330, especially in the area of airborne law enforcement.

Schweizer Aircraft is hosting Friday night admittance to the Buffalo Naval Park in conjunction with the national A.L.E.A. conference.

MINNEAPOLIS (JULY 23) PR NEWSWIRE - CPW S.A., a jointly owned venture of General Mills (NYSE: GIS) and Nestle S.A., today announced the signing of a definitive contract for the purchase of the UK breakfast cereal business of Ranks Hovis McDougall PLC through a newly formed partnership of both companies called Cereal Partners UK. The agreement has been approved by RHM's board of directors with consummation expected on or before Aug. 17,

1990.

The above partners have agreed to pay RHM No. 93 million for the business, including fixed assets, stock and goodwill and a piece of land adjacent to one of the premises. RHM will be retaining net assets, principally debtors and creditors.

RHM Breakfast Cereals, headquartered in London, is a division of RHM Foods a wholly owned subsidiary of Ranks Hovis McDougall PLC. It operates the third largest breakfast cereal business in the UK, producing both branded and private label products. The business includes the Shredded Wheat Company, Viota Foods and A.C. Fincken Limited, each of which operates its own manufacturing facilities. Major brands include Shredded Wheat and Shreddies.

CPW S.A. was formed earlier this year by General Mills and Nestle to manage the development of a major breakfast cereal business starting in Europe. The joint venture later intends to enter other worldwide markets excluding the United States and Canada. CPW S.A. is a Swiss company with headquarters in Morges. Charles W. Gaillard, executive vice president of General Mills, is CPW's chief executive officer.

The European ready-to-eat cereal market, CPW's initial area of concentration, is currently $1.6 billion in annual sales and is expected to quadruple by the year 2000 to sales of $6.5 billion, the size of the U.S. market in 1989. The RHM cereal products command a more than 15 percent share of the $1 billion UK breakfast cereal market. Thus, the acquisition of the RHM cereals business gives CPW immediate penetration in the UK, the world's second-largest market in sales and the highest in per capita consumption at over 13 lbs. annually. It represents major progress toward achieving CPW's goal of $1 billion in sales by the year 2000. Moreover, the existing RHM plants are positioned to eventually help supply new markets overseas where CPW plans to expand. Growth will be supported by the planned introduction of a number of new brands.

Upon completion of the transaction, the U.K. business will operate under the above mentioned name, Cereal Partners UK, with existing plants and employee force. J.R. Preston, currently managing director of RHM Breakfast Cereals, will be appointed managing director of Cereal Partners U.K.

#90204p7294 07/23/1990 ~PR Newswire

SAN DIEGO (JULY 23) PR NEWSWIRE - Mycogen Corp. (NASDAQ: MYCO) reported

its first profitable quarter today. Net income for the second quarter ended June 30, 1990, was $209,000, or $.02 per share, compared to a net loss of $184,000, or $.03 per share, for the quarter ended June 30, 1989. Revenues for the quarter increased to $4,307,000, compared to $2,912,000 last year.

For the six months ended June 30, 1990, revenues were $7,373,000, compared to $4,743,000 for the same period last year. The net loss decreased to $466,000, or $.05 per share, compared to a net loss of $919,000, or $.13 per share, last year.

Accomplishments during the second quarter included a secondary stock offering of 2.8 million shares of common stock, an equity investment by The Lubrizol Corp. (NYSE: LZ) of $6 million, and two new collaborative agreements with Monsanto Co. (NYSE: MTC) and S.C. Johnson.

Mycogen also received EPA approval to conduct large-scale tests of its second genetically engineered biopesticide, the CellCap(TM)-encapsulated version of its M-One(R) bioinsecticide.

"We have just completed the most significant quarter in the company's history. We have strengthened our financial base, expanded our corporate relationships and moved towards profitability," said Jerry Caulder, chairman of Mycogen.

"However, year-to-date product sales have not met our expectations," Caulder said. "We underestimated the commercial development effort required for certain products and overestimated the adoption rate by farmers of our new biopesticides. We are in the process of increasing commercial development efforts and focusing marketing activities to address these important issues."

"Mycogen has a portfolio of products and technologies which allows us to address the demand for safe and effective crop protection pesticides," Caulder added. "Our challenge now is to demonstrate the utility of our biopesticides and to rapidly fit them into farmer acceptable agronomic practices."

Mycogen Corp. develops, manufactures and markets biopesticides as alternatives to chemical pesticides to control a variety of insects, weeds and other pests. Mycogen's biopesticide products are based on natural agents such as microorganisms and fatty acid compounds which are compatible with the environment. The company develops its products through the application of genetic engineering technology and innovative formulations.

PHOENIX, AZ (JULY 23) PR NEWSWIRE - Carlton V. Phillips, chairman and chief executive officer of Century Pacific Corp. (OTC "Pink Sheets") announced the appointment of Steven J. Sogard as president of CENPAC Securities Corp., a full-service brokerage firm and the principal subsidiary of Century Pacific Corp. Sogard joined the firm in December 1988 as senior vice president and has more than nine years experience in the securities industry.

Phillips stated, "I am gratified to have someone of Steve's ability and commitment take over the duties as president of CENPAC Securities. I will remain as chairman of the board and chief executive officer and look forward to working with Steve and his management team to continue building a strong regional brokerage firm."

Sogard, president, said, "CENPAC Securities is a firm with emphasis on product for the individual investor of today and the 1990s. We pride ourselves in serving the individual investor's needs." Sogard added, "We will continue to recruit professional registered representatives who are intrusted in providing quality client services and who are looking for a firm whereby they can grow professionally and have management opportunities."

Other subsidiaries of Century Pacific Corp., a publicly-held financial services company, include: Vista Financial Services, a licensed mortgage bank; Century Pacific International Inc., which is involved in international marketing of U.S. dollar denominated investments, insurance and financial services; and Century Pacific Insurance Group Inc., which provides life insurance, health insurance and arranges annuity investments.

The corporate, general and administrative offices of the Century Pacific family of companies are located at 3200 East Camelback Rd., Phoenix, AZ 85018, phone: 602-957-0000, or 800-4-CENPAC, fax: 602-954-3656.

#90204p7297 07/23/1990 ~PR Newswire

HOUSTON (JULY 23) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) today introduced two high-performance desktop personal computers, the COMPAQ DESKPRO 486/33L and COMPAQ DESKPRO 386/33L, and 486-based models of

the COMPAQ SYSTEMPRO.

The 486-based additions to the COMPAQ SYSTEMPRO line introduced today allow this family of personal computer systems to meet an even broader range of network server and multiuser requirements -- from 15-user resource-sharing networks to complex departmental database applications with 200 or more users.

Users who select the COMPAQ SYSTEMPRO as a network server can also benefit from the availability of the new COMPAQ DESKPRO 386N and COMPAQ DESKPRO 286N which have been designed with built-in security and configuration features that make them ideal choices on each desktop as networked personal computers.

Shipments of the new COMPAQ SYSTEMPRO models will begin this month to Authorized COMPAQ Computer Dealers worldwide.

The 486/33 System Processor Board option ($6,999) is also available for the COMPAQ SYSTEMPRO. Users of either single processor 386-based or single processor 486-based COMPAQ SYSTEMPROs may upgrade to multiprocessing by adding either this board or the available 386/33 System Processor Board. A 486/33 System Processor Board upgrade kit is offered for owners of 386-based COMPAQ SYSTEMPRO models who wish to exchange their present 386/33 System Processor Board for a 486/33 System Processor Board ($4,999 plus 386/33 system processor board in exchange).

With the introduction of the new models, the COMPAQ SYSTEMPRO is now scalable to 256 megabytes of RAM, to 1.68 gigabytes of internal storage, and with the power of up to two 486/33 system processor boards that can deliver a range of processing performance from 8 to 40 MIPS (million instructions per second).

These new desktop computers using the 32-bit Extended Industry Standard Architecture (EISA) expansion bus are two of the most powerful PCs available, offering business users maximum 486 or 386 processing performance in demanding applications.

Along with the COMPAQ SYSTEMPRO and COMPAQ DESKPRO 486/25, Compaq now offers four EISA-based computer platforms, all supported today by dozens of high- performance 32-bit EISA peripherals and thousands of 8-/16-bit Industry Standard Architecture (ISA) peripherals, and more are being introduced almost daily.

Shipments of both desktop computers begin this month to Authorized COMPAQ Computer Dealers.

Compaq Computer Corporation is a world leader in the manufacture of PC systems, and desktop, portable, and laptop personal computers.

#90204p7299 07/23/1990 ~PR Newswire

ATLANTA (JULY 23) PR NEWSWIRE - Southern Heritage Insurance Co. today announced unaudited financial results for the second quarter ended June 30.

The company reported a net profit of $89,000 or $.03 per share for the three-month period ended June 30. During the comparable period in 1989, the company had a net loss of $374,000 or $.14 per share. Operating results for the six months through June 30 reflect a net profit of $154,000 or $.06 per share, compared to a loss of $199,000 or $.07 per share, for the first six months of 1990.

Thomas W. Crawford, president and chief executive officer, stated that key factors in the positive 1990 results have been continued improvement in the company's operating expense ratio and a more normal weather pattern; the latter has produced less severe weather and a reduced number of weather-related claims, as compared to the second quarter of last year.

Southern Heritage also announced that it has repurchased 33,000 shares of its common stock (reducing the outstanding shares to 2,627,024) to be used in connection with the company's 1990 Stock Option Plan for employees that was approved by the company's shareholders at the 1990 annual meeting. The shares were purchased at the prevailing market price of $3.03 per share from Crawford, who stated that his reason for selling related to personal liquidity requirements. In May 1990, the company granted incentive stock options to both Crawford and Robert J. Cormican, the company's senior vice president and chief financial officer, to purchase 25,000 and 10,000 shares, respectively. Each option becomes exercisable in 20 percent increments over the next five years, at a price of $3.03 per share.

Southern Heritage is a personal lines property and casualty underwriter that operates in Georgia, Alabama and Virginia.

#90204p7301 07/23/1990 ~PR Newswire

NANTUCKET, MA (JULY 23) PR NEWSWIRE - Home Port Bancorp, Inc. (NASDAQ: HPBC) reported a loss for the quarter ended June 30, 1990 of $75,000 compared to earnings of $674,000 for the second quarter of 1989. This loss was after $925,000 provisions to the loan loss reserve during the quarter as compared to $120,000 provision during the second quarter of 1989. The per share loss for the quarter ended June 30, 1990 was 4 cents compared to earnings per share of 31 cents for the second quarter of 1989.

Home Port posted a profit for the six months ended June 30, 1990 of $197,000 after provisions to the loan loss reserve of $1.8 million. Earnings for the first six months of 1989 were $1.3 million after a loan loss provision of $180,000. Earnings per share for the six months ended June 30, 1990 were 9 cents compared to 60 cents for the first six months of 1989.

The reserve for loan losses at June 30, 1990 totaled $1.6 million or 1.9 percent of total loans vs. $945,000 or 1.1 percent at March 31, 1990. Non-performing loans as a percentage of total loans at June 30, 1990 were 4.1 percent down from 4.3 percent at March 31, 1990.

Robert G. Stover, chief executive officer, stated that the additional provisions were necessary due to a continued slow real estate market and the sluggish Massachusetts economy.

The company's capital-to-asset ratio remains strong at 25 percent. A cash dividend of 5 cents per share was declared for shareholders of record as of Aug. 9, 1990 to be payable Aug. 20, 1990.

BOCA RATON, FL (JULY 23) PR NEWSWIRE - Humagen, Inc. (NASDAQ: HUGE), has signed a definitive agreement with Medical Depot, Inc. (NASDAQ: MEDD), to open Medical Depot medical equipment and supply distribution centers on an exclusive basis in the U.S.S.R., Mexico and Panama; and on a non-exclusive basis elsewhere outside the United States. In addition, Humagen will become the exclusive Medical Depot Superstore franchise sales agent in the U.S.S.R., Mexico and Panama, and on a non-exclusive basis elsewhere outside the United States.

Humagen's foreign Medical Depot centers will supply a wide range of durable and disposable medical equipment and hygiene products to state agencies, the medical commmunity and the general public.

"This agreement is the first step of Humagen's plan to attempt to establish a significant position in the international wholesale and retail medical fields," said Roberto Riva, Humagen's president.

"Our close association with Medical Depot, Inc., will enable us to move very quickly to take advantage of what we perceive as potentially lucrative market openings," he said.

Medical Depot, Inc. is in the business of developing and franchising Medical Depot Superstores dealing in durable, disposable and comfort medical equipment supplies and related products.

Humagen, Inc., is also developing and marketing practical, high-tech medical diagnostic testing products. The company's current U.S. marketing thrust is directed principally to the practicing male infertility specialist for in-office use, and includes the patented Penetrak (TM) and Tru-Trax (TM) infertility testing programs now in routine production.

#90204p7309 07/23/1990 ~PR Newswire

ATLANTA (JULY 23) PR NEWSWIRE - Contel Corp. (NYSE: CTC) today reported that revenues for the second quarter of 1990 increased 12 percent to $844 million, compared with $755 million reported in the second quarter of last year.

Operating income increased 6 percent to $156 million, compared with $147 million in the year earlier period.

Net income declined, as expected, to $43 million, or $.27 per share, compared with $67 million or $.42 per share for the second quarter of 1989. The lower net income was due primarily to costs associated with the acquisition of 13 southeastern cellular systems from McCaw Cellular Communications in the first quarter of 1990.

For the six months ended June 30, 1990, revenues were $1.6 billion, an increase of 9 percent over the prior year period. Operating income increased 6 percent to $310 million, compared with $293 million for the first six months of 1989. Net income declined 26 percent to $97 million, compared with $131 million in the prior year period.

Contel President and Chief Executive Officer Donald W. Weber said 1990 second quarter and six months results "were driven by the excellent performance of our Telephone Operations Sector, which continued to report strong growth in access lines and minutes of use of the network. Although costs related to the southeastern cellular properties acquisition reduced earnings, we continue to be pleased with our Cellular Communications Sector's ability to add new subscribers while maintaining revenues per subscriber that are well above the industry average. The Federal Systems Sector continued to increase revenue backlog, with new contract awards in 1990 totaling $343 million. Overall, we are pleased with the results, which were in line with our expectations."

The Telephone Operations Sector posted second quarter revenues of $559 million, and income of $88 million, compared with second quarter 1989 revenues of $539 million and $84 million in income. Continued strong growth in customer access lines and minutes of use of the network were the primary factors in the sector's revenue increase. On an annualized basis access lines grew by approximately 4 percent and minutes of use increased by approximately 12 percent.

The Cellular Communications Sector reported revenues of $44 million and a net loss of $27 million in the second quarter of 1990, compared with revenues of $15 million and net income of $1.4 million in the year earlier period. Revenues increased as a result of growth in subscribers and the Southeastern cellular properties acquisition. Subscribers in company-controlled systems increased 54 percent, on an annualized basis, for the quarter. At June 30, 1990, the sector reported 119,515 subscribers in its company-controlled markets. The sector reported a net loss primarily due to interest expense and goodwill amortization associated with the southeastern cellular properties acquisition, which was completed on Feb. 27, 1990. Income or loss reported by Contel for this sector is 90 percent of the net income or loss figure reported separately by Contel Cellular because 10 percent of Contel Cellular is owned by minority stockholders.

The Federal Systems Sector reported revenues of $160 million and $3 million in net income in the second quarter of 1990. The sector reported revenues of $124 million and income of $2 million in the year earlier period. Revenues increased primarily as a result of the acquisition of Telos Corporation in February 1990. Revenue backlog was $1.29 billion at June 30, 1990, compared with $1.03 billion at year-end.

The Information Systems Sector posted a loss of $6 million on revenues of $80 million in the second quarter of 1990. In the corresponding 1989 period, the sector reported a net loss of $6 million on revenues of $78 million.

On July 12, Contel and GTE Corp. (NYSE: GTE) jointly announced that their boards of directors had agreed in principle to merge the two companies in a tax-free exchange of common stock whereby GTE would issue 1.27 shares of its common stock for each outstanding share of Contel common stock. The merger would result in an organization that ranks as the largest U.S.-based, local exchange telephone company and the second-largest cellular telephone operator. The final merger agreement is subject to approval by the directors and stockholders of both companies as well as various regulatory approvals.

GTE recently reported an 11 percent increase in net income for the second quarter of 1990. GTE's consolidated net income for the quarter was $364 million, compared with $329 million in the second quarter of 1989. Earnings per share were up 10 percent, increasing to 54 cents per share from the 49 cents earned in the prior year period when there were 2 percent fewer shares outstanding. Earnings per share in both periods reflect GTE's two-for-one stock split, which became effective on May 23. Consolidated revenues and sales rose 6 percent to $4.6 billion, compared with $4.3 billion in the second quarter of 1989.

Contel Corp., a company with more than $3 billion in revenues and sales, provides a broad range of telecommunications products and services.

ASHLAND, KY (JULY 23) PR NEWSWIRE - Ashland Oil Inc. (NYSE: ASH) said today it had all-time record net income of $100 million, or $1.79 a share, for the quarter ended June 30, 1990.

This was more than double the $44 million, or 78 cents a share, earned in the quarter last year. Operating income for the quarter just ended was a record $188 million, compared to $102 million in the quarter a year ago. Sales and operating revenues were $2.2 billion in both quarters.

For the nine months ended June 30, 1990, Ashland had net income of $123 million, or $2.21 a share, compared to $126 million, or $2.26 a share, last year. Sales and operating revenues were $6.5 billion for the 1990 period and $6.2 billion in 1989.

"We're very pleased with our results for the quarter," said Ashland Chairman and Chief Executive Officer John R. Hall. "Net income, earnings per share and operating income all reached record-high levels.

"These results were led by an outstanding performance from Ashland Petroleum Co. and bolstered by a strong third quarter from SuperAmerica, substantial improvement from Ashland's construction and exploration operations, and higher equity income from our coal investments," he added.

Ashland Petroleum's $127 million in operating income represented the best quarter in petroleum company history. Hall attributed the results to very favorable refinery margins and excellent refinery operations.

SuperAmerica's continuing expansion program resulted in higher volumes for the retail gasoline marketing chain. This factor and good margins for both gasoline and merchandise resulted in operating income of $10 million for SuperAmerica, a 13 percent increase from the quarter last year.

Operating income of $16 million from APAC construction operations was substantially higher, due to more favorable weather conditions in the latter part of the quarter.

Ashland Exploration's operating income of $8 million was more than double the level of the 1989 quarter. Equity income of $14 million from coal investments, including Arch Mineral Corp. and Ashland Coal Inc., also more than doubled.

Operating income from Ashland Chemical and Valvoline declined, reflecting soft demand in some chemical markets, as well as the U.S. automotive oil market.

"In summary, we were delighted with our results for the quarter," Hall said. "Although refinery margins have declined from their mid-June peak, they remain at favorable levels. With continued strength in refinery margins and a positive outlook for the majority of our non-refining businesses, we are optimistic that Ashland can have a strong fourth quarter and a good year."

#90204p7321 07/23/1990 ~PR Newswire

HOUSTON (JULY 23) PR NEWSWIRE - Lyondell Petrochemical Company (NYSE: LYO) today reported net income of $155 million, or $1.93 per share, on sales of $1.4 billion, for the second quarter of 1990, making this the best quarter since Lyondell became a public company.

Bob G. Gower, president and chief executive officer of Lyondell Petrochemical Company, said, "We are extremely pleased with our second quarter performance, which benefited from a very favorable environment for refining and a strong olefins market."

Refining margins almost doubled in the second quarter vs. the first quarter of 1990 due to an apparent tightening of the supply/demand balance as well as lower crude oil costs. In addition, Lyondell's ethylene margins increased in the second quarter compared to the first quarter due primarily to lower feedstock costs. Ethylene prices have remained relatively stable since the beginning of the year.

Second quarter earnings also benefited from a positive contribution from the Bayport polymers business which Lyondell acquired in the first quarter of 1990. "In our first full quarter of ownership, this business has exceeded our expectations," Gower said.

Ethylene and propylene sales volumes, including sales to a subsidiary, continued at a record pace in the second quarter. This was due to strong demand and additional capacity made available by the expansion of Lyondell's olefins units in 1989.

Compared to the second quarter of 1989, second quarter 1990 earnings were up 50 percent due primarily to higher refining margins. Refined products prices decreased less than crude oil costs resulting in a significant margin improvement.

Ethylene and propylene sales volumes were considerably higher in the second quarter of 1990 vs. the same period of 1989. However, this was offset by lower ethylene margins resulting mainly from a decline in ethylene prices on a year to year basis.

Lyondell Petrochemical Company, headquartered in Houston, manufactures and markets a wide variety of petrochemicals including olefins (primarily ethylene, propylene, butadiene and butylenes), methanol, aromatics and specialty products, polyethylene and polypropylene and refined petroleum products, including gasoline, heating oil, jet fuel and lubricants.

#90204p7322 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - RJR Nabisco Holdings Corp. today reported significantly improved second quarter 1990 results.

Business unit contribution (operating income before amortization of trademarks and goodwill) rose 29 percent from the second quarter last year to $887 million from $687 million. Operating income was $735 million, or 34 percent higher than operating income of $547 million a year ago. Consolidated net sales in the quarter were $3.46 billion, 5 percent higher than net sales of $3.30 billion last year.

The company reported free cash flow before divestiture proceeds of $637 million in the quarter.

The company reported a 66 percent reduction in its second quarter net loss to a $108 million loss from a $319 million net loss a year ago. (The net loss in the first quarter of 1990 was $222 million.) The second quarter 1990 net loss reflects $444 million of charges for non-cash interest primarily related to RJR Nabisco's leveraged buy-out in 1989. The loss also reflects $308 million of other non-cash charges, including amortization of intangibles and depreciation.

RJR Nabisco's worldwide tobacco businesses recorded second-quarter net sales of $2.02 billion, a 6 percent increase over $1.90 billion last year. Business unit contribution was $718 million, 36 percent greater than the $527 million recorded in the quarter a year ago.

Domestic tobacco results improved as a result of improved pricing and cost reductions from restructuring in the second half of 1989.

International tobacco operations continued to record strong sales and earnings, with significant volume growth in Europe and Asia.

For the first six months of 1990, net sales for RJR Nabisco's worldwide tobacco businesses totaled $3.88 billion, 10 percent greater than last year's $3.52 billion in net sales. Six-month business unit contribution of $1.36 billion was 38 percent higher than last year's $980 million.

Food businesses reported second quarter 1990 net sales of $1.44 billion, up 3 percent from $1.40 billion in 1989. Business unit contribution was $199 million compared with $192 million a year ago.

RJR Nabisco Holdings Corp. is the indirect parent company of RJR Nabisco Inc., an international consumer products company. RJR Nabisco's major operating subsidiaries are R.J. Reynolds Tobacco Co., R.J. Reynolds Tobacco International Inc., Nabisco Brands Inc., and Planters LifeSavers Co.

KANSAS CITY, MO (JULY 23) PR NEWSWIRE - Kansas City Power & Light Company (NYSE: KLT) announced that it has today commenced a tender offer for all outstanding shares of Kansas Gas and Electric Company common stock (NYSE: KGE) at $27.00 per share in cash, Kansas Gas and Electric 4-1/2 percent preferred stock at $110.00 per share in cash, Kansas Gas and Electric 4.32

percent preferred stock at $101.64 per share in cash and Kansas Gas and Electric 4.28 percent Preferred Stock at $101.00 per share in cash. The offer price for the common stock, approximately $857 million in the aggregate, represents a 37 percent premium over the market price of Kansas Gas and Electric common stock on July 20, 1990, the last trading day prior to the commencement of Kansas City Power & Light's offer.

Kansas City Power & Light has executed a $1 billion definitive credit agreement with Westpac Banking Corporation and The First National Bank of Chicago providing for financing necessary to complete the tender offer and related transactions. Donaldson, Lufkin & Jenrette Securities Corporation is serving as the financial advisor and dealer manager for the tender offer.

The tender offer is conditioned upon, among other things: -- at least 90 percent of the total number of common shares and each class of preferred shares of Kansas Gas and Electric being tendered in the offer and the "short-form" merger provisions of Kansas and Missouri law being applicable to the merger of Kansas City Power & Light and Kansas Gas and Electric after consummation of the offer;

-- Kansas City Power & Light having received all necessary governmental and regulatory approvals and consents for the acquisition of shares in the offer, for consummation of the merger and related transactions and to borrow funds under the definitive credit agreement, including necessary approvals or consents of the Federal Energy Regulatory Commission, the Nuclear Regulatory Commission and the state utility commissions in Kansas and Missouri;

-- Kansas City Power & Light being satisfied that the Kansas Business Combination Act has been complied with or is inapplicable to the offer and the merger;

-- Kansas City Power & Light having obtained sufficient financing to enable it to purchase all Kansas Gas and Electric shares, redeem certain preferred shares of Kansas City Power & Light, pay related expenses and, if necessary, to refinance certain indebtedness of Kansas Gas and Electric; and

-- the authorization by Kansas Gas and Electric stockholders under the Kansas Control Share Acquisitions Act of voting rights for all shares acquired by Kansas City Power & Light unless Kansas City Power & Light determines such Act is inapplicable to Kansas City Power & Light.

Kansas City Power & Light has made a request under the Kansas Control Share Acquisitions Act that Kansas Gas and Electric call a Special Meeting of Kansas Gas and Electric stockholders within 30 to 50 days in order that Kansas Gas and Electric's stockholders may authorize Kansas City Power &

Light to vote all shares it acquires in the tender offer.

The offer is scheduled to expire at midnight, New York City time, on Monday, Aug. 20, 1990, but it is anticipated that the offer will be extended from time to time until after the Special Meeting and until all necessary governmental and regulatory approvals and consents have been received. Dewe Rogerson Inc. will be information agent for this offer.

Kansas Gas and Electric, headquartered in Wichita, Kans., is an electric utility which generates, transmits, distributes and sells electricity in the southeastern quarter of Kansas, including the Wichita metropolitan area. In 1989, Kansas Gas and Electric's revenues totalled $533.5 million with net profits of $47.5 million. As of December, 1989, Kansas Gas and Electric has 1,330 employees and last year provided service to over 254,000 customers.

Kansas City Power & Light, headquartered in Kansas City, is a medium-sized public utility engaged in the generation, transmission, distribution and sale of electricity. In 1989, the company's revenues exceeded $730 million and its net income was $108.6 million. Kansas City Power & Light employs over 2,800 people and currently serves over 409,000 customers ranging across a 4,700 square mile area of western Missouri and eastern Kansas.

JACKSON, MICH. (JULY 23) PR NEWSWIRE - Consumers Power Company is launching a major new energy conservation program which offers a free home energy checkup by professional conservation experts. In addition, residential customers can qualify for up to $1,000 in bonuses if they take energy-efficiency measures recommended by auditors.

Called "Great Shape," the program is available to all Consumers Power electric and/or natural gas residential and commercial customers. Customers can schedule an audit by calling toll free, 1-800-842-6971. Energy auditors have begun canvassing neighborhoods in Flint, Farmington Hills and Wyoming, soliciting customer interest in a home energy conservation checkup.

"This is the first free major energy conservation program Consumers Power has offered," said Michael G. Morris, the utility's executive vice president for natural gas and marketing. "This program will play an important role in helping us meet Michigan's energy needs in the 1990s."

Consumers Power has hired a firm with national energy conservation credentials, A&C Enercom, to coordinate the new program. Customers calling the toll-free number will talk with A&C Enercom personnel. A&C Enercom employees, identifiable by uniform and carrying an identification card, will conduct the energy audits.

Persons representing themselves as A&C Enercom employees, but without proper identification, should not be permitted to enter a customer's home and should be reported to local law enforcement officials.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

MERRIMACK, NH (JULY 23) PR NEWSWIRE - Termiflex Corporation (NASDAQ: TFLX) today reported sales and profits for the three-month period and year

ended June 30, 1990. The full year sales rose 19 percent to $9,274,118, compared to the $7,790,105 reported last year. Profit for the full year was $409,811 or 31 cents per share, compared to a loss of $(106,308) or (8 cents) per share last year. Net sales for the quarter were $2,543,435, compared to the $2,496,256 reported for the fourth quarter last year. Profits for the quarter increased to $256,295 or 19 cents per share, compared to $39,532 or 3 cents per share reported for the fourth quarter a year ago.

"These record revenues and profits for both the qurter and the full year are a most gratifying result of our focus on selling our core product to key customers and prospects while at the same time vigorously controlling costs," reported Bill Fletcher, president. "The primary application of our products continues to be as operator control panels or service units used with our industrial customers' manufactured products. During this past fiscal year we have concentrated on improving our effectiveness at providing tailored, private labelled handheld terminals to these key industrial original equipment manufacturers. We will continue this focus throughout the present fiscal year."

"While we anticipate future improvements in our results as a consequence of our present focus, the historical softness of our first quarter is expected to continue in this year for the period ending Sept. 30, 1990," Fletcher added. "Last year our first quarter results were revenues of $2,082,861 and profit of $13,303 or 1 cent per share."

Termiflex Corporation designs, manufactures and markets rugged handheld terminals used for operator interface, data acquisition and service with microprocessor-based commercial, industrial and military equipment.

#90204p7337 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - National Westminster Bancorp (NatWest Bancorp) today reported a consolidated net loss of $90.2 million for the first half of 1990 compared with net income of $58.0 million in the comparative period of 1989. For the quarter ended June 30, NatWest Bancorp posted a loss of $106.3 million, compared with net income of $24.1 million in 1989. The results of First National Bank of Central Jersey (Central Jersey) have been incorporated from Aug. 18, 1989, the date it was acquired by NatWest Bancorp.

The second quarter results included a $147.6 million provision for loan losses and the establishment of a $30 million reserve for the potential decline in the value of other real estate owned (OREO). Commenting on the results, William T. Knowles, chairman and chief executive officer, said "We believe it is prudent to strengthen our reserve position substantially at the end of June. The continued decline in the real estate market in the northeastern United States has further eroded collateral values. We have also seen a significant growth in non-performing assets reflecting the difficulties affecting some of our commercial customers. We consider the current levels adequate and we monitor them continually to ensure they appropriately reflect changing market conditions." The provision for loan losses in the second quarter of 1989 was $44.7 million.

Net interest income was $182.1 million in the second quarter of 1990 compared with $179.1 million in 1989. For the six months ended June 30, net interest income increased to $363.8 million from $343.8 million a year ago. The increase in both periods was due to the inclusion of Central Jersey as well as growth in domestic commercial and consumer loans and growth in core deposits. Domestic loans grew by $2.3 billion from June 30, 1989 and core deposits grew by $2.1 billion during the same period, with the passbook money market account, which was introduced in the fourth quarter of 1989, adding approximately $880 million. These gains were offset by the increase in domestic non- performing assets and a narrowing of interest rate spreads.

Net interest income on a tax equivalent basis as a percentage of average earning assets (net interest margin) was 3.93 percent in the second quarter and 3.95 percent for the first six months of 1990 compared with 4.38 percent in the second quarter and 4.27 percent for the first six months of 1989.

NatWest Bancorp is a wholly owned subsidiary of National Westminster Bank PLC, the London-based international banking and financial services organization.

RICHADSON, TEXAS (JULY 23) PR NEWSWIRE - Convex Computer Corporation (NYSE: CNX) today announced record revenues and profits for the second quarter ended June 30, 1990. The company reported revenue of $51.9 million, an increase of 39 percent from the second quarter of 1989 and up seven percent from the first quarter of 1990. Profit performance continues to be strong with the company reporting net profits of $4.4 million for the quarter, or 22 cents per share. This represents a 69 percent increase from the second quarter 1989 net of $2.4 million, or 13 cents per share.

The second quarter results mark the company's 23rd quarter of uninterrupted growth in revenues. This growth was fueled primarily be record demand for Convex C2 Series supercomputers which accounted for 39 of the 41 systems shipped in the quarter. Nearly 700 Convex systems are now owned by more than 400 customers worldwide. Also during the quarter, Convex continued adding UNIX-based software applications to its comprehensive library.

Since the beginning of the year, more than 200 applications have been ported to Convex supercomputers, bringing the total number available to more than 600.

"Market acceptance of our C Series supercomputers continues to grow as a result of our focus on providing creative supercomputing solutions to our customers' problems," said Robert J. Paluck, Convex chairman, president, and chief executive officer. "Revenues hit record levels in the United States and were particularly strong in the government/aerospace sector due in part, to the first shipments of the C220i -- a new product designed to handle input/output intensive applications. We also delivered a C210 system to E-Systems, Inc., Dallas, Texas, under a recently signed three-year OEM agreement. This initial system will be used by E-Systems to develop a state-of-the-art computer data mass storage system."

Convex Computer Corporation, a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market, and service high performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology. The systems are sold and serviced through direct sales and an extensive distribution network.

NEWTOWN SQUARE, PA. (JULY 23) PR NEWSWIRE - Sumitomo Chemical of Japan and ARCO Chemical (NYSE: RCM) of the United States jointly announced two capacity expansions of propylene oxide (PO) and styrene monomer (SM) through their joint venture, Nihon Oxirane.

Both expansions are at the joint venture's Chiba facility. The first expansion of 10,000 metric tons of propylene oxide and 25,000 metric tons of styrene will be on stream during the fourth quarter of 1990, bringing Nihon Oxirane's annual rated capacity to 140,000 metric tons of propylene oxide and 335,000 metric tons of styrene.

Another expansion, currently under study and subject to final board approvals, is planned to be on stream in 1993. This capacity expansion would increase Nihon Oxirane's annual rated capacity to an estimated 200,000 metric tons of propylene oxide and 450,000 metric tons of styrene.

The parties said the expansions reflect the strategic plan of both partners. "We are building capacity to meet the anticipated needs of a growing Japanese market," they said. Propylene oxide and styrene have a number of applications in both residential and industrial markets in Japan.

Nihon Oxirane, Asia's largest producer of propylene oxide, uses ARCO Chemical's proprietary PO/SM co-product technology. ARCO Chemical Co. also has a Korean joint venture with Yukong Ltd. which will utilize propylene oxide/styrene co-product technology. Production is expected to begin in the third quarter of 1990. It will have an annual rated capacity of 100,000 metric tons of PO and 240,000 metric tons of SM to supply Asian markets.

#90204p7340 07/23/1990 ~PR Newswire

HIGH POINT, NC (JULY 23) PR NEWSWIRE - Ladd Furniture, Inc. (NASDAQ-NMS: LADF) today reported net sales of $136.0 million for the three months ended June 30, 1990, up from $96.7 million in the same period of fiscal 1989. The sales increase reflected Ladd's acquisition of the former Maytag Furniture Group on July 7, 1989.

Net earnings for the quarter totaled $3.5 million, or $.18 per share. While these earnings were down from the $6.9 million, or $.37 per share, earned in 1989's second quarter, they were higher than 1990's first quarter net earnings of $2.6 million, or $.14 per share.

Through the first six months of fiscal 1990, net sales rose to $275.1 million from $190.2 million a year earlier. First half net earnings declined to $6.1 million, or $.32 per share, from $12.7 million, or $.68 per share, in fiscal 1989.

Ladd chairman and chief executive officer Don A. Hunziker cited continuing weakness in the U.S. furniture industry and Ladd's acquisition of the former Maytag furniture businesses as the primary causes of the lower profits.

"U.S. consumers have remained on the defensive in terms of major durable goods purchases through the first six months of 1990," Hunziker said, "as indicated by recent deterioration in broad nationwide consumer confidence measurements and lagging retail sales volumes."

He said Ladd management continues to expect generally subdued furniture sales over the remainder of 1990 but added, "Federal Reserve Board Chairman (Alan) Greenspan's recently-disclosed inclination to reduce U.S. interest rates from current levels represents a potentially positive development for a number of consumer goods industries including furniture."

Vice chairman Richard R. Allen said Ladd's year-to-year profit margin comparisons remained negative in the second quarter, reflecting sluggish sales and extremely aggressive promotional activity throughout the furniture industry.

"However," he pointed out, "second quarter margins improved compared to those of the previous 1990 quarter, which in turn were higher than the depressed margins reported for 1989's final three months," While Allen characterized this trend as "mildly encouraging," he said any further near-term margin improvement will depend on increased sales levels during the second half of 1990.

Vice chairman O. William Fenn, Jr. said that Ladd's incoming order rates, "were essentially flat during the May-June period." Fenn added that Ladd is currently taking selective plant downtime in order to control its inventory levels.

#90204p7342 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - AMAX Inc. (NYSE: AMX) today reported second quarter net earnings of $56.9 million ($0.65 per primary common share) compared with first quarter 1990 net earnings of $50 million ($0.57 per primary common share). In the second quarter of 1989, net earnings

were $130.9 million ($1.53 per primary common share).

Earnings from operations in the 1990 second quarter amounted to $102.0 million, compared with $91.0 million in this year's first quarter and $181.0 million in the second quarter of 1989.

Second quarter sales were $984.7 million, compared with $927.9 million in the first quarter and $1.1 billion in the 1989 second quarter.

For the first six months of the year, AMAX had net earnings of $106.9 million ($1.22 per primary common share) vs. 1989 six-month earnings of $245.1 million ($2.87 per primary common share). Operating earnings for the 1990 first half were $193.0 million, compared with $347.8 million in the comparable 1989 period. Half-year sales were $1.9 billion, vs. $2.1 billion a year ago.

Commenting on the results, Allen Born, chairman, chief executive officer and president, said, "Second quarter 1990 earnings were slightly above first quarter earnings on a comparable basis. The current quarter's results include proceeds from the settlement of a coal supply agreement dispute; insurance proceeds from claims for damages caused by Hurricane Hugo at the Mt. Holly, S.C., primary aluminum plant; charges associated with the carrying value of Amax Gold's investment in a Canadian mining company; and a charge for downsizing and decentralizing certain corporate staff functions.

"The decrease in earnings from a year ago reflects the slide in aluminum prices. Industry ingot prices, which averaged $0.94 per pound in the second quarter of 1989, have been around $0.70 per pound during most of 1990. However, prices appear to have bottomed out.

"We are encouraged by the company's performance in the year to date in light of the continuing sluggish economy. Alumax's European fabricated and semi-fabricated businesses are enjoying a strong year, as are many of the domestic product lines. In addition to Alumax's downstream businesses AMAXs other major businesses are doing well. We are well positioned for earnings improvement over the balance of this year and next, when business conditions are expected to improve."

AMAX is a major international producer of aluminum and manufactured aluminum products and also has substantial interests in domestic energy and gold production.

JOHNSTOWN, PA (JULY 23) PR NEWSWIRE - Frank J. Pasquerilla, chairman and CEO of Crown American Corp., has announced that Mark E. Pasquerilla has been appointed president of the 40-year-old real estate development corporation and other management restructuring has taken place within the organization.

"This is the 40th anniversary year of Crown American and also the year in which we begin preparing ourselves for the challenges of the 1990s and beyond," said Frank Pasquerilla. "We have experienced tremendous growth in the past 10 years and now we must build for our future by enhancing the efficiency and effectiveness with which our organization operates. With properties in 11 states and assets in excess of $1.3 billion, we have built a firm foundation. Our new organizational plan helps us prepare for a bright tomorrow."

As president, Mark Pasquerilla will be responsible for profit and loss of the privately held corporation as well as directing the business from a broad strategy and policy perspective. "It is with the greatest sense of responsibility that I accept the office of the president," he said. "Our mission is to remold our organization so that we can meet the challenges of the '90s in a manner that allows our risk-taking traditions to continue. We need to build on that firm foundation in order to insure a bright tomorrow for our entire corporation."

A 1981 graduate of the University of Notre Dame, Mark Pasquerilla is a Fulbright Scholar and earned a master's degree from the London School of Economics. He joined Crown American in 1981 and in 1987 was named executive vice president of operations.

In addition to naming Mark Pasquerilla president, the corporate reorganization includes the combining of the Real Estate Leasing and Development departments into one under Nicholas Antonazzo, executive vice president of leasing and development. Thomas Fetsko is now the chief financial officer with the office of accounting and the controller reporting to him as well as financial services and the treasurer.

A new position of chief administrative officer is being created. That person will be responsible for human resources, communications, management information systems, and market analysis and planning as well as developing a management development plan for the corporation.

Senior executives in the organization that will also report to the president include Marlin Havener, executive vice president of the hotel division; Nicholas Pasquerilla, senior vice president of facilities planning; Curt Costlow, senior vice president of property management; and Paul Kiever, vice president and general counsel.

As chairman and CEO, Frank Pasquerilla will be responsible for guiding the

development of corporate policies and goals and providing guidance and counsel to the president and board of directors. He will also plan and direct all mergers and acquisitions for the corporation. Irwin Greenberg, president of Hess's department stores, a Crown American subsidiary, will continue to report to the chairman and CEO.

Founded in 1950 as a small masonry contractor, Crown American has grown to become one of the largest shopping mall developers in the nation with assets in excess of $1.3 billion. "Monitor" magazine (January 1990) for the second consecutive year listed Crown American as the most active shopping mall developer over the past three years.

In 1979, Crown American made retail history by becoming the first shopping mall developer to purchase a department store chain, Hess's. At that time there were 16 Hess's locations in Pennsylvania. Under Crown American ownership, the chain has grown to 75 stores in an 11-state area.

Crown American properties include 33 regional shopping malls, 13 community shopping centers, 21 hotels, five office buildings, and 75 Hess's department stores. They span the states of Pennsylvania, Maryland, Virginia, West Virginia, New York, New Jersey, Tennessee, Kentucky, Georgia, Indiana and North Carolina. Hess's is operated as a wholly owned subsidiary based in Allentown, Pa.

#90204p7344 07/23/1990 ~PR Newswire

GAINESVILLE, FL (JULY 23) PR NEWSWIRE - Pharmatec Inc. (NASDAQ: PHTC) today announced the U.S. Food and Drug Administration (FDA) granted Orphan Drug designation to Pharmatec's new, proprietary form of phenytoin (marketed by Parke-Davis under the trademark Dilantin) for the intravenous treatment of Grand Mal Status Epilepticus (epilepsy) seizures.

Orphan Drug status, which applies to diseases affecting less than 200,000 persons, confers special tax advantages and a minimum of 7 years of marketing exclusivity following FDA approval to market the product.

Epilepsy is a brain disorder affecting an estimated 4 million persons in the United States. Grand Mal seizures are estimated to affect about 50,000 of these persons and, unless quickly controlled, can result in severe brain damage or death.

While phenytoin has been prescribed for the treatment of epilepsy for a number of years, it provides only partial control of seizures in some patients and when given by injection can cause severe cardiovascular side effects. Other medications for epilepsy are taken orally to prevent

seizures and cannot be injected to prevent brain damage when an uncontrollable seizure occurs.

Pharmatec has combined phenytoin with its patented Carrier, which enables the combination to more effectively penetrate the blood-brain barrier, a tightly packed layer of cells which separates the brain from the rest of the body. Animal testing has shown that the combination of phenytoin with Pharmatec's Carrier was seven times more effective in preventing chemically induced seizures in mice and rats and twice as effective in preventing electrically induced seizures, compared to the administration of the same amount of phenytoin alone. By reducing the dosage, adverse cardiovascular side effects may also be reduced or avoided.

The company estimates the worldwide market for its new form of phenytoin for treating uncontrolled Grand Mal seizures, if approved for sale by the FDA and similar regulatory authorities of foreign countries, would be approximately $25 million annually. However, several years of clinical testing and approval of the FDA will be required before the company's new form of phenytoin can be marketed in the United States.

Pharmatec is a research-based pharmaceutical company specializing in the development of two novel technologies -- a carrier system for increasing the delivery of drugs to the brain and MOLECUSOL(R) brand cyclodextrins for increasing the solubility and stability of drugs.

WOODLAND HILLS, CA (JULY 23) PR NEWSWIRE - The American Pacific Mint Inc. (NASDAQ: MINT) announced that sales for the second quarter were $10,930,772 versus $2,645,426 for the equivalent 1989 period. For the six months, sales were also a record $25,319,958 versus $6,630,821 for the equivalent 1989 period. The company's net loss for the quarter was $40,297 versus $512,654 for the same period in 1989. The loss for the quarter was less than $.01 per share.

The results for the first half of 1990 continue the improvement of the company's results during 1989. Cash flows from operations for the first half were over $.07 per share. Working capital was over $.15 per share and shareholders equity increased to over $.22 per share.

Management indicated that the continuation of the company's current trends will lead to a profitable full fiscal 1990. As a result of the positive financial condition of the company, increasing cash flow, and earning prospects, the company's board of directors authorized the purchase of up to 300,000 shares of company stock from time to time in the open market.

#90204p7347 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - Samuel Miller, senior vice president-finance of Liz Claiborne, Inc. (NASDAQ: LIZC), today announced record sales and earnings for the three and six months ended June 30, 1990.

Net sales for the second quarter increased 25.3 percent to $340,255,000 from $271,553,000 for the same quarter last year. Earnings of $34,933,000 reflect a 21.3 percent increase from $28,790,000 in the same prior year period. Earnings of 40 cents per share reflect a 21.2 percent increase over last year's second quarter of 33 cents per share.

Net sales for the six months of $761,106,000 increased 21.9 percent over last year's six months' results of $624,447,000. Earnings of $87,547,000 increased 19.8 percent from $73,090,000 for the prior year's same period. Earnings of $1.00 per share reflect a 20.5 percent increase over last year's six months' 83 cents per share earnings.

Miller commented, "Management is extremely gratified that the company was able to achieve record sales and earnings."

The company also announced that the board of directors had declared a regular cash dividend on the company's common stock at the rate of $0.0625 per share to be paid on Sept. 3, 1990 to shareholders of record at the close of business on Aug. 13, 1990. The declaration of any future dividends will be subject to the company's earnings, financial position, capital requirements and other relevant factors.

With respect to the previously announced program to purchase up to $50 million of its common stock, Miller noted that through July 20, 1990, the company has purchased approximately 1.5 million shares of common stock at an aggregate purchase price of approximately $38 million.

#90204p7348 07/23/1990 ~PR Newswire
ST. LOUIS (JULY 23) PR NEWSWIRE - Monsanto Company (NYSE: MTC) today reported net income for the second quarter of $247 million, 2 percent higher than last year's second quarter when the company earned a record $241 million. Earnings per share for the period were $1.90, 7 percent above the $1.77 recorded in the second quarter a year ago. Earnings per share data for 1989 have been adjusted to reflect the company's two-for-one stock split to holders of record May 15, 1990.

Second quarter net income included an after-tax gain of $31 million, or 24 cents per share, resulting from the divestiture of certain assets of the company's joint venture in Japan with Mitsubishi Kasei Corporation.

Consolidated net sales for the quarter reached $2.37 billion, a 1 percent increase compared with $2.35 billion for the same period in 1989.

For the first six months of 1990, Monsanto earned $441 million, 5 percent lower than the $463 million earned during the first half of 1989. Earnings per share for the six months were $3.37, 1 percent below the $3.39 per share earned for the comparable period last year. Consolidated net sales for the six-month period reached $4.65 billion, 1 percent greater than the $4.61 billion recorded for the first six months of 1989.

"Extreme weather was the major factor affecting our second quarter earnings," said Monsanto Chairman and Chief Executive Officer Richard J. Mahoney. "Demand for the Agricultural unit's herbicides slowed as several major markets around the world were either too wet for optimum planting or in other cases, too dry for weed growth. On the other hand, our Chemical unit had a good quarter considering prolonged weakness in U.S. automotive markets. Results for Searle and Fisher improved significantly, and NutraSweet recorded another solid quarter."

"While Monsanto's overall second quarter financial performance wasn't as strong as we had hoped earlier in the year, our businesses remain fundamentally very solid and on-track when measured against Monsanto's short and long-term financial objectives," Mahoney said.

BOSTON (JULY 23) PR NEWSWIRE - Uno Restaurant Corporation (AMEX: UNO) today announced that net income rose 26 percent to $1,034,000 for the third quarter, compared to $818,000 for the comparable period last year.

Revenue increased to $14.2 million, up 36 percent from last year's third quarter. Earnings per share increased to 16 cents for the quarter from 14 cents last year, on an 8 percent increase in shares outstanding. For the first three quarters of fiscal 1990, revenue was up 33 percent to $38.9 million, net income increased by 26 percent to $2.6 million, and earnings per share increased to 41 cents from 36 cents for the comparable period last year, on a 9 percent increase in shares outstanding.

In making the announcement, Aaron Spencer, chairman and chief executive officer, stated, "As expected, increasing profit contributions from our newer units were responsible for the company's strong earnings growth in the third quarter. Eight company units have opened during the past four quarters, and are achieving average weekly sales 12 percent greater than older, more mature units. We expect these units to have an even greater impact on earnings in succeeding quarters, due to continual gains in operating efficiencies that are typical of newer units and the elimination of pre-opening cost amortization after their first year of operation. Our expansion schedule calls for opening three additional company units during the fourth quarter and 12 new units during fiscal 1991. We therefore expect a revenue growth rate of approximately 50 percent for fiscal 1991."

Uno Restaurant Corporation operates and franchises a chain of casual dining, full-service restaurants under the name "Pizzeria Uno Restaurant & Bar." The restaurants feature gourmet, Chicago-style deep dish pizza and a variety of entrees, sandwiches, appetizers, salads, desserts and beverages. It currently owns and operates 29 Pizzeria Uno restaurants in Massachusetts, New York, New Jersey, Rhode Island, New Hampshire, Maryland and Washington, D.C. and has 46 franchised restaurants in 16 states.

#90204p7354 07/23/1990 ~PR Newswire

ATLANTA (JULY 23) PR NEWSWIRE - HBO & Co. (NASDAQ: HBOC) today reported operating results for its second quarter ended June 30.

Revenue increased 10 percent to $50.4 million over the second quarter of last year. Operating income was up 7 percent to $4.2 million with net income increasing 2 percent to $2.4 million for the quarter. Earnings per share increased 7 percent to $.16, compared to the $.15 reported during the second quarter of 1989.

For the six-month period ended June 30, HBO & Co.'s revenue reached $89.3 million, down slightly from the $90.6 million reported for the first half of 1989. Operating income for the first half of 1990 reached $2.4 million and the company reported net income of $1.1 million for the period.

First half earnings per share were $.07 compared to $.24 during the first half of 1989 due to the $.09 loss HBO reported during the first quarter of 1990.

Chairman and Chief Executive Officer Holcombe T. Green Jr. commented that, "We are pleased that revenue and operating income increased substantially in the second quarter, and we are looking forward to continued operating improvements during the second half of 1990." He also noted that no revenue was recognized in the second quarter from the $14 million contract for a significant hospital installation in the United Kingdom that was signed during the quarter.

HBO & Co. also reported that Donald L. Lucas had resigned from the company's board of directors for personal reasons. Lucas had been a member of HBO's board of directors since 1980.

HBO & Co. is one of the nation's leading providers of hospital information systems and services.

#90204p7358 07/23/1990 ~PR Newswire

ST. PAUL, MN (JULY 23) PR NEWSWIRE - Despite a less-than-buoyant U.S. economy and adverse effects on international profits, 3M (NYSE: MMM) today reported improved second-quarter and first-half sales and earnings.

For the three months ended June 30, net income increased 4.7 percent to a record $342 million, or $1.54 a share. That was up from $327 million, or $1.49 a share, in the same quarter last year. Sales were $3.234 billion, up 6.9 percent from $3.025 billion in the second quarter of 1989.

For the first six months, net income rose 5.0 percent to $677 million, or $3.05 a share, compared with $645 million, or $2.92 a share, in the first half of last year. Sales for the first six months increased 5.9 percent

to $6.398 billion from $6.042 billion in the year-ago period.

Allen F. Jacobson, chairman and chief executive officer, said second-quarter results "benefited from a pickup in our U.S. unit-volume growth and from continued productivity-improvement efforts."

3M's domestic unit volume increased about 3 percent for the quarter. That was above the growth of the U.S. economy and compared with growth of 1 percent in the first quarter.

"Volume growth was strong in our Life Sciences Sector," Jacobson said, "with solid gains in both our health care and our traffic and personal safety businesses.

"Several businesses in our largest sector, Industrial and Electronic, also posted sizable volume gains," Jacobson said. These included telecom systems, electro products and specialty chemicals.

Outside the United States, 3M achieved double-digit unit growth for the 10th consecutive quarter. However, international profits declined slightly from the second quarter last year. This reflected the impact of economic changes in Brazil, negative currency effects and investments in new businesses. 3M's International Operations had an exceptionally strong second quarter last year.

The company estimates that the Brazilian situation reduced second-quarter earnings by approximately 3 cents a share. In addition, currency effects reduced earnings by about 1 cent a share. Helping to offset this was a decline in the company's effective tax rate. The worldwide tax rate for the second quarter was 37.8 percent, down from 39.8 percent in the year-earlier quarter.

Looking ahead, 3M expects another year of higher sales and earnings. "We look for slightly stronger growth in the U.S. economy in the second half," Jacobson said. "This, coupled with ongoing productivity-improvement efforts, should help U.S. results for the balance of the year. In addition, our international profits will benefit from continued solid volume growth, as well as from recent weakening of the U.S. dollar and improvement in our Brazilian business."

3M FINANCIAL HIGHLIGHTS

	Second Quarter Ended	
	6/30/90	6/30/89

WILKES-BARRE, PA. (JULY 23) PR NEWSWIRE - At its meeting on July 18, 1990 the board of directors of First Eastern Corp. (NASDAQ: FEBC) took action to opt out of two provisions of the recently enacted Pennsylvania anti-takeover legislation.

First Eastern elected not to be subject to the control share acquisition and disgorgement provisions. The board determined that the protections afforded the corporation as a bank holding company by Federal Reserve Bank regulations and by the Share Purchase Rights Plan adopted last year provide adequate defenses against undervalued or otherwise inappropriate takeover attempts.

The First Eastern board did not opt out of the provisions of the new law dealing with standards of conduct for directors. "Banks are rather special businesses and have, perhaps, a rather broader responsibility to the constituencies that they serve than do other publicly held businesses," stated Richard M. Ross Jr., chairman and chief executive offier. "But our directors did recognize the importance of the interests of our shareholders by concurrently adopting a resolution providing that when considering any matter, the board will not regard the interests of any other constituent group to be more important than those of our shareholders."

First Eastern Corp. reported assets in excess of $2.9 billion on June 30. Based in Wilkes-Barre, it is the parent firm of First Eastern Bank, N.A. and Peoples First National Bank and Trust Co., Hazleton, which have 64 banking offices throughout a nine-county region of northeast Pennsylvania.

NEW HAVEN, MI (JULY 23) PR NEWSWIRE - Margate Ventures, Inc. (NASDAQ: CGUL) announced that it sold 55 percent of its stock in New Haven Foundry to Wesley Industry, Inc. on July 19, 1990.

Wesley acquires control of New Haven Foundry effective July 1, 1990. Flint Mich.-based Wesley is owned and operated by Delbert W. Mullens, who also owns and operates Flint Coatings, a supplier of painted metal and parts for automakers.

Principal terms of the sale include: 1. $1.5 million cash to Margate at closing. 2. Wesley to pay a promissory note of $89,000; to be paid over six years at an interest rate of 2 percent above prime.

3. Margate to receive a sales commission of $150,000 per year, plus 3 percent on the difference between actual sales in excess of $35 million but less than $40 million, plus 2 percent on the difference between $40 million and actual sales that exceed $40 million.

4. Margate and its wholly owned subsidiaries to have an exclusive right to clean all castings produced by New Haven Foundry so long as Margate retains stock interest in New Haven Foundry or for a period of 10 years; whichever is longer.

5. Mullens to secure $5 million in new sales for New Haven Foundry. 6. Mullens to hold a seat on the Margate Board of Directors. 7. At Mullens' option, Margate to sell up to 1 million shares of its common stock to Mullens at the following prices so long as he retains a minimum 55-percent interest in New Haven Foundry and Margate retains a stock interest in New Haven Foundry.

-- 500,000 shares at 30 cents per share -- Additional 500,000 shares at 50 cents per share 8. Margate and Mullens to have a right of first refusal agreement on any further sales of New Haven Foundry stock by either party.

9. Upon Mullens' payment in full of the Promissory Note, he has the right to purchase an additional 20 percent of NHF stock (44 percent of the New Haven Foundry shares held by Margate) for a price of $800,000, or book value, whichever is greater. Upon such purchases, Margate can require Mullens to acquire all of its New Haven Foundry shares of $1.8 million, or book value, whichever is greater.

Margate Ventures, Inc. is a holding company whose active subsidiaries include Michigan Casting Corporation and Brown City Casting Corporation; manufactuers or finshers of ferrous castings, primarily for the automotive industry. Margate now owns a 45-percent interest in New Haven Foundry.

Margate Ventures' common stock is traded publicly in the NASDAQ Over-The-Counter system under the symbol CGUL. For additional information contact Susan Wetter at Margate Ventures, Inc., 58391 Main, New Haven, MI 48048.

PEACE DALE, RI (JULY 23) PR NEWSWIRE - American Power Conversion Corporation (NASDAQ: APCC) today announced record sales and earnings for the second quarter ended June 30, 1990.

Net sales for the second quarter of 1990 were $14.4 million, up 93 percent from $7.4 million for the second quarter of 1989. Earnings for the second quarter of 1990 were $1.9 million ($.53 per share), up 105 percent from $938,684 ($.26 per share) in the second quarter of 1989.

For the six month period ended June 30, 1990, net sales were $25.8 million an increase of 90 percent over the $ 13.6 million in sales from the corresponding six month period in 1989. Earnings for the period were $3.3 million ($.93 per share), up 78 percent from $1.8 million ($.53 per share) in 1989.

The Company's Board of Directors also announced a 3 to 1 stock split in the form of a 200 percent stock dividend, subject to shareholder approval of an increase in the number of authorized shares from 5 million to 20 million. The split is expected to be effected in September.

Rodger Dowdell Jr., President and Chief Executive Officer, noted that although competition is strong, acceptance of the Company's products continues to increase across a broad market base.

The Company will sponsor an analysts' meeting at its new corporate headquarters on Tuesday, July 31 at 10:00 a.m.

LAKE HAMILTON, FL (JULY 23) PR NEWSWIRE - Orange-co, Inc. (NYSE: OJ) announced today that it has signed an agreement to sell for cash a citrus grove totaling about 2,000 acres in St. Lucie County, Fla.

Under terms of the agreement, the price cannot be disclosed at this time. This sale is in addition to the announcement made last week of an agreement signed for the sale of a 200-acre grove, also in St. Lucie County.

In commenting on this latest sale, Ron Divin, Orange-co's chief executive officer, noted that "this transaction confirms our ability to restructure our assets in a manner consistent with our plans announced in April.

"Except for our 17,900-acre Joshua Grove, which we plan to rehabilitate in order to enhance its productivity, all of our groves are being marketed actively. The cash from this transaction will provide a substantial improvement to our balance sheet and cash flow and is a strong step in positioning the company toward better operating results."

All of the expected gain from this and future transactions will be sheltered by the company's existing net operating loss carryforward. The sale is subject to approval by the Federal Trade Commission under the Hart-Scott-Rodino Act, but neither party expects any objections from the government.

Final financing approval by the buyer's lending institution is also pending, but it is expected that this approval will be forthcoming shortly.

WAYNE, PA (JULY 23) PR NEWSWIRE - SEI Corp. (NASDAQ: SEIC) announced today that its board of directors had elected to opt out of certain newly enacted anti-takeover amendments to the Pennsylvania Business Corporation Law.

These amendments to Pennsylvania law would have restricted certain shareholders who acquired specified percentages of the company's shares from voting those shares unless the shareholders of the company specifically approved the grant of voting rights to those shareholders. In addition, the provisions would have required persons who acquired, or announced an intention to acquire, 20 percent or more of the company's outstanding stock or who disclosed an intention to seek control of the company to give up any profits realized in a sale of that stock within specified periods of time.

By "opting out" of these provisions, the board has determined that these provisions will not apply either to existing or future shareholders of SEI common stock. Alfred P. West Jr., SEI's chairman and chief executive officer, commented: "In reaching the decision to exclude SEI Corporation from the more controversial provisions of the statute, the directors noted

that these provisions limited the rights of shareholders to exercise their rights to vote and dispose of their stock as they desired."

ST. PAUL, MN (JULY 23) PR NEWSWIRE - Pentair, Inc. (NASDAQ: PNTA) the St. Paul-based manufacturer of industrial products and paper, announced today that its board of directors has elected Winslow H. Buxton president, chief operating officer and a director. Buxton will report to D. Eugene Nugent who remains Pentair's chairman and chief executive officer.

Buxton was formerly vice president of Pentair's Paper Group, which is comprised of Cross Pointe Paper Corporation, Niagara of Wisconsin Paper Corporation and Lake Superior Paper Industries, the joint venture with Minnesota Power. He joined Pentair in October 1986 as president of Niagara and was promoted to vice president of the Paper Group in 1989. In his new position, he will continue to head Pentair's Paper Group and will assume responsibility for the Specialty Product and General Industrial Equipment segments.

Buxton's 30 years of experience includes operations, engineering, marketing and other senior management positions at Willamette Industries, Boise Cascade and Publisher's Paper. He is a 1961 graduate of the University of Washington and holds a bachelor's degree in chemical engineering.

"Buxton's broad operating experience and proven management results should serve him well in the president's job," said Nugent. "His leadership style operations expertise and managerial ability are expected to make strong contributions to Pentair's continuing growth and performance."

Pentair, Inc., headquartered in St. Paul, Minn., is comprised of 10 businesses which manufacture woodworking equipment, electric power tools, sporting ammunition, electrical enclosures, automotive service equipment, industrial lubrication systems, material dispensing equipment, pumps and paper. Pentair common stock is quoted on the NASDAQ National Market System under the symbol: PNTA.

#90204p7371 07/23/1990 ~PR Newswire

DENVER (JULY 23) PR NEWSWIRE - Manville Corp. (NYSE: MVL) today reported results for the first half of 1990.

For the first half ended June 30, net sales were $1.079 billion, virtually unchanged from the first half of 1989. Income from continuing operations was $77.5 million or 58 cents per common share, in the first half of 1990 compared to $79.7 million or 60 cents per common share in 1989.

Second quarter 1990 net sales of $561 million decreased slightly compared with 1989, while income from continuing operations of $52.6 million increased by 16 percent.

In the second quarter 1990, Manville announced the sale of its worldwide refractory ceramic fibers businesses, resulting in a restructuring gain during that period.

Excluding the restructuring activities, operating income was down 11 percent for the first half and 13 percent for the second quarter when compared with the like periods in 1989.

"Our second quarter results reflect a mixture of forces driving our company," said Tom Stephens, Manville chairman, chief executive officer and president. "Construction-related markets continued to erode slowly, and while demand for our coated paperboard products was strong, packaging sales were down."

"In Brazil, our domestic markets continue to be negatively affected by the country's new economic program but our exports from Brazil remain on target. We remain confident about Manville's long-term prospects in Brazil and continue to strengthen our position in worldwide paper markets " Stephens added.

In April, Manville acquired a leading British carton producer, DRG Cartons Ltd., located in Bristol, U.K. In June, the company furthered its penetration of European paper markets with the acquisition of Fiskeby Board AB, a leading European supplier of recycled and coated products. Fiskeby is located in Norkopping, Sweden.

"In industrial products, we serve diverse markets, some of which were robust, while others, such as the auto industry, were down substantially. Our mining operations improved slightly from last year," Stephens said.

"We continue to pursue our previously-stated strategic objectives of growing our core businesses. To this end, we have absorbed costs in the first and second quarters associated with facility expansions, start-ups and acquisitions," Stephens concluded.

Stephens said that competitive pressures in all of the company's product lines are expected to intensify during the second half of 1990.

Manville is an international manufacturing and natural resources company headquartered in Denver. The company's primary businesses include building and engineered products, fiber glass and industrial insulation products, paper and wood products, packaging, roofing systems and filtration and minerals. Founded in 1858, Manville has more than 18,000 people at more than 50 plants and four mines worldwide. Manville and its subsidiaries have more than $2.5 billion in assets as of Dec. 31, 1989.

CONTACT: Don Ferguson, 303-978-3255; or William Bullock, (Financial) 303-978-4694, both of Manville Corp.

CLEVELAND (JULY 23) PR NEWSWIRE - Nestle Enterprises, Inc., announced today that it will not expand its Stouffer Restaurant Company but will begin an orderly process of preparing the restaurant group for an eventual sale. The decision follows extensive evaluation of the long-range business strategy of Nestle in the United States.

The Stouffer Restaurant Company has been in business for 66 years and has many outstanding properties throughout the country. The 65-unit company owns and operates restaurants under several brand names: J.B. Winberie, James Tavern, Rusty Scupper and Parkers' Lighthouse, as well as individual restaurants such as the famous "Top" restaurants in New York City, Boston, Pittsburgh, Philadelphia, Columbus, and Cleveland.

James M. Biggar, chairman and chief executive officer of Nestle Enterprises, said the decision was based on the company's desire to focus

its efforts on its other subsidiaries, including Nestle Foods Corporation, the Nestle Hills Coffee Company, Stouffer Foods Corporation, Stouffer Hotel Comapny, The L.J. Minor Corporation, Wine World Estates, Sunmark Inc., and FreshNes Foods Corporation, as well as several new ventures. Said Biggar, "Our restaurants have made a proud contribution over the past 66 years. However, the restaurant industry has changed significantly and is better operated by specialty chains and entrepreneurs rather than a large corporation like Nestle."

John Quagliata, president of Stouffer Restaurant Company for the past eight years, will continue to head the company and assist in the offering. Stouffer Restaurant Company personnel will be considered for positions in other Nestle companies as opportunities arise. In the meantime, Stouffer Restaurant Company will work with its managers and employees in every location to maintain its high standards for quality and its commitment to customer service.

WARREN, OH (JULY 23) PR NEWSWIRE - Alcan Building Products, a Division of Alcan Aluminum Corporation (NYSE: AL), has purchased Alumax Aluminum Corporation's Building Specialties Division. The purchase price was not disclosed.

The Alumax Building Specialties Division fabricates and distributes aluminum and steel commercial and industrial siding & roofing, architectural panels and exterior building specialty products from seven locations. These include Mesquite, Texas; Fremont and Cerritos, Calif.; Harrisburg and Leola, Penn.; Kansas City, Mo.; and Atlanta, Ga. The acquisition also includes a steel and aluminum coil coating line located at Mesquite, Texas.

"The Alumax Building Specialties Division is a recognized leader in the residential and commercial building and construction industry," said Donald L. Sperry, president of Alcan Building Products. "This acquisition provides our company with additional market, product and distribution synergy as well as entry into new markets not previously serviced by Alcan. The acquired business will be integrated into Alcan's Fabral and Building Specialties business units. Each Alcan business has over 20 years experience in servicing the customers in their respective markets."

Alcan Building Products, a Division of Alcan Aluminum Corporation, is a major manufacturer/marketer of residential and commercial building

products in the United States. Alcan Building Products now has 36 different manufacturing and distribution locations in 16 states.

FAIRFAX, VA (JULY 23) PR NEWSWIRE - CACI Marketing Systems, a division of CACI International Inc. (NASDAQ: CACIA) has just published "The Sourcebook of City Demographics," a new book containing demographic and income forecast information for the 100 largest cities in the United States.

"The Sourcebook of City Demographics" provides readers with nearly 200 data statistics for each of the country's 100 largest cities, totaling nearly 20,000 different statistics. Included in the publication are: 1980, 1990 and 1995 population, households, families, average household and family size, total and per capita income, average and median family and household incomes, income and age distribution, average and median age and race distribution. Also included is the same information for the United States, as a benchmark.

"The Sourcebook of City Demographics" follows on the success of CACI's two other sourcebook publications: "The Sourcebook of ZIP Code Demographics" and "The Sourcebook of Country Demographics." First introduced in 1984, CACI's line of sourcebook products met with instant success, meeting marketers' longtime need for a quick and accurate desktop resource guide. Since then they have been widely acclaimed by the entire marketing community as the premier guides for demographic and marketing information.

In addition to the statistical information included in "The Sourcebook for City Demographics," readers will also find a copy of CACI Marketing Systems' unique methodology statement, summary table and a glossary of terms.

CACI, in its 29th year, is an international high-technology and professional services corporation. CACI is a leader in advanced information systems, engineering, logistics, proprietary software and market analysis. CACI provides worldwide services in support of national defense agencies, civil government and commercial enterprises. CACI offices are located in major cities in North America and Western Europe. Corporate headquarters are in the metropolitan Washington area.

TULSA, OK (JULY 23) PR NEWSWIRE - MAPCO, Inc. (NYSE: MDA) today reported an all-time high quarterly earnings record for earnings per share (excluding extraordinary items) and operating profit. For the three months ended June 30, 1990, earnings per share were $1.31, an increase of 92 percent over last year's $.72 per share; net income was up 46 percent to $41.4 million in 1990 from $28.4 million in 1989; and operating profit was up 50 percent to $81.4 million in 1990 from $54.2 million in 1989.

For the six months ended June 30, 1990, earnings per share were $2.41, compared to $1.61 per share in 1989. Net income for the six months was $78.1 million in 1990 and $63.8 million in 1989; and operating profit was $150.8 million in 1990 and $116.9 million in 1989.

Average shares outstanding for the three months were 31.3 million in 1990 and 39.5 million in 1989. For the six month period average shares outstanding were 32.5 million in 1990 and 39.7 million in 1989.

James E. Barnes, chairman and chief executive officer of MAPCO, commenting on the quarter, said, "The 82 percent increase in earnings per share and the 50 percent increase in operating profit reflects an outstanding reaction by our operating businesses to favorable industry trends and the continuing impact of the five-point plan approved by MAPCO's board in April 1989 to enhance long-term shareholder value. The strong operating profit performance includes a year-to-year increase in each of MAPCO's four business segments, including a substantial increase in petroleum."

Barnes noted, "In July the company completed the share repurchase part of the five-point plan." 12.5 million shares were purchased by the company including 2.5 million shares in connection with the Employee Stock Ownership Plan, at an average cost per share of slightly less the $38. Barnes continued, "We have now accomplished the financial restructuring aspects of the five-point plan, which included, in addition to the stock repurchase programs, a 100 percent dividend increase and a two-for-one stock split. A continuation of the company's internal expansion and asset acquisition program is the remaining facet of the five-point plan."

Barnes stated that, "MAPCO's record performance in the second quarter is the result of favorable industry conditions, generally, and the efficiency of MAPCO's operations within their individual business niches. These results should be expected to continue as long as both conditions exist."

MAPCO is a diverse energy company whose business is conducted by four operating subsidiaries: MAPCO COAL produces and markets bituminous steam and metallurgical coal; MAPCO GAS PRODUCTS produces and markets natural gas liquids and fertilizers; MAPCO PETROLEUM operates refineries and

retail marketing networks through the Mid-South and Alaska systems; and MAPCO TRANSPORTATION operates natural gas liquids and ammonia pipelines, and fractionation and storage facilities.

SOMERVILLE, N.J. (JULY 23) PR NEWSWIRE - Unimed, Inc. (NASDAQ: UMED) today announced that it has signed a non-binding letter of intent with a Far Eastern group for the private placement of common stock. The private placement, which will involve 1.5 million shares of common stock, will be subject to required approvals and execution of definitive agreements. The private placement will be managed by First Albany Corporation.

The Far Eastern group, a diversified conglomerate with business interests including pharmaceuticals, has active relationships with several well-known international companies.

Dr. Harold J. Tenoso, Unimed's president and chief executive officer, stated, "The Far Eastern group has the resources and relationships to provide both near- and long-term investment as our business develops. This relationship will also strengthen our ability to establish alliances in Asia."

Tenoso added the proceeds from this placement will be used to advance the company's product alliances and marketing strategies and to accelerate the development program for Marinol(R) (dronabinol) in the treatment of appetite loss and weight loss in cancer and AIDS patients.

Unimed, Inc. is a pharmaceutical company specializing in the early acquisition, development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

#90204p7396 07/23/1990 ~PR Newswire

PHILADELPHIA (JULY 23) PR NEWSWIRE - Meritor Savings Bank (NASDAQ: MTOR) today reported a second quarter net loss of $136.8 million, or $3.90 per share, compared to a net loss of $21.2 million, or 61 cents per share

during the same quarter last year.

As previously announced, second quarter results were impacted by several factors:

-- The sale of 54 branch offices to Mellon Bank (East), -- Additional restructuring transactions totaling $74.5 million, and -- A provision for possible credit losses in the amount of $42.5 million.

Net loss for the six months ended June 30, 1990, was $166 million, or $4.73 per share, compared to a net loss of $9 million or $.26 per share for 1989.

"We have made significant progress during the quarter in the long- term strategic restructuring of the institution," said Meritor Chairman Roger S. Hillas. "We closed the Mellon branch sale; finalized the recapitalization of our Florida subsidiary and completed a number of necessary restructuring transactions resulting in a balance sheet that more accurately reflects current operations," he added.

Meritor posted a net loss on the divestiture of operations and provision for restructuring of $74.5 million representing the branch transaction and other restructuring transactions. The company recorded a premium of $337 million on the sale of 54 branches to Mellon. Additionally, the following restructuring transactions were completed during the quarter:

-- A reduction of goodwill in the amount of $171.9 million; -- A loss of $115.1 million on the disposition of assets associated with the branch sale;

-- $16.1 million in costs relating to the branch sale transaction; -- Termination of interest rate swap and floor contracts which mature beyond 1990 resulted in a loss of $54.7 million, and

-- Establishment of a reserve in the amount of $53.7 million for unrealized benefits associated with certain facilities under long-term leases.

Net interest income for the second quarter was $22.4 million, compared to $45.1 million for the second quarter of 1989. This decline was primarily the result of a decrease of $4.9 billion in average interest-earning assets, as well as a decline in the average net yield to .98 percent from 1.28 percent in the second quarter of 1989.

The provision for possible credit losses was $42.5 million for the quarter. A significant portion of the provision is attributable to recent deterioration of commercial and real estate related loans and Meritor's plan to accelerate the disposal of certain nonperforming assets. Total

nonperforming assets increased from $323.3 million at year end to $359.4 million at June 30, 1990.

Noninterest income was $4.9 million for the quarter, compared to a loss of $5.6 million for the second quarter of 1989. Included in the current quarter are losses of approximately $5.5 million, associated primarily with the sale of the remaining interest-only derivatives included in the mortgage-backed securities portfolio.

Noninterest expense was $43.6 million for the quarter, compared to $56.4 million during the second quarter of 1989. The lower level of noninterest expense was the result of a decline in the workforce and the divestiture of operations.

With regard to regulatory capital, Hillas noted that Meritor had improved its regulatory capital position in the second quarter, primarily the result of the branch sale which reduced assets by approximately $5 billion. Meritor's primary capital at June 30, 1990, was 7.3 percent, exceeding the required 6.5 percent. The primary capital ratio will further improve to approximately 9.5 percent when the full impact of the asset reduction is reflected in the ratio computation during the next quarter.

Total assets at the end of the second quarter were $6.9 billion, compared to $12.6 billion at the end of 1989. Meritor's shareholders' equity totaled $135.8 million at June 30, 1990, compared to $303.7 million at year end 1989. The recently announced recapitalization of the Florida subsidiary will increase the company's shareholders' equity by approximately $98 million and will be reflected in the third quarter.

Meritor Savings Bank is a financial services institution. Its flagship operation, the Philadelphia Savings Fund Society, provides financial services to nearly 200,000 households in the Philadelphia area through its network of 29 branches.

PHILADELPHIA (JULY 23) PR NEWSWIRE - Bell Atlantic Corp. (NYSE: BEL) today reported second-quarter net income of $362.8 million, a 6.2 percent increase over the $341.7 million recorded for the second quarter of 1989.

Net income for the first six months ended June 30, 1990, was $718.1 million, a 6.8 percent increase over the $672.5 million for the corresponding period last year.

Earnings for the quarter were $.92 per share, a 5.7 percent increase over the $.87 per share for the second quarter of 1989. For the first half of 1990, earnings per share were $1.82, compared with $1.71 for the same period last year, a 6.4 percent increase. All per share amounts reflect a two-for-one stock split effective April 10.

Total operating expenses for the second quarter were $2.39 billion, compared with $2.26 billion for the corresponding quarter in 1989, an increase of 5.6 percent. Expense levels reflect modest increases at the network telephone companies, expanded business activity in other subsidiaries, and the acquisitions of Control Data Corp.'s third party maintenance business on Jan. 3 and the mid-Atlantic regional operations of Northern Telecom's Meridian Business Systems Group on June 4.

On June 14, the company announced that along with Ameritech (NYSE: AIT) it will purchase the Telecom Corporation of New Zealand for $2.4 billion.

In mid-June, the government of Czechoslovakia awarded Bell Atlantic and U S West (NYSE: USW) the exclusive rights to form joint venture companies with the Czechoslovakian Ministry of Posts and Telecommunications to construct and operate a cellular network and a public switched packet data network.

Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone (Delaware), and the Chesapeake and Potomac Telephone Companies serving Maryland, Virginia, West Virginia and Washington, D.C

The corporation also is the parent company of businesses that provide mobile communications in the mid-Atlantic region as well as computer maintenance and financial services in national and international markets.

#90204p7398 07/23/1990 ~PR Newswire
BOSTON (JULY 23) PR NEWSWIRE - XTRA Corporation (NYSE: XTR) announced today that it has called for redemption the $88.5 million of Series A Medium Term Notes of XTRA, Inc., a wholly owned subsidiary. The notes will be redeemed at par on Aug. 22, 1990. These notes were subject to a reset provision whereby the company is required either to begin paying a higher interest rate or to redeem the notes at par. These fixed rate notes are being redeemed principally with the proceeds from a new $80 million Term Loan Agreement, underwritten by The First National Bank of Boston and Continental Bank, N.A., as co-agents. Borrowings under this agreement are at floating interest rates. The balance of the financing will be provided by the company's existing Revolving Credit Agreement.

Robert Goergen, chairman of the board noted "this new Term Loan Agreement, provided by two major bank lenders, facilitates the repayment of the Medium Term Notes which would have become expensive financing for XTRA. The willingness of two long standing lenders to promptly provide the financing at attractive rates is a sign of confidence in the company and its plans going forward."

XTRA Corporation is engaged in transportation leasing services, primarily the leasing, on an operating basis, of intermodal equipment, including piggyback trailers and domestic containers and chassis, as well as over-the-road trailers.

NEW YORK (JULY 23) PR NEWSWIRE - The Bank of Tokyo, Ltd., announced today the appointment of Yoji Anzai to executive vice president of the Bank of Tokyo Trust Company, a subsidiary of the Bank of Tokyo Ltd.

The appointment of Anzai is part of a move by The Bank of Tokyo to expand its nationwide investment banking business in the United States. In addition to supervising the growing investment banking operations of The Bank of Tokyo in New York and of its Union Bank subsidiary in California, Anzai will supervise the operations of BOT Financial Corporation which incorporates the BancNewEngland Leasing Group, which The Bank of Tokyo acquired from the Bank of New England on June 1 for $500 million.

"Mr. Anzai will concentrate our resources on developing fee-generating investment banking business on a much larger scale," said Kenji Yoshizawa,

resident deputy president for the Americas of The Bank of Tokyo, Ltd.

"With our offices across the United States, we expect to tap the middle market to provide American companies with the unique skills of our 300 offices in 42 countries around the world. This will facilitate American participation in the globalization of business through strategic alliances and other tailor-made arrangements."

Anzai, 49, has been general manager of The Bank of Tokyo's Financial Services Department at headquarters in Japan since 1985. Previously he managed the fiduciary trust and financial services operations of the Bank's subsidiary in San Diego, and was also a lending officer in San Francisco. Anzai is a graduate of Keio University in Economics.

The Bank of Tokyo is the largest foreign bank in the United States with assets of $47.2 billion of its total assets of $210.8 billion. It has offices and subsidiaries in New York, Chicago, Los Angeles, Houston, San Francisco, Boston, Atlanta, Cleveland, Cincinnati, Miami, Seattle, and Portland.

#90204p7409 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - John K. Ziegler, chairman of Willcox & Gibbs, Inc. (NYSE: WG), announced today that sales for the quarter ended June 30, 1990 rose slightly to $139,170,000 and earnings declined to $3,577,000, compared with sales of $137,864,000 and earnings of $4,646,000 for the same quarter in the prior year. Net earnings per share were 26 cents compared with 34 cents for the comparable 1989 period.

Ziegler stated that the sales of Consolidated Electric, the company's electrical supply division, increased about 9 percent compared with the prior year, but that the company's apparel and covered yarn divisions continued the disappointing trends experienced in the first quarter, both recording decreases in sales and earnings. These declines are due to general economic conditions and to the tightening of inventories by manufacturers, wholesalers and retailers.

Ziegler said that he believes results in the covered yarn and apparel divisions will improve as the year progresses, and he expects the company's results in the last half of the year to be better than the first and second quarter results.

Net income for the six months, before unusual charges after-tax of $2,040,000, declined to $6,861,000 compared with $8,947,000 in the same period in 1989. Net earnings per share for the six months ended June 30,

1990, after the $2,040,000 charge, were 35 cents compared with 65 cents for the same period in 1989. Sales for the six months ended June 30 were $278,167,000 in 1990 compared with $272,233,000 in the year earlier period.

Ziegler stated that the unusual charges recorded in the first quarter of 1990 consisted of a provision for estimated expenses resulting from a planned restructuring in several divisions of the company. As of the end of June, about 50 percent of the restructuring had taken place.

Ziegler further stated that the company expects to complete the acquisition of its previously announced purchase of Filix Lastex S.A. of Troyes, France on about Aug. 1, 1990. Filix Lastex S.A. is the largest covered yarn manufacturer in France and one of the industry leaders in Europe. In 1989, sales reached $51,000,000 and net earnings were $3,200,000.

Willcox & Gibbs is a distributor of industrial parts and supplies and a specialty manufacturer of covered yarn.

IRVINE, CA (JULY 23) PR NEWSWIRE - Toshiba America Information Systems Inc. today announced the appointment of Thomas B. Martin as vice president of marketing for the Computer Systems Division.

Bill Johnson, vice president and general manager of the computer systems division, stated, "We are delighted to have Tom join the Toshiba management team. His experience and successful track record gives us great confidence in his ability to strengthen Toshiba's presence in the

portable computer marketplace."

Martin will be responsible for directing all marketing activities and planning for the computer systems division. Both product planning and marketing communications will report to Martin in his new capacity.

Martin comes to Toshiba America from a distinguished history in the portable computer arena. Prior to joining Toshiba, he held the position of vice president of the computer business unit for NEC technologies where he was instrumental in introducing a number of innovative products including a notebook computer and a desktop "docking station"

From 1981 to 1986, Martin worked at McKinsey & Co., an international consulting firm in Chicago. In this position, Martin focused on the electronics industry for Fortune 500 companies.

Martin holds a bachelor's of science in engineering from Brown University and a master's in business administration from MIT.

Toshiba America Information Systems is a wholly owned subsidiary of Toshiba America Inc. Five divisions within TAIS market a wide range of office automation products within the United States. The Toshiba Computer Systems Division markets and supports high-quality Toshiba portable personal computers and peripherals for the United States marketplace.

#90204p7418 07/23/1990 ~PR Newswire

SENECA FALLS, NY (JULY 23) PR NEWSWIRE - Goulds Pumps, Inc. (NASDAQ-NMS: GULD) today reported record sales, net income and earnings per share for the second quarter of 1990. These levels of performance were the highest in the history of the company.

Second-quarter sales were $142.4 million, up 8 percent from $131.6 million a year ago. Net income increased 24 percent to $8.8 million, up from $7.1 million for the same quarter a year ago. And earnings per share were 43 cents, up from 35 cents a year ago.

Net income from continuing operations increased 11 percent to $8.8 million compared to $7.9 million in 1989. And earnings per share from continuing operations were 43 cents in the second quarter, compared to 39 cents in 1989.

Total orders received for the second quarter were also a record $145.9

million, up from $143.9 million a year ago. Consolidated backlog totaled $116.9 million, compared to $113.3 million a year ago.

Gross margins also improved, moving from 28.2 percent in the first quarter of 1990 to 30.2 percent for the second quarter. This also exceeds the 29.3 percent margin of the second quarter a year ago.

Goulds Industrial Products Group increased second-quarter sales by 7 percent to $86.8 million, from $80.9 million a year ago. Second- quarter orders of $91.4 million were down slightly from the same period a year ago reflecting the sale of Gaso Pumps and the company's greater selectivity for higher margin orders in the global municipal market. Orders in Goulds Pumps' core industrial markets rose 5 percent, and repair parts and Pro Shops showed record results. Second-quarter backlog of $114.9 million is comparable to 1989's $110.7 million.

Goulds' largest division, the engineered products division, reached an all-time high of $49.2 million in quarterly shipments. This is the fourth consecutive month of strong shipment levels, as Goulds continues to streamline and optimize operations.

The water technologies group increased second-quarter sales by 10 percent to $55.6 million, up from $50.7 million a year ago. The 35 percent sales gain posted by the Lowara S.p.A. accounted for more than the total sales increase, but was offset by a 7 percent sales decrease in the rest of the group. Lowara is benefiting from a strong Italian economy and excellent exports at the same time that Goulds water systems division is being negatively affected by poor housing starts and an uncertain economy.

Sales for the first six months of 1990 also increased 9 percent to a record $267.6 million, compared to $245.5 million for the first half of 1989. Net income rose 12 percent to $15.2 million, up from $13.6 million in 1989. Earnings per share were 74 cents, up 10 percent from 67 cents. And earnings per share from continuing operations were 74 cents, compared to 75 cents in 1989.

In announcing these results, President and CEO Stephen V. Ardia stated that the outlook for Goulds remained bright for the remainder of the year. The demand in core industrial markets remains high, he said, and the new management teams and systems put into place in 1989 continue to have a favorable impact on operations. In addition to the company's strong financial performance, management is pleased at the significant improvements in customer service levels at all of its industrial operations. Goulds said it is on target for all-time record highs in both sales and earnings.

SAN FRANCISCO (JULY 23) PR NEWSWIRE - Plans for a new Kodak (NYSE: EK) Ektachem analyzer targeted for lower-volume applications were announced today at the joint meeting of the American Association for Clinical Chemistry and the International Congress for Clinical Chemistry at Moscone Center.

The Ektachem 250 analyzer will join Kodak's line of automated, random-access analyzers, giving the company analyzers suitable for low-, mid- and high-volume users. It will be commercially available late next year.

"Kodak will now have an analyzer designed specifically for every laboratory need, from large, to medium to small," pointed out Ruth Unzicker, vice-president and general manager, U.S. marketing, Clinical Products Division.

The Ektachem 250 analyzer will run up to 250 tests an hour. It is targeted to meet the requirements of small laboratories and clinics, and joins a product line that includes the Ektachem 700XR analyzer and the Ektachem 500 analyzer. Because it is based on Kodak's existing dry-slide technology, the 250 analyzer is ideal for use by small hospitals as a backup unit or as a STAT analyzer in remote or satellite locations.

Kodak and Ektachem are trademarks.

#90204p7421 07/23/1990 ~PR Newswire

GOLDEN, CO (JULY 23) PR NEWSWIRE - Amax Gold Inc. (NYSE: AU; TORONTO: AXG) announced a net loss of $4.5 million, 7 cents per share, for the second quarter of 1990 after a charge of $12.6 million to substantially reduce the carrying value of its investment in Canamax Resources Inc. Second quarter 1989 net earnings were $8.9 million, 15 cents per share. Gross operating margin for the 1990 quarter was slightly higher than last

year at $15.8 million compared with $15.1 million.

Gold production increased 29 percent for the second quarter to 91,654 ounces compared with 70,845 ounces for the second quarter of 1989. This increase is due primarily to the excellent results achieved at the Wind Mountain Mine in Nevada. Wind Mountain produced 22,382 ounces of gold for the 1990 second quarter compared to a start-up level of 3,620 ounces for the second quarter of 1989.

"Second quarter operating results were outstanding, particularly in view of falling gold prices. All of Amax Gold's operations are running at peak efficiency and producing quality results," commented Timothy J. Haddon, president and chief executive officer. He added, "Current weak conditions in gold markets have led to a decision by Canamax to suspend operations at two of its three producing properties. In line with this decision and our conclusion that Amax Gold's holding in Canamax is not expected to be maintained for the long-term, this investment has been reduced. Given Amax Gold's superior cost position, we expect continued strong performance over the remainder of 1990 despite current gold prices."

Sales for the second quarter were $37.2 million compared to $28.9 million for the like period in 1989. Amax Gold's realized price for the second quarter was $400 per ounce, $34 higher than the average COMEX price. Cash production costs for the second quarter of 1990 were $143 per ounce compared to $130 per ounce for the like period in 1989.

Net earnings for the six months ended June 30, 1990, after the Canamax charge, were $5.5 million, 9 cents per share, compared to $18.1 million, 30 cents per share for the first half of 1989. Gross operating margin remained constant for both six-month periods of 1990 and 1989 at $31.5 million. Production and sales increased for the six-month period to 176,448 ounces of gold and $72.5 million, respectively, compared with 137,416 ounces of gold and $57.5 million, respectively, for the like period in 1989.

For the first six months of 1990, Amax Gold realized a price of $410 per ounce of gold sold, $24 higher than the average COMEX price, as a result of hedging activities. Cash production costs rose to $143 per ounce for this six-month period compared to $125 per ounce for the like period in 1989.

Amax Gold produces and explores for gold in the United States and New Zealand, is listed on the New York and Toronto stock exchanges and is 87 percent owned by AMAX Inc.

CORPUS CHRISTI, TX (JULY 23) PR NEWSWIRE - Hitox Corporation of America (NASDAQ: HTXA), a producer of buff-colored titanium dioxide pigment used in the manufacture of paints, industrial coatings and plastics, had lower sales and net earnings for its second quarter and six months ended June 30 1990, Richard L. Bowers, chairman and president, announced today.

In the second quarter, Hitox had sales of $4.2 million, compared with $4.7 million a year ago. Net earnings for the quarter amounted to $464,000, equal to 13 cents per fully diluted share, against $727,000, or 21 cents per share, fully diluted, attained in the year-earlier period.

For the 1990 six months, sales were $8.6 million, compared with $8.7 million in 1989. Net earnings in the current year totaled $598,000, equal to 17 cents per share, fully diluted, against $1.3 million, or 38 cents per share, fully diluted, in the prior year.

In the 1990 first quarter, Hitox discontinued its zinc oxide operations in Spokane, Wash., and had a special writedown of $500,000, approximating 11 cents per share.

"As anticipated," Bowers said, "we experienced lower demand for our HITOX pigment during the second quarter, reflecting the soft U.S. economy. Although demand for titanium dioxide is presently soft, the shortage of synthetic rutile, our primary raw material, persists. Synthetic rutile prices continue to increase, causing a negative impact on operating margins. This margin squeeze will be gradually alleviated as our newly refurbished synthetic rutile plant in Malaysia comes into production."

Bowers indicated that sales of the company's iron oxide and barium sulfate lines are above 1989 levels and that its new HALTEX alumina trihydrate product is being well received in the marketplace.

According to Bowers, the synthetic rutile plant in Malaysia is close to commercial production. "Reports from our new subsidiary company, The Malaysian Titanium Corporation, indicate that preliminary commissioning is proceeding as expected. Short of any unforeseen problems, we will have some commercial production in the current quarter," he stated.

Based in Corpus Christi, Hitox Corporation manufactures pigments and extenders which are marketed worldwide to paint, plastics and chemical industries.

ST. PAUL, MI (JULY 23) PR NEWSWIRE - Deluxe Corporation (NYSE: DLX) reported that sales for the second quarter were $328,87,185, up 5.8 percent from $310,820,049, last year, while net earnings were $38,189,966 or $.45 per share up 11.6 percent compared to $34,211,171, or $.40 per share a year ago.

Sales for the first six months of 1990 reached $673,862,171, up 7.3 percent from $627,746,136 a year ago. Net earnings for the period were $74,240,811, or $.87 per share up 14.7 percent compared to $64,706,081, or $.76 per share a year ago.

The company had an average of 84,730,300 shares outstanding for the quarter and 84,912,547 shares outstanding for the six-month period with par value of $1.00 per share.

President and Chief Executive Officer Harold V. Haverty said that slower revenue growth was the result of a sluggish economy and that the company performed very well in managing operating costs during the period. "We anticipated the slow economic growth," said Haverty, "and our operating units did a good job of controlling costs. Although there is continued uncertainty about the economy for the remainder of the year, Deluxe should be able to respond to changing business conditions and we anticipate posting improved sales and earnings for 1990."

Deluxe Corporation is an industry leader in providing products and services to the financial payment systems industry. The company is the nation's largest check printer and also provides electronic funds transfer (EFT) software and processing services, ATM card services, new-account verification services, and sales development services to financial institutions. Deluxe's Business Systems Division produces a variety of computer and business forms and related products for small businesses and professional practices. The company's Consumer Specialty Products Division markets greeting cards, stationery, and a variety of related products to households.

DALLAS (JULY 23) PR NEWSWIRE - Capstead Mortgage Corporation (NYSE: CMO) announced today earnings of $7,290,000, or 59 cents per share (54 cents per fully diluted share), for the quarter ended June 30, 1990, as compared to $4,603,000, or 53 cents per share, for the same quarter in 1989. Net income for the six months ended June 30, 1990, was $14,618,000, or $1.18 per share ($1.07 per fully diluted share), as compared to $8,970,000, or $1.03 per share, for the same period in 1989.

The company has qualified as a real estate investment trust by distributing at least 95 percent of its net income in the form of dividends to its stockholders. On June 29, 1990, a dividend of 57 cents per common share and 40 cents per share on the $1.60 cumulative preferred stock, Series A, was distributed by the company to its stockholders.

Subsequent to the end of the quarter the company increased its line of credit to $90 million with the addition of one commercial bank for $15 million.

Capstead Mortgage Corporation invests in long-term, single-family residential mortgages for the purpose of offering investors the opportunity to participate in the income generated from the management of a portfolio of mortgage loans utilizing pooling and the issuance of collateralized mortgage obligations and other portfolio management strategies. It is managed by Capstead Advisers, a subsidiary of Lomas Mortgage USA.

STAMFORD, CT (JULY 23) PR NEWSWIRE - Sprague Technologies, Inc. (NYSE: SPG) today reported 1990 second quarter net income of $1.9 million or 11 cents per share, compared with a 1989 second quarter loss of $45.4 million or $(2.49) per share.

The second quarter of 1989 included a provision for restructuring of $39.2 million. Operating income from continuing operations for the 1990 second quarter was $4.4 million versus an operating loss of $1.8 million (before the restructuring provision) reported in the 1989 second quarter. Net sales for the period were $84.9 million compared to $89.7 million for the second quarter of 1989.

Sprague reported net income for the six months ended June 30, 1990, of $3.4 million, or $0.19 per share, compared to a net loss of $45.3 million, or $(2.49) per share, for the comparable period in 1989.

Operating income from continuing operations was $8 million in the first six months of 1990 versus operating income of $1.2 million in the first half of 1989 before the restructuring provision. Net sales were $169.4 million for the six month period of 1990 compared to $196 million in 1989.

Included in the sales for the three months and six months of 1989 are revenues of $11.9 million and $25.4 million and operating losses of $2.7 million and $4.5 million, respectively, for the company's Fil-Mag and ceramic capacitor operations which were transferred to businesses held for sale as of June 30, 1989. On a comparable year-to-year basis, revenues from continuing operations were nine percent higher in the second quarter and six percent higher for the first half of the year.

Edward F. Kosnik, president and chief executive officer commented, "We are optimistic that earnings in the second half will be higher than the first six months, although third quarter results will be weaker than the second quarter due to seasonally lower shipments."

Sprague Technologies, Inc. is a worldwide manufacturer of capacitors, and other electronic components.

CHICAGO (JULY 23) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) and its wholly owned subsidiary, Sears Receivables Financing Group, Inc. (SRFG), announced today that the subsidiary offered for sale $250 million of Sears Credit Account Trust 1990 C 8.70 percent credit account pass-through certificates through an underwriting syndicate managed by Dean Witter Reynolds Inc., Lehman Brothers and Merrill Lynch Capital Markets. The securities have a scheduled maturity date of Aug. 25, 1995. The securities were priced at 99.855 percent of par resulting in a yield of 8.75 percent.

Sears, through SRFG, has sold a portion of its credit card accounts receivable portfolio to a trust which issued the certificates. The certificates represent undivided ownership interests in the trust. The certificates will be rated "Aaa" by Moody's, "AAA" by Standard & Poor's and "AAA" by Duff & Phelps.

NEW YORK (JULY 23) PR NEWSWIRE - The Blackstone Group and RP Companies, Inc., whose sole owner is I. Martin Pompadur, announced today the formation of a joint venture with $100 million of equity capital available to invest in media and entertainment properties both domestically and abroad.

The venture has been formed to invest in a wide array of media properties including cable television systems, radio stations, television stations, cellular communications, publishing, video retailing, television and cable programming, and program syndication and distribution. The venture intends to capitalize on the management expertise of RP Companies, Inc. as well as on the financial expertise of Blackstone in looking at traditional equity investments in undervalued media properties as well as troubled situations within the industry, due in large part to today's financing and economic climate.

The Blackstone Group, an international investment bank, was founded in 1985 by Peter G. Peterson, former chairman and CEO of Lehman Brothers Kuhn Loeb and U.S. Secretary of Commerce, and Stephen A. Schwarzman, former chairman of the merger & acquisition committee at Lehman Brothers Kuhn Loeb. Blackstone Capital Partners, the affiliated investment fund of The Blackstone Group, has raised over $800 million in equity capital and has access to a much larger pool of debt capital from its limited partners such as Prudential, Nikko Securities, Metropolitan Life, and GECC.

To date, Blackstone Capital Partners has led investors in over $5 billion worth of acquisitions including the Wickes Companies, CNW Corporation, the Howard Johnson and Ramada franchise systems and Transtar Inc., the transportation business of USX which Blackstone owns jointly with USX.

RP Companies, Inc. was founded in 1988 by I. Martin Pompadur, former president and chief operating officer of Ziff Corporation and a senior executive and a member of the board of directors of American Broadcasting Companies, Inc. and the late Elton H. Rule, former president and vice chairman of the board of American Broadcasting Companies, Inc. RP Companies, Inc. is a holding and management company for all of Pompadur's activities.

ST. PAUL, MI (JULY 23) PR NEWSWIRE - Merrill Corporation (NASDAQ: MRLL) today announced that it has acquired Los Angeles-based Group Printing California. The acquisition brings additional web and sheet-fed printing capacity to Merrill's Los Angeles printing facility, as well as important binding and finishing equipment. All Group Printing employees, including salespeople, joined Merrill. Terms of the acquisition were not disclosed.

In commenting on the acquisition, Robert Nienhouse, president of Merrill's California operations, said, "The addition of Group Printing California makes Merrill one of California's largest printers. It also is an exceptional combination. Joining Merrill are experienced professionals who share our desire to provide superior service. And the additional printing and binding equipment enhance Merrill's ability to meet all of our clients' diverse needs."

John Castro, president and chief executive officer of Merrill Corporation, said of the acquisition, "This fulfills our goal of creating a full-service financial and commercial printing operation to service our fast-growing list of clients in the California market. Group Printing also complements the expanded nationwide printing capacity. Today, Merrill is one of the top three financial printers in the United States."

During the previous 12 months, Merrill Corporation has acquired assets of Chas. P. Young in Chicago, San Francisco and Los Angeles (July 1989); American Offset Printers in Los Angeles (September 1989); Southeastern Financial Printing in Atlanta and Group Web Inc. in St. Paul (February 1990); and S Printing Company (formerly Sorg Printing Company) in Chicago one week ago.

Merrill Corporation provides on-demand, 24-hour-per-day typesetting, printing, reproduction and distribution services to the financial, corporate and legal communities through affiliates overseas and 15 operating centers around the United States, including West Coast facilities in Los Angeles, San Francisco, San Diego, Newport Beach, Portland and Seattle. The company's shares are traded on the NASDAQ National Market System under MRLL.

WELLESLEY, MASS. (JULY 23) PR NEWSWIRE - EG&G, Inc. (NYSE: EGG), announced it has received an offer from NOK Corporation to purchase its Fluid Components Technology Group (FCTG). The Group, a diversified components manufacturing organization headquartered in Warwick, R.I., has contributed approximately $95 million in revenues through the first six months of 1990 and approximatley $180 million for the year 1989.

EG&G's Chairman and Chief Executive Officer, John M. Kucharski, said, "I plan to request approval from our board of directors to enter negotiations with NOK." The next meeting of the EG&G board is scheduled for July 25th.

Kucharski said, "EG&G and NOK have enjoyed a long-standing relationship of some 30 years' duration, and also have a joint venture, based in Japan, in the area of optoelectronics." Added Kucharksi, "This separate strategic relationship will continue and will not be affected by the sale fo FCTG to them."

The transaction, if consummated would result in a substantial gain to EG&G.

EG&G is a diversified Fortune 300 company that employs more than 30,000 people worldwide to provide advanced scientific and technical products and services to commercial and governmental customers.

HUNTINGDON VALLEY, PA (JULY 23) PR NEWSWIRE - Healthcare Services Group Inc. (NASDAQ-NMS: HCSG) today reported revenues for the three months ended June 30, 1990, of $16,304,000 compared to $13,564,000 for the same 1989 quarter, representing a 20 percent increase.

Net income for the three months ended June 30, 1990, was $1,334,000 or $.27 per share compared to $1,003,000 or $.21 per share for the same 1989 quarter, representing 33 percent and 29 percent increases, respectively.

Revenues for the six months ended June 30, 1990, were $31,307,000 compared to $26,601,000 for the same period of 1989 representing an 18 percent increase. Net income for the six months ended June 30, 1990, was $2,564,000 or $.51 per share compared to $1,958,000 or $.40 per share for

1989, representing 31 percent and 27 percent increases, respectively.

The company also announced today that it had completed the restructuring of its agreements with Southmark Corp. (NYSE: SM) relating to the September 1988 acquisition of Healthcare Services Co. (formerly American Services Co.) from Southmark.

Pursuant to the restructuring, of the 950,000 shares originally issued to Southmark, 240,000 shares have been returned to the company for cancellation and the balance have been distributed to healthcare facilities affiliated or previously affiliated with Southmark. Of the 710,000 shares which were distributed, 122,176 shares have also been returned to the company for cancellation as a result of the termination of service agreements by certain distributees' facilities. The remaining distributed shares will be held by the company as security for the obligations of the healthcare facilities being serviced by the company. In addition, the $8.5 million aggregate principal amount of 10 percent subordinated debentures due 1993 issued by the company to Southmark in connection with the acquisition have been returned to the company and cancelled.

The company has agreed to release Southmark from its guaranty of the obligations of the facilities under the service agreements to which Healthcare Services Co. was a party when acquired by the company and has also agreed to reduce in the aggregate amount of $30,000 per week, the service fees to be charged under the remaining service agreements, as amended.

Healthcare Services performs housekeeping, laundry and linen services to long-term care facilities, including nursing homes and retirement complexes.

PHILADELPHIA (JULY 23) PR NEWSWIRE - The (Memphis) Commercial Appeal, (Newport News) Daily Press and The Times-Herald, and The (Atlantic City) Press are now available in full text for computerized access. These additions bring the total number of papers online with Vu/Text to 61, more U.S. newspapers than any other databank.

The Commercial Appeal marks Vu/Text's first Tennessee database. With this addition subscribers can access news surrounding the booming city of Memphis, the transportation-distribution capital of the Southeast. Area industry and business include agriculture, transportation, biomedical engineering, tourism, retail trade, recording, and manufacturing.

With The Commercial Appeal online, subscribers can retrieve information on leading corporations headquartered in the area including Federal Express, Promus Cos. Inc., Schering-Plough, and International Paper.

The addition of the Daily Press and The Times-Herald increases Vu/Text's coverage of Virginia to include its Tidewater region. Now subscribers have news concerning regional industries such as commercial fishing, textiles,

food products, and the manufacturing of transportation equipment as well as area companies including Newport News Shipbuilding, Anheuser-Busch, Canon, C&P Telephone, and Siemens-Bendix Automotive Electronics.

Subscribers also can find information on the NASA-Langley research center focusing on aerodynamics and space research and news of Langley Air Force Base, Norfolk Naval Base, and historic Fort Monroe.

The (Atlantic City) Press extends Vu/Text's reach to the south of New Jersey bringing subscribers news of the state's casino city. Atlantic City is the most frequented tourist destination in the United States with 32.1 million visitors yearly.

As a resort town Atlantic City hosts some of the most talked-about casinos in the United States including Trump Plaza and Castle, Resorts International, Bally's Grand and of course the new Trump Taj Mahal. In addition, The Press provides news of the economy, environment and business of Atlantic County, Cape May County, Cumberland County, and southern Ocean County.

Major area businesses include Ciba-Geigy, Wheaton Industries, Viking Yacht, Durand Glass Manufacturing, South Jersey Gas, Atlantic Electric, the Naval Air Engineering Center, and Federal Aviation Administration Technical Center.

The access code for The (Atlantic City) Press is ACA, for The (Memphis) Commercial Appeal, code CAA, and for (Newport News) Daily Press and The Times-Herald, code NNA. Costs to access any of these databases is $1.80/minute for Option I subscribers and $2.20/minute for Option II.

Vu/Text is a Knight-Ridder company providing access to newspapers from 28 states plus the District of Columbia. For more information about Vu/Text's latest additions or a complete database directory, call 1-800-323-2940, or (215) 574-4400 in Pennsylvania.

CONTACT: Tonia Kimbrough of Vu/Text, (215) 574-4469.

#90204p7464 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - ASARCO Incorporated (NYSE: AR) today reported net earnings of $50,189,000, or $1.21 per common share, for the second quarter ended June 30, 1990, compared with net earnings of

$50,769,000, or $1.20 per share, for the second quarter of 1989.

Sales of products and services were $543,147,000 in the second quarter of 1990, compared with $539,334,000 in the same period of 1989.

For the six-months ended June 30, 1990, ASARCO reported net earnings of $85,966,000, or $2.07 per share, compared with net earnings of $119,335,000, or $2.83 per share, in the comparable period in 1989.

Sales of products and services for the first six months of 1990 were $1,064,379,000, compared with $1,157,493,000 in 1989.

Net earnings in the 1990 second quarter, which were essentially even with those of the prior-year period, reflect lower prices for copper and silver and higher lead, zinc and gold prices.

Commenting on the company's results, Richard de J. Osborne, chairman, president and chief executive officer, said, "Second-quarter results reflect continued good market fundamentals for the primary metals we produce. Worldwide consumption of copper, lead and zinc has continued to grow and available supplies are limited. We remain optimistic about the non-ferrous metals markets for the balance of this year and next."

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of non-ferrous metals, principally copper, silver, lead, zinc and gold. ASARCO also produces specialty chemicals, minerals and other industrial products and provides environmental services. ASARCO had 1989 sales of $2.2 billion.

NEW YORK (JULY 23) PR NEWSWIRE - Turner Construction Company's Robert E. Fee, vice president and territory general manager of Turner's New York office, announced today that its Special Projects Division (SPD) will be known as Turner Interiors effective Aug. 1, 1990. The name change is being made to reflect more accurately the focus of the group's activities in recent years.

Started in 1977, the group has been involved in a variety of project types with individual project volume up to $18 million. In the past ten years, however, the group's efforts have been increasingly concentrated on interior work including renovations, installations and alterations. In 1989, Turner's New York SPD put in place more than $150 million of interior work in New York City. This work included projects at Siemens,

Crown Center Showrooms, Manhattan Sports Club and complete fit-out of the new Citicorp building at Court Square.

Turner Interiors is managed by Roger Lang, a Turner employee for over 12 years, who has extensive experience in the interior market. "With more than 80 percent of our work coming from interiors, it seemed only natural to choose a name reflecting this focus," said Lang. "We will also continue to pursue new construction of special use facilities such as theaters, cultural centers, retail space and the like."

With 17 SPD units nationwide, Turner Construction Company, the nation's leading general builder, is also the country's largest interior builder. In 1989, the units completed a total of $650 million of interior construction work.

NEW YORK (JULY 23) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) announced today the appointment of Michael P. Sabanos to the position of vice president & controller.

Sabanos will be responsible for communication and compliance with policies and procedures relating to all corporate financial activities, planning and budgeting, internal financial reporting, liaison with internal and external auditors, and presentation of financial data to senior management. His appointment was announced by Robert P. Cuthbert, first vice president & chief financial officer of Corroon & Black Corporation.

"As Corroon & Black continues to expand its operations in the United States and around the globe, the corporation's financial activities have become increasingly complex. Mike has proven expertise in developing and managing nearly every aspect of the challenging financial procedures, policies, and requirements of large international corporations, and he will be an important and valuable resource to Corroon & Black," Cuthbert said.

Sabanos has nearly 12 years of accounting-related experience, and most recently served as senior manager of Deloitte & Touche. He is a member of the American Institute of Certified Public Accountants, the New York State Society of Certified Public Accountants and its banking committee, the Insurance Accounting and Systems Association, and the Bank Administration Institute. Sabanos also serves as a director of the New York University Graduate School of Business Management Decision Laboratory.

#90204p7469 07/23/1990 ~PR Newswire

PERRY, OH (JULY 23) PR NEWSWIRE - The Perry Nuclear Power Plant has set a new record for electricity generation.

At 10:44 p.m. on July 21, the Perry Plant set a continuous electricity generation record of 185 days. For a nuclear power plant in Perry's class, this is the longest record worldwide for continuous electricity generation in a second fuel cycle.

The Perry Plant completed its first refueling/maintenance outage in August 1989. During that month the plant entered its second fuel cycle and began generating electricity on Aug. 5. Since then, the Perry Plant has:

- been available to generate electricity 96.9 percent of the time;
- achieved a capacity factor of 94.8 percent;
- generated a total of 9,439,312 kilowatthours of electricity;
- generated electricity for a total of 340 days out of a possible 351.

In addition, Perry this year has produced three of its top six months for total electricity generation: March (910,397,000 kilowatthours); May (919,793,000 kilowatthours); and June (885,969,000 kilowatthours). Perry's record for the most electricity generated within a 24-hour period was set on March 20 with 30,277,000 kilowatthours of electricity.

"We continue to set records each day the plant is generating electricity," says Michael Lyster, vice president - nuclear. "As we've said in the past, setting records is nice - it's something we can measure and compare with our goals. But we must never forget that operating the Perry Plant in a safe manner is our primary goal and we're very proud of our record in that category."

The Perry Plant uses a General Electric Boiling Water Reactor model six (BWR/6). The facility is owned by a consortium of five electric utilities and is operated by the Cleveland Electric Illuminating Company (NYSE: CVX) a subsidiary of Centerior Energy Corporation (NYSE: CX).

The Davis-Besse Nuclear Power Station, operated by the Toledo Edison Company (NYSE: TED), another subsidiary of Centerior, is also a top-performing nuclear power facility. Davis-Besse's overall 1989 performance was recently rated by Nucleonics Week, a trade magazine, as being sixth among 109 commercial nuclear reactors in the United States, and 12th out of 359 commercial nuclear reactors in the world.

The Perry Plant is scheduled to begin its second refueling/maintenance outage in September. A special media briefing on the outage has been scheduled for Aug. 8, 10 a.m., at the Perry Plant.

ROCKVILLE, MD (JULY 23) PR NEWSWIRE - Diagnon Corporation today has acquired Miller Investments, S.A. and David J. Rowland 4,494,208 and 10,000 shares, respectively, of Common Stock, par value 1 cent per share.

The shares acquired by Diagnon represent approximately 47 percent of Diagnon's outstanding common stock. The purchase price was $.142 per share. The shares will be reclassified as treasury stock.

Diagnon's acquisition of the Miller and Rowland shares results from the request by Miller and Rowland that Diagnon purchase the shares. In deciding whether to purchase the shares, Diagnon's board of directors considered the merits of the purchase and the alternatives to not proceeding with the purchase, which included the possibility that a third-party purchase of the shares would direct Diagnon toward business pursuits which the directors believed could be detrimental to Diagnon and its subsidiaries.

In determining to proceed with the purchase, Diagnon obtained the services of a financial advisory firm which has opined that the purchase is fair to Diagnon and its shareholders.

DALLAS (JULY 23) PR NEWSWIRE - Harken Energy Corporation (NYSE: HEC) of Dallas today announced that its wholly owned subsidiary, Harken Bahrain Oil Company (Harken), has entered into a joint operating agreement with Bass Enterprises Production Company (Bass) of Fort Worth, Texas, whereby Bass

will participate with Harken in the exploration and ultimately the development of the Arabian Gulf offshore territories covered in Harken's recently signed Production Sharing Contract with the Bahrain National Oil Company (BANOCO).

Under the terms of the Harken/Bass agreement, Bass will fund all the costs of drilling three exploratory wells plus related seismic acquisition and reprocessing.

Two of the wells will test the Permian Khuff formation at approximately 14,000 feet while the third well will be a shallower Jurassic Arab/Fadhili test (estimated depth 9,000 feet). The initial well will be drilled on the Jarmin reef prospect and is expected to spud by Jan. 1, 1991.

After drilling the initial three wells, Bass will have the option to withdraw from the project, having earned no interest in Harken's Production Sharing Contract with BANOCO, or to fund certain additional drilling activities which would allow Bass to earn a 50 percent interest in Harken's Production Sharing Contract with BANOCO.

Harken has recently opened an office in Manama, Bahrain and will serve as the operator for all activities under the Production Sharing Contract.

Harken Energy Corporation manages and develops energy assets. HEC retails, wholesales and distributes gasoline through its subsidiary, Harken Marketing Company.

Through its subsidiary, Tejas Power Corporation, HEC constructs, owns, and operates natural gas gathering and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users.

HEC explores for, develops, and produces oil and gas reserves domestically through its subsidiary Harken Exploration Company and internationally through its subsidiary Harken Bahrain Oil Company.

POMPANO BEACH, FLA. (JULY 23) PR NEWSWIRE - Oriole Homes Corp. (AMEX: OHCA, OHCB), a major south Florida residential builder, today reported the unaudited results of its operations for the second quarter and six months ended June 30, 1990.

A net operating profit of $922,709, or $.25 per share, was reported for the 1990 second quarter, compared to $1,221,357, or $.32 per share, for

the 1989 corresponding quarter. Operating revenues amounted to $20,622,382, compared to $21,872,518 for the same period of 1989.

For the six-month period ended June 30, 1990, revenues amounted to $46,209,007, compared to $49,706,533 in the same period of 1989. A net operating profit of $2,488,071, or $.66 per share, was reported, compared to a net operating profit of $3,363,440, or $.88 per share, for the 1989 six months. Net profit for the 1989 six-month period included $936,810, or $.24 per share, for the sale of a parcel of land in Broward County, Fla.

Oriole's backlog of undelivered housing at the end of the 1990 second quarter totaled 372 units valued at $45,157,230 as compared to 499 units valued at $55,574,293 at the end of the second quarter in 1989.

FLAT ROCK, MI (JULY 23) PR NEWSWIRE - Mazda Motor Manufacturing (USA) Corporation (MMUC) and Mazda (North America), Inc. (MANA) of Flat Rock announced today they will co-sponsor the Detroit Free Press marathon, now called the Detroit Free Press/Mazda International Marathon.

The Oct. 21 race - which draws a field of about 3,000 and is annually rated by Runner's World Magazine as one of the top 25 in the nation - will be the 28th annual Detroit marathon and the 13th for which the Free Press has been a major sponsor.

Mazda will co-sponsor the 26.2-mile race in 1990 and has options for the next five years to continue sponsorship. "Mazda is delighted to play a part in upholding the longstanding tradition of the marathon," said Muneo Kishimoto, chairman of MANA.

Added Masahiro Uchida, president of MMUC: "Mazda takes great pride in supporting this event that takes place in the community where we live and work."

Free Press officials said they were on the verge of canceling this year's race because of difficulty finding a major sponsor. "We're looking forward to working with Mazda," said Free Press Publisher Neal Shine. "This agreement will secure the future of the marathon, allowing us to maintain a quality running event."

Mazda Motor of America (MMA) is also supporting the event, including providing pace and utility vehicles.

#90204p7488 07/23/1990 ~PR Newswire

LAS VEGAS, Nev. (JULY 23) PR NEWSWIRE - Ford Aerospace has won the award of a $23 million contract for FY 1991 for the operation and maintenance of the electronic warfare ranges at the U.S. Air Force Tactical Fighter Weapons Center Range Complex, Nellis Air Force Base, Nev.

Ford Aerospace, Technical Services Division has been providing these services since 1980. With the addition of four option years, the contract will be valued at approximately $120 million.

At the Nellis Range Complex Ford Aerospace provides hardware, software and civil engineering; systems integration and configuration management in support of gunnery ranges, electronic warfare ranges and air combat maneuver instrumentation (ACMI) systems; and airbase operations and maintenance for the Indian Springs Air Force Auxiliary Field.

In addition, the company maintains the Nellis Range communications links including 750 miles of digital mircrowave relays containing 432 voice and data channels, approximately 150 miles of fiber-optic cable, 150 air-to-ground receivers, and more than 200 radio transceivers between Nellis and Indian Springs Air Force Auxiliary Field.

"The Nellis Range Operation and Maintenance contract is a significant award, a testimony to a decade of our quality service, and a foundation for continued innovation and growth," said Dom Panacio, vice president and general manager of Ford Aerospace, Technical Services Division.

In addition to the Nellis Range, Ford Aerospace has operated Fallon NAS Range and Indian Springs Auxiliary Field in Nevada since 1984, and 1987, respectively. At each site, Ford Aerospace has reduced required personnel and range down-time, adding to the number of test and training missions supported.

Ford Aerospace manages similar combat ranges in Arizona, California, Florida, New Mexico, North Carolina, the Philippines, and Sardinia, Italy.

Ford Aerospace, a wholly owned subsidiary of Ford Motor Company, is a leader in command, control, communications and intelligence systems; tactical weapon systems; satellites and space systems, and professional and technical services. The corporation is headquartered in Newport Beach Calif., with major operations in California, Colorado, New Mexico, Ohio, Pennsylvania, Texas and the Washington metropolitan area.

PITTSBURGH (JULY 23) PR NEWSWIRE - Wean Inc. (NYSE: WID) reported a profit of $2,074,000 for the first six months of 1990 on revenues of $47,190,000, it was announced today.

The results included a tax loss carryforward benefit of $486,000. This compares to a profit of $1,326,000, including a tax loss carryforward credit of $232,000 on sales of $61,486,000 for the same period of 1989.

The second quarter reflected a profit of $1,023,000 after a tax loss

carryforward credit of $193,000 compared to second quarter 1989 earnings of $1,010,000, including a tax loss carryforward credit of $232,000. Sales for the second quarter totaled $24,420,000 vs. $28,300,000 for the like period of 1989.

The backlog of orders at June 30, 1990, amounted to $79,000,000 compared to $90,000,000 as of March 31, 1990, and $61,000,000 at June 30, 1989.

The company continues to be encouraged by the high level of business activity in the marketplace as well as its financial results for the first half of 1990.

DENVILLE, N.J. (JULY 23) PR NEWSWIRE - On May 30, 1990, the board of directors of Bellatrix International, Inc. decided to extend the exercise dates on the outstanding redeemable Class A and Class B warrants. The Class A warrants have been extended from Sept. 15, 1990, to March 15, 1991 and the Class B warrants have been extended from Sept. 15, 1991, to March 15, 1992.

On May 30, 1990, the board also terminated the payment of a previously announced stock dividend in the form of shares of Denville Corp, a subsidiary of the company, because the company was unable to make a deal with a third party to take over a controlling stock interest in Denville Corp in exchange for valuable assets with future business viability or a viable going concern.

According to Ivan M. Kerzner, chairman, the company's wholly owned subsidiary, Bellatrix Communications, Inc., has embarked on a totally new and improved marketing program. Emphasis is being placed on acquiring a large base of various-sized 1-900 accounts rather than relying on a small base of large accounts, and the new attitude appears to be well accepted and appreciated by many information providers.

FAIRLAWN, OH (JULY 23) PR NEWSWIRE - GenCorp (NYSE: GY) announced today agreements to settle license proceedings pending before the Federal Communications Commission (FCC) concerning San Francisco radio station, KFRC-AM. The station is currently operated by RKO General, Inc.,

GenCorp's broadcasting subsidiary.

The agreements were signed by RKO and the applicants competing for licenses to operate the station and are subject to approval by the FCC. If these agreements are approved, the ownership of KFRC-AM would be transferred to Daytona Group of California in accordance with a purchase agreement reached previously between RKO and Daytona.

The total price for the transaction is approximately $8 million. The closing date for the transaction has not been scheduled. RKO will continue to own and operate the station until the transfer is completed.

GenCorp is a technology-based company with strong positions in aerospace, automotive and related polymer products.

#90204p7495 07/23/1990 ~PR Newswire

NORTHBROOK, IL (JULY 23) PR NEWSWIRE - IMCERA Group Inc. (NYSE: IMA) announced today that its Mallinckrodt Medical unit of St. Louis has signed an agreement to establish and participate in the operation of a multimillion dollar positron emission tomography (PET) diagnostic center on the campus of St. Joseph's Hospital in Tampa, Fla.

The PET center will be the first in the United States that will serve hospitals on a regional basis, according to C.R. Holman, president of Mallinckrodt Medical. It is expected to open this summer and serve hospitals throughout west and central Florida.

"This regional approach will overcome the economic limitations which have prohibited PET's wider use by giving hospitals access to the necessary equipment and materials they, as individual institutions, may not be able to afford," Holman said.

PET, a form of nuclear medicine imaging primarily used to evaluate disorders of the heart and brain, employs certain radioisotopes which emit positrons, or positively charged particles. When administered intravenously to the patient, the positrons collide normally with electrons in the body, emitting photons which can be detected by a PET scanner and translated into visual images.

"PET is unique because it is the only diagnostic imaging procedure that can detect physiologic, biochemical and metabolic abnormalities in the earlier stages of the disease process," said William J. Mercer, group vice president of medical imaging for Mallinckrodt Medical. "Conventional imaging techniques detect anatomical changes which are generally not in

evidence until the disease has progressed further."

It is estimated that there are currently about 40 PET operations in hospitals throughout the U.S., about three-fourths of which are performing diagnostic clinical studies. To date, PET has gained only limited acceptance due largely to the high start-up and operational costs and, at the present time, limited insurance reimbursement. Because PET agents have a short half-life, they must be used shortly after preparation, which requires a cyclotron to be located within or very close to a hospital.

Holman said the Tampa PET center represents a new approach to overcome this economic limitation. Unlike most PET radiopharmaceutical production services, which supply only a single institution, the Tampa center will be a multi-institution operation, with the St. Joseph's site serving as a distribution center. Certain specific PET imaging agents produced at the Tampa center will be sold to hospitals throughout west and central Florida.

Mallinckrodt Medical, with estimated fiscal 1990 net sales of more than $390 million, is a major supplier of products for radiology, cardiology, nuclear medicine, anesthesiology and critical care. Its products are sold in more than 100 countries and are used by more than 7,000 health care facilities in the U.S.

CONTACT: Dave Prichard, 708-205-2270, or Keith Pickett, 314-895-2143 (press), both for IMCERA/Mallinckrodt; Elizabeth Higashi, 708-205-2189 (investor), of IMCERA; or Colleen Chappell of St. Joseph's Hospital, 813-870-4848

ST. LOUIS (JULY 23) PR NEWSWIRE - General Dynamics Corporation (NYSE: GD) today announced special assignments for several senior executives to provide a substantial increase in management focus on the U.S. NAVY'S A-12 advanced tactical aircraft program at its Fort Worth division.

Effective immediately, Herbert F. Rogers, president and chief operating officer, will relocate to Fort Worth, Texas, and assume the duties of general manager of the Fort Worth division. He will continue to report directly to Stanley C. Pace, chairman and chief executive officer. Charles A. Anderson, corporate vice president and general manager of the Fort Worth division, will undertake a special assignment as program director of the A-12 program. John A. Lamers, vice president of the A-12 program, will become deputy program director.

With these assignments, William A. Anders, General Dynamics vice chairman, will assume Rogers' corporate management responsibilities and reporting relationships. Material service corporation will continue to report to

pace.

In making the announcement, Pace said these assignments will bring the necessary corporate and division resources and attention to bear on the critically important A-12 program. "At the same time," Pace said, "Rogers' special assignment as general manager of the Fort Worth division will assure that the other important aircraft and business programs of the division receive continued management focus."

Rogers, a 40-year General Dynamics veteran, was vice president and general manager of the Fort Worth division from 1981 to 1987. He became executive vice president, aerospace, in 1987 and was elected president and chief operating officer of the corporation in 1988.

#90204p7501 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - James P. Stuckey, former president of the

New York City Public Development Corporation, has joined the real estate service firm of Gronich and Company as managing director.

In announcing Stuckey's appointment, the firm's president, Dan Gronich, said: "Jim Stuckey and Gronich and Company have a shared vision of how to do business with the city's real estate and business community. It is our belief that creative resourcefulness and strategic thinking are the keys to successful real estate leasing and redevelopment.

"Jim's outstanding experience as an active participant in some of the city's largest real estate transactions of the last decade significantly enhances our ability to provide first-rate service to our clients."

As president of the city's Public Development Corporation from 1986 through the end of 1989, Stuckey was responsible for orchestrating and managing a multi-billion-dollar portfolio of New York City-sponsored commercial, industrial and waterfront development projects.

He implemented an aggressive campaign to develop under-utilized city-owned sites for office, retail industrial and residential development, which resulted in the sale or lease of more than 230 parcels of land during a four-year period.

Gronich added: "Jim Stuckey's reputation as a tough but fair negotiator will certainly add to Gronich and Company's abilities at the bargaining table on behalf of both tenants and developers alike. Even more importantly, having someone who played a key role in making and shaping the city's economic development policy is a tremendous asset to the firm."

"Real estate transactions in the 1990s call for a high level of sophisticated, hands-on expertise," said Stuckey. "Gronich and Company offers seasoned professionals who know how to do business in the complex New York City market."

Since leaving public service in December of 1989, Stuckey served as a consultant to Chicago's Central Station project, a 20-million-square foot project planned for downtown Chicago, a joint venture of Fogelson Properties Inc., and Forest City Central Station, Inc.

Founded in 1976, Gronich and Company is a full-service real estate firm concentrating on tenant representation for office and retail leasing. The firm, also specializes in surplus space disposition, investment property acquisition and redevelopment, and strategic planning for major corporations, financial institutions, professional service firms and investors,

IRVINE, CA (JULY 23) PR NEWSWIRE - Rainbow Technologies Inc. (NASDAQ: RNBO), based here, today announced record net income and revenues for both the three- and six-month periods ending June 30 of the company's fiscal year 1990.

Rainbow is the leading developer and manufacturer of hardware devices for software execution control and data security in the IBM, Apple and UNIX personal computer markets.

The company's net income increased 53 percent during the second quarter of fiscal year 1990, rising to $615,600 from $403,000 for 1989's comparable period.

Income per share for the just completed quarter rose 36 percent to $0.15 compared to 1989's income per share of $0.11. The income per share figures are based on 4,041,000 shares outstanding and 3,734,800 shares outstanding, respectively.

Revenues for the second quarter increased to $3,502,000, a 28 percent jump from last year's second quarter revenues of $2,731,100.

The income per share and shares outstanding totals reflect a recently completed two-for-one split of the company's common shares.

Six-Month Period Also Shows Impressive Gains New net income and revenue records were also established by Rainbow during the first six months of fiscal year 1990.

Income rose 46 percent during the period to $1,174,600, up from last

year's comparable period figure of $807,000. Income per share advanced 30 percent to $0.30 from $0.23 for the first six months of 1989. The income per share figures are based on 3,975,500 shares outstanding and 3,586,300 shares outstanding, respectively.

Revenues for the first six months of 1990 were $6,794,400, up 34 percent from $5,059,100 during 1989's comparable period.

Rainbow's new headquarters site provides 24,000 square feet of office and manufacturing space, compared to the 11,000 square feet available at the previous location.

Formed in 1984 and based in Irvine, Rainbow Technologies Inc. is the leading developer and manufacturer of hardware devices for software execution control and data security in the IBM, Apple and UNIX personal computer markets.

In May 1989, Rainbow was listed in Business Week magazine as 10th among the top 100 fastest-growing public companies in the United States. Rainbow has also been named recently by INC. Magazine to the "1990 INC. 100" for small, high-growth public companies.

#90204p7507 07/23/1990 ~PR Newswire

WALTHAM, Mass. (JULY 23) PR NEWSWIRE - Scientists at GTE Laboratories have developed an optical amplifier that can boost the strength of signals transmitted over a fiber-optic network by 100,000 times, the most reported to date for such a device. This advance is an important step in the delivery of higher-quality transmission at lower costs over future fiber-based telecommunications networks.

"Because some loss of power occurs as light travels through optical- fiber networks, or because it may be necessary to split the transmitted optical signal among many users, amplifiers of this type will play a key role in telecommunications systems of the future," said C. David Decker, vice president and director of research at GTE Laboratories.

Such systems will be needed to speed the development of economical and efficient broadband networks, which will provide a host of new services such as video-on-demand, medical diagnostics, and two-way educational conferences.

When installed at strategic points along the path of the fiber, amplifiers

boost the light signal carrying the transmission. Typical installations are either in the local distribution "loop" or in transmission links covering long distances.

Lower Costs Current methods of amplification employ expensive electronic "repeater" stations every 25 kilometers or so throughout the network. "These electronics are very costly, in the range of $25,000 each," said Leonard Andrews, manager of the Optical Fiber and Components Department at GTE Laboratories. "Our optical device holds promise of performing the same amplifying function at a fraction of the cost."

The GTE optical amplifier is composed of a length of fiber containing erbium, a luminescent, rare-earth ion similar to those which provide the color in television sets. The erbium is evenly distributed within the core of the fiber during manufacture. Several meters of this specially prepared fiber are then simply spliced into the fiber network at any point amplification is desired.

Amplification occurs when light energy, at a wavelength which excites the erbium, is introduced into the treated fiber, creating "stimulated emission," a process in which additional photons are released. These new photons, in turn, increase the power of signals passing through the fiber.

Higher Quality This is the first time such a high level of gain has been achieved by an amplifier operating near the "quantum limit" of noise. "This means the GTE device is essentially a perfect amplifier," said William Miniscalco, principal investigator for GTE's fiber amplifier program.

GTE Laboratories, based here, is the central research and development facility for GTE Corporation (NYSE: GTE). GTE, headquartered in Stamford, Conn., is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

#90204p7508 07/23/1990 ~PR Newswire

IRVINE, CA (JULY 23) PR NEWSWIRE - Fluor Daniel announced today that it has been awarded a contract by Doswell Limited Partnership, a subsidiary of Los Angeles-based Diamond Energy Inc. The value of the contract is approximately $300 million.

Fluor Daniel's Power Sector will provide engineering, procurement, and construction services for the Doswell Combined Cycle Facility to be located

in Hanover County, Va. When completed, the 663-megawatt power plant will be the largest independent power producer in the United States. The power will be sold to Virginia Power.

Engineering is under way in Fluor Daniel's Irvine offices with project completion scheduled for the second quarter of 1992. Construction began in July 1990. The number of craftworkers is expected to peak at 500 personnel.

Diamond Energy Inc., a subsidiary of Mitsubishi Corporation, has developed to date, non-utility power projects in California, Texas, and New York; and this facility in Virginia.

Fluor Daniel Inc., Fluor Corporation's (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance, and technical services company with more than 50 offices around the world.

CONTACT: Deborah Land (media), (714) 975-3971, or Lila Churney (investors), (714) 975-3909, both of Fluor Corp.

#90204p7512 07/23/1990 ~PR Newswire

ORLAND PARK, IL (JULY 23) PR NEWSWIRE - Andrew Corp. (NASDAQ: ANDW) today reported substantial gains in sales for its third quarter ended June 30, 1990. Net income and earnings per share were equal to the third quarter last year.

Sales of $92.8 million set a record for the third quarter, increasing 21 percent from $76.8 million in the previous year. Orders in the quarter increased 19 percent to $95.7 million, also a record. Net income of $3.7 million and earnings per share of $.37 were the same as the June 1989 quarter.

For the first nine months of fiscal 1990, sales were $262.5 million, up 23 percent from $212.6 million. Net income was $10.9 million compared with $9.1 million one year ago, a 20 percent increase. Earnings per share for the nine months were $1.08 compared to $.91, a 19 percent increase.

Orders for the nine months were $260.4 million, up 5 percent from $248.4 million. Funded backlog expected to be shipped in the next 12 months was $112.0 million, down 8 percent from June 1989 levels.

Dr. Floyd L. English, president and chief executive officer, said, "Obviously, we are disappointed with the flat third-quarter earnings, but are encouraged by the strong increases in orders and sales in our commercial and network products groups. The market for defense electronics, where delays in orders have been commonplace, appears to have started to stabilize. The declines in orders, sales and profits in this

business have slowed, but defense electronics was still a negative on Andrew's overall performance," English noted.

"During the past 12 months, we have significantly restructured the government products organization, including defense electronics. In the third quarter, we further downsized our defense electronics capabilities, consistent with backlog and conservative forecasts.

"We are confident of recording another year of increased sales and earnings, although the magnitude of the earnings gain will be less than we planned," English said.

NEW YORK, NY (JULY 23) PR NEWSWIRE - Lord Hanson said today that he had indicated to the Secretary of State for Energy that Hanson PLC (NYSE: HAN) had a firm interest in making a bid for the whole of PowerGen, the second largest company generating electricity in the U.K.

Lord Hanson welcomed the Minister's statement in the House of Commons today in which he said he proposed to pursue discussions with Hanson in parallel with existing preparations for a flotation. It was also noted that in the event of a bid from Hanson the Minister intended to invite other companies to bid for PowerGen on a similar basis.

Lord Hanson said his company's philosophy of investing in good basic industries serving strong and continuing needs would certainly be served if the company were ultimately to own PowerGen. "I look forward," he concluded, "to learning more about PowerGen and its ambitions and needs in the further discussions that are shortly to take place."

#90204p7514 07/23/1990 ~PR Newswire

ARMONK, NY (JULY 23) PR NEWSWIRE - Chrysler Financial Corporation, Chrysler Capital Public Finance Corporation and Merrill Lynch Capital Markets have teamed up with Municipal Bond Investors Assurance Corporation to create the first insured tax-exempt asset- backed certificates secured by a pool of municipal lease obligations.

The $35 million offering, which sold Friday, July 20, 1990, consists of five CFC-9 tax-exempt Grantor Trusts, Series A through E, formed by Chrysler Financial Corporation. The pass-through rate on an annual basis for each trust ranges from 6.25 percent to 6.75 percent. MBIA issued a separate insurance policy for each trust, and the certificates are rated Triple-A by both Moody's Investors Service and Standard and Poor's Corporation based on MBIA's guarantee. In addition, Chrysler Financial is providing an extra layer of security based on the quality of the municipal leases. The certificates were underwritten by Merrill Lynch Capital Markets. Closing is scheduled for July 26, 1990.

The lease obligations selected for sale to the five trusts were originated or purchased by Chrysler Capital Public Finance Corporation, a Chrysler Financial subsidiary, which will continue to service the leases. The obligations were entered into with state and local governmental entities and distributed among 36 states to finance the purchase of equipment or real estate. The equipment includes computers, vehicles, energy systems, communications systems, general office and hospital equipment. The real estate obligations cover property such as a library, a school, a medical center or fire station. No trust will have an interest in any of the lease obligations held by another trust.

MBIA retained the right to review and approve certain leases, but according to Steven A. Campo, vice president and manager, MBIA structured finance department, the bond insurer is "comfortable with the transaction based on our analysis of Chrysler Capital's business operations and the security provided by Chrysler Financial."

The secondary market for municipal leases is traditionally narrow, and usually limited to trading among the leasing companies. For various reasons, these companies can only hold a limited amount of tax-exempt leases for their own account. This new insured product offers the leasing company a way to fund leases quickly that they can no longer retain, while continuing to earn the service fees from the leases originated.

With the entrance of this new insured security, retail investors can participate in the municipal lease market and get the kind of diversification normally available only to very large corporate or institutional investors. Additionally, the security's rapid amortization structure offers monthly rather than semiannual cash flow. Investors can reinvest proceeds sooner than with a traditional municipal bond.

Chrysler Financial Corporation provides diversified financing and insurance products and services and was ranked as the fourth largest non-bank finance company in North America by American Banker. The company services approximately 3.4 million accounts, representing $40.7 billion in gross finance receivables serviced.

Municipal Bond Investors Assurance Corporation insures municipal bonds and other financial securities, including new issues, bonds traded in the secondary market and those held in unit investment trusts and mutual funds. MBIA is rated Triple-A by both Moody's Investors Service, Inc., and by Standard & Poor's Corporation, and municipal bonds and other financial obligations insured by MBIA receive these ratings. MBIA Corporation is a wholly owned subsidiary of MBIA Inc. (NYSE: MBI).

WASHINGTON (JULY 23) PR NEWSWIRE - Polaroid Vice President, Business Imaging Group, Carl J. Yankowski, presented the company's first Special Needs Award in the INVENT AMERICA! competition to Margaret Donhauser, first grade student, of Dunellen, N.J.

Yankowski presented Margaret with a $1,000 U.S. Savings Bond, a personalized photo album and an INVENT AMERICA! medal of honor during INVENT AMERICA! Week opening ceremonies in Washington July 22.

Polaroid established a new category this year to the INVENT AMERICA! competition for an invention that best addressed the special needs of a disabled person. Margaret's invention, The Remember Clock, was selected as Polaroid's award winner by a panel of Polaroid judges.

The Remember Clock -- a tape recorder with a built-in clocking device -- would ensure maintainance of important medication-taking time tables and other health-related or safety-related activities and would allow certain patients and disabled persons to be self-sufficient in handling routine activities.

Margaret suggests that for numerous afflicted persons, such as her grandmother who suffers from Alzheimer's disease, a familiar voice on tape scheduled to play at specified times with instructions would solve the problem of constant supervision.

Yankowski applauded the invention as "an example of how young inventors in America are learning to identify problems, recognize needs and come up

with creative solutions. Polaroid and INVENT AMERICA! share an important goal," he said, "and that is to develop the children's imaginations and to spur creativity."

Polaroid became an official national sponsor of INVENT AMERICA! in 1989. According to Yankowski, "Polaroid's sponsorship of INVENT AMERICA! reflects the company's commitment to support programs designed to encourage classroom creativity and visual literacy."

INVENT AMERICA! Chairman J. Morgan Greene noted, "This special category award is very exciting for us. Each year we see thousands of children devoting their creativity to inventions that benefit others, particularly those indviduals with special needs. And now, with Polaroid providing this new award, these children will receive special recognition and rewards for their interest in helping others."

The nationwide Polariod Education Program, which has been in place for more than ten years, offers innovative techniques for improving basic learning skills. Each year Polaroid offers teacher workshops to thousands of teachers. It also offers an ongoing series of classroom curriculum books for teachers. The curriculum books provide classroom exercises and writing projects to increase visual literacy and communication skills.

Polaroid Corporation (NYSE: PRD), based in Cambridge, Mass., designs, manufactures and markets worldwide a variety of products in instant imaging.

#90204p7517 07/23/1990 ~PR Newswire

PALO ALTO, CALIF. (JULY 23) PR NEWSWIRE - Bio-Electro Systems Inc. (BES) today announced a net loss for the quarter ended June 30, 1990, of $3.3 million. Net loss for the six month period ended June 30, 1990, was $6.5 million compared to a net loss of $3.8 million for the same period in 1989. Revenue for the quarter consists of interest income of $.3 million. Revenue for the six month period ended June 30, 1990, was $.7 million.

The loss in the current period consists primarily of research and development expenses, less interest income, incurred under development contracts with ALZA Corp. and Medtronic Inc., a Minnesota corporation. BES and ALZA have entered into a collaborative arrangement with Medtronic whereby both ALZA's and Medtronic's electrotransport drug delivery activities are being managed by ALZA pursuant to agreements with BES.

BES is developing drug delivery systems utilizing bioerodible polymer and electrotransport drug delivery technologies, and intends to commercialize, most likely through licensing, pharmaceutical products based on these technologies.

#90204p7520 07/23/1990 ~PR Newswire

CHICAGO (JULY 23) PR NEWSWIRE - Centel Corporation (NYSE: CNT) today announced second quarter income from continuing operations increased significantly to $16.1 million, or 19 cents per share, up from $4.6 million, or 5 cents per share, a year ago. Net income was $15.2 million, or 18 cents per share, nearly double from $8 million, or 9 cents per share the prior year. Revenues increased 13.9 percent to $339.8 million, up from $298.4 million, a year earlier.

"We are very pleased with our strong second quarter," said John P. Frazee Jr., Centel's chairman and chief executive officer. "We again had excellent customer growth in both our local telephone and cellular communications operations. As we continue to sharpen our focus on these two businesses, we are enjoying the rewards of their performance. We are right on track."

Additionally, significantly reduced interest expense contributed to the results.

For the six months ended June 30, income from continuing operations was $32.6 million, or 38 cents per share, a significant jump from $5.3 million or 5 cents per share, in the same period a year earlier. Net income rose to $29.4 million, or 34 cents per share, from $12.7 million, or 14 cents per share, in 1989. Revenues were $655.8 million, up from $579.9 million.

Telephone access line growth continued at a 6 percent rate over the last 12 months, considerably higher than the industry average. Revenues were up 10.4 percent to $247.3 million, compared to $224 million in the same quarter in 1989. The strong access line growth, as well as a temporary rise in directory revenues during the transition from previous directory company contracts to agreements with the CenDon partnership, contributed to the increase. CenDon is a joint venture of Centel Directory Co. and Donnelley Directory. Operating income increased 5.2 percent to $60.2 million from $57.2 million in the same quarter a year ago.

Customer growth in the company's cellular operation also continued at a strong pace. Centel now serves nearly 149,000 cellular customer lines, a 78 percent increase in the last 12 months. Reflecting this growth, revenues for the quarter were up 52 percent to $44.9 million from $29.5

million last year. The group's operating loss was $1.8 million, compared to a loss of $4.6 million in the same period in 1989. Revenue per customer increased and operating cash flow margins dramatically improved in the quarter over the first quarter.

To meet the increasing needs of its cellular customers, seven new cell sites were constructed in the quarter and construction permits were approved for six rural service areas.

Hot weather in both Colorado and Kansas contributed to a 4.7 percent increase in revenues in Centel's electric operations. Revenues increased to $42 million, up from $40.1 million in the same quarter a year ago. Operating income climbed 8.5 percent to $7.3 million from $6.7 million in 1989.

FAIRFIELD, NJ (JULY 23) PR NEWSWIRE - Cantel Industries, Inc.'s common stock will continue to be included for quotation in the National Association of Securities Dealers' Automated Quotations System (NASDAQ) via an exception from the capital and surplus requirement.

While Cantel failed to meet this requirement as of Apr. 30, 1990, the NASD has granted a temporary exception from this standard subject to Cantel meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that it will do so. If at some future date the company's securities should cease to be quoted on the NASDAQ system, they should continue to be quoted in the over-the-counter market. For the duration of the exception, the company's NASDAQ symbol will be CATBC.

LOS ANGELES (JULY 23) PR NEWSWIRE - Angeles Corp. (AMEX: ANG) announced that an agreement in principle has been reached with the original owners of the Quinoco entities for an option to re-acquire the securities issued to them by Angeles in 1984 when it acquired those entities.

Under the proposed agreement, Angeles would receive a three-year option to acquire the following securities for an aggregate purchase price of $30,000,000: 800,000 shares of its common stock, 900,000 warrants, 500,000

shares of preferred stock with a liquidity preference of $7,500,000, and 10.75 percent debentures with a face amount of $32,500,000 maturing in 2005. The securities were valued at approximately $39,000,000 when issued in 1984.

In return for the option, Angeles contemplates the following consideration: QRI, the Angeles subsidiary that originally issued the debentures, will be merged into Angeles Corp., making the debentures general unsecured obligations that are not subordinated to other unsecured obligations. Currently, Angeles is the subordinated guarantor of the debentures. In addition, the interest rate on the debentures will be increased to 11 1/2 percent 18 months following the transaction. Maturity would remain in January 2005 if the option is not exercised.

Also under the agreement Angeles agreed to change the dividend on the preferred stock from an adjustable rate to a fixed rate of 14 percent after three years in return for the ability to exchange debentures for the preferred stock. The debentures would be substantially similar, including maturing in 2005, to those subject to the agreement and would be exchanged dollar for dollar to the liquidating value of the preferred stock..

The common stock and warrants are the only publicly traded securities and represent approximately 22 percent and 54 percent, respectively, of those outstanding securities.

Angeles will also acquire the common stock voting rights under most circumstances during the three-year option period.

The transactions are expected to close the week of July 30, 1990. Angeles Corp. is an investment management company whose subsidiaries manage excess of $4 billion in securities, real estate, mutual fund and leased equipment assets for corporations and institutions, and for more than 130,000 individual investors.

DETROIT (JULY 23) PR NEWSWIRE - The Detroit Edison Board of Directors today elected Larry G. Garberding, 51, executive vice president, chief financial officer (CFO) and a member of the board.

From 1987 until earlier this year, Garberding was president of NICOR, Inc. a natural gas utility serving suburban Chicago. Prior to that, he was president of Tenneco Gas Marketing, a unit of Houston-based Tenneco, Inc., a major natural gas transporter and producer.

Garberding assumes the Detroit Edison (NYSE: DTE) position formerly held by Ernest L. Grove Jr., who retired in September 1989 after 14 years with the Detroit-based electric utility. Grove also was vice chairman much of that time.

Ronald C. Gresens and Leslie L. Loomans, both vice presidents, have shared major financial responsibilities since Grove's retirement. Gresens also is controller and Loomans is corporate treasurer.

Garberding, a 1960 industrial administration graduate of Iowa State University and a certified public accountant, began his career as an auditor with Arthur Andersen and Co. in Chicago, working primarily with energy-related companies, and became a partner in 1970. He left in 1972 to become chief financial officer of K-N Energy (formerly Kansas- Nebraska Natural Gas Co.) in Hastings, Neb., and in 1981 joined Tenneco's Tennessee Gas Transmission unit as senior vice president and CFO. He was promoted to executive vice president in 1983 and assumed the presidency of Tenneco's marketing unit in 1987.

With NICOR, Garberding spearheaded the holding company's strategic review of its portfolio of businesses and prospects for further diversification. The result of this review was NICOR's decision to concentrate its efforts on its existing businesses.

In announcing Garberding's election, Detroit Edison Chairman and Chief Executive Officer John E. Lobbia said, "We are fortunate to have obtained a man of Larry Garberding's stature, intelligence and experience. Larry has played a key role in leading important elements of the natural gas industry through the process of adapting to deregulation and into an increasingly competitive environment. That experience will be invaluable for us as the electric utility industry faces many of the same kinds of regulatory and competitive changes over the coming years."

Garberding and his wife, Ann, plan to reside in Grosse Pointe Farms. They have three children, Scott and Kathryn, both with Andersen Consulting in Houston, and Michael, a student at Texas A&M University.

PHILADELPHIA (JULY 23) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) announced today that James A. Hagen, chairman, president and chief executive officer, Consolidated Rail Corp. (Conrail), has been elected a director of the company.

The election of Hagen increases the number of PE directors to 15. Joseph F. Paquette, Jr., PE chairman and chief executive officer said, "We are very pleased that James Hagen has agreed to serve on our board. He is an outstanding business and civic leader and will be a valuable addition to our board as we face the challenges of the '90s"

Hagen, 58, received a B.A. from St. Ambrose College, Davenport, Iowa, and an M.A. from State University of Iowa.

After completing his academic studies in 1948, he began a career in the railway business when he joined Missouri Pacific Railroad. In 1963 he joined Southern Railway where he was director, Marketing Research. In 1971 he joined the Federal Railroad Administration and in 1975 the U.S. Railway Association becoming its president in 1976. In 1977 he became vice president, Marketing and Sales, with Conrail and in 1985 was executive vice president, Sales and Marketing, for CSX Transportation. In 1988 he became president, Distribution Services Group at CSX. He attained his current position as Conrail chairman, president and chief executive officer in May 1989.

Hagen is a member of the National Freight Transportation Association, a board member of the Association of American Railroads, executive board member of the National Railway Labor Conference, and a member of the American Management Association General Management Council.

Additionally, Hagen is a member of the Pennsylvania Business Roundtable, the Greater Philadelphia Chamber of Commerce, the PENJERDEL Council and the Greater Philadelphia First Corp.

#90204p7530 07/23/1990 ~PR Newswire

DETROIT (JULY 23) PR NEWSWIRE - The Detroit Edison Company (NYSE: DTE) today announced earnings for common stock for the three months ended June 30, of $108.9 million, or $0.74 per share, up 25.4 percent from the $86.8 million, or $0.59 per share, for the same period a year ago. For the six months ended June 30, earnings for common stock were $236.5 million, or $1.61 per share, up 31.3 percent from the $180.2 million, or $1.23 per share, for the same period a year ago.

The earnings increase was due to higher operating revenues and to continued expense reductions, including fuel and other power supply costs. The increase in revenue resulted from record kilowatt-hour sales in the second quarter, rate increases in accordance with the company's 1988 rate case settlement, and increased energy transmission services.

For the 12 months ended June 30, earnings for common stock were $445.3 million, or $3.03 per share, compared with a loss of $159.2 million, or $1.08 per share, for the same period a year ago. The loss for the previous 12-month period resulted from a December 1988 write-off of certain plant costs disallowed by the Michigan Public Service Commission.

For the three months ended June 30, total kilowatt-hour sales were at a record level, up 0.5 percent from the same period a year ago, with commercial sales up 2.5 percent, residential sales up 2.1 percent and industrial sales down 0.9 percent.

For the six months ended June 30, total kilowatt-hour sales were down 0.2 percent from the same period a year ago, with commercial sales up 2.1 percent, residential sales up 1.5 percent and industrial sales down 1.8 percent.

The increases in residential and commercial sales for the three- and six-month periods were due primarily to continuing growth in the number of customers in the company's southeastern Michigan service area and warmer weather during the second quarter, which resulted in higher air conditioning use. The decreases in industrial sales for both periods were due largely to declining production in the auto and steel industries.

LOS ANGELES, (JULY 23) PR NEWSWIRE - ARCO (NYSE: ARC) today reported 1990 second quarter net income of $391 million, or $2.36 per share, compared with $467 million, or $2.66 per share, in the 1989 second quarter.

ARCO also announced it is restating and increasing this year's first quarter net income by $45 million, or 27 cents per share, following discussions with the Securities and Exchange Commission relating to ARCO's recognition of dividends received in excess of its equity investment in Lyondell Petrochemical Company.

The second quarter results and the restatement brought ARCO's net income for the first half of 1990 to $983 million, or $5.91 per share, compared with 1989's first half net income of $1.17 billion, or $6.66 per share.

ARCO's return on stockholders' equity for the past 12 months was 26.1 percent.

After-tax earnings for ARCO's worldwide oil and gas exploration and production operations totaled $96 million in the 1990 second quarter, down from $229 million in the 1989 second quarter.

ARCO earned $77 million in the 1990 second quarter from its 49.9 percent equity interest in Lyondell Petrochemical Company.

ARCO's sales and other operating revenues totaled $4.0 billion in the 1990 second quarter, compared with $4.3 billion in the 1989 period. For the first six months of 1990, ARCO's sales and other operating revenues totaled $8.25 billion, compared with $8.30 billion for the first half of 1989.

The initial six months of 1990 included a $323 million gain as a result of ARCO's adoption of Statement of Financial Accounting Standards (SFAS) No. 96, "Accounting for Income Taxes." This benefit was partially offset by net charges totaling approximately $233 million after tax. In 1989 first half, ARCO's results included a $634 million after-tax gain resulting from the initial public offering of Lyondell Petrochemical Company common stock. This was partially offset by $345 million in charges for future environmental and other expenses.

NEW YORK (JULY 23) PR NEWSWIRE - Forty-three-year-old men everywhere can have a major league shave with the same razor used by pitching great Nolan Ryan. BIC Corporation, one of the world's leading manufacturers of

shavers, is offering each 43-year-old in the United States -- an estimated 1.4 million men -- a trial pack of BIC Metal Shavers.

Nolan Ryan, baseball's "Man of Metal," is about to chalk up his 300th victory, a bionic feat giving hope to middle-aged men everywhere.

At the ripe age of 43, Ryan appears to have discovered the fountain of youth as he leads the league in strikeouts and recently pitched his sixth no-hitter. This season will mark Ryan's 300th career win, and 1990 is also the year he steps out onto the mound with a new pitch -- for BIC Metal Shavers.

As part of a special promotion, 43-year-olds can receive a free trial pack of BIC Metal Shavers by sending their name, address and date of birth to: BIC's "Man of Metal," BIC Corporation, 500 BIC Drive, Milford, Conn. 06460.

With the help of the BIC Corporation, middle-aged men in the United States can unite and celebrate the success of one of their comrades in maturity.

LOS ANGELES (JULY 23) PR NEWSWIRE - ARCO's (NYSE: ARC) three executive vice presidents will assume new management responsibilities, it was announced today by ARCO Chairman and Chief Executive Officer Lodwrick M. Cook.

"Our primary goal in shifting responsibilities of a number of our senior managers is to provide broader experiences in order to appropriately prepare for the company's management succession needs," said Cook who celebrated his 62nd birthday last month.

The changes include: James S. Morrison, 60, will be executive vice president and chief financial officer. Morrison's new responsibilities include Treasury, Planning and Control, Government and Public Affairs, and Human Resources.

James A. Middleton, 54, will be executive vice president with responsibility for the three divisions that constitute ARCO's integrated West Coast petroleum operations -- ARCO Alaska Inc., ARCO Transportation Company, and ARCO Products Company.

Ronald J. Arnault, 47, will be executive vice president with responsibility for ARCO International Oil and Gas Company, ARCO Coal

Company, and ARCO Oil and Gas Company.

Arnault and Middletown will report to Robert E. Wycoff, 60, president and chief operating officer. Morrison will report to Cook.

Arnault had previously been chief financial officer. Morrison had overseen the company's integrated West Coast Petroleum operations. Middleton had been president of ARCO Oil and Gas company, the company's Lower 48 exploration and production division.

ATLANTA (JULY 23) PR NEWSWIRE - Rollins Inc. (NYSE: ROL), nationwide consumer service company, reported for the second quarter ended June 30 revenues of $123,843,000, an increase of $8,320,000, 7 percent, compared to this quarter a year ago.

Net income was $12,194,000, an increase of $1,640,000, 16 percent. Earnings per share increased 16 percent to 52 cents compared to 45 cents a year ago. For the six months ended June 30, revenues increased 8 percent to $221,421,000, net income increased 16 percent to $15,800,000 and earnings per share 16 percent to 67 cents.

Gary W. Rollins, company president and chief operating officer, said: "Orkin's second quarter revenues, including pest control, termite and lawn care services, increased 8 percent to $110,150,000 and operating income increased 15 percent to $20,099,000. Each of the businesses improved their operations. Orkin's lawn care services achieved profitable results compared to a loss a year ago. Rollins Protective Services increased revenues 4 percent and operating income 3 percent. The new wireless home security system -- System VI -- is now being introduced in the market and is expected to significantly improve sales. Overall, we are pleased with the second quarter and mid-year results. We are confident about our plans and are optimistic about future opportunities."

Rollins owns and operates Orkin Exterminating Co. Inc., the world's largest termite and pest control company, which also provides lawn care and plantscape services; and Rollins Protective Services Co., one of the leaders and pioneers in residential security.

NEW YORK (JULY 23) PR NEWSWIRE - George L. Sosson has been appointed president and chief operating officer of Win Communications, Inc., it was announced today by I. Martin Pompadur, president and chief executive officer of RP Companies, Inc.

Sosson has spent the last 21 years with CBS, Inc., in various capacities within its radio division. He was most recently vice president, CBS owned FM stations, with responsibility for the 11 company-owned FM stations. Prior to that he served as vice president, operations, for the CBS FM group.

"George Sosson will bring RP Companies' radio division the strong operating experience, management skills and long-term perspective that are essential to sustaining the company's rapid growth," Pompadur said. "As a leader of the radio industry he has gained the respect of operators throughout the country and we are very pleased to have him lead our radio organization."

Win Communications, Inc., manages RP Companies' radio properties, which are owned by ML Media Partners, L.P. and ML Media Opportunity Partners, L.P. Currently, Win Communications operates 12 radio stations in eight markets: WEBE-FM/WICC-AM in Fairfield County, Conn.; WQAL-FM in Cleveland, Ohio; WMJC-FM/WXTZ-AM and the Indiana University Sports Network in Indianapolis, Ind.; WFID-FM/WUNO-AM and the Noti-Uno News Network in San Juan, Puerto Rico; KEZY-FM/KORG-AM in Anaheim, Calif; WEJZ-FM in Jacksonville, Fla; KBEX-FM in Tulsa, Okla.; and WZCL-FM in Norfolk, Va.

RP Companies, Inc., is a diversified media company which invests in and manages properties in the communications and entertainment industries. RP Companies was founded by Elton H. Rule and I. Martin Pompadur, whose initials form the name. The company was formed to centralize the direction of Rule and Pompadur's media portfolio. With Rule's death in May 1990, Pompadur is now the sole owner of RP Companies and continues to direct the activities of the company as its chief executive officer and chief operating officer.

RP Companies, Inc., owns, operates, manages or has interests in 12 radio stations, cable television systems with over 600,000 subscribers, 11 television stations, 12 monthly trade magazines, a daily newspaper, a weekly entertainment guide, a newsletter, two programming production companies, a program distribution company, and a cellular telephone company. RP Companies has successfully raised six public partnerships and several private vehicles for media investments. These properties have a current estimated market value of more than $1.6 billion.

Win Communications, Inc., will be relocating its corporate headquarters from Cleveland to Greenwich, Conn. The offices will be located at 55 Old Post Rd., Number 2, Greenwich, Conn. 06830-6074, telephone number

203-622-0006.

#90204p7546 07/23/1990 ~PR Newswire

TORONTO (JULY 23) PR NEWSWIRE - Metall Mining Corporation announced today that Eurogold, a mining exploration joint venture in which it has a one-third interest, has located promising gold mineralization in western Turkey.

Norman Hardie, Metall's vice president, projects and corporate development said, "Core recoveries to date have been erratic. In order to establish reserve potential a second phase of diamond drilling will commence in August."

Metall is a Canadian-based international mining company with interests in copper, zinc, lead, gold and silver operations and properties, primarily in North America, Europe and the Pacific Rim. Metall is also a major shareholder of Teck Corporation and Cominco Ltd. and M.I.M. Holdings Limited of Australia.

ACM Gold Limited of Australia, Metall's two-thirds joint venture partner and the operator of Eurogold's exploration program, issued the following press release today:

ACM Gold Limited of Australia and Metall Mining Corporation of Canada report that diamond drilling of the Dikili gold prospect in western Turkey (70 km north of Izmir) has located promising gold mineralization within two epithermal quartz reefs (designated "M" and "S" veins). Results of the first 15 diamond drill holes are attached.

Core recoveries under the difficult conditions have been disappointing and there are no formal estimates of the resource potential at this stage. Nevertheless, the results are considered to be very encouraging.

A second phase of diamond drilling, utilizing more specialized equipment to improve core recoveries, is scheduled to commence in August and is expected to lead to resource estimates later this year or early in 1991.

A number of other epithermal quartz veins with anomalous gold values have been located close to the two principal veins and within the general proximity of the prospect site. Preliminary drill testing of several of these will commence in August.

The exploration program is being carried out through a joint venture known as Eurogold which is managed by ACM Gold. Joint venture interests are ACM

Gold, two-thirds and Metall Mining, one-third. The Eurogold joint venture was formed in 1988 with the objective of searching for epithermal gold mineralization in countries of the Mediterranean region considered prospective for such mineralization. The intention was to utilize bulk leach (BLEG) geochemical prospecting as the key exploration tool. ACM Gold had previously used this technique in Australia with success.

Turkey was one of the target areas and in mid-1989 the joint venture incorporated a Turkish company, Eurogold Madencilik A.S. to facilitate exploration in that country. Eurogold Madencilik acquired an exploration permit covering 2,900 square kilometers in western Turkey and results from the initial BLEG survey led directly to the discovery of the mineralized reefs on the permit. Diamond drill testing commenced in December 1989.

Eurogold Madnecilik (which is also beneficially owned two-thirds by ACM Gold and one-third by Metall Mining), is exploring on a widespread basis and has a number of other tenements in western and central Turkey.

Metall Mining Corporation (MMC) is a subsidiary of the large West Germany-based company, Metallgesellschaft AG. MMC also has an advanced base metals mining project in Turkey.

For and behalf of the board, enquiries to be directed to: David Burt, 09-325-7755.

#90204p7547 07/23/1990 ~PR Newswire

DALLAS (JULY 23) PR NEWSWIRE - Halliburton Co. (NYSE: HAL) today announced that W. Bernard ("Ber") Pieper has been named chief executive officer of the company's Brown and Root, Inc. subsidiary, succeeding T. Louis Austin Jr. who will retire effective July 31, 1990. In a related management change, Tommy E. Knight has been promoted to the position of executive vice president-operations.

In his new position as president and chief executive officer of Brown and Root, Pieper will assume leadership responsibilities for one of the world's largest engineering, construction and maintenance companies. In 1989 Brown and Root generated revenues of about $2.7 billion. The company currently employs about 50,000 people in locations around the world.

Pieper is a 33-year employee of Brown and Root and has served in a variety of key managerial positions in the United States and in international operations, including chief engineer, senior executive vice president of operations, and most recently president and chief operating officer.

Thomas H. Cruikshank, chairman of the board and chief executive officer of Halliburton Co., said, "Ber Pieper has worked closely with Louis Austin for the past seven years and he is part of the management team responsible for restructuring Brown and Root in recent years to better meet the needs of a changing market. His extensive knowledge of Brown and Root's operations places him in an excellent position to strategically guide the company in the decade of the 1990s."

Austin accepted the position of president and chief executive officer of Brown and Root in 1983, after his retirement as chairman and chief executive officer of Texas Utilities Co.

Cruikshank added, "Louis Austin has provided outstanding leadership for Brown and Root. He helped lead Brown and Root through some of the company's most challenging times, and helped to assemble a management team that has positioned the company to take advantage of emerging global opportunities."

Pieper holds B.A. and B.S. degrees from Rice University. He is a fellow of the American Society of Civil Engineers, and a member of Sigma Tau Engineering Honor Society, Tau Beta Pi Engineering Society, the Moles, Houston Business Council Executive Board, Texas Research League Executive Board, and Rice University's George R. Brown School of Engineering Advisory Board.

Knight has 26 years of engineering and construction experience, 25 with Brown and Root. He holds bachelor's and master's degrees in civil engineering from Texas A & M University. Knight's extensive international experience has included resident engineering management responsibilities in Japan, Singapore and Australia.

Halliburton Co. is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

LIVONIA, MI (JULY 23) PR NEWSWIRE - The Kroger Co. (NYSE: KR) announced today that Joel E. Greenisen has been named president of the company's Michigan Marketing Area retail operations.

Greenisen is currently vice president of the division, which operates 54

Kroger Food Stores in Michigan. He is on the Executive Committee of the Greater Detroit Chamber of Commerce, currently serving as vice chairman, Business Services. He is a member of the Executive Committee and past chairman of the Michigan Merchants Council. Greenisen has also been active in a variety of roles with the United Way of Southeast Michigan, currently serving on the Advisory Board and the Ad Hoc Committee for Fund Distribution.

Kroger President and Chief Executive Officer Joseph A. Pichler said the change in title recognizes the substantially increased authority and responsibility placed in the hands of division executives through the decentralization of Kroger's retail operation.

Greenisen joined Kroger as a management trainee in 1958, following his graduation from Ohio State University with a degree in agricultural economics. He has held a variety of positions with the company, and before coming to Michigan in January 1983, he was vice president of Kroger's Louisville, Ky., division.

MIAMI (JULY 23) PR NEWSWIRE - Eastern Airlines said today it has received no offer from Northwest Airlines to acquire any part of Eastern.

Furthermore, news accounts today citing unidentified sources that such an offer is imminent reflect two inconsistencies with conditions repeatedly cited by Eastern's trustee, Martin Shugrue. He has said that Eastern is interested only in offers for the complete airline with its employees and that there is no intention to liquidate the carrier.

Shugrue has said that Eastern is obliged to entertain any proposals that might be beneficial to Eastern in resolving its Chapter 11 bankruptcy status and restoring the company to a progressive path. Even if an acceptable offer were to arise at some future date, it would probably become part of an overall reorganization plan for Eastern, acceptable to its creditors and the judge of the bankruptcy court. Such procedures would require many months to process and implement. For that reason alone no change in Eastern's operations can occur for the foreseeable future.

#90204p7556 07/23/1990 ~PR Newswire

WASHINGTON (JULY 23) PR NEWSWIRE - The Air Line Pilots Association has filed suit against Eastern Air Lines, seeking to force the company to bargain in good faith with ALPA, the legal bargaining agent for Eastern's pilots.

The suit, filed in the Southern District of Florida Federal District Court requests a preliminary injunction to prevent Eastern from making any unilateral changes in the status quo pending good faith exhaustion of the processes of the Railway Labor Act (RLA). In addition to the preliminary injunction, the suit asks for a permanent injunction, a declaratory judgment, damages, and other relief.

"We hope that this suit will bring Eastern back to the table, ready to bargain in good faith for the sake of this airline and all of its employees," said Capt. Skip Copeland, chairman of the Eastern pilots' ALPA Master Executive Council (MEC). "Eastern cannot hope to survive with any less of a commitment."

The suit is based on Eastern's failure and refusal to bargain in good faith with ALPA in violation of the RLA, and charges that the company has planned and implemented a course of conduct to subvert and impair negotiations with ALPA for a new collective bargaining agreement.

"Pilots rejoiced when Eastern was taken out of the hands of Frank Lorenzo and put into the hands of Martin Shugrue," said Copeland. "We were heartened by Mr. Shugrue's statement that all Eastern pilots -- both those working and those who have not yet returned to work since the pilots' sympathy strike ended in November 1989 -- have a right to participate in the rebuilding process of the airline.

"Pilots pledged to do everything in our power to encourage the crucial task of reconstruction at Eastern, and that is the spirit with which we've negotiated. That, however, has not been the spirit on the other side of the table.

LOS ANGELES (JULY 23) PR NEWSWIRE - Kaufman and Broad Home Corporation, (NYSE: KBH) the state's largest single-family home builder, and Catellus Development Corporation, a major landowner and developer, today announced plans to jointly develop a 400-acre master-planned residential community in Stockton, Calif.

Current plans for the parcel, located on Stockon's north side, include up

to 2,000 housing units as well as parks, schools, light commercial development and open space. The community will offer a variety of lot sizes and housing types and prices, geared primarily to first-time home buyers. It will be one of the largest residential developments ever undertaken in this rapidly growing city, located about 80 miles east of San Francisco and 40 miles south of Sacramento in California's San Joaquin Valley.

According to officials with both companies, the total market value of the project is expected to exceed $300 million. As part of the development process, the partnership expects to contribute more than $30 million to local public infrastructure, including street improvements, new school financing and fee contributions to the City of Stockton general fund.

The project will be developed on equal basis by the two companies, with Catellus providing the land and Kaufman and Broad responsible for land development and residential construction. Kaufman and Broad will act as managing partner.

Catellus Development Corp., formerly Santa Fe Pacific Realty, is headquartered in San Francisco and is a major land owner and developer of industrial and commercial properties in California, Arizona, Illinois, and Texas. The company anticipates becoming independent of its parent firm, Santa Fe Pacific Corp., later this year, and will become one of the largest publicly-traded real estate firms in the nation.

Los Angeles-based Kaufman and Broad is California's largest producer of single-family housing, and is also the largest builder in metropolitan Paris, where the company develops commercial office buildings and a variety of residential investment properties, in addition to single-family homes.

MENLO PARK, CA (JULY 23) PR NEWSWIRE - George M. Keller, chairman of the board of directors of SRI International, today announced Dr. James J. Tietjen as the president and chief executive officer of SRI International, effective Dec. 1, 1990. Dr. Tietjen is the president and chief operating officer of the David Sarnoff Research Center, a wholly owned subsidiary of SRI, located in Princeton, N.J.. He will replace Dr. William F. Miller, who has been SRI's president and chief executive officer since 1979.

"Dr. Teitjen has been associated with SRI since our acquisition of the David Sarnoff Research Center in 1987," said Keller, "and he has been the

prime mover in changing that organization into a leading edge contract research organization. The Board feels Dr. Tietjen is the ideal candidate to lead SRI International in providing its clients with high technology and business services in the globally competitive atmosphere of the 1990s."

The board of directors also announced that Dr. Paul J. Jorgensen, executive vice president and chief operating officer of SRI International, will continue in his position and will assume increased responsibilities. He will also continue to serve as a member of the board of directors. Dr. Tietjen's replacemant as chief operating officer at the David Sarnoff Research Center has not been announced.

Tietjen, who has been the president and chief operating officer of the David Sarnoff Research Center since its acquisition by SRI International in April of 1987, joined that organization in 1963, held various posts on the technical staff and was appointed staff vice president, Materials and Components Research in 1977. In 1983, Dr. Tietjen joined RCA American Communications becoming its president and chief executive officer in 1984. In 1985, he was elected a vice president of RCA Corp. and returned to the David Sarnoff Research Center with overall responsibility for RCA's research activities.

Dr. Tietjen is the author of more than 30 published articles primarily relating to materials and components research. Dr. Tietjen is past chairman, Electronic Materials Committee of AIME and a founding member of the Materials Research Society. He is a member of Sigma Xi, the American Chemical Society, the Electrochemical Society, and the Institute of Electrical and Electronics Engineers. Committee memberships include: Sherman Fairchild laboratory for Solid-State Studies Visiting Committee (Lehigh University), Advisory Council for the Minority Engineering Program (Penn State), University Scholars Program (Penn State), and the Penn State Alumni Council. Federal government committees include Distinguished Associate of the USIA Private Sector Committees (U.S. Information Agency), and FCC Advisory Committee on Advanced Television Service, where he is also chairman of the Implementation Subcommittee.

Born in New York City, Dr. Tietjen received his bachelor's of science degree, cum laude, in Chemistry from Iona College in 1956. He was awarded his master's of science and Ph.D. degrees in Fuel Technology (Physical Chemistry) in 1958 and 1963 from The Pennsylvania State University.

In 1970, Iona College presented him with the Brother Arthur A. Loftus Award for outstanding achievement in his profession. He was a recipient of The Pennsylvania State University's 1985 Distinguished Alumni Award, the university's highest honor.

Dr. Tietjen serves on the Board of Trustees for The Medical Center at Princeton, and the Independent College Fund of New Jersey; and on the

Board of Directors for the New Jersey State Chamber of Commerce, The American Boychoir School, David Sarnoff Research Center Inc., SRI International, Superconductor Applications Inc., and C-Cor Electronics Inc.

Dr. Tietjen will be located at SRI International's headquarters in Menlo Park.

SRI International is a research, development, and consulting organization for business and government worldwide.

DALLAS (JULY 23) PR NEWSWIRE - Interphase Corp. (NASDAQ: INPH) today introduced SOFTarray for VME, an innovative software package that provides system administrators with an easy-to-use, inexpensive way to significantly improve the performance and fault tolerance of disk subsystems.

SOFTarray for VME, innovative software from Interphase, enables system administrators to actually create a "soft array" to meet unique application needs.

SOFTarray enables scanning and mirroring of data for the wide range of VME platforms supported by the Interphase V/SCSI 4210 Jaguar or V/SCSI 4410

host bus adapters. The first version of the software, SOFTarray for Sun, is available for the Sun 3 and the Sun 4 SPARC platforms.

With a SOFTarray, system administrators can ensure uninterrupted availability of critical data. In addition, system performance and capacity are enhanced by the ability to spread data across multiple drives and to use portions of different drives together to act as a single, larger drive.

End users can also configure a SOFTarray to activate any combination of balanced striping, spanning, or mirroring capabilities, to suit a variety of system requirements.

"This new software array technology, when used with Interphase host adapters, gives users flexibility and performance that can't be achieved with hardware-only solutions," said Michael E. Cope, Interphase president and CEO. "Now, VME system managers can cost-effectively mix different disk drive sizes and models without concern for compatibility issues. In the future, the SOFTarray will be extended to other platforms as well."

Interphase was founded in 1974 and had its initial public offering of stock in 1984. Its stock is traded on NASDAQ under the symbol INPH. The company is located at 13800 Senlac Drive, Dallas, TX 75234. Telephone: 214-919-9000.

Interphase is a trademark of Interphase Corp. Multibus is a trademark of INTEL Corp. SPARC is a trademark of Sun Microsystems Inc.

PROVIDENCE, RI (JULY 23) PR NEWSWIRE - Fleet/Norstar Financial Group has elected three executive vice presidents to the position of vice chairman and broadened the responsibilities of four other executive vice presidents it was announced today by Terrence Murray, chairman and chief executive officer.

Named vice chairman are Charles W. Carey, John W. Flynn and Robert L. Mushkin. Carey has responsibility for the corporation's commercial banking and real estate activities, investment banking subsidiary, and asset-based lending line of business. Flynn is chief financial officer; chairman of the Assets and Liabilities Committee; and has responsibility for the corporation's public policy, legal, controllers, corporate communications and treasury functions. Mushkin is responsible for the nine banks that comprise the New England and New York State Banking Groups.

"Each of the corporation's new vice chairmen are seasoned executives who have made major, lasting contributions to Fleet/Norstar's success over many years," Murray said. "Their promotions recognize not only their past achievements, but also the fact that they are taking on added responsibilities. Fleet/Norstar is fortunate to have senior executives with the quality and depth of management experience and skill that these individuals possess."

Executive vice presidents given broader responsibilities are Robert J. Higgins, John B. Robinson, H. Jay Sarles and Michael R. Zucchini.

"These four executive vice presidents, along with a number of other key executives, represent Fleet/Norstar's future. They have been given additional management duties because, in the particularly challenging environment of the past several years, they have clearly demonstrated their ability to handle broader line responsibilities. The expansion of their roles in the organization reflects my confidence, and the confidence of the board of directors, in these talented executives," Murray said.

Higgins, who last week was named chairman of Fleet Bank, Providence, in addition to his position as the bank's chief executive officer, has been given responsibility for two other Fleet/Norstar banks: Fleet Bank of Connecticut, Hartford, and Fleet Bank of Boston. He also continues to head the corporation's trust and investment group.

Robinson, who heads the four-bank New York State Banking Group, has been given additional responsibility for Fleet Bank of Maine, Portland, and Fleet Bank-NH, Nashua.

Sarles, who has been responsible for managing Fleet/Norstar's mortgage banking, consumer finance, and discount brokerage lines of business, as well as the corporation's municipal securities subsidiary, was given additional responsibility for Fleet/Norstar's consumer banking activities and the corporate development function.

Zucchini, Fleet/Norstar's chief information officer, in addition to managing all of the corporation's data processing and bank operations activities, was given new responsibility for AFSA Data Corp., the corporation's California-based student loan processing subsidiary. He also was made responsible for the Corporate Products and Services Group, which develops and markets products and services for all Fleet/Norstar subsidiaries.

Murray also announced that Eurgene T. Mann, an executive vice president of the Corporation, will retire on Aug. 1, 1990. Responsible for all consumer banking activities of Fleet/Norstar's banks, Mann was first elected an executive vice president when he joined Norstar Bancorp in 1983. He was appointed a senior executive vice president in 1987 and

served as president of Norstar Bank, N.A., Buffalo. He was named an executive vice president of Fleet/Norstar when Fleet Financial Group and Norstar Bancorp merged in 1988.

Before joining the Norstar organization, Mann was with Marine Midland Bank Buffalo, from 1958 until 1983. A native of New York City, Mann received his B.S. degree from Holy Cross College and is a graduate of the Stonier Graduate School of Banking. He and his family live in the Buffalo area.

"Gene Mann's 32-year banking career has been distinguished and exceptionally productive, and his contributions to the Norstar and Fleet/Norstar organizations have been outstanding. Since the merger, he has done a remarkable job of preparing and streamlining our consumer banking system to compete in today's deregulated banking environment. We will miss his wise counsel and leadership," Murray said.

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Exchange (NYSE: FNG). Fleet/Norstar has approximately 1,000 offices in 40 states. Its lines of business include commercial and consumer banking, mortgage banking, consumer finance, asset-based lending, trust banking, student loan processing, and investment banking.

VAN NUYS, CALIF. (JULY 23) PR NEWSWIRE - Craig R. Jones, 44, has been promoted to vice president and chief financial officer of Electro Rent Corp. (NASDAQ: ELRC), Daniel Greenberg, chairman and chief executive officer, announced today.

Jones joined Electro Rent in June 1989 as corporate treasurer. He succeeds William Weitzman, who has held the chief financial officer's post since 1980. Weitzman continues as president and chief operating officer of Electro Rent. The treasurer's post will be vacant for the time being.

For three years prior to joining Electro Rent, Jones served as chief financial officer of Hollywood Park Companies. For one year before that he was director of corporate accounting for Fluor Corp. and for two years prior to that he was a division controller for Ultraystems Inc.

He began his business career with nine years of public accounting at the accounting firm of Price Waterhouse.

A certified public accountant, Jones graduated with honors from Rutgers

University in 1974 with a bachelor's degree in accounting and business administration.

Jones resides in Rolling Hills Estates with his wife, Tamara. Electro Rent Corp. is one of the largest nationwide organizations devoted to the short-term rental and leasing of general purpose and telecommunications electronic test equipment, personal computers and engineering workstations.

JACKSON, MS (JULY 23) PR NEWSWIRE - MidSouth Corporation (NASDAQ: MSRR) today announced record revenues, record carloadings and substantially improved earnings for the second quarter ending June 30.

The company reported revenues of $23,055,000 for the quarter, a new high for any quarter in the company's history, compared to $22,122,000 in 1989, an increase of 4.2 percent. Carloadings for the same period were up 6.7 percent, Net income of $1,945,000 or 22 cents per share compared to $1,397,000 or 14 cents in the same period a year ago.

For the first six months of 1990 the company reported revenues of $45,104,000 against $44,632,000 in 1989, and net income of $3,536,000 or 38 cents per share compared with $3,683,000 or 42 cents per share a year ago. Record rainfall throughout its service area coupled with abnormal increases in the cost of locomotive fuel, since subsided, depressed earnings in the first quarter, 1990.

MidSouth is a railroad holding company that provides freight transportation over 1,200 miles of track in the southeastern United States through its three operating subsidiaries: MidSouth Rail Corporation, MidLouisiana Rail Corporation and SouthRail Corporation.

ST. LOUIS (JULY 23) PR NEWSWIRE - Jefferson Smurfit Corp. (JSC) and its affiliate Container Corp. of America (CCA) together with Smurfit Newsprint Corp. are streamlining the structure of their nationwide recycling operations into a new, more unified organization, Smurfit Recycling Co.

Smurfit Recycling(SM), America's number one paper recycler, combines the capabilities of JSC/CCA's current Reclamation Division which includes Independent Paper Stock and the management of newly acquired Pacific Recycling. In 1990, Smurfit Recycling is estimated to market in excess of four million tons of waste paper.

"With 47 plants and regional sales offices in 15 states coast-to-coast, we're the largest waste paper collector and recycler in the U.S.," said John H. Veidt, Jr., vice president of Smurfit Recycling and Jefferson Smurfit Corp. "We feel the name change to Smurfit Recycling will improve communication between our recycling facilities and service to our customers."

Approximately half of the paper collected by Smurfit Recycling is used by

Smurfit's mills to produce a variety of paper and paperboard products including boxboard grades, newsprint, containerboard and other paperboards.

The balance is sold to customers in the U.S. as well as the expanding overseas market, where Smurfit Recycling ranks as the largest single exporter of waste paper. Smurfit Recycling is headquartered at Jefferson Smurfit's corporate center in St. Louis.

As a company, JSC does no add a single pound to America's fiber waste stream. For every pound of paper and paperboard it makes, it markets that much or more for recycling. Jefferson Smurfit was ranked best in its industry by a survey reported in Fortune Magazine, Feb. 12, 1990, for corporate actions that help the environment.

Jefferson Smurfit Corp. is a privately-held company that manages annual estimated sales of more than $4.3 billion. Its operations produce one of the largest, most broadly-based lines of paper and paperboard packaging products in the world. JSC has more than 17,000 employees and manages more than 170 plants and mills in the United States, Canada and Mexico.

CONTACT: John Veidt, (314) 746-1100, or Terry Ingram, (314) 746-1100, both of Smurfit Recycling Co.

CALHOUN, GA (JULY 23) PR NEWSWIRE - Crown Crafts Inc. (AMEX: CRW) today announced unaudited financial results for its first fiscal quarter which ended July 1.

Net sales in the fiscal first quarter were $25,613,000 as compared to net sales of $22,361,000 in the corresponding period a year ago. Current year first quarter net earnings were $1,453,000 compared to $1,430,000 in the prior year's first quarter. Both primary and fully diluted earnings per share were $0.21 in both years' first quarters.

Commenting on first quarter operating results, President and Chief Executive Officer Michael H. Bernstein stated: "Although the most recent quarter's sales grew 14.5 percent to a first quarter record, net earnings and earnings per share were flat with last year's first quarter, as anticipated, primarily due to higher marketing, administrative and interest expenses in the current period. First quarter results reflected primarily sales of the company's existing products since, as expected, shipments of our most recently introduced products (jacquard-woven cotton rugs, Thermoloft(R) comforters, and a line of 200-count sheets sold with coordinating comforters and window treatments) commenced at the end of the quarter."

Summary results for the first quarter are as follows:

CROWN CRAFTS INC.

First quarter ended	7/1/90	7/2/89
Net sales	$25,613,000	$22,361,000
Net earnings	$ 1,453,000	$ 1,430,000
Net earnings per share:		
Primary	$ 0.21	$ 0.21 (Note)
Fully diluted	$ 0.21	$ 0.21 (Note)
Average shares outstanding:		
Primary	6,957,989	6,974,924 (Note)
Fully diluted	7,026,733	6,975,008 (Note)

NOTE: Adjusted for two-for-one stock split distributed Jan. 11. Crown Crafts Inc., located in Calhoun, Ga., manufactures and distributes bed covering products and related fashion accessories.

COSTA MESA, CA (JULY 23) PR NEWSWIRE - The O.E.M. Division of Procom Technology Inc., a technology-driven manufacturer of board level SCSI host adapters and software drivers for the O.E.M. and industrial distribution markets, today announced the opening of two new facilities and the addition of new sales and administrative staff.

An East Coast regional sales office has opened to accommodate the heightened interest in the new division's O.E.M. product offering and will be headed by Richard Prairie, most recently a sales manager with Future Domain, and formerly with Caliper and Siemens.

In addition to the East Coast facility, a new office, headquartered in Buckinghamshire, England, has been established to address the growing microcomputer market place in Europe. Both the U.S. headquarters in Costa Mesa, and the European headquarters in England will be headed by Procom Technology O.E.M. Vice President Tom Miller, also formerly with Future Domain and Micropolis. According to Miller, "The increased demand for our new O.E.M. products pointed to the obvious need for satellite offices, both domestically and abroad." He added that a Pacific Rim office will be opening in the next 120 days.

Other new staff additions building the O.E.M. division include National Distribution Sales Manager Patricia Seifert, who will be developing and industrial distribution sales team and Judy DeWinter, an executive assistant who will oversee all administrative, marketing and sales coordination activities.

Miller will be increasing the division's staff even more when Procom Technology relocates its headquarters to an 80,000 square foot facility located in Irvine, Calif. These plans include the addition of a senior level product manager, several engineers with applications oriented backrounds and two more senior level domestic sales managers.

The O.E.M. division's intital product line features Procom Technology's internally engineered 8-bit and 16-bit SCSI host adapters for PC, XT, AT and PS/2 Micro Channel machines as well as device drivers for a variety of SCSI peripherals. Additonally, the OEM Division is already developing a 32-bit host adapter to take advantage of the bus mastering capabilities of the newer machines, with delivery slated for fourth quarter 1990.

Said Miller, "Currently, Data General, Fujitsu, Hitachi, IBM, Leading Edge Olivetti, Sony and Teac are evaluating our products and we expect many more to follow suit."

The recently established division is a wholly owned subsidiary of Procom Technology.

More information may be obtained by contacting Debbie Mercer, Procom Technology Inc., 200 McCormick Ave., Costa Mesa, Calif., 92626. Telephone: 714-549-9449 ext 233; fax: 714-549-0527.

MIDLAND, TX (JULY 23) PR NEWSWIRE - Parallel Petroleum Corp. (NASDAQ: PLLL) today announced that revenues and earnings for both the second quarter and six months ended June 30, 1990, set records for any comparable periods in the company's history.

For the second quarter, Parallel had net income of $132,538, or 1.2 cents per share, on revenues of $482,728, compared to year-earlier net income of $31,907, or three-tenths of a cent per share, on revenues of $204,122.

For the six months ended June 30, 1990, Parallel had net income of $221,485 or 2 cents per share, on revenues of $830,455, compared to net income of $61,279, or six-tenths of a cent per share, on revenues of $86,611 in the year-earlier period.

Parallel attributed the more than doubling of revenues to the enhancement of properties acquired in 1989 and initial production from two wells completed since March in the Pearsall area of the Austin Chalk formation in South Texas. Parallel recently increased its holding in the Pearsall

area to interests in approximately 6,300 acres underlying a potential 16 to 20 wells, up from the present two wells on 1,840 acres. The two wells, drilled with the "horizontal" technique, are producing an aggregate of more than 1,500 barrels of oil and 500,000 cubic feet of natural gas per day. A third well has reached total depth and awaits testing and evaluation. Parallel owns a 6.25 percent working interest and 3.9 percent net revenue interest in the two producing wells. Parallel's new holdings, in four prospects, offset wells that are producing from 600 to 1,200 barrels per day.

For the six months ended June 30, 1990, Parallel's equivalent barrels of oil sold more than doubled to 58,759 from 28,305, while average sales prices increased to $14.23 from $13.66. Net cash flow before working capital adjustments increased to $437,298 from $180,670.

PEAPACK, N.J. (JULY 23) PR NEWSWIRE - Beneficial Management Corporation, a subsidiary of Beneficial Corporation (NYSE: BNL), announced today it has reached an agreement in principle to acquire a majority interest in Softek Systems, Incorporated, doing business as Flashtax, of Irvine, Calif.

Flashtax provides a full range of electronic filing services to the tax filing marketplace, including tax preparation firms, software companies, and other electronic filing outlets serving individual taxpayers. Founded in 1987, Flashtax has participated in the Internal Revenue Service's electronic filing program since its inception.

"This agreement creates a unique strategic partnership in the tax preparation software marketplace through the combined offering of Flashtax's electronic filing technology with Beneficial's refund anticipation loan products and expertise," said David A. Snyder, president and chief executive officer of Flashtax.

Beneficial pioneered the refund anticipation loan program in 1986 and has become a leader in the business, making over 1.2 million refund anticipation loans during the 1990 tax season.

"The strategic alliance between Flashtax and Beneficial creates a very stable and aggressive state-of-the-art business relationship," said Ross N. Longfield, president of Tax Masters, Beneficial's refund anticipation loan business unit.

Beneficial currently offers refund anticipation loans to customers who file their returns electronically with H&R Block and other tax preparation firms. The agreement with Flashtax will provide Beneficial with another means of distribution for its growing refund anticipation loan business.

Beneficial Corporation provides consumer financial services through a network of over 1,100 offices located across the United States, and in Canada, the United Kingdom and Germany.

ATLANTA (JULY 23) PR NEWSWIRE - Fuqua Industries Inc. (NYSE: FQA) today announced results for the second quarter of 1990.

For the three months ended June 30 net income was $5.8 million or more than double the $2.2 million reported for the same period in 1989. Earnings per share for the second quarter of 1990 were $.32 compared to $.10 for 1989. Sales for the quarter were $251 million compared to $232 million in 1989.

For the first six months of 1990 Fuqua's net income was $11.8 million. In the first half of 1989 net income was $7.3 million. Earnings per share for the first half of 1990 were $.62 compared to $.34 last year.

Lawrence P. Klamon, president and chief executive officer of Fuqua, said the second quarter results reflect the continued improvement in the earnings of the Snapper lawn and garden division and a record second

quarter at Qualex, Fuqua's jointly owned photofinishing subsidiary. He noted that because Fuqua has been repurchasing its stock, the average number of shares outstanding for the quarter was 18.1 million compared to 21.5 million last year. Klamon said he expected that Fuqua's results for the remainder of 1990 would be significantly better than the last half of 1989.

LOS ANGELES (JULY 23) PR NEWSWIRE - Angeles Housing Concepts Inc., a wholly owned subsidiary of Angeles Corp. (AMEX: ANG), announced the acquisition of three fully operational congregate-style retirement properties in Fort Myers, Fla.; Winston-Salem, N.C., and Greensboro, N.C., for a total in excess of $25 million. Mortgage financing for the transactions was provided by Home Savings Association of Kansas City and by an affiliate of PaineWebber Properties Inc. Angeles Housing Concepts (AHC) assumed management of the properties as of July 19. The seller was an affiliate of Heritage Centers of America.

Properties acquired were Heritage Woods, a 136-unit property located in the southwestern part of Winston-Salem; Heritage Palms, a 186-unit facility in the central section of Fort Myers, and Heritage Greens, a 136-unit complex in the western area of Greensboro. Heritage Woods is 80 percent occupied, Heritage Palms 42 percent, and Heritage Greens 85 percent.

AHC had acquired two operational adult housing complexes in Wichita, Kan., and Omaha, Neb., from another Heritage affiliate in February, and will develop a separate facility in Omaha to provide assisted living services. The company also has developed, owns and manages the "Independence Village" congregate care facilities in East Lansing, Mich., and Winston-Salem, and is in the early rent-up phase for the "Independence Village" properties it is constructing in Peoria, Ill., and Raleigh, N.C. In addition, AHC is preparing to begin construction on a new "Independence Village" in Columbia, S.C., and is in predevelopment stages at Louisville, Ky., and other locations.

William E. Tuthill, chairman, president and chief executive officer of Angeles Housing Concepts, said, "Census Bureau studies show marked changes in the patterns of senior adult living. Increasing numbers of elderly couples and elderly singles are now living independent of relatives and they are remaining independent longer because they are 'better off physically and financially.' Today's congregate-style adult housing provides seniors with a comfortable private apartment, a carefree

lifestyle, three meals a day plus a 24-hour snack service, transportation, housekeeping service, a program of varied activities, companionship, and freedom from the worries of running a private home. It is available on a monthly rental basis with no endowment requirement." Tuthill, a vice chairman of Angeles Corp., has been involved in specialized adult housing for 18 years.

William H. Elliott, chairman and chief executive officer of Angeles Corp., stated, "By responding to these changing senior living patterns through the experience and sensitivity of our Angeles Housing Concepts unit, Angeles Corporation is also providing quality investment opportunities for our institutional investors."

Angeles Corp. is an investment management company whose subsidiaries currently manage in excess of $4 billion of real estate and securities assets for institutional and individual investors.

CLUTE, TX (JULY 23) PR NEWSWIRE - Benchmark Electronics Inc. (ASE: BEI) today reported record earnings for the six months and second quarter ended June 30, 1990.

For the six months, Benchmark earned $1,037,000, or 50 cents per share, on net sales of $11,201,000. For the same period last year, the company reported net earnings of $555,000, or 27 cents per share, on net sales of $8,174,000.

For the quarter ended June 30, 1990, the company earned $533,000, or 26 cents per share, on net sales of $5,475,000. This result compares with earnings of $355,000, or 17 cents per share, on sales of $4,948,000 in the second quarter last year.

"Sales for the first six months of 1990 were 37 percent ahead of the corresponding period in 1989," reported President Don Nigbor. "We attributed the increase to a continuing trend toward surface- mount turnkey contract manufacturing and to favorable acceptance by customers of the company's services."

Benchmark Electronics Inc. provides manufacturing services to original equipment manufacturers (OEMs) in the electronics industry, including manufacturers of communications equipment, business computers, testing equipment, medical devices and industrial instruments. The company's common stock trades on the American Stock Exchange.

NEW YORK (JULY 23) PR NEWSWIRE - George L. Sosson has been appointed president and chief operating officer of Win Communications, Inc., it was announced today by I. Martin Pompadur, president and chief executive officer of RP Companies, Inc.

Sosson has spent the last 21 years with CBS, Inc., in various capacities within its radio division. He was most recently vice president, CBS owned FM stations, with responsibility for the 11 company-owned FM stations. Prior to that he served as vice president, operations, for the CBS FM group.

"George Sosson will bring RP Companies' radio division the strong

operating experience, management skills and long-term perspective that are essential to sustaining the company's rapid growth," Pompadur said. "As a leader of the radio industry he has gained the respect of operators throughout the country and we are very pleased to have him lead our radio organization."

Win Communications, Inc., manages RP Companies' radio properties, which are owned by ML Media Partners, L.P. and ML Media Opportunity Partners, L.P. Currently, Win Communications operates 12 radio stations in eight markets: WEBE-FM/WICC-AM in Fairfield County, Conn.; WQAL-FM in Cleveland, Ohio; WMJC-FM/WXTZ-AM and the Indiana University Sports Network in Indianapolis, Ind.; WFID-FM/WUNO-AM and the Noti-Uno News Network in San Juan, Puerto Rico; KEZY-FM/KORG-AM in Anaheim, Calif; WEJZ-FM in Jacksonville, Fla; KBEX-FM in Tulsa, Okla.; and WZCL-FM in Norfolk, Va.

RP Companies, Inc., is a diversified media company which invests in and manages properties in the communications and entertainment industries. RP Companies was founded by Elton H. Rule and I. Martin Pompadur, whose initials form the name. The company was formed to centralize the direction of Rule and Pompadur's media portfolio. With Rule's death in May 1990, Pompadur is now the sole owner of RP Companies and continues to direct the activities of the company as its chief executive officer and chief operating officer.

RP Companies, Inc., owns, operates, manages or has interests in 12 radio stations, cable television systems with over 600,000 subscribers, 11 television stations, 12 monthly trade magazines, a daily newspaper, a weekly entertainment guide, a newsletter, two programming production companies, a program distribution company, and a cellular telephone company. RP Companies has successfully raised six public partnerships and several private vehicles for media investments. These properties have a current estimated market value of more than $1.6 billion.

Win Communications, Inc., will be relocating its corporate headquarters from Cleveland to Greenwich, Conn. The offices will be located at 55 Old Post Rd., Number 2, Greenwich, Conn. 06830-6074, telephone number 203-622-0006.

SAN MANUEL, AZ (JULY 23) PR NEWSWIRE - Magma Copper Co. (AMEX: MCU) has been notified by the chairman of the Magma Union Bargaining Committee, speaking for all Magma unions, of the decision to withdraw grievances related to the non-payment of copper price-related bonuses for the first and second quarters of 1989.

This follows an earlier ruling by an arbitrator upholding the position of the company that no bonus was payable for the fourth quarter of 1988. Approximately $10 million per quarter would have been payable as bonuses under the plan had production and sales quotas been met.

The bonus dispute is now resolved and is not subject to further appeal. Magma Copper Co. operates mines, concentrators and solvent extraction/electrowinning plants at San Manuel, Superior and Miami, Ariz., as well as a smelter, electrolytic refinery and rod plant at San Manuel.

CONTACT: Frank Harris of Magma Copper Co., (602) 385-3256 or (602) 825-9660.

AUBURN, NY (JULY 23) PR NEWSWIRE - The board of directors of Iroquois Bancorp, Inc. (NASDAQ: IROQ), at its July 19 meeting, approved payment of a $.125 per share dividend, according to Robert J. Steigerwald, president and chief executive officer.

Holders of the company's common stock as of the record date of July 31, 1990, will receive the dividend, which will be paid on Aug. 31, 1990.

It is the 16th consecutive quarterly dividend declared, based on the earnings of Cayuga Savings Bank, the sole banking subsidiary of Iroquois Bancorp, Inc.

"The directors' approval of this second quarter dividend signifies their continuing confidence in the company's financial vitality. Close attention to our net interest margin and containment of operating costs remain key operating strategies," according to Steigerwald.

MORRIS TOWNSHIP, NJ (JULY 23) PR NEWSWIRE - Bellcore has developed a highly efficient computer language that uses logical deduction to solve complex programming problems. The object-oriented language prototype, LAURE, also makes it easier to write and reuse software programs.

Software developers have successfully used the LAURE methodology and programming language in laboratory tests to solve problems faced in telecommunications network management and operations systems.

"LAURE programmers need only describe the software-writing result they are seeking and LAURE will determine the best way to reach that goal," said Bellcore researcher Diane Hoffoss. "LAURE can evaluate their questions and come up with solutions quickly and accurately."

LAURE's deductive abilities can make it more efficient than the currently popular "C" or "C++" (an object-oriented version of C) languages to solve complex programming tasks.

Moreover, LAURE makes it easier to incorporate a programmer's instructions into operating code. With traditional programming languages, software developers must spell out detailed procedures, a tedious and time-consuming task. LAURE can automate up to 50 percent of most programmers' work, thereby increasing the software's reliability by minimizing human intervention, said LAURE's inventor, Yves Caseau.

LAURE organizes facts and related instructional data into sets and then defines specific relationships among all the sets in a program. This feature makes it possible for various sets to be reused frequently without being rewritten.

LAURE helps set up the object groupings and their relationships; it supports not just hierarchies of sets, but lattices (more complex interrelationships) -- permitting objects to inherit properties from different sources. For example, whales are warm-blooded like all mammals, but their shape and habits are similar to other ocean-dwellers which are cold-blooded. With LAURE, users can include any number of "super" sets allowing much better differentiation and categorization of objects having ambiguities in their description such as whales. Once specific sets and relationships are defined, a programmer can identify the process he wants to model -- either by describing a specific sequence of operations to be applied to specific objects contained in the program, or by logically describing the result being sought. The program, however, more definitive in scope, can then be written more rapidly and in many instances with substantially fewer lines of codes, Hoffoss said.

Initial tests have demonstrated LAURE's effectiveness in streamlining programming tasks. At U S WEST, LAURE was used to design software for a network-monitoring interface management system. A project that was expected to take 12 months was completed within two.

LAURE supports several kinds of logical deduction, including both forward chaining and backward chaining. Forward chaining is traditional mathematical reasoning: starting with premises, one sees which theorems can be proven. In backward chaining, one starts with a hypothesis, and sees whether the given premises will support it. As an example, it is easy to give LAURE rules such as "any telephone exchange with more than 90 percent of its lines assigned is ready for expansion" plus a list of the

capacity and number of lines assigned in each exchange, and have LAURE print a list of exchanges that need expansion.

LAURE can also help organize spatial relationships. Using LAURE, programmers determined the placement of various rectangular objects on a computer screen, by developing a single equation. Traditional programming schemes require detailed written procedures for the placement of each object in order to ensure correct spacing.

LAURE, which can work with virtually any computer system, is being used in experiments at Brown University, Northwestern University and the University of Florida, according to Caseau. EDF, a major French electric company, and MATRA Aerospace, a French manufacturer of satellites and airplanes, have also requested permission to experiment with LAURE, he added.

One of the largest software developers in the world, Bellcore provides research and other technical support to the telephone companies of Ameritech, Bell Atlantic, BellSouth, NYNEX, Pacific Telesis, Southwestern Bell Corp., and U S WEST, as well as Cincinnati Bell and the Southern New England Telephone Company.

NEW YORK (JULY 23) PR NEWSWIRE - Edmund T. Pratt, Jr., chairman and chief executive officer, and Gerald D. Laubach, Ph.D., president, today announced new positions for three senior Pfizer executives.

"These changes," said Pratt, "represent another step in the continuing transition to new corporate leadership."

The changes, effective Aug. 1, are: -- Jean-Paul Valles, senior vice president, Pfizer Inc., will assume additional responsibility for the company's Animal Health Group.

-- Henry A. McKinnell, Jr., Ph.D., vice president, corporate strategic planning, has been appointed vice president-finance and chief financial officer, a responsibility formerly held by Valles. McKinnell will continue to report to Valles.

-- Peter G. Tombros, executive vice president, Pfizer Pharmaceuticals Group, has been named vice president, corporate strategic planning. Tombros will report to McKinnell.

ATLANTA (JULY 23) PR NEWSWIRE - "Our financial performance was strengthened by strong demand for energy in June, but our earnings through the first half of this year remain below the results we reported for the first six months of 1989," Southern Company President Edward L. Addison said today.

The Southern Company (NYSE: SO) is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Savannah Electric. The Southern Company's common stock is one of the 20 most widely held corporate stocks in America.

Addison announced that net income for the first six months of this year was $329 million or $1.04 per share -- down $55 million or 18 cents per share from the first half of 1989.

For the 12 months ending June 30, earnings totaled $791 million or $2.51 per share -- off $121 million or 39 cents per share from the comparable 12 months a year ago. Earnings for the 12 months ending May 31 were $2.39 per share.

Reviewing system operations, Addison said that electricity use by retail customers in the four-state area rose 3.0 percent during the first half of 1990. Electricity sales to commercial customers -- offices, stores, and other nonmanufacturing firms -- gained 4.1 percent to 14.0 billion kilowatthours. In-home electricity needs were up 3.1 percent to 14.7 billion kilowatthours. Industrial energy use rose 2.3 percent to 22.6 billion kilowatthours.

Energy sales under long-term contracts with neighboring utilities totaled 10.3 billion kilowatthours during the first six months of this year -- an increase of 5.0 percent.

The energy needs of wholesale customers -- municipalities and cooperatives in the service area -- were down 10.7 percent. These sales are expected to remain below prior levels because many wholesale customers in Georgia are meeting an increasing portion of their energy needs through joint ownership of facilities with Georgia Power.

Overall, sales of electricity to customers of The Southern Company were up 2.2 percent in the first six months of 1990 compared with the same period in 1989.

PENNSAUKEN, N.J. (JULY 23) PR NEWSWIRE - MEDIQ Inc. (AMEX: MED) announced today that on July 20, 1990, it entered into a $65 million, 18-month term, credit facility with a group of banks headed by Mellon Bank (East), as agent.

The proceeds of the facility were used to replace $43 million of outstanding credit lines and $22 million is available for working capital and/or letters of credit.

Commenting on the facility, Michael Sandler, senior vice president and chief financial officer, said, "We are especially pleased to have successfully completed the financing during this difficult economic environment in which commercial banks have become increasingly more reluctant to expand corporate credit. The $65 million term credit facility is a recognition of the underlying values of our operating companies."

MEDIQ Inc., whose shares (MED and MED.Pr) and debentures (MED.C) are traded on The American Stock Exchange, provides products and services to hospitals, nursing homes, health care professionals and consumers through its subsidiaries. MEDIQ's businesses include diagnostic imaging and testing, maintenance of diagnostic equipment, pharmaceutical packaging, hospital and health care management and consulting, equipment rental, health care facility planning, design and project management, management and ownership of psychiatric units, the manufacture and distribution of eyeglass frames and financial services.

#90204p7613 07/23/1990 ~PR Newswire
MENLO PARK, CA (JULY 23) PR NEWSWIRE - Consolidated Freightways Inc. (NYSE: CNF) today reported a net loss for the second quarter of $6.8 million, or 19 cents per share, an improvement over the first quarter loss of $37.1 million or $1.06 per share.

The results in both quarters were after payment of $3.2 million for preferred dividends. The second quarter loss compares with year earlier net income of $7.6 million, or 19 cents per share.

The CF companies had operating income of $9.2 million compared with a first quarter operating loss of $40.0 million.

Revenues for the quarter were $1.044 billion compared with $1.037 billion a year ago. These revenues reflect gains by the company's long-haul and regional trucking units, which benefited from rate increases and consolidation in the less-than-truckload (LTL) industry.

For the first six months of the year, the company recorded a net loss of $43.9 million, or $1.25 per share, after preferred dividends. In the comparative period a year ago, the company earned $40.1 million, or $1.05 per share. Net income for the first half of 1989 was restated for the adoption of Financial Accounting Standards Statement No. 96, Accounting for Income Taxes.

Revenues for the first half of 1990 were $2.042 billion, up from $1.763 billion in 1989.

Each of the company's three principal operating groups -- CF Motor Freight Con-Way Transportation Services and Emery Worldwide -- showed substantive financial improvement from the first quarter, with the most improvement achieved by Emery. Operating income for the trucking groups increased by $10.7 million while the Emery loss was reduced by $38.6 million.

Lary R. Scott, president and chief executive officer, said that while much work remains before the Emery turnaround is completed, "We are nevertheless pleased that our air freight operations made considerable progress in the second quarter.

"Perhaps even more important, Emery has maintained positive progress since February, which one financial analyst called CF's darkest hour," Scott said.

Emery Worldwide lost $30.9 million on revenues of $332.1 million in the second quarter, compared with its first quarter loss of $69.5 million.

Emery's second quarter results reflected continuing cost reductions, steady shipping volumes and success in obtaining a better revenue and freight mix of urgent envelope, package and heavy freight from customers.

The second quarter resutls also improved at CF Motor Freight, the company's long-haul carrier, and the Con-Way Transportation Services regional carrier and intermodal services group.

"Strong revenue and profit results from our trucking operations were instrumental in progress made toward returning CF to profitability," Scott said.

The combined operating income of the trucking companies totaled $40.1 million in the quarter.

CF Motor Freight had operating income of $29.8 million for the quarter on record revenues of $548.5 million. That company's emphasis on premier service and customer satisfaction has resulted in increased market share, Scott noted. The predominantly LTL carrier averaged a record 59 million pounds of freight per day during the quarter.

Total tonnage for CF Motor Freight rose six percent while higher-rated less-than-truckload tonnage increased 7.5 percent.

Con-Way Transportation Services, which operates CF's regional trucking and intermodal businesses, had operating income of $10.3 million for the quarter on record revenues of $163.7 million.

Con-Way Western Express and Con-Way Southern Express had record profits for the quarter. As a group, operating income from the regional carriers declined versus last year's second quarter, reflecting start-up costs and the recent planned expansion of Con-Way Southwest Express, the newest regional carrier, which increased its terminal network from 15 to 27 service centers.

Total tonnage for Con-Way Transportation Services rose 19.5 percent while regional LTL traffic was up 20.0 percent.

CINCINNATI (JULY 23) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced the appointment of N W Ayer, Inc., New York, as the advertising agency for Puritan Oil, effective immediately.

Puritan Oil had been handled by Grey Advertising, Inc., New York. "Grey Advertising has made a valuable contribution to the Puritan Oil business, and we offer them our sincere thanks and appreciation," said L. Ross Love, vice president - advertising for Procter & Gamble. "This change simply reflects a decision to have our two trademarks in this category handled by separate agencies, with Grey continuing its responsibility for Crisco shortening and oil."

In addition to Puritan Oil, N W Ayer will continue to handle Puffs, Duncan Hines mixes, Citrus Hill, Hawaiian Punch, Instant Folgers and Vacuum Folgers. Grey Advertising continues to handle Joy, Downy, Lestoil, Pantene, Sure, Crisco, Crisco Oil, Jif, and Cover Girl.

#90204p7620 07/23/1990 ~PR Newswire

LIVINGSTON, N.J. (JULY 23) PR NEWSWIRE - The Howard Savings Bank (NASDAQ: HWRD) has announced an after tax loss of $15.7 million, or $1.09 per share for the second quarter of 1990, compared to net income of $4.6 million, or 32 cents per share, for the second quarter of 1989. For the first six months of this year the bank had an after tax loss of $33.2 million, or $2.31 per share, compared to net income of $13.1 million, or 91 cents per share, for the comparable 1989 period.

"Our second quarter loss reflects the addition of $25.0 million to the bank's allowance for possible loan losses, as our non-performing loans increased from $402.7 million at the end of March, to $503.0 million at the end of the second quarter, due to continued weakness in the northeastern United States real estate markets," bank President Leo J. Rogers, Jr. said.

After this second quarter addition, the bank's allowance for loan losses at June 30, 1990 was $122.6 million, compared to $112.9 million at March 31, 1990.

The Howard reported an after tax loss of $17.5 million, or $1.22 per share in the first quarter of this year, after adding $29.5 million to the bank's reserve for possible loan losses for the quarter ended March 31, 1990.

"The second quarter loss also reflects significant reductions in interest income in the second quarter due to loans placed on non-accrual status," Rogers said.

The Howard's non-interest expense during the second quarter was $32.0 million, down from $35.0 million for the first quarter of 1990.

"The $3.0 million improvement in non-interest expense is largely attributable to non-recurring expenses incurred in the first quarter of 1990," Rogers said.

"The effects of the bank's cost cutting efforts, announced in April, will be felt in the third and fourth quarters of 1990," Rogers added.

The bank's primary capital ratio at June 30, 1990 was 7.34 percent, compared to 7.03 percent at March 31, 1990. A memorandum of understanding with state and federal regulators provides that the Howard will take steps so that its primary capital ratio will be at least 7.0 percent at Dec. 31, 1990 and at least 7.5 percent after Dec. 31, 1991.

The Howard's total assets were $4.9 billion at June 30, 1990, compared to $4.9 billion a year ago. Deposits were $4.5 billion and $4.4 billion at the end of the second quarters of 1990 and 1989, respectively. Shareholders' equity was $253.1 million, or $17.62 per share, at June 30 of this year.

ORLANDO, FLA. (JULY 23) PR NEWSWIRE - Page Avjet Corporation announced today that it has entered into a definitive agreement for the acquisition of the assets of Van Dusen Airport Services Company. The Van Dusen acquisition would add 13 fixed base operations to the company's existing eight facilities, making Page Avjet one of the largest FBO chains in the country.

In making the announcement, Page Avjet's president and CEO, Vincent DeLuca said, "The integration of Van Dusen, with locations ranging from Anchorage Alaska, to Boston, into our existing network of full service fixed base operations represents Page's confidence in and commitment to the airport services industry."

Page Avjet's management and financial strength will now be coupled with

the prime locations and strong operations personnel of the Van Dusen bases to provide enhanced services to the aviation community. "We are extremely pleased to now have the opportunity to serve our customers coast-to-coast," said DeLuca. "We will be providing on a larger scale the same high quality and professional service that has become synonymous with Page Avjet."

Page Avjet has spent the last few years substantially upgrading the facilities, customer service and training at its existing FBOs. It has also diversified its airport services operations and now competes vigorously in providing airline fueling and ground handling, passenger and special services, and terminal management. The Van Dusen acquisition will substantially expand Page's market presence in the fueling of major domestic airlines. Page's plans call for retention of Van Dusen's operations personnel and regional management.

Page Avjet Corporation is an international aviation sales and service company that provides maintenance, modification and new aircraft completions for airline and general aviation jet aircraft; sells aircraft and ground support equipment; provides airline and general aviation aircraft and passenger ground support services at eight airports in the United States; and manufactures aircraft modification assemblies.

PEARL RIVER, N.Y. (JULY 23) PR NEWSWIRE - Orange and Rockland Utilities, Inc. (NYSE: ORU) today reported that total electric and natural gas operating revenues for the second quarter of 1990 were $124.1 million, versus $122.8 million in the second quarter of 1989.

According to James F. Smith, chairman and chief executive officer, this increase is due principally to the higher recovery costs of purchased power and fuel used for electric generation, which do not have an impact on earnings. For the six months ended June 30, 1990, total electric and natural gas operating revenues were $277.0 million, compared with $268.5 million for the same period in 1989.

Net income for the second quarter of 1990 was $7.0 million, or 47 cents per share, compared with 1989 second-quarter earnings of $7.5 million, or 51 cents per share. Net income for the first half of 1990 was $16.9 million, or $1.16 per share, versus $17.8 million, or $1.25 per share, a year earlier.

The second-quarter decline primarily reflects lower electric sales, resulting from a cooler period than that experienced a year ago.

#90204p7625 07/23/1990 ~PR Newswire

PAOLI, Pa. (JULY 23) PR NEWSWIRE - Ametek Inc. (NYSE: AME) announced today that it had completed its purchase of a major European electric motor manufacturer and also reported that its earnings of 24 cents per share in the three months ended June 30 equalled last year's second quarter earnings.

Ametek said that it had purchased the Ciaramella-OEP Group, a leading producer of appliance and vacuum motors located near Milan, Italy, under terms of an agreement announced July 9. Supplying mainly European customers, the 30-year-old business will sell nearly $70 million worth of motors this year, according to Ametek's President and Chief Executive Officer Walter E. Blankley. "This new business, together with Ametek's established electric motor businesses, gives us a strong position in the growing world market for these motors," Blankley said.

Ametek reported that second quarter sales this year increased about nine percent to $157.6 million and produced net income of $10.5 million or 24 cents per share, compared to last year's second quarter net income of $10.9 million, also equal to 24 cents per share.

First half sales this year showed a strong increase while earnings for the six months ended June 30 were $20.2 million or 46 cents per share, compared to the $22.2 million or 50 cents per share earned in the first half of 1989 which included a record first quarter. Sales in the current period, including additional volume from aircraft instrument businesses acquired in the third quarter of last year, totaled $326.5 million vs. $289.2 million shipped in the same period of 1989.

Ametek's president indicated that reduced profit margins in the second quarter and year-to-date were primarily due to costs of moving and integrating an aircraft instruments business purchased last year, higher cost in a plastics packaging business resulting from a recently imposed tax on the use of certain materials, and the downturn in the automotive market. "We benefited from a strong recovery of profitability in the Electro-mechanical group, although volume dropped slightly following the sale in May of one division from that group -- Houston Instrument -- to a computer graphics equipment manufacturer," according to Blankley. While operating income was higher in the quarter and first half of 1990, last year's net income for these periods included a nonoperating net gain from the disposition of two product lines.

"New order rates in aircraft instruments and Electro-mechanical products

have continued strong during this six-month period," Blankley noted, "and Ametek's backlog of orders, now in excess of $270 million, has increased more than nine percent from year-end."

Late in the second quarter Ametek completed the purchase, from the Du Pont Co. (NYSE: DD), of two instrument businesses which had sales last year of about $20 million.

GREAT NECK, N.Y. (JULY 23) PR NEWSWIRE - Leon Machiz, chairman and CEO of Avnet, Inc. (NYSE: AVT), announced today that Edward Kaniger has elected to retire. Kaniger has been with Avnet's Hamilton/Avnet division in various operating and executive positions for the past 31 years most recently as president of Hamilton/Avnet. He has also been a senior vice president of Avnet, Inc.

Roy Vallee, who has held executive positions with Hamilton/Avnet in both the components and computer sectors for the past 13 years and is president of the company's Avnet Computer division, was elected a senior vice president of Avnet and named director of its electronics operations worldwide.

He will assume responsibility for Hamilton/Avnet and will operate as its president until a successor is named.

#90204p7627 07/23/1990 ~PR Newswire

CHICAGO (JULY 23) PR NEWSWIRE - Amoco Corporation (NYSE: AN) today reported estimated consolidated earnings of $379 million for the second quarter of 1990, compared with the $497 million earned in the second quarter of 1989. Earnings per share for the current quarter amounted to $.75 compared with $.96 for the second quarter of last year.

Second quarter 1990 earnings included a net gain of $471 million related to the previously announced settlement of claims arising out of Iran's seizure during the 1978-79 revolution of Amoco's oil development and production and chemical facilities. Offsetting were provisions for future environmental remediation costs of $477 million and unfavorable foreign currency effects of $22 million. After excluding the impact of special factors, adjusted quarterly earnings were $407 million, compared with

adjusted quarterly earnings of $533 million for the second quarter of last year.

Revenues for this quarter were $7.4 billion, an increase of 9 percent over the $6.8 billion reported in the corresponding 1989 period, reflecting the gain on the Iran settlement.

In commenting on comparative adjusted earnings, Richard M. Morrow, chairman and chief executive officer, said, "Refining, marketing, and transportation operations improved considerably in the second quarter and exceeded year-earlier levels, primarily on the strength of higher margins." He noted, however, that earnings from exploration and production activities declined from the level achieved in the second quarter of 1989, due to lower prices and volumes, unfavorable foreign currency effects, and higher exploration expenses. Chemical earnings also declined, mainly reflecting lower olefins margins.

For the first six months of 1990, earnings were $845 million compared with the $955 million earned during the first six months of 1989. 1990 earnings reflected the gain on the Iran settlement, provisions for future environmental remediation costs of $500 million, and unfavorable foreign currency effects of $28 million. After excluding the impact of special factors, adjusted first half earnings were $902 million. 1989 earnings were adversely affected by special charges aggregating $93 million, including $57 million associated with consolidation of exploration and production activities. On a per-share basis, earnings were $1.66 versus $1.85 per share for the first six months of 1989. Year-to-date revenues, including the gain on the Iran settlement, were $14.5 billion, 9 percent higher than the first-half 1989 level of $13.3 billion.

For the 12 months ended June 30, 1990, return on average shareholders' equity was 10.9 percent while return on average capital employed was 9.5 percent. For the 12 months ended June 30, 1989, return on average shareholders' equity was 14.2 percent and return on average capital employed was 11.6 percent.

Worldwide capital and exploration expenditures in the first six months of 1990 totaled approximately $1.4 billion, 5 percent higher than the prior year level. Amoco previously announced a capital and exploration expenditure budget of $3.95 billion for the full-year 1990.

Domestic exploration and production operations earned $82 million in the second quarter of 1990, down from the $143 million earned in the corresponding 1989 period. The decrease primarily reflected lower prices and volumes for both crude oil and natural gas.

Foreign exploration and production earnings in the second quarter totaled $387 million, including $439 million associated with the Iran settlement.

Excluding the impact of the settlement, foreign operations incurred a loss of $52 million, compared with earnings of $42 million reported for the second quarter of 1989. The decline resulted primarily from lower crude oil prices, higher exploration expenses, and unfavorable currency effects.

Worldwide refining, marketing, and transportation activities reported a loss of $125 million in the second quarter of 1990. Included in the current quarter results were provisions for future environmental remediation costs of $417 million. Exclusive of that amount, earnings were $292 million in the second quarter of 1990, compared with $213 million in the same period last year, reflecting higher refined product margins and sales volumes.

NEW YORK (JULY 23) PR NEWSWIRE - The Global Government Plus Fund (NYSE: GOV) today issued the following monthly update for July:

Distribution Information:	Amount	Payable Date	Record Date	Declaration Date
$0.20	July 13, 1990	June 29, 1990	June 14, 1990	

Investment Adviser Commentary: -- The global bond market performed well in June with all markets except Japan, posting solid gains. The U.K. gilt market was the top performer with more than a 7 percent return for the month.

-- Economic indicators released during the month point to further sluggish economic growth in the United States and Canada, but strong abroad. The Japanese economy grew at a staggering 10 percent annual rate during the first quarter, prompting the bank of Japan to tighten monetary policy in June. This led to a sell off in Japan's government bond market, but a positive development for the Japanese Yen.

-- The overall strategy remains to overweight in European bonds and currencies as compared to the Salomon Brothers World Bond Index.

-- While neutral on North American bonds as a whole, the fund increased its exposure to Canada due to the dramatic yield advantage there over the U.S. The fund's U.S. position has declined because interest rates there are among the lowest in the world.

Portfolio Databank (As of June 29, 1990): -- Average Bond Quality: AAA/Government -- Average Yield to Maturity: 9.2 percent -- Average Maturity: 11.5 years

Country	Percent of Portfolio	Percent Including Currency Hedges
Canada	14.8 percent	11.6 percent
Denmark	1.4 percent	1.4 percent
France	5.9 percent	6.7 percent
Germany	0.0 percent	7.2 percent
Ireland	2.0 percent	0.0 percent
Japan	13.7 percent	18.7 percent
Netherlands	10.3 percent	10.3 percent
Norway	1.3 percent	1.3 percent
United Kingdom	10.8 percent	12.5 percent
United States	39.8 percent	30.3 percent
Total	100.0 percent	100.0 percent

Performance Update

	June 29	May 31	April 30

NEW YORK (JULY 23) PR NEWSWIRE - Renault Vehicules Industriels S.A. (RVI) a wholly owned subsidiary of Regie Nationale des Usines Renault, today announced that it had been advised that Mack Financial Corporation (MFC) has received an extension of the maturity to July 25, 1990, of its revolving credit agreement that was previously scheduled to expire on July 20, 1990.

However, Mack Trucks, Inc. (NASDAQ: MACK) failed to receive prior to July 20, 1990, the extension of the maturity of the MFC revolving credit agreement to Dec. 31, 1990, and certain waivers from lenders to Mack and its subsidiaries through that date.

As a result, one of the conditions to the tender offer that has been made by ITM Acquisition Corp. (ITM), an indirect wholly owned subsidiary of RVI to purchase all outstanding shares of common stock of Mack not beneficially owned directly or indirectly by RVI, at $6 per share, net to the seller in cash, can no longer be satisfied.

Mack has advised RVI that discussions with its lenders and certain of the lenders to Mack's subsidiaries are continuing. RVI is following these discussions closely and will await their outcome before taking any action on the alternatives available to it.

ITM's offer is scheduled to expire at midnight, New York time, on Wednesday, Aug. 8, 1990.

HARRISBURG, PA (JULY 23) PR NEWSWIRE - Dauphin Deposit Corp. (NASDAQ: DAPN) announced today that its board had acted to opt out of certain provisions of Act 36 of 1990 of the Pennsylvania General Assembly, generally known as the Pennsylvania Takeover Act of 1990.

As authorized by the act, the board of Dauphin Deposit Corp. adopted a by-law amendment making inapplicable the provisions of the act dealing with control share acquisitions. Those provisions would prevent the voting of shares by a shareholder who acquires 20 percent or more of the

company's stock unless a majority of the other shareholders approve of such acquisition. The board said it believes that other existing provisions of the corporation's Articles of Incorporation, By-Laws and Shareholder Rights Plan, as well as other general provisions of the Pennsylvania Business Corporation Law, adequately protect the interests of its shareholders.

The corporation said it did not act to exclude itself from other provisions of Act 36 defining the fiduciary responsibility of the board or providing for disgorgement of profits by a shareholder who acquires 20 percent or more of the corporation's stock in certain circumstances. The board said it believes that its action is in the long-term best interests of its shareholders.

PITTSBURGH (JULY 23) PR NEWSWIRE - Cyclops Industries Inc.(NYSE: CYC) announced today that following an evaluation of its Cytemp Specialty Steel division, the company is realigning Cytemp's product lines on a facility and management basis.

According to Joseph J. Nowak, executive vice president-operations, the Cytemp operations at Titusville, Pa., under the direction of Cytemp President Alex Simkovich, will be dedicated primarily to high temperature bar and billet and precision-rolled products, principally for the aerospace market. The Bridgeville, Pa., operation will be called Bridgeville Stainless and Alloy Products, with Thomas D. Moore serving as president. Bridgeville will pursue semi-finished stainless sales, manufacture and market stainless long products, and produce tool steel plate. It will also provide melting and blooming mill conversion for outside customers. Current technology and quality assurance programs for both facilities will remain the responsibility of L.W. Lherbier, Cytemp vice president of technology.

Also as part of the realignment, Cytemp is phasing out its high temperature sheet business, which will result in the closing of its Pittsburgh plant during the last half of the year. In addition, Cytemp is seeking a buyer for its powder metals business.

"High temperature sheet has been a low volume product for some time," according to Nowak. "Moreover, we are adjusting the mix of our stainless long products to focus on more profitable markets."

Cyclops announced earlier this year that it was studying ways to improve the profitability of Cytemp, which has experienced operating losses for

the past several quarters, said Nowak. He said Cyclops also plans to realign certain carbon strip operations, which have had losses as well.

As a result of these realignments, Cyclops will record a one-time charge to earnings which it estmates will not exceed $16 million before income taxes, subject to final determination. This will result in a loss for the company for the second quarter and the first half of the year.

"In evaluating our strategy for these divisions," said Nowak, "we believe these moves are necessary in order to enable us to focus on those products having the greatest profit potential and eliminate loss operations."

ROCHESTER, N.Y. (JULY 23) PR NEWSWIRE - Rochester Telephone Corp. (NYSE: RTC) today reported consolidated net income of $11.3 million or $.42 per common share for the second quarter of 1990. This compares with net income of $14.4 million or $.54 per common share in the second quarter of 1989.

Total revenues and sales for the second quarter increased 1.7 percent over the corresponding period a year ago, reaching $142.2 million. Consolidated operating income was $25.8 million for the three months, down 10.2 percent from the comparable 1989 quarter.

For the first six months of the year, the company reported net income of $23.0 million or $.85 per common share, compared with $28.0 million or $1.05 per share in the first half of 1989.

Revenues for the six months reached $285.3 million, up 3.5 percent over the first six months of 1989. Consolidated operating income was $52.1 million for the period, down 6.7 percent from the first half of 1989.

Alan C. Hasselwander, president and chief executive officer, said the company's results in the second quarter and first half of the year were affected primarily by higher depreciation costs in the Telephone Group and lower than anticipated revenues form deregulated products and services.

"Results were also impacted by higher interest expense compared to the same periods in 1989," Hasselwander said. Interest expense was $15.3 million in the first half of 1990, up $2.1 million or 16.0 percent over the first six months of 1989.

Revenues in the Telephone Group were $96.2 million in the second quarter and $190.2 million in the first six months of 1990, up 5.0 percent and 6.6 percent, respectively, over the comparable periods of 1989. Local service revenues rose $5.2 million in the first half of 1990, largely as a result of the Rochester company's rate case, which became effective Jan. 3 1990. Toll revenues and miscellaneous income were also up for both periods.

The rate case also resulted in significantly increased depreciation expense, which was up $3.0 million in the second quarter and $6.7 million for the first six months over the corresponding periods last year.

#90204p7648 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - The High Yield Income Fund, Inc. (NYSE: HYI) today issued the following monthly update for July:

Distribution Information:

Amount	Payable Date	Record Date	Declaration Date
$.085	July 13, 1990	June 27, 1990	June 21, 1990

Investment Adviser Commentary:

-- The high yield market continued to show promise during late June and early July. Prices on the most liquid and widely traded issues increased about one point during June. A positive market trend has emerged even though strong rallies have been short-lived due to profit taking and lack of market liquidity.

-- Three major factors have contributed to the market's positive tone.

First, demand for high yield bonds is higher. New buyers, such as equity funds, have entered the market seeking undervalued bonds. High yield mutual funds have also seen net cash inflows over the past couple of months. Secondly, there is less concern over supply as new issue volume has remained low, and fears of a rapid insurance industry sell-off have subsided. Finally, RJR began a $5.3 billion effort to reshape its balance sheet.

-- The High Yield Income Fund, Inc. purchased $1 million of Ferrell Gas, a natural gas distributor that is a very stable, non-cyclical credit. The fund also purchased $500,000 of RJR Nabisco.

General Overview:
The High Yield Income Fund, Inc. is a closed-end management investment company whose primary investment objective is to maximize current income to shareholders. The fund will attempt to achieve this objective primarily through investment in a diversified portfolio of high-yield, fixed-income securities.

STAMFORD, CT (JULY 23) PR NEWSWIRE - Young & Rubicam Inc. has been named to handle Xerox Corporation's (NYSE: XRX) multi-million dollar corporate and product advertising account in the United States, Xerox announced today.

The move to New York-based Young & Rubicam is part of a marketing strategy calling for more integration between corporate and product campaigns throughout the world, the company said. Young & Rubicam has been the agency for most of the advertising in Europe of Rank Xerox Ltd., a majority-owned joint venture, for more than 20 years.

Backer Spielvogel Bates Worldwide has handled Xerox advertising in the U.S. since 1986. Xerox said it enjoyed a close relationship with BSB and values the work it has produced, but the need for a more integrated worldwide approach has resulted in this change.

Direct marketing assignments, which have been with Lowe Direct in the U.S. and Ogilvy & Mather Direct in Europe, will continue with those agencies.

It is expected that the first work produced by Young & Rubicam for Xerox will begin to appear in September. Details of Y&R's plans were not revealed.

WORCESTER, MA (JULY 23) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX) today reported second-quarter 1990 revenues of $2,536,642, compared to revenues for the first quarter of 1990 of $2,043,340. Revenues for the preceding quarter ended Dec. 31, 1989, were $1,864,559.

The results from ongoing operations show a continuing trend of decreasing losses from 27 cents per share for the quarter ended Dec. 31, 1989, to 23 cents per share for the quarter ended March 31, 1990, to 19 cents per share for the quarter ended June 30, 1990.

However, the total losses for the second quarter ended June 30, 1990, are increased by $1.5 million of one-time charges, primarily connected with the pending merger with Biotech Research Laboratories (NASDAQ: BTRL) scheduled for shareholder approval in early September 1990, with a closing to occur soon thereafter.

Commenting on the operational results, Patrick J. Leonard, Cambridge BioScience president, said, "We are pleased with the steady growth of our revenues for the past three quarters, as well as the resulting reduction in loss per share from ongoing operations. We continue to emphasize the objective of management is to increase our revenues, control our costs and reduce our losses, with achieving profitability in an orderly manner being our ultimate objective. Our results reinforce our dedication to that objective."

Dr. Leonard further commented, "Our recently announced agreement with Ortho Diagnostics for the marketing of our high volume HIV product, coupled with our recent European manufacturing announcement, are indicative of the efforts towards our goal of profitability for Cambridge BioScience at an early date."

Cambridge BioScience Corporation is a leader in recombinant technology, which it utilizes in the development and production of antigens, adjuvants and monoclonal antibodies, as the basis for its product lines of diagnostics, vaccines and therapeutics for humans and animals.

MOUNTAIN VIEW, CA (JULY 23) PR NEWSWIRE - Genus Inc. (NASDAQ: GGNS) today announced financial results for the second quarter of 1990 which ended on June 30. Genus recorded net sales of $9.7 million, down 54 percent from sales of the corresponding period in 1989 during which sales reached $21.3 million. Net loss for the quarter was $4.5 million which represents a decrease of 275 percent from net income reported for the second quarter of 1989. Net loss per share for the quarter was $0.40, compared to net income per share of $0.26 for the same quarter of 1989. For the first six months of 1990, sales were $30.9 million, net loss was $4.3 million, and net loss per share was $0.39. These results are compared to sales of $38.9 million, net income of $4.7 million, and net income per share of $0.49 for the six months of 1989. These results are consistent with the company's previously released expectations for second quarter of 1990.

Genus is the leading producer of semiconductor equipment of front end production equipment for tungsten CVD and high energy ion implantation. Genus' products are used in the fabrication of advanced semiconductor integrated circuits by major semiconductor manufacturers around the world.

NEW YORK (JULY 23) PR NEWSWIRE - The Kingdom of Spain today priced its first ever underwritten Yankee bond issue. The public offering consists of $300 million 9 1/8 percent notes due Aug. 1, 2000, and was lead-managed

by Morgan Stanley & Co. Incorporated. The co-managers of the offering were the First Boston Corporation, Goldman, Sachs & Co. and Merrill Lynch Capital Markets.

The notes were priced at 100 percent to yield 9.125 percent, 65 basis points greater than the 10-year U.S. Treasury (8-7/8 percent due 2000).

The offering follows the successful introduction of the kingdom's commercial paper program in 1985 and its medium-term note program in 1988. The kingdom's current existing debt is rated Aa2 by Moody's and AA by Standard and Poor's.

The net proceeds from the issue will be used for repayment of existing indebtedness of Spain or for financing general budgetary expenditures.

A prospectus relating to the offering of the notes may be obtained from the Prospectus Department, Morgan Stanley & Co. Incorporated, 1251 Avenue of the Americas, New York, NY 10020.

CAMBRIDGE, MA (JULY 23) PR NEWSWIRE - Index Technology Corporation (NASDAQ:INDX), a leading developer of computer-aided software engineering

(CASE) products for systems analysis and design, today reported record revenues for the quarter ended June 30, 1990 of $13,240,000, up 41 percent from revenues of $9,366,000 for the corresponding period of 1989.

Net income for the quarter was $494,000, or 10 cents per share, based on 4,844,000 weighted average shares outstanding, compared with net income of $609,000, or 13 cents per share based on 4,587,000 weighted average shares outstanding, for the same period a year ago.

For the six months ended June 30, 1990, net income totaled $961,000, or 20 cents per share, compared to $1,223,000 or 27 cents per share, for the comparable period last year. Revenues for the six month period were $24,399,000, compared to $17,504,000 for the first six months of 1989.

"The financial results marked a record revenue quarter for Index Technology," said Dr. Fred L. Luconi, president and chief operating officer of Index Technology. "We experienced increased domestic sales via our Business Partnership with IBM and improved performance from international operations, particularly in the U. K., West Germany, Australia and Japan. Our net income reflects costs associated with development of new products to be announced during the second half of the year and expenses involved with the continued expansion of the sales staff and our marketing programs."

A highlight of the quarter included the largest single shipment of product in Index Technology's history and an additional nonrecurring fee of $500,000 from IBM to license certain technology of the company.

Also in the quarter, the company continued to strengthen its management team with the addition of Stephen F. Wright as senior vice president, field operations. Wright has responsibility for the company's worldwide sales and support organizations.

Index Technology's Excelerator Series is the most widely used systems analysis and design CASE product, with an installed base of more than 24,000 copies. The company, founded in 1983, markets its products from its Cambridge, Mass. headquarters, from field sales and support offices throughout the U.S. and Canada, through subsidiaries in the U.K., France, West Germany and Australia, and through third-party distributors, providing coverage in approximately 40 countries worldwide.

DETROIT (JULY 23) PR NEWSWIRE - Gail L. Warden, president and chief executive officer of Henry Ford Health System in Detroit, was appointed to the board of directors of Manufacturers National Corporation (OTC: MNTL) and to the board of its principal banking subsidiary, Manufacturers National Bank of Detroit, on Friday, July 20.

Warden, 52, has been president and chief executive of HFHS, one of the nation's leading health-care corporations, since April 1988. Prior to joining HFHS, he was president and chief executive of Group Health Cooperative of Puget Sound in Seattle (1981-88), executive vice president of the American Hospital Association in Chicago (1976-81), and executive vice president and chief operations officer of Rush- Presbyterian-St. Luke's Medical Center in Chicago (1965-76).

He holds a bachelor of arts degree from Dartmouth College and a master of hospital administration degree from the University of Michigan.

Manufacturers National Corporation is a major regional bank holding company headquartered in Detroit. It operates four subsidiary banks in Michigan and seven banks in the metropolitan Chicago area through its subsidiary, Affiliated Banc Group, Inc. The corporation also operates other financial subsidiaries in Delaware, Florida, Illinois and Michigan. Manufacturers reported total assets of $11.2 billion at June 30, 1990.

ELK GROVE VILLAGE, IL (JULY 23) PR NEWSWIRE - Pre Finish Metals Inc. (PFM), a Material Sciences Corp. subsidiary based here, announced it has signed a distribution and sales agreement for its Polycore Composites(R), noise damping laminate products, with NHK International Corp., based in Schaumburg, Ill., and NHK Sales Co. Ltd., Tokyo. Both NHK firms, subsidiaries of NHK Spring Co. Ltd., Yokohama, Japan, will sell and distribute Polycore Composites products throughout the Far East.

"We are extremely pleased with the NHK agreement and look forward to introducing Polycore Composites' noise-damping properties through NHK's distribution channels, starting immediately," says Robert J. Mataya, vice president, PFM business development and planning.

PFM is a world leader in the manufacturing of noise-damping metal laminates and composites, which are increasingly being used by the automotive industry to reduce noise and vibration from brake shoes, engines, transmissions and body panels.

NHK Spring Co. Ltd., Japan's leading manufacturer of suspension systems and seating components for the automotive industry, plans to sell and distribute PFM's Polycore Composites entire line on an exclusive basis in Japan and on a non-exclusive basis in other countries in the Far East.

In addition, NHK will assist in the sales of Polycore Composites to the Japanese automotive transplant companies in the United States.

"The NHK agreement is PFM's second licensing agreement abroad in a little over a year and complements our strategic plan to expand the distribution of Polycore Composites on a global basis," Mataya said. PFM signed a Polycore Composites licensing agreement with Tyssen Stahl A.G., Germany's largest steel manufacturer, in April 1989.

SAN DIEGO (JULY 23) PR NEWSWIRE - Unaudited earnings per common share for the second quarter ending June 30, 1990, were 83 cents compared to 72 cents for the same period last year, Thomas A. Page, San Diego Gas & Electric (NYSE: SDO) chairman of the board, president and chief executive officer, announced today.

The 11-cent increase in earnings for the second quarter was due primarily to diversification activities. Wahlco Environmental Systems Inc. (WES) (NYSE: WAL), a newly formed holding company within SDG&E's subsidiary, Pacific Diversified Capital (PDC), raised about $38 million in an initial common stock offering, and PDC sold one of its companies, Mock Resources Inc. The gain from the WES offering was partially offset by the loss on the sale of Mock Resources.

Earnings applicable to common shares increased 14.4 percent to $46.2 million compared to $40.4 million for the same quarter last year.

Consolidated operating revenues and expenses for all periods presented have been restated to exclude Mock Resources' operations. For the quarter consolidated operating revenues are up 3.3 percent to $403.3 million compared to $390.6 million in 1989. Consolidated operating expenses also were up 4.3 percent to $337.5 million compared to $323.7 million.

For the 12 months ending June 30, 1990, earnings per share were up 22.8 percent to $3.61 compared to $2.94 for the same period in 1989. This increase was due primarily to the impact of the Public Utilities Commission's disallowance related to the Southwest Powerlink in 1989 and the WES offering in 1990.

CHARLOTTE, N.C. (JULY 23) PR NEWSWIRE - NCNB Corporation (NYSE: NCB) said today it has entered into an agreement for the underwritten public offering of $200 million in 25-year subordinated notes.

The debt issue is the final portion of a $600 million shelf registration for corporate debt filed last year with the Securities and Exchange Commission.

The 25-year, non-callable notes have a coupon interest rate of 10.20 percent. The notes qualify as Tier 2 capital under the Federal Reserve Board's Capital Guidelines.

The underwriting syndicate is co-managed by Merrill Lynch Capital Markets; Goldman, Sachs & Co., and Salomon Brothers Inc. Closing is scheduled for July 31, 1990.

Proceeds from the debt issue will be used for general corporate purposes, possible additions to working capital and possible acquisition of other financial institutions.

NCNB is the seventh largest banking institution in the U.S. with more than $66 billion in assets and full-service banks in seven states.

#90204p7683 07/23/1990 ~PR Newswire

DETROIT (JULY 23) PR NEWSWIRE - UAW Vice President Ernest Lofton and UAW Region 9 Director Thomas Fricano responded favorably to a settlement between the Occupational Safety and Health Administration (OSHA) and Ford Motor Company (NYSE: F) intended to improve health and safety conditions at the Ford electronics plant in Lansdale, Pa.

Lofton, who is director of the UAW National Ford Department, and Fricano, whose UAW region covers UAW Local 1695 which represents the 2,000 workers at the facility, said the settlement "marks a major step forward in removing workplace hazards faced by UAW members."

The settlement was announced today in Washington, D.C., by the federal OSHA office. Among its provisions is a national abatement agreement for ergonomics, signed jointly by OSHA, Ford and the UAW. That agreement will assure UAW members at the Lansdale facility of coverage under, and participation in, a national joint UAW-Ford ergonomics program which the Union negotiated and launched under the 1987-90 UAW-Ford National Agreement. The Lansdale facility, which makes auto radios and other electronic items, is not covered by the national agreement. The UAW-negotiated joint ergonomics program, which is called "Fitting Jobs to People," will now be carried out in all Ford manufacturing, assembly and warehouse facilities. Ergonomics is the science of safe job design.

Other provisions of the settlement included a $1.2 million penalty against Ford, based on OSHA citations for record-keeping, repeated trauma, and unsafe lifting at the Lansdale plant.

Lofton said, "It's good news for workers that this agreement recognizes that Ford can meet its legal obligations by extending and carrying out the UAW-Ford ergonomics program which our Union negotiated in 1987." The program specifies that workers and the Union will have full input into analysis of jobs for hazards, designing "fixes," and seeing that the modified jobs are safe. The OSHA-supervised agreement requires Ford to complete the first phase of the program nationally in three years.

"The $1.2 million fine which Ford is paying for not having reported injuries and illnesses at the plant is an appropriate penalty," Lofton said. "Complete injury and illness reports are absolutely essential to preventing future harm to workers. We hope that OSHA will apply this same enforcement to other employers as well."

Fricano said, "The abatement agreement results in large measure from the efforts of the members and officers of UAW Local 1695 and the long- term commitment of UAW Region 9 and the International Union to policing health and safety problems. We in Region 9 have put major emphasis on training local UAW representatives to deal with plant hazards and on political action to support strong health and safety laws and enforcement."
Fricano noted that Local 1695 representatives cooperated with the OSHA inspections which confirmed the ergonomics and record- keeping problems.

LONG BEACH, CALIF. (JULY 23) PR NEWSWIRE - The McDonnell Douglas (NYSE: MD) MD-80 twin-jet reached another milestone July 20 when the company delivered the 750th aircraft in its family of short to medium range airliners.

The milestone aircraft, an MD-81, was delivered to Japan Air System. It was the 20th MD-80 to join Japan Air System's fleet since the airline took delivery of its first MD-80 in 1981.

The first MD-80s were delivered in September 1980 to Swissair and Austrian Airlines, the plane's launch customers. Since then the twin-jet family of aircraft has been in service with more than 50 different domestic and international operators.

The MD-80 has flown more than 3.1 billion miles and has carried more than 500 million passengers since it entered commercial service.

The quiet and fuel-efficient MD-80 is available in five versions, offering customers different range capabilities. Comfortable five-across seating makes the plane a popular choice of airlines and passengers alike.

McDonnell Douglas transport aircraft are assembled at its Douglas Aircraft division facility here.

The division is also assembling the MD-11, the company's newest wide-cabin tri-jet, at the Long Beach plant. Four MD-11s are currently in FAA certification testing. McDonnell Douglas expects FAA certification in the fourth quarter of this year, with first deliveries to customers shortly after that.

#90204p7693 07/23/1990 ~PR Newswire
NEW YORK (JULY 23) PR NEWSWIRE - Avery, Inc. (NASDAQ: AVRY) announced today that Nelson Peltz and Peter W. May, the company's controlling stockholders and its chairman and chief executive officer and president and chief operating officer, respectively, have proposed to the company a transaction in which they would acquire the 17 percent of the shares of the company's common stock not presently owned by them for 35 cents per share in cash. The proposed transaction would be accomplished by a merger into Avery of a newly formed company owned entirely by Peltz and May.

In proposing the transaction to the board of directors, Peltz and May noted that in order to comply with the Investment Company Act of 1940, the company, by Oct. 31, 1990, would either have to complete an acquisition of an operating business or sell its entire current portfolio of securities and reinvest the proceeds in government securities. They noted that an acquisition was unlikely in light of Avery's limited resources, and that selling the securities portfolio would force the company to sell illiquid securities at depressed prices, eroding shareholder value. Peltz and May also cited the company's lack of any operating business and the cost of continuing as a public company as factors underlying their proposal. Peltz and May also noted that although the 35 cents per share offered by them was below recent market prices, such price exceeds the book value of 23 cents per share.

A committee of directors, which is composed of all of the directors other than Peltz and May, has been appointed to consider and make recommendations with respect to the proposed transaction and alternatives to it, including liquidation and the continued search for a suitable acquisition.

Should the committee of directors recommend that the company proceed with the proposed transaction with Peltz and May, it would be subject to the satisfaction of various conditions, including the receipt of requisite regulatory approvals, the negotiation and execution of definitive agreements and the approval of Avery stockholders.

ROCKY MOUNT, NC (JULY 23) PR NEWSWIRE - William E. Prather, Jr., President and Chief Executive Officer of Hardee's Food Systems, Inc., today announced that, following an extensive re-examination of the company's soft drink service needs, the decision has been made to remain with Coca-Cola as its major soft drink supplier.

Commenting on the announcement Mr. Prather stated, "In the course of making decisions relative to Hardee's strategic positioning for the nineties, it became apparent that we should re-examine our cola soft drink program to ensure that the products and service were in line with the direction of the Company. Coca-Cola and other major soft drink vendors were evaluated based on how each envisioned their brands lending long-term value to the growing Hardee's trademark."

Mr. Prather went on to state that the decision to remain with Coke was influenced by the fact that the two companies shared considerable marketing and operating efficiencies and have enjoyed several successful joint marketing efforts, such as the Days of Thunder promotion which is currently ongoing in Hardee's restaurants. Further, the two companies have worked in conjunction to develop high-tech automation, such as a new automated drink dispensing system. He also mentioned that Dr. Pepper was unaffected by the decision and would remain a strong presence on Hardee's menu.

"In the final analysis it was clear that our strategic business direction would be best served by continuing our long-term relationship with Coca-Cola," he concluded.

Hardee's Food Systems, Inc. the world's third largest fast food hamburger chain, operates a combined system of 4,000 restaurants in 41 states and nine foreign countries.

#90204p7707 07/23/1990 ~PR Newswire

CINCINNATI (JULY 23) PR NEWSWIRE - Eagle-Picher Industries, Inc. (NYSE: EPI) announced today that it had filed a motion in the U.S. District Courts for the Southern and Eastern Districts of New York seeking the certification of a nationwide class action consisting of all asbestos-related personal injury claims.

Class certification is appropriate in order to avoid the needless expenditure of tens of millions of dollars to relitigate the same issues in case after case, thus making these dollars available to satisfy meritorious claims. Class certification also minimizes the risk that the resources available to compensate deserving claimants will be insufficient.

The application has been made to Judge Weinstein in the special Joint Asbestos Litigation in the Eastern and Southern Districts because that Court now has jurisdiction over all matters arising out of the reorganization proceedings of Johns-Manville Corporation, and a full and

proper resolution of the asbestos litigation will require the participation of the Manville Personal Injury Trust which was created in those proceedings.

That court also is experienced in and has been successful in managing and resolving complex personal injury litigation such as that involving Agent Orange.

Eagle-Picher believes that certification of a class action will increase the likelihood of achieving a negotiated nationwide resolution of present and future claims.

It also believes that a class action is more likely to take into account the real damages suffered by the claimants and the ability of the defendants to make payments over time without destroying the viability of their businesses.

The company recognizes, however, that if an equitable settlement is not reached, class certification could result in an accelerated disposition of claims. The consequences of such acceleration and the accompanying liability are uncertain at this time.

HOUSTON (JULY 23) PR NEWSWIRE - Republic Waste Industries Inc. (NASDAQ: RWIN) announced today that it has signed a letter of agreement to acquire MALS Properties, a California general partnership, and El Centro Sanitation Co. Inc., a California corporation, in a transaction involving an exchange of stock and the purchase of assets. Included in the acquisition are two collection companies and a 160-acre landfill with 120 permitted acres located in the San Diego market area. All operations are located in the Imperial Valley area. The announcement was made by James D. Lee, president of Republic, who said, "California is very important to Republic's long-term growth design. The acquisition of MALS and El Centro will greatly complement the companies we have acquired in Southern California over the past four weeks and should enhance both our strategic growth and profit potential in this region."

Republic has announced contracts to acquire several other California solid waste companies. In addition to MALS and El Centro, Republic recently announced plans to acquire Art's Disposal Service Inc. of Montebello, G.I. Industries of Simi Valley, and Anderson Solid Waste Inc., a landfill company in Northern California.

The transaction is subject to execution of a definitive agreement,

completion of due diligence, and approval by Republic's board of directors.

Republic Waste Industries Inc., is a Houston-based company specializing in the collection, processing, and disposal of solid waste. The company's common stock is traded over-the-counter under the NASDAQ symbol RWIN.

#90204p7717 07/23/1990 ~PR Newswire

HIGHLAND PARK, MI (JULY 23) PR NEWSWIRE - Chrysler Corporation (NYSE: C) announced today it will introduce new low-price "America" versions of its 1991 model Plymouth Sundance/Dodge Shadow compact cars.

Chrysler expects that these Sundance America and Shadow America cars will be the lowest-priced air bag-equipped '91 models in the United States.

The tentative Manufacturer's Suggested Retail Price for the America models is $7,599 for the two-door liftback model and $7,799 for the four-door liftback.

These low prices are a $1,186 reduction from the lowest-priced 1990 Sundance/Shadow two-door and four-door models.

The America models will be well-equipped with such standard features as Chrysler's fuel-efficient, electronic fuel-injected 2.2-liter engine, 5-speed manual transaxle, power steering, power brakes and driver's side air bag.

"American buyers should be able to buy an affordable and well- equipped U.S.-built car with a standard driver's side air bag," said Chrysler Chairman Lee A. Iacocca. "Our America models will provide that car for less than $7,600."

"The America models will be the best value in the low end of the market, bar none. This is what our 'Advantage: Chrysler' program is all about -- giving our customers outstanding value in products that take on the competition head-to-head and win."

The America models will offer a limited selection of options: automatic transmission, air conditioning and tinted glass, rear window defroster, radios, conventional spare and an upgrade package that contains radio, defroster, dual remote mirrors, convenience lights, floor mats and body side moldings.

The Sundance and Shadow also will be offered in a more extensively equipped highline model with a wider range of options. Dodge also is

introducing an all-new Shadow convertible. The only prices announced at this time are those for the America models.

Sundance and Shadow have been particularly popular with families and younger buyers. More than 600,000 Sundances and Shadows have been sold since they were introduced in 1987.

"Our 1991 pricing makes Shadow and Sundance even more appealing and puts an air bag-equipped new car within reach of a greater segment of the market," Iacocca said.

Shadow and Sundance are built on a 97-inch wheelbase and offer an estimated EPA fuel economy of 24 mpg city and 31 highway with the standard drive train, which is covered by Chrysler's exclusive seven-year/70,000-mile limited powertrain warranty.

DENVER (JULY 23) PR NEWSWIRE - Continental Express announced today its support of Cheyenne's Antique Carriage Restoration project. The airline is donating two round trip tickets on Continental Airlines, valid Mainland U.S., Mexico, or Canada, to the winner of a raffle held during the city's annual Frontier Day's celebration.

The raffle tickets, costing $1.00 each, will be sold from July 23 to July 29 at the Continental Express booth located in the Cheyenne Frontier Days exhibition hall. The proceeds of the raffle will be donated to the restoration project. The winner will be notified on Tuesday, July 31.

Continental Express is a sponsor of Cheyenne Frontier Days for the second year. In celebration, of the event, the airline's employees are wearing western style uniforms including Wrangler blue jeans, Continental Express western scarfs, boots, and cowboy hats. Don Smith, president of the western region, said, "We are pleased to support the local Cheyenne community through our sponsorship of Frontier Days and donation to the restoration project."

Continental Express currently operates 10 daily departures between Cheyenne and Denver utilizing the 19-passenger Beechcraft 1900 and the 48-passenger De havilland Dash 7. The airline serves eight destinations in Wyoming, making it the largest carrier in the state.

TAYLOR, MI (JULY 23) PR NEWSWIRE - Heritage Bankcorp, Inc. (NASDAQ: HEBC) today reported net income for the year ended June 30, 1990 was $3,250,000 compared with net income of $3,428,000 for the year ended June 30, 1989.

Earnings per share were $1.45, based upon historical earnings since the issuance of common stock (Aug. 10, 1990), and $1.56, based upon pro forma earnings as if the common shares were issued July 1, 1989. Net income for the quarterly period ended June 30, 1990 was $818,000, or $0.38 per share compared with $646,000 for the same period one year ago. Earnings per share for the year or the quarterly period ended June 30, 1989 are not reported as there were no common shares outstanding at that time.

E.G. Wilkinson Jr., president and chief executive officer, stated, "the current-year result includes additions to the allowance for possible loan and real estate losses of $1,825,000 which increased the allowance by $459,000 to $4,527,000 or 0.87 percent of total loans and real estate as of June 30, 1990." Total non-performing assets (non- accrual loans, loans of concern, and real estate) declined $1,618,000 during the year ended June 30, 1990 to $13,636,000 or 1.50 percent of total assets at June 30, 1990 as compared to 15,254,000 or 1.67 percent of total assets at June 30, 1989. During the year ended June 30, 1990, $1,366,000 of loans and real estate were charged off, net of recoveries. The charge-offs were primarily attributable to the purchased loan portfolio. The allowance for possible loan and real estate losses is 33.2 percent of non-performing assets at June 30, 1990 as compared to 26.7 percent at June 30, 1989.

Additionally, Wilkinson stated that "the Office of Thrift Supervision has recently made public comments referring to 'capital as king' and I am pleased to report that the company's subsidiary, Heritage Federal Savings Bank, exceeds all three fully phased in regulatory capital requirements." Heritage Federal Savings Bank's capital levels are: tangible 4.6 percent, core 5.6 percent, and risk-based 12.8 percent.

In concluding comments, Wilkinson emphasized "consistent core earnings and a high level of allowance for possible loan and real estate losses to non-performing assets, combined with a strong and growing capital base, continue to be the strengths of our company."

Heritage Bankcorp, Inc. is the holding company for Heritage Federal Savings Bank of Taylor. Heritage Federal Savings Bank serves southeastern and northern Michigan through its home office and 45 full- service branch offices. Heritage Bankcorp, Inc. is quoted on the NASDAQ National Market System under the symbol HEBC.

#90204p7729 07/23/1990 ~PR Newswire

CHICAGO (JULY 23) PR NEWSWIRE - Montgomery Ward & Co., Incorporated, and Thrifty Car Rental have begun testing the viability of offering car rental services to the retailer's customer base in selected markets.

The test agreement with Thrifty, North America's fifth largest car rental company and a subsidiary of Chrysler Corp. (NYSE: C), consists of two parts: the establishing of Thrifty rental offices in selected Montgomery Ward stores; and accepting the Montgomery Ward credit card at all 24 Washington-area Thrifty rental locations. They will be identified as Thrifty Car Rental/Montgomery Ward. The agreement calls for as many as 20 rental offices in 15 cities to open by the end of 1990.

Bernard F. Brennan, chairman and chief executive officer of Montgomery Ward, said of the agreement: "We are excited about the potential benefits of our test arrangement with Thrifty. The arrangement will enable us to offer our customer base one of the nation's best car rental values and should bring new customers into our stores at the same time. For Thrifty, it is a great opportunity to market their services to our customers and to expand their suburban market."

"We're very enthusiastic about the Montgomery Ward program," said Thrifty President Jim Philion. "It fits extremely well into our continued strategy to keep the local car rental market as a major component of our business mix, complementing our airport market growth." The U.S. suburban car rental market is estimated to be more than $2 billion annually and growing at 12 percent a year.

According to Brennan, Thrifty rental offices to be opened this year include stores in Baltimore; Washington; Sacramento, Calif.; Tampa/St. Petersburg, Fla.; and Denver. Thrifty currently is operating in five Montgomery Ward stores - Laurel and Gaithersburg, Md.; Davenport, Iowa; Sacramento, Calif. (Florin Road); and Canton, Ohio.

In the second phase of the test agreement, all 24 of the Washington- area Thrifty offices will accept the private label Montgomery Ward credit card in addition to other credit cards already accepted. This component takes effect Aug. 1.

In conjunction with this activity, Thrifty will add the Montgomery Ward name to select Washington exterior signage and its rental agreements. Additionally, some Thrifty print advertising will carry the Montgomery Ward name and the program's tag line will be added to some of both companies' Washington radio advertising this fall.

Montgomery Ward is a chain of value-driven specialty stores with 336 stores in 19 states. The company focuses on four basic specialty categories: Home Ideas (home furnishings and accessories); Electric Avenue (home electronics and appliances); The Apparel Store (includes The Kids Store and Gold 'N Gems fine jewelry); and Auto Express (tires, batteries, auto parts and service).

#90204p7736 07/23/1990 ~PR Newswire

HARRISBURG, PA (JULY 23) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) sales of $839.8 million for the first six months and $451.3 million for the second quarter of 1990 established new records for the company.

Net income of $35.0 million ($1.33 per share) for the first six months and $22.0 million ($.83 per share) for the second quarter of 1990 were substantially above the same periods in 1989 when significant loss provisions for certain defense contracts reduced income by $37.0 million ($1.41 per share) for the first six months and $34.1 million ($1.29 per share) for the second quarter.

First six month's sales for the Industrial Services and Building Products Group were $210.2 million, 7 percent below last year's performance for the same period. The Engineered Products Group had revenues of $276 million, slightly below 1989's first half results. The revenues in the Defense Group were $353.6 million, a 60 percent increase over the first six months of last year.

Operating income for the Industrial Services and Building Products Group for the first half of this year was $31.1 million, closely paralleling last year's performance. Engineered Products Group had operating income of $26.4 million for the period, a 17 percent advance in performance over the first six months of 1989. The Defense Group had operating income of $12 million as compared to a loss of $47.7 million for the same period in 1989 when pre-tax loss provisions of $58.6 million were recorded.

Second quarter sales for the Industrial Services and Building Products Group were $104.7 million, 11 percent below the $118.1 million recorded for 1989's second quarter reflecting the divestiture of a division within the Group in early 1990. The Engineered Products Group's revenues of $141.2 million were slightly ahead of last year's second quarter even though a division was sold in late 1989. The Defense Group had revenues of $205.4 million compared to $96.7 million for 1989's second quarter.

Operating income for the Industrial Services and Building Products Group was $15.8 million, below the $17.7 million recorded for last year's second quarter. Engineered Products had operating income of $15.1 million, a 46 percent advance over the $10.3 million posted for the same period last year. Operating income in the Defense Group was $9.2 million compared to a loss of $49.6 million recorded in last year's second quarter when pre-tax loss provisions of $54 million were recorded.

Malcolm W. Gambill, president and chief executive officer characterized the company's first half and second quarter performance as follows:

"These results indicate that our strategies for improving performance in the Defense Group and achieving growth in all sectors are sound. By continuing to focus on our business plan, we are confident shareholder value will be enhanced over the short and long-term."

Harsco Corp. is a diversified, international, industrial company headquartered in Camp Hill, Pa. The cvompany's 12 divisions provide products and services for defense, industrial, commercial and construction applications from more than 270 facilities in 32 states and 15 countries.

The interim report containing financial figures for the first half and second quarter will be mailed on or about Aug. 6. The Consolidated Statements of Income and the Review of Operations by Group follow:

VAN NUYS, CA (JULY 23) PR NEWSWIRE - Pinkerton's Inc. (NASDAQ: PKTN) continued to record substantial gains in its income from operations in the second quarter of 1990.

For the 12 weeks ended June 15, 1990, income before extraordinary item totaled $2,222,000, equal to 36 cents per share, compared with last year's net income for the period of $1,337,000, or 26 cents per share.

For the first half of 1990, income before extraordinary item totaled $3,001,000, equal to 53 cents per share, compared with $2,007,000, or 38 cents per share, one year earlier.

As previously announced and included in the prospectus, the early payment of senior and subordinated indebtedness resulted in an extraordinary non-recurring "non-cash" charge in the second quarter of 1990 which amounted to $2,796,000, or 47 cents per share, net of tax. The item principally represented the write-off of previously deferred financing fees associated with the repaid debt. After the extraordinary item, the net loss for the quarter was $574,000, equal to 11 cents per share.

Revenues for the second quarter were $134,114,000, compared with $140,007,000 in the corresponding quarter of 1989. One of the company's major objectives has been to enhance the quality and profitability of its portfolio by selectively eliminating, or renegotiating, marginal contracts. For example, second quarter revenues were reduced by $3.4 million due to the discontinuance of the New York Racing Authority contract as of Jan. 1, 1990.

After the previously mentioned non-recurring write-off, net income for the first 24 weeks of 1990 was $205,000, or one cent per share.

First half revenues were $267,627,000, compared with $279,022,000 in the prior year. The 1989 period included $6.5 million in revenues from the discontinued New York Racing Authority contract as well as from other contracts that were reduced or eliminated in the latter part of 1989.

TORONTO (JULY 23) PR NEWSWIRE - Fred T. Klinkhammer has been named president and chief executive officer and a member of the board of

directors of Imax Systems Corporation (ISC). ISC, the privately owned Canadian entertainment company, invented and has developed giant-screen IMAX(R) motion picture systems. The announcement was made today by ISC's Chairman, William A. Breukelman.

Klinkhammer, who announced his resignation as president and chief executive officer of First Choice Canadian Communications Corporation last week, will assume his new position on Sept. 1. He will report directly to ISC's board of directors.

Co-founder Graeme Ferguson, stepping aside from the presidency he has held since the company's inception 23 years ago, expressed the board's enthusiastic support for Klinkhammer's appointment.

Klinkhammer brings a rich background in broadcasting to his new role. Prior to his tenure at First Choice, which began in 1984, he was president and chief executive officer of Cablenet Limited and US Cablenet Inc., and vice president/general manager of Channel Seventy- nine (CITY-TV). He has also held management positions within Maclean Hunter and Procter & Gamble Inc. He is involved in the Academy of Canadian Cinema, the Canadian Film Institute and the Festival of Festivals. His significant contribution was recognized in 1989 with the Canadian Film and Television Association (CFA) Lifetime Achievement Award. Klinkhammer is also active with the Broadcast Executives Society, the Society of Management Accountants, the Canadian Power and Sail Squadrons and a number of service organizations.

Klinkhammer joins the company at an important phase of its growth, as evidenced by a number of initiatives announced for the 1990s. Last February ISC announced its plans to develop a new circuit of commercial IMAX theaters, in conjunction with key partners, in downtown city centers around the world. In April, ISC began to receive international publicity because of the new technologies unveiled at EXPO '90 in Osaka, Japan. In June, ISC and the National Geographic Society announced a new co-venture to produce IMAX films about natural history, exploration and peoples of the world. The dramatic growth of the company led to the decision to move its technology division to Sheridan Park, the research band development community in Mississauga, in 1991.

There are currently 68 permanent theaters operating in 15 countries; by 1992, there will be more than 100. Imax Systems Corporation has its corporate headquarters in Toronto and its technology facilities in Oakville, Canada, as well as offices and subsidiaries in Canada, the United States, Japan and Europe, with 350 employees worldwide.

CHICAGO (JULY 23) PR NEWSWIRE - The board of trustees of The Chicago Dock and Canal Trust (NASDAQ: DOCKS) declared a dividend of $.07 per share payable on Sept. 1, 1990, to shareholders of record as of Aug. 15, 1990.

This dividend compares to $.06 per share for the same period last year. The Chicago Dock and Canal Trust is a real estate investment trust engaged primarily in the business of acquiring and holding real estate and interests in real estate for investment. The trust, formed in 1962, is successor to The Chicago Dock and Canal Company, founded in 1857 by Chicago's first mayor, William Ogden. The trust's assets include ownership of a major interest in the Equitable Building and a substantial portion of the land at Cityfront Center, a major mixed-use development, both in Chicago. The trust also owns Kipling Plaza (a 90,000-square-foot shopping center in suburban Denver, Colo.), Lincoln Garden (a 73,000-square-foot office complex in Tampa, Fla.), Waterplace Park (a 107,000-square-foot office complex in Indianapolis, Ind.), and One Michigan Avenue (a 144,000 square-foot office building in Lansing, Mich.).

#90204p7750 07/23/1990 ~PR Newswire

CHICAGO (JULY 23) PR NEWSWIRE - The Chicago Dock and Canal Trust (NASDAQ: DOCKS), a publicly held real estate investment trust, today announced its income before property dispositions of $3,688,000, or $.64 per share, for the fiscal year ended April 30, 1990, compared to a loss of $453,000, or $.08 per share, in the prior year.

There was no gain from property dispositions in fiscal 1990. Income after property dispositions for the fiscal year ended April 30, 1989, was $3,380,000, or $.58 per share, including a gain from property dispositions of $3,833,000, or $.66 per share.

For the quarter ended April 30, 1990, the trust reported income before property dispositions of $1,381,000, or $.24 per share, compared to $272,000, or $.04 per share, for the same period in the prior year. There was no gain from property dispositions in the fourth quarter of fiscal 1990. Income after property dispositions for the quarter ended April 30, 1989, was $4,105,000, or $.70 per share, including gain from property dispositions of $3,833,000, or $.66 per share.

According to Charles R. Gardner, president of the Chicago Dock and Canal Trust, the significant increase in income compared to the same period in the prior year is primarily the result of the ground lease on which the

Sheraton Chicago Hotel & Towers is being built at the trust's principal holding, Cityfront Center in Chicago.

Cityfront Center is a 60-acre property located at the confluence of Lake Michigan and the Chicago River which the trust and the Chicago Dock and Canal Company have owned for more than 130 years. The trust is responsible for development of the approximately 40-acre eastern portion of Cityfront Center; Equitable Life Assurance Society is responsible for the development of the western portion. Construction has begun on the newest rental project, Cityfront Place, a 900-unit upscale complex located along the Chicago River Esplanade. North Pier Apartments, the 505-unit residential building located immediately east of North Pier Chicago, is nearing completion. Construction is also well under way on the 1,200-room Sheraton Hotel & Towers, located west of Cityfront Place. Phase I infrastructure is complete and construction has begun on Phase II infrastructure that includes development of Ogden Plaza, a one-acre park.

The Chicago Dock and Canal Trust is a real estate investment trust engaged primarily in the business of owning real estate and interests in real estate for investment. The trust, formed in 1962, is the successor to the Chicago Dock and Canal Co., founded in 1857 by Chicago's first mayor, William B. Ogden.

In addition to its interest in Cityfront Center, the trust's assets include ownership of a major interest in the Equitable Building in Chicago and Ownership of Kipling Plaza (a 90,000-square-foot shopping center in suburban Denver), Lincoln Garden (a 73,000-square-foot office complex in Tampa, Fla.), Waterplace Park (a 107,000-square-foot office complex in Indianapolis, Ind.), and One Michigan Avenue (a 144,000- square-foot office building in Lansing, Mich.).

#90204p7753 07/23/1990 ~PR Newswire

CHARLOTTE, NC (JULY 23) PR NEWSWIRE - Today, Datasouth Computer Corporation (NASDAQ-NMS: DSCC) announced a net loss totaling ($467,000) or ($.08) per share for the quarter ended June 30, 1990 compared to net income of $2,000 for the same period last year. Revenue for the second quarter totaled $3,301,000 representing a 23 percent decrease from the same period last year.

For the six months ended June 30, 1990, the net loss totaled ($541,000) or ($.09) per share compared to net income of $45,000 or $.01 per share in 1989. Revenue for the first six months in 1990 totaled $7,161,000, a 13 percent decrease from the same period in 1989.

"We are seeing a steady decline in our overall sales, particularly in the international and IBM compatible areas," commented Jim Busby, President of Datasouth. "Market conditions continue to be extremely competitive from both a pricing and performance standpoint. Our ability to resume our growth depends on the successful introduction of our forthcoming high speed printer line. While we do not expect any signficant revenue contribution from the new printer this year, we do believe it will represent an important step in strengthening our product line for the future."

Datasouth designs, manufactures, and markets heavy-duty printers used primarily with multiuser microcomputers, minicomputers and mainframe computers. The Company sells its products worldwide through distributors and systems integrators, and directly to large volume end users.

#90204p7754 07/23/1990 ~PR Newswire

OLYMPIA, WA (JULY 23) PR NEWSWIRE - The Washington Utilities and Transportation Commission (WUTC) has rejected a proposal from GTE Northwest Inc. (GTE-NW) aimed at providing an alternative to its current form of regulation, WUTC said today. In essence, the commission determined that GTE-NW did not demonstrate that the proposed alternative form of regulation would produce rates for telecommunications services that were "fair, just and reasonable" and therefore was not in the public interest.

GTE-NW submitted its proposal pursuant to a law enacted by the State Legislature in 1989. That law permits the commission to authorize an alternative form of regulation and "determine the manner and the extent of any alternative forms of regulation as may in the public interest be appropriate."

The law was designed to permit the commission to respond to changes in technology and the structure of the telecommunications industry. It permits the commission to consider alternative regulatory arrangements which "meet the varying circumstances of different companies and their ratepayers."

In determining the appropriateness of any proposed alternative form of regulation, the law requires the commission to consider public policy goals which would justify the reduced level of regulatory oversight sought by the petitioning telecommunications company. The commission order finds that GTE-NW failed to demonstrate that its proposal meets the statutory goals established by the state legislature.

The commission specifically noted in its order without an overall review of GTE-NW's revenue requirement, it could not decide whether the proposal would provide fair, just and reasonable rates for all ratepayers: "We believe that this is a threshold issue and, petitioner not having crossed it, discussion of the other elements is of little value." The commission order also faulted the GTE-NW proposal for its service modernization program: "The Commission expects GTE-NW to go forward with implementation of universal single party, touch tone service, and with the elimination of mileage charges, regardless of whether its proposed alternative form of regulation is approved."

The commission stated in its order that it encourages diversity in proposals for alternative forms of regulation and remains open to consideration of all petitions for alternative regulatory arrangements. "The Commission will continue to require, however, that petitioners clearly demonstrate that any such proposal meet statutory standards."

#90204p7760 07/23/1990 ~PR Newswire

NEW YORK (JULY 23) PR NEWSWIRE - LIN Broadcasting Corporation (NASDAQ: LINB) today announced that it has received bank commitments sufficient to complete its $2.1 billion financings. Proceeds of the financings will be used, in part, for the $1.05 billion in cash necessary to complete LIN's purchase of Metromedia Company's 46 percent direct and indirect interest

in Metro One, the New York non-wireline cellular system. As previously announced, LIN expects to complete this transaction in August.

In the first of two financings, LIN Cellular Network Inc., a newly created subsidiary of LIN, has received firm financing commitments exceeding $1.75 billion from 16 U.S. and foreign banks. Primary syndication is expected to close on July 24, 1990. The Bank of Nova Scotia, Barclays Bank PLC, Citibank, N.A., Morgan Guaranty Trust Company and the Toronto-Dominion Bank are serving jointly as co-arrangers for this financing.

In the second financing, LIN Television Corporation, a newly created subsidiary of LIN, has received a $350 million, fully underwritten financing commitment from the Bank of New York, the Toronto-Dominion Bank, Morgan Guaranty Trust Company, and Citibank, N.A.

In connection with the Metromedia transaction, LIN earlier announced that LCH Cellular, Inc., a newly created subsidiary of LIN, would issue $850 million of Class A redeemable preferred stock to Metromedia in addition to the cash consideration.

LIN Broadcasting Corporation is engaged in cellular telephone operations, television broadcasting and specialty publishing. The Company has major ownership interests in five cellular telephone systems serving the metropolitan areas of New York, Los Angeles, Philadelphia, Dallas-Ft. Worth and Houston, owns and operates seven network-affiliated television stations, and publishes advertiser-supported hardcover magazines placed in the rooms of distinguished hotels in 37 metropolitan areas.

#90204p7762 07/23/1990 ~PR Newswire

WATERBURY, Conn. (JULY 23) PR NEWSWIRE - Webster Financial Corporation (NASDAQ: WBST), holding company for First Federal Savings and Loan Association of Waterbury, reported net earnings of $806,000 or 23 cents per share for the second quarter ended June 30, 1990, compared to $1,212,000 or 34 cents per share during the same period in 1989, according to James C. Smith, president and chief executive officer. Second quarter earnings increased 33 percent from first quarter earnings of $608,000 or 17 cents per share. Earnings for the six months ended June 30, 1990 amounted to $1,414,000 or 40 cents per share compared to $2,420,000 or 68 cents per share for the same period last year.

Net interest income of $4,771,000 for the quarter increased $147,000 from a year earlier due to an improvement in the interest rate spread. Net

interest income was 1.5 times noninterest expense. Fees and service charges amounted to $548,000 in the quarter and $1,079,000 for the six month period, up 73 percent and 46 percent respectively from the same periods a year ago.

The corporation continues to build reserves for potential loan losses in consideration of the uncertainty of the region's economy. The provision for loan losses was $600,000 in the second quarter and amounted to $1.4 million for the six months ended June 30, 1990 compared to $83,000 and $143,000 for the comparable periods in 1989.

Nonperforming assets increased $4.7 million in the second quarter to $17.7 million or 2.50 percent of assets at June 30, due primarily to a subdivision land loan which became nonperforming in the second quarter and for which reserves, based on a recent independent appraisal, were previously provided. The allowance for loan losses at June 30, 1990 was $4.4 million or 25 percent of nonperforming assets.

Deposits increased $41 million or 8.7 percent to $511 million at June 30, 1990, from $470 million a year earlier. Loan originations in the quarter declined to $23 million compared to $31 million for the same period in 1989, due to lower demand for residential first mortgage loans.

Assets at June 30, 1990 totalled $708.6 million. Shareholders' equity of $69,233,000 resulted in a book value of $19.74 per share based on 3,507,459 shares of common stock outstanding. In recognition of the corporation's satisfactory earnings and strong financial condition, the board of directors declared a regular quarterly cash dividend of 13 cents per share. The dividend is payable Aug. 15, 1990 to shareholders of record on Aug. 3, 1990.

DALLAS (JULY 23) PR NEWSWIRE - Central and South West Corp. (NYSE: CSR) said today its Central and South West Services Inc., subsidiary will make seven organizational changes Sept. 1 as part of an overall corporate realignment.

Donald A. Shahan, 40, executive director of information services for CSWS, will be promoted to vice president of information services.

Shahan assumed his present position in 1989 after working previously for two Central and South West operating companies, Public Service Co. of Oklahoma and West Texas Utilities Co. At PSO he served as director of corporate planning and analysis from 1985 to 1988 and as director of

information services from 1988 to 1989. Previously, he worked for WTU as secretary and treasurer, in accounting and finance, in rates and regulatory affairs, and in system production.

Terry D. Dennis, 43, will become CSWS vice president of engineering. He currently is vice president of engineering for West Texas Utilities Co.

James A. Bruggeman, 41, CSWS vice president of system engineering, will become vice president of technical services. He will be responsible primarily for system capacity forecasting and fuel planning.

Bruggeman was named vice president of electric system planning and coordination in 1985 and was named to his present position in 1989. Before moving to CSWS in 1976, he worked for another Central and South West operating company, Central Power and Light Co., as a generation planning engineer.

Walter A. Ratcliff, 59, CSWS vice president of human resources, will become vice president of corporate services and will assume added responsibilities for facility services.

Before transferring to CSWS in 1989, he was vice president and corporate secretary at Central Power and Light Co. and executive assistant to the president of CPL. Previously, he served as a career officer in the U.S. Army, retiring as a colonel in 1981.

Thomas M. Hagan, CSWS vice president of governmental affairs, will assume added responsibilities for a new Washington, office to handle federal legislative and regulatory affairs.

Hagan, 46, joined CSWS in 1981 as assistant to the vice president of governmental affairs and was named to his present position in 1988. He previously worked as administrative assistant to U.S. Sen. Lloyd Bentsen, as a political and legislative consultant for George Christian & Associates and as legislative assistant to Texas Lt. Gov. William Hobby.

Paul F. Douty Jr., 43, will become vice president of finance at West Texas Utilities Co. Douty currently is assistant treasurer of Central and South West and assistant treasurer and director of finance of CSWS.

Douty served from 1978 to 1989 as assistant treasurer of Central and South West and of CSWS; from 1971 to 1978 he was assistant to the secretary and treasurer of Central and South West. Previously, he worked for the State of Delaware and Hercules Inc.

Jack C. Wells, CSWS senior vice president, will retire after 40 years with the Central and South West system.

Wells, 63, began his career with Public Service Co. of Oklahoma in 1950 and rose to vice president of power engineering and construction. He moved to CSWS in 1972 as vice president of engineering and construction and was promoted to senior vice president of engineering in 1979. He was named to his present position in 1989.

Central and South West Services Inc., provides support services to Central and South West Corp. and its subsidiaries.

#90204p7767 07/23/1990 ~PR Newswire

NEW BEDFORD, MA (JULY 23) PR NEWSWIRE - Aerovox Incorporated (NASDAQ: ARVX) has reported revenues of $15,973,000 for the second quarter of 1990, and net income of $386,000, or 8 cents a share. Sales declined 29 percent from the same period last year which resulted in a decline of 73 percent in earnings.

The general economy and housing starts in particular were cited by the company as major contributors to reduced sales in the U.S. The company's Canadian operation also experienced declining sales, in part due to a construction strike in the Province of Ontario. While the company expects that the recent warm weather should prevent a further decline in sales, it has come too late to stimulate sales to the 1989 levels.

The transition of production of DC wound film capacitors from Nashville to New Bedford is reported to be progressing on schedule. Aerovox purchased the DC wound film capacitor operation of AT&T Microelectronics Power Systems Business Unit located in Nashville in April of this year. Under the purchase agreement, Aerovox will provide AT&T with DC wound film capacitors used in telecommunications and switching equipment with sales estimated at $10-15 during the first year of the agreement.

The company is also engaged in a major automation project known as AeroMet II which is expected to contribute significant sales and profits in 1991. The first major piece of manufacturing equipment is due in the New Bedford plant in September. Meanwhile, the company is pursuing a solution to an intolerance of the product's plastic case to very high heat which has shown up in the testing process. AeroMet II with its significantly reduced manpower requirements and consistent quality is Aerovox's answer to keeping the manufacture of AC capacitors in the U.S.

Aerovox Incorporated, a spin-off of Cooper Industries, began trading on the NASDAQ National Market under the symbol "ARVX" in February of this year.

#90204p7768 07/23/1990 ~PR Newswire

PLANO, TX (JULY 23) PR NEWSWIRE - Texas Instruments (TI) (NYSE: TXN) will begin shipping the initial commercial release of its Information Engineering Facility (TM) IEF(TM) software products for OS/2 R (Version 4.1) on Aug. 22 in the U.S. and Canada. The IEF for OS/2 includes Planning, Analysis, Design and -- a new work station toolset -- Construction (or PC code generation). OS/2 is IBM's multi-tasking operating system for work stations.

TI's IEF product is an integrated CASE (computer-aided software engineering) tool that allows application developers to design business systems using graphical models that describe business operations and automatically generate business systems from those models.

Planning, Analysis and Design Toolsets for OS/2 operate similarly to the IEF Toolsets for MS-DOS. Developers use these toolsets to create business models using the windowing and multi-tasking capability of OS/2. From these models, the Construction Toolset generates business systems that will target other environments (hardware, databases, operating systems, teleprocessing monitors, and languages). By separating the development environment from the environment in which the business system will ultimately execute, the IEF architecture provides true environmental independence. Developers will be able to generate and test business systems on the OS/2 workstation, move their tested models to other hardware platforms (such as MVS) and generate production business systems from the same business model.

This first release of the IEF Construction Toolset for OS/2 will allow for tested models and subsets of models to be moved to the IEF Central Encyclopedia for MVS where CICS, IMS, TSO and batch systems will be reconstructed and placed into production. Production business systems will represent 100% of their corresponding models because, at no time, will developers have to code or "tune" code. This means that all maintenance and enhancements to code and data bases will be accomplished by changing production business system models -- not by looking at generated (then altered) code and data base definitions.

The new IEF Construction Toolset for OS/2 generates COBOL (ANSI 85) source code and relational data base definition statements from business models. For OS/2 testing purposes, it also generates data definition language (DDL) and data manipulation language (DML) statements for DBM, the data base manager that is part of IBM's OS/2 Extended Edition.

The IEF for OS/2 product also includes installation and diagram testing of the generated applications under OS/2. Workstation installation tasks, such as source code compilation, linking, binding, and library selection are completely automated. The Diagram Testing Tool allows the developer to test and verify the application logic at the diagram level with no need to look at code.

Texas Instruments, headquartered in Dallas, is a high-technology corporation engaged in worldwide development, manufacture, and sale of semiconductors, defense electronics systems, computer and software systems electrical controls, industrial automation systems, metallurgical materials and consumer products.

#90204p7772 07/23/1990 ~PR Newswire

MONTREAL (JULY 23) PR NEWSWIRE - BCE Mobile Communications Inc. (BCE Mobile) today announced its second quarter unaudited operating results for 1990.

Consolidated revenues for the three months ended June 30, 1990 were $82.8 million, an increase of some 37 percent over consolidated revenues of $60.4 million for the same period last year. For the six months, the figure was $155.9 million, up 42 percent from $109.5 million one year ago.

Bell Cellular Inc., a wholly owned subsidiary which operates a cellular telephone system in Ontario and Quebec, contributed $59.6 million to quarterly consolidated revenues compared to $38.4 million in 1989. On a year-to-date basis, Bell Cellular contributed $111.6 million ($68.1 million in 1989). Its customers numbered 167,000 at June 30, 1990, an increase of some 47 percent over the June 30, 1989 total of 114,000.

National Pagette Ltd. (Montreal: NPG), also a wholly owned subsidiary which operates paging and telephone answering systems, contributed $14.7 million to consolidated revenues for the quarter and $29.1 million for the year to date ($14.4 million and $28.4 million, respectively,in 1989).

National Mobile Radio Communications Inc., 100 percent owned by BCE Mobile operates private and shared radio systems such as those used by police forces and taxi fleets. National Mobile contributed $8.3 million to

consolidated revenues in the second quarter of 1990 and $14.8 million on a year-to-date basis ($7.5 million and $12.7 million for the corresponding periods last year).

BCE Mobile's quarterly operating income was $8.3 million, compared to $5.5 million one year ago. On a year-to-date basis, the corporation reported an operating profit of $13.3 million compared to $8.9 million in 1989. The 1990 operating income figures reflect additional depreciation expense (not present in the 1989 data) of approximately $6.2 million for the quarter and $12.4 million for the year-to-date, resulting from the previously announced change in depreciation policy concerning cellular assets.

Quarterly consolidated net loss was $4.5 million ($0.07) per share) compared to net income of $0.8 million last year ($0.01 per share). On a year-to-date basis, consolidated net loss was $7.6 million ($0.12 per share) compared to net income of $0.1 million in 1989 ($0.00 per share). The net loss results from increased interest expense associated with the financing of Bell Cellular's capital program for the expansion of its networks.

Consolidated cash flow from operations was $15.0 million for the three months ended June 30, 1990 ($0.24 per share) compared to $10.6 million for the corresponding 1989 period ($0.17 per share). For the six months, the figures were $27.8 million ($0.45 per share) and $17.6 million ($0.29 per share), respectively.

Bell Cellular's cash flow margin before interest expense was 40 percent, up from 25 percent in the second quarter of 1989.

The 1990 per-share figures are based on average outstanding common shares of 62.0 million for both the quarter and the six months.

"BCE Mobile's results are on target and, excluding the impact of the change in depreciation policy, net income is at the break-even level," stated John McLennan, president and chief executive officer. "The company will continue to stress sound financial management within the context of high growth in its cellular operations."

Effective July 1, 1990, Leonce Montambault, chairman of the board of Bell Canada and Robert Kearney, executive vice-president (finance and administration) of Bell Canada joined the BCE Mobile board of directors. They succeed Alan Walter and C. Wesley Scott.

Also effective July 1, 1990, John McLennan, chief executive officer of BCE Mobile, assumed the title of president. In the latter capacity, he replaces Alan Walter who has resigned to accept a position at Bell Canada.

BCE Mobile is the Canadian leader in mobile communications. Its diversified activities include cellular telephone, paging, telephone answering and private radio services integrating communications and information systems technology. The principal subsidiaries of BCE Mobile are Bell Cellular Inc., National Pagette Ltd. and National Mobile Radio Communications Inc. BCE Mobile is a subsidiary of BCE Inc.

#90204p7779 07/23/1990 ~PR Newswire

NORTHFIELD, Ill. (JULY 23) PR NEWSWIRE - Stepan Company (AMEX: SCL) today reported all time record quarterly sales and earnings for the second quarter of 1990.

Net earnings for the second quarter of 1990 were $4,527,000, up from $793,000 for the same quarter of 1989. Earnings per share rose to 82 cents, up from 14 cents. Net sales for the quarter increased to $96,629,000, up from $85,200,000 for the comparable quarter of 1989. Both sales and earnings surpassed previous records.

Net earnings for the six month period of 1990 increased to $8,002,000, or $1.46 per share, up from $3,690,000, or 67 cents per share reported in the previous year. Net sales for this period were $192,038,000, increased from $174,608,000, recorded in 1989.

''So far, our expectations for the year have been surpassed,'' said F. Quinn Stepan, chairman and president. ''The record quarterly earnings are the result of continued strength in our core surfactant business, which showed a 21 percent increase in volume. Both domestic and foreign operations contributed substantially to the improvement. The foreign portion reflects the acquisition of two Canadian operations in 1989 and the change in accounting method adopted in 1990 for Stepan Mexico, following acquisition of controlling interest. Phthalic anhydride (PA) based polyols also had a record quarter for both sales and earnings. PA recorded a significant improvement over the same period last year, primarily as a result of a $1.1 million write-down of inventory in the second quarter of 1989.''

Operating expenses increased 14 percent, half of which was due to new foreign operations. The remainder of the increase is due primarily to environmental-related expenses.

For the six month period, surfactants and polymers recorded increased earnings on higher sales volumes. Specialty chemicals earnings were up modestly on flat sales volume.

Interest expense for the first half of the year is up six percent due to higher average borrowing levels partially offset by lower average rates and capitalized interest.

''We anticipate continued strength in our core surfactant business for the remainder of the year,'' stated Stepan. ''We also expect improved results from the PA operations for the remainder of the year.''

Stepan Company, headquartered in Northfield, is a leading producer of basic and intermediate chemicals used in household, industrial, personal care, agricultural and energy-related products. The stock is traded on the American and Midwest Stock Exchanges under the symbol SCL.

#90204p7781 07/23/1990 ~PR Newswire

HOUSTON (JULY 23) PR NEWSWIRE - Continental Airlines today announced that it has cut fares by as much as 57 percent for travel during the next three weekends. The sale fares range from $39 to $129 each way. For instance, the fare from Boston to Austin, Texas, will be $99 each way, versus a regular low fare of $182 each way, offering a savings of 46 percent.

The nationwide weekend sale fares apply to travel that begins July 26-28 and returns July 28-30; begins Aug. 2-4 and returns Aug. 4-6; or begins Aug. 9-11 and returns Aug. 11-13. Round-trip travel must occur on the same weekend.

Internationally, Continental is offering weekend sale fares (each way) from Houston to Acapulco ($69), Monterrey ($69), Mexico City ($99) and Guadalajara ($99); from Newark to Bermuda ($99) and Santo Domingo ($99); from San Antonio to Mexico City ($99); and from San Diego to Mexico City ($99).

"The enormous popularity of our most recent weekend sale fares for travel between hub cities has encouraged us to offer a weekend sale for travel nationwide," a Continental spokesman said. "This is a limited-term, targeted fare promotion that will save millions of dollars for tens of thousands of consumers."

Seats are limited, tickets must be purchased on July 24 or 25, and within 24 hours of making a reservation. A round-trip purchase is required, and tickets are nonrefundable. The sale applies to most Continental Express routes as well as Continental jet flights.

#90204p7782 07/23/1990 ~PR Newswire

HOUSTON (JULY 23) PR NEWSWIRE -- National Convenience Stores Inc. (NYSE: NCS) today announced that preliminary unaudited financial results for its fiscal year ending June 30, 1990, indicate that the company will show improved performance over the previous fiscal year, but that the improvement in financial performance is not sufficient for the company to retain its common stock dividend.

The NCS board of directors voted today to suspend the current common stock dividend in accordance with the terms of the company's bank loan agreement. The board also declared a regular quarterly cash dividend on its series E convertible exchangeable preferred stock of $3.59375 per share, to be paid on Sept. 1, 1990, to shareholders of record on Aug. 16, 1990.

"We regret that we have had to suspend the common stock dividend, but we remain very optimistic about our long-term outlook," Van Horn said. "We believe that our strategy addresses the changing dynamics of the convenience store industry."

According to Van Horn, the cornerstone of that strategy is a new merchandise offering and store look that is well ahead of the industry.

New merchandise is already in place in some 200 stores and will be introduced to the entire network of over 1,000 Stop N Go stores over the next two years.

"The remerchandising is not a quick solution to increased sales, nor is it intended to have an immediate bottomline impact," Van Horn said. "But we believe new merchandise is the future of this industry. And with the remerchandising program now under way at Stop N Go, we have a five-year headstart and believe that we will emerge as the industry leader."

Additionally, Van Horn said, "NCS has made great strides in reducing its debt, strengthening the balance sheet, and focusing its operating assets into a few important markets, thereby gaining economies of scale and reducing operating costs.

"During fiscal 1990, debt was reduced by $72 million and the company's debt to equity ratio improved from 4.5 to one to 2.7 to one. This improvement, coupled with our traditionally strong cash flow, puts us in a better position to take advantage of the opportunities that may come to us due to the difficulties that certain other companies in our industry are experiencing."

National Convenience Stores operates 1,091 specialty convenience stores in four Sunbelt states under the name Stop N Go.

#90204p7783 07/23/1990 ~PR Newswire

IRVINE, Calif. (JULY 23) PR NEWSWIRE - Technology Marketing Inc. (NASDAQ: TMKT) today announced the financial results for the first quarter of fiscal year 1991. Revenues in the first quarter ended May 31, 1990 were $1,701,057, resulting in a net loss of $98,177. This compares with revenues of $2,620,357 and a net profit of $245,658 for the same period a year ago. Net loss per share for the current quarter was $.03 vs. a net income per share of $.08 for the same quarter a year ago.

The company expressed disappointment with the first quarter loss but noted substantially improved performance over the previous quarter. Revenues were down 35 percent from the first quarter of fiscal 1990, but down only 9 percent from the fourth quarter of fiscal 1990, while showing significant improvement over the previous quarter's loss. This trend in performance indicates that cost reductions implemented in January and February of 1990 have had a positive effect. Management is continuing to drive sales and cost control efforts to return the company to profitability.

Technology Marketing Inc., headquartered in Irvine, is comprised of the Advanced Systems Development division, a product development center for computer based high technology products; the Electronic Test product line (formerly MacroTest), which supplies memory/logic board testers used by electronic manufacturers worldwide, and the Magnetic Certification product line (formerly TestMaster), delivering proprietary products used to certify the IBM type 3480 1/2-inch magnetic tape cartridge drives.

#90204p7788 07/23/1990 ~PR Newswire
IRVINE, CA (JULY 24) PR NEWSWIRE - In anticipation of charges being filed by the State of Florida against Bob Edwards, Edwards has handed over his day-to-day management responsibilities of FundAmerica Inc.

Speaking from his offices in Irvine, Edwards said today: "My paramount concern is to protect the services we provide our customers and the professional opportunity we provide our more than 20,000 independent marketing representatives. That's why I'm handing over my management responsibilities at FundAmerica, so that I may defend myself separately against the charges I am told will be brought against me in the state of Florida. It's very important to me that whatever challenges I may personally face not reflect on the superior services provided by our vendors or the professional representation of those services provided by our independent marketing representatives."

FundAmerica is the seller of a product-services package which has been purchased by approximately 100,000 customers in eight states. The FundAmerica services include rebates on long distance telephone, an accelerated mortgage plan, tele-floral services, travel services, and others. Not only do FundAmerica members receive these services at a competitive price, but a percentage of the purchase price is escrowed and refunded to them (once the savings has reached $250). Attorneys General in the states of California, Texas, and Florida have given press interviews indicating they have received many inquiries but relatively few complaints about the program.

Peter Bradshaw will assume the day-to-day responsibilities as managing director of FundAmerica.

Steve Studdert has been retained as a consultant to FundAmerica to reinforce the vendor associations and provide FundAmerica objective analysis of its programs. "The immediate priority is to research all the facts as they relate to FundAmerica's relationship to its providers," Studdert says. "From this we will implement an effective strategy to deal with all current challenges and simultaneously to reassure the thousands

of consumers in the FundAmerica family that every prudent step is being taken. Studdert is chairman of the Studdert Companies. His most recent public experience was as White House advisor to President George Bush. Prior to that appointment he had served as executive director of the American Bicentennial Presidential Inaugural Committee, senior national advisor to the Reagan-Bush campaigns in 1980 and 1984. When Reagan was elected to the presidency, he appointed Studdert as special assistant to the president. Studdert also has extensive regulatory experience.

#90204p7789 07/23/1990 ~PR Newswire

IRVINE, CA (JULY 24) PR NEWSWIRE - United Leisure Corp. announced today that its wholly owned subsidiary and its primary operating arm, Lion Country Safari Inc.- California, had today filed for protection of the United States Bankruptcy Court under Chapter 11.

This action has become necessary as a result of the continuing efforts of The Irvine Company, the company's landlord, to cripple Lion Country Safari Inc. -California, and to force the company to surrender its leasehold interest, according to the company.

Lion Country is engaged in substantial litigation with The Irvine Company. Lion Country's lawsuit includes several claims for breach of contract and business torts, including intentional interference with economic advantage. Lion Country seeks general damages in excess of $40 million plus punitive damages. The basis of Lion Country's lawsuit is that The Irvine Company is engaged in a long term effort to damage its operations and to put Lion Country in a position where it must vacate the premises. The trial is set for Sept. 4, less than 60 days from now.

Lion Country's leasehold property consists of approximately 300 acres of land and is located immediately adjacent to the "Golden Triangle" and the billion dollar Irvine Company development in Irvine. Lion Country generates more than $1 million a year in rental income from sub-tenants and still has approximately 100 acres of undeveloped land. The lease is due end on Feb. 28 1997.

During the pendency of the litigation, The Irvine Company has consistently used its financial resources in an effort to force Lion Country out of business and thus off the leased premises. Every effort has been made to destroy Lion Country's ability to carry on its litigation effectively, according to the company.

During August 1989, The Irvine Company filed a motion to attach Lion

Country's income pending the outcome of the litigation. The court granted the motion. After the filing of third party claims by Shuster, the president of the Lion Country, and Executive Life Insurance Company, one of the company's lenders, a stipulation was entered into amongst the parties that allowed Lion Country to retain certain of its revenues on the condition that the remaining revenues would be paid over to satisfy the attachment. To date, Lion Country has paid approximately $450,000 in connection with this attachment, severely restricting the company's ability to carry on its operations and to fund its lawsuit.

Lion Country was left with no alternative but to seek the protection of the United States Bankruptcy Court under Chapter 11.

#90204u0108 07/23/1990 ~United Press International

YORBA LINDA, CA (JULY 23) UPI - The ''smoking gun'' Watergate tape on exhibit at the new Richard Nixon museum is heavily edited, but still includes a key passage in which the former president instructs the FBI be told, ''Don't go any further into this case, period.''

John Taylor, Nixon's top aide who designed the Watergate exhibit at the Richard M. Nixon Library and Birthplace, defended the omissions Sunday, saying the edited version coupled with an ''interpretative'' narration will help visitors better understand the full context of the tape that led to the downfall of the nation's 37th president.

He also denied that museum officials ever intended to exhibit the tapes in their entirety, despite comments from other high-ranking library staff and

printed materials stating otherwise.

''We believe it would have been a disservice to history and to people's full understaning of the document without interruption and without narration,'' Taylor said in a telephone interview.

''It helps the public understanding rather than confuse them by focusing on the most important parts of the tape,'' he said.

The privately funded library, which opened Friday after a dedication ceremony highlighted by a historic appearance by four presidents, eventually will offer visitors three of the tapes made by a once-secret recording system in the Oval Office. The White House tapes helped tie Nixon to the widening scandal and force his resignation in 1974 in the face of impeachment proceedings.

The only recording now on display - two other edited tapes are to be added in September - contains portions of the ''smoking gun'' tape, made during a June 23, 1972, meeting between Nixon and his chief of staff, H.R. Haldeman, six days after the Watergate burglary, and shows Nixon approving a plan to have the CIA warn the FBI to stop its investigation of Watergate.

The 10 minutes of tape excerpts, whittled down from more than 30 minutes of conversation, are combined with a narration that offers innocent explanations for what Nixon is saying. The museum tape also includes excerpts of Nixon reading a diary entry made two weeks later describing later events.

''It is interpretative but completely factual and does not mitigate the president's involvement,'' Taylor said. ''The sections (excerpted) are the most incriminating.''

The Watergate display also fails to mention the criminal convictions of a host of senior Nixon aides for their roles in the overlapping conspiracies known as Watergate. The first was a plan to use wiretaps, burglaries, the FBI, CIA and independent groups organized by White House aides to punish Nixon's political enemies.

The second conspiracy, initiated after a team of White House-linked burglars was arrested during a break-in at the Democratic National Committee headquarters in the Washington's Watergate office building, was designed to cover up the first conspiracy.

''The (Watergate) presentation makes the best possible case for Nixon, mainly in Nixon's own words, and is entirely self-serving,'' wrote Nixon biographer and history professor Stephen Ambrose in the Los Angeles Times Sunday.

Text displays concede that ''Nixon himself has said he made inexcusable misjudgments during Watergate,'' but accuse many of his critics of ''partisan'' bias, including the late Sen. Sam Ervin, D-N.C., chairman of the Senate probe of Watergate, and the first Watergate special prosecutor, Harvard law professor Archibald Cox, whom Nixon fired.

Taylor said it was not the goal of the museum to provide the public with every document and tape of the six-year Nixon administration.

''The tapes are available to the public at the National Archives in Alexandria, Va.,'' he said. ''It is their business to play all of the tapes as charged under the law. Our business at the library is doing interpretative exhibitry.''

Taylor said it was still undecided whether the Nixon archival library, set to open next year, will contain any of the unedited Watergate tapes.

Another display in the Watergate exhibit particularly criticizes the investigative work to unearth the scandal by The Washington Post's Pulitzer Prize-winning reporters Bob Woodward and Carl Bernstein. The display offers an accusation from an unidentified ''scholar'' that the reporters offered bribes for information and illegally obtained telephone numbers and talked to grand jurors.

Woodward, in an interview with the Times, denied ever offering bribes.

WASHINGTON (JULY 23) UPI - As Medicare's silver anniversary nears, the Pepper Commission announced three recommendations to improve Medicare's health care coverage for the nation's impoverished senior citizens.

''People think that because the elderly have Medicare, they are adequately protected. That's wrong,'' said Sen. John Rockefeller, D-W.Va., chairman of the Pepper Commission, a bipartisan group of 12 members of Congress and three presidential appointees.

Congress charged the commission with developing ways to assure that all Americans have access to affordable health and long-term care.

Medicare, which turns 25 on July 30, is the federal health care insurance program for the elderly and disabled.

The recommendations, adopted by an 11-4 vote, are the last of the panel's proposals. A final report to Congress will be released in September.

The proposals, announced Sunday, would require the federal government to

help the poorest elderly pay Medicare charges, expand Medicare to cover certain preventive services and reform private insurance many elderly purchase to supplement Medicare. If enacted, the proposals would cost about $3 billion but the commission did not recommend a source of funding.

Specifically:

-The government would help those over 65 with incomes below 200 percent of the official poverty line - now $6,280 for an individual - pay the premiums, deductibles and co-payments required under Medicare. If implemented in 1990, the government's cost would be $2.6 billion, the commission said.

About 3.5 million elderly people have incomes below the $6,000 line, while 8.2 million have incomes between $6,000 and $12,000, the commission said.

Medicaid now provides health care insurance for the elderly below the poverty line, but participation by those just turning 65 has been low, caused in part by the ''welfare stigma'' attached to Medicaid, the commission said.

In March, the commission made a similar recommendation for the non-elderly poor.

-Medicare coverage should be expanded to cover certain preventive services such as mammography, colorectal and prostate screening for cancer.

The federal cost would be $200 million if implemented in 1990.

Last March, the commission urged the same coverage for people younger than 65.

-New federal standards for ''Medigap'' insurance, which is private insurance that supplements Medicare coverage. Standards would include requiring insurers to pay a higher proportion of their premium revenue as benefits, prohibit insurers from refusing to sell coverage to anyone based on health status, develop more understandable policy language, limit commissions for new policies and spend about $25 million in federal funding to counsel potential Medigap purchasers.

#90204u0112 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - It's a seller's market for people offering their teaching services to colleges and universities.

''Campus Trends 1990,'' a report released Sunday by the American Council on Education, found that 89 percent of college and university

administrators are concerned about the consequences of predicted faculty shortages.

''Greater competition for qualified faculty has serious implications for the financing of higher education,'' said the report's author, Elaine El-Khawas. ''More competition compels institutions to offer higher salaries, better research opportunities, help with housing costs or reduced teaching loads.''

The survey, in which 364 campus administrators responded, also found nearly all institutions are requiring students to complete a minimum number of general education courses and are finding new ways to assess student learning. But the report said serious challenges lie ahead in making greater progress with minority student achievement and renewing campuses' physical facilities.

College and university administrators indicated that faculty shortage problems have worsened in the past year. Sixty-three percent reported greater difficulty in getting top applicants to accept positions, while 65 percent reported it was taking longer to find qualified persons for job openings. In 1989, only half of the institutions gave similar responses.

The survey found 41 percent of institutions have hired faculty in high-demand fields at salaries above their usual scale or their generally accepted salary range. Twenty-five percent reported hiring new junior faculty in a few fields at salaries above those of senior faculty in the same department.

Sixty-five percent said they have taken steps to improve fringe benefits for faculty, while 79 percent reported efforts to increase the attractiveness of available jobs to current faculty members.

The report also found 14 percent of administrators - most at doctoral universities - are hiring faculty in advance of expected vacancies, while six in 10 institutions - most at two-year and baccalaureate colleges - have offered full-time faculty appointments to persons who had held part-time positions.

And reflecting the changing makeup of families, the report revealed about half the institutions are recruiting dual-career families and about four in 10 have assisted a spouse's job search.

And in an effort to widen the pool of candidates, three in 10 institutions have considered applicants without academic experience; 34 percent have taken steps to reexamine their criteria for making new faculty appointments, and nearly half have taken steps to encourage students to consider a faculty career.

LOS ANGELES (JULY 23) UPI - The second of two despondent women who on the same day set themselves on fire rather than face health and family problems died Sunday of severe burns, authorities said.

Louisa Jiminez, a 35-year-old mother of three young children, died a day after suffering third-degree burns over 90 percent of her body after dousing herself with a flammable liquid and setting herself on fire in the street in front of her house Saturday morning.

Just hours after Jiminez immolated herself, Ruby Poublane of Tujunga died on a mountain road in a fiery tomb of her own making. The 26-year-old woman doused her car with gasoline, then climbed inside as it burned at a turnout of the Angeles Crest Highway, Detective Jerome Beck said.

Investigators found notes indicating she was having health and family problems and friends said she was despondent and previously attempted suicide, Beck said.

Jiminez told her husband Friday night that she was sick of her life and

asked him to help her burn to death, Sgt. John Johnston said.

''She told her husband she was tired of her dirty house and the cockroaches and everything else, and she asked him to set her on fire to purify her body,'' Johnston said.

The husband refused and by the time the couple went to bed he thought the crisis had passed, Johnston said. But his wife woke up early and went outside.

Horrified neighbors found Jiminez on fire in the middle of the street in front of the couple's duplex in suburban Highland Park about 6:15 a.m. Saturday.

The neighbors grabbed a garden hose and put the fire out despite Jiminez' yelling at them to leave her alone, Johnston said.

Paramedics arrived several minutes later and found her conscious, even though her injuries indicated she had been on fire for ''quite some time '' Johnston said.

Fire investigators found an empty gas can in the couple's kitchen and a book of matches was found near her body.

Fire officials said Jiminez had been despondent for the past month.

Johnston said Jiminez may have gone outside to set herself on fire out of concern for the safety of her three children, aged 1, 2, and 4.

Initially, authorities thought the two suicide attempts could be related, but further investigation revealed they were not.

''You don't have this kind of thing everyday. It's a terrible way to go,'' Johnston said.

#90204u0292 07/23/1990 ~United Press International

CHICAGO (JULY 23) UPI - The Cubs' Joe Girardi was a reluctant hero, waiting until his final at-bat to knock in the winning run in each of the Chicago'scome-from-behind victories over the San Francisco Giants.

Friday, Girardi followed Shawon Dunston's RBI single with one of his own, stroking a two-out single in the ninth inning to give the Cubs a 5-4 victory.

Saturday, the Cubs' catcher lined a grounder that carromed off shortstop Jose Uribe's knee to score Marvell Wynne with the winning run as Chicago

scored twice in the eighth to win 3-2.

Sunday, Girardi hit a two-out, tie-breaking RBI double in the eighth inning, lifting the Cubs to a 4-2 victory for their seventh straight win.

The last time the Cubs swept three games from the Giants at Wrigley Field was Aug. 23-25, 1982. Chicago had not won seven in a row since April 7-16 last season.

Throughout their recent tear, the Cubs have relied on timely hitting and outstanding pitching. In the 10 games since the All-Star break, Cubs starters have a 2.89 ERA, giving up 24 earned runs in 74 2-3 innings.

From behind the plate, Girardi has witnessed the pitching staff mature.

''The thing they're (pitchers) doing is making the pitches when they have to,'' said Girardi. ''I think pitching is contagious. It's just like hitting.''

If hitting is contagious, Gerardi must be seriously infected.

The 25-year-old native of Peoria, Illinois went 5-12 in the series. Girardi has 24 hits in his last 58 at-bats for a .414 average during that period.

But perhaps his finest hit of the series came in the eighth inning on Sunday.

With one out and the score tied 2-2, Luis Salazar singled against loser Atlee Hammaker, 4-5. Dunston hit into a fielder's choice, forcing Salazar at second before Girardi belted a doubled down the left field, driving in Dunston with the go-ahead run. The throw home was on time, but the ball hit Dunston in the back of the helmet.

''I knew if I hit the ball in the corner, Shawon had a chance to score,'' said Girardi.

Pinch-hitter Lloyd McClendon was then intentionally walked and Doug Dascenzo followed with a single, driving in Girardi.

The Cubs took a 2-1 lead on Ryne Sandberg's RBI triple.

In the eighth, the Giants tied the game 2-2 when Brett butler delivered a run-scoring double.

San Francisco took a 1-0 lead in the fourth on Matt Williams' 18th home run, a two-out shot to left.

Chicago tied the game with a run in the sixth on Dunston's RBI single.

Reliever Paul Assenmacher, 3-2, earned the win by pitching 1-3 inning. Jeff Pico pitched the ninth for his second save.

Elsewhere in the National League, St. Louis dropped San Diego 6-4; Pittsburgh slammed Los Angeles 11-6, Atlanta scalped New York 3-2 in 10 innings, Philadelphia downed Cincinnati 6-2 and Houston clipped Montreal 3-2.

In the AL, it was: Baltimore 9, Chicago 3; New York 10, Minnesota 6; Seattle 4, Milwaukee 3; Cleveland 8, California 1; Oakland 3, Toronto 0; Kansas City 2, Boston 1 and Texas 5, Detroit 3.

-- AROUND THE NL --

Cardinals 6, Padres 4

At St. Louis, Tom Pagnozzi doubled home a pair of runs to cap a three-run seventh inning and send St. Louis to its fourth straight victory. San Diego, who extended its losing streak to seven games, has won only three in their last 24 games. Ken Dayley, 2-2, earned the victory and Lee Smith notched his 14th save. Reliever Greg Harris, 4-5, took the loss.

Pirates 11, Dodgers 6

At Pittsburgh, Gary Redus hit a grand slam, Rafael Belliard delivered a three-run double and Jay Bell knocked in three runs to power Pittsburgh. Bob Kipper, 4-1, earned the victory with 2 2-3 innings of hitless relief. Los Angeles starter Terry Wells, 1-2, allowed seven runs in three innings.

Braves 3, Mets 2, 10 innings

At New York, Dale Murphy hit a sacrifice fly in the 10th inning to lift Atlanta, salvaging the final game of the weekend series while snapping its four-game losing streak. Ron Gant walked and scored against loser Jeff Innis, 1-3. Reliever Kent Mercker, 3-1, pitched hitless ball over two innings.

Phillies 6, Reds 2

At Cincinnati, Rickey Jordan doubled home three runs and Len Dykstra scored three more to lead Philadelphia. Rookie Jose DeJesus, 2-2, went 6 1-3 innings, allowing five hits and two earned runs and Roger McDowell got the final two outs for his 15th save. Scott Scudder, 2-3, pitched five innings, allowing five hits and five earned runs.

Astros 3, Expos 2

At Houston, Eric Yelding scored from third on a two-out bunt single by Franklin Stubbs in the eighth inning to lead Houston. Dave Schmidt dropped to 3-3. Reliever Juan Agosto, 5-4, worked two hitless innings and Dave Smith struck out the side in the ninth for his 18th save.

SYDNEY, AUSTRALIA (JULY 23) UPI - Australian children have been roaming city sewers and playing dangerous ''drain games'' in emulation of their cartoon movie heroes, the Teenage Mutant Ninja Turtles, authorities said Monday.

The Sydney Water Board issued an alert to its employees after learning children in Melbourne were acting out the parts of the sewer-dwelling comic characters in the city's drains and sewers, spokesman Chris Tweedie said.

''Authorities fear children could be caught in flash floods or poisoned by the toxic gases which build up in sewers,'' he said.

Police and Melbourne Board of Works officers have been gathering evidence that the potentially deadly ''drain games'' have been gaining in popularity since the Ninja Turtles cartoon series began.

Police Sgt. Gary Phillips of Melbourne said children were using the underground tunnels as ''escape routes'' when Council officers and police tried to round them up.

''The kids got out before we got to their exit points,'' Phillips said.

Sydney Water Board chief Bob Wilson said Monday he was very concerned about the trend.

Wilson appealed to parents to educate their children to the dangers of attempting to get into drains.

''Water Board workers who themselves have to go underground must observe detailed safety procedures, but the kids don't know what to do in an emergency,'' the spokesman said.

EAST BERLIN (JULY 23) UPI - Party leaders in East Germany's government coalition said they are ready to accept the acceleration of German unification in order to prevent the collapse of their broad-based alliance.

Following numerous party meetings and heated debates, the parties agreed Sunday to hold all-German elections following official unification, instead of separate East German elections before the link-up with West Germany.

''We have to look for arguments and approaches that are able to create consensus and discussion over party boundaries,'' Richard Schroeder, a social democratic spokesman, said at a special session of Parliament.

Meanwhile, The New York Times reported Monday that unification is expected to remove many in East Germany's military from their posts and officials are warning many career officers to look for jobs in the private sector.

The Christian Democratic Union, the senior coalition party, said all questions concerning the final unification process will be solved in special committees set up by the two governments.

Members of the junior coalition parties had sharply accused Prime Minister Lothar de Maiziere of trying to split up the government by maintaining his position to have separate elections in the two Germanys before they merge.

''I can only hope that Lothar de Maiziere gives up his extremely stubborn position, otherwise he will break up the coalition,'' Wolfgang Thierse, head of the East German Social Democrats said earlier.

But de Maiziere dismissed the accusations by saying, ''I think that we are facing very grave economic and social problems which need the coalition in its current composition.''

Parliament, meanwhile, Sunday passed the budget proposal by the government of more than $39 billion for the last six months of 1990. The budget deficit will grow by $21 billion, exceeding the $18 billion in revenue.

Finance Minister Walter Romberg sharply criticized the West German government for not giving East Germany enough money to patch up its economy.

''In the first reading of the budget proposal, I already said that the tight funding from the finance minister in Bonn left us with little room for an independent budget policy,'' he said.

Romberg said the East German government has often decided on programs approved by Bonn officials with a nod of the head, but not with funds.

''I regret this very much, for I would have wished for more cooperation as partners and good neighbors on the path of German unity,'' he told delegates,who responded with loud applause.

Parliament approved of a 15 percent cut in the defense budget, or $406 million. It doubled the budget for environmental protection to a total of $501 million.

Meanwhile, the the government estimated East German unemployment will soar to an alarming 1.5 million people from the present 220,000.

The people in East Germany are ''really desperate,'' said Labor Minister Regine Hildebrandt.

She said in a radio interview Sunday the ministry expects about 1 million unemployed in the industrial sector and 250,000 jobless in agriculture.

The New York Times said Monday despite an impending merger of East and West German forces, NATO and West German experts have warned that most East German officers and career personnel should start looking for private-sector jobs immediately.

Adm. Theodor Hoffmann, chief of East Germany's 170,000-person National People's Army, requested in Berlin Friday that the remains of his forces be integrated into the merged army.

The East German Army has about 60,000 career soldiers, the Times said.

Hoffman told NATO leaders his career officers could be made acceptable to the merged force by taking a new oath of allegiance. The merged army will be under allegiance to the new unified government, the Times said.

In Strausberg, Rainer Eppelmann, East Germany's Minister for Disarmament and Defense, said it would be fair if the new all-German force, expected to number 370,000, were to absorb 70,000 East Germans.

Until last year the East German army was the most formidable Warsaw Pact militia outside the Soviet Army, the Times said.

#90204u0327 07/23/1990 ~United Press International

(JULY 23) UPI - Strong storms, some dropping 2 inches of rain an hour, lashed parts of Texas, Nebraska, Ohio and Pennsylvania, causing floods and closing roads Monday while a storm with 30-mph winds swept across Baltimore's Inner Harbor.

Days of rains pushed the Big Blue River in southeast Nebraska about 6 feet above flood stage in Dorchester, where the river peaked at 21 feet, the highest level since 1986.

A small stream and urban flood warning was in effect Monday in east-central Ohio as heavy rains fell on soil already saturated from a month of heavy rain.

Flood watches were in effect for several counties in the northeast and east-central parts of Ohio, the National Weather Service said.

Across the state line, the same storm system caused floods in northwestern Pennsylvania where route 208 between Emlenton and Knox was under 2 feet of water and other roads were closed in the region near Oil City.

Thunderstorms moved across northern and central Maryland early Monday and a weather service observer in Baltimore's Inner Harbor reported frequent lightning, very heavy downpours and winds gusting to 30 mph.

A broad strip of showers and thunderstorms formed along and north of a slow-moving cold front sprawled from deep south Texas into Louisiana and Arkansas Monday.

''It is unusual to get these (cold fronts) this far south in the middle of July,'' meteorologist Buddy McIntyre at the NWS office in Fort Worth said Monday.

Temperatures north of the front were several degrees below normal Monday for the second day in a row, he said. The jet stream was moving through the central portion of the country, further south than normal, McIntyre said.

A flash flood watch was in effect for several counties in central Texas as light to moderate rains continued in the soggy region. Powerful storms dumped up to 2 inches of rain an hour in Juno in Val Verde County along the state's southwestern border.

At least two county roads were closed because of flooding, officials said.

In the northwest, a trough of low pressure was moving east over inland Washington state during the night and morning hours, bringing cooler temperatures and areas of drizzle. The condition also promised cooler weather for Oregon and northern California.

Isolated thundershowers popped up over the northern and southern Idaho borders.

Showers covered northern New England early Monday, while fog shrouded the southern portions of the six-state region. Thick fog made for especially poor visibility in the Boston area, southeastern Massachusetts and Cape Cod.

Temperatures in the region were mostly in the low 70s or upper 60s, but the mercury dropped to 59 degrees at Maine's Houlton airport. In rainy Manchester, N.H., the mercury stood at 69 degrees.

#90204u0328 07/23/1990 ~United Press International

SEOUL, South Korea (JULY 23) UPI - Opposition lawmakers resigned en masse Monday in a bid to force the dissolution of the current National Assembly and its replacement by a new Parliament through elections.

The ruling Democratic Liberal Party, which controls more than two-thirds of the 299 parliamentary seats, said the opposition attempt to abandon the National Assembly will be turned down. A legislator's resignation requires consent by a majority of the Assembly's members.

All 70 members of Kim Dae Jung's Party for Peace and Democracy sent in written resignations to Assembly Speaker Park Jyun-kyu. Five lawmakers of the minor opposition Democratic Party followed suit.

Two other opposition politicians, including one independent and another serving a prison term after being convicted of a secret North Korean visit also tendered resignations through their lawyers.

Four legislators, including a member of Kim's party and three Democrats, had already sent in resignations. In all, 80 opposition members quit the Parliament.

The opposition made its move to protest legislation by the government party to place the entire armed forces under a single unified command and restructure the nation's broadcast system, among other gripes.

Opponents have charged the new command system will weaken civilian control over the military and the broadcast restructuring will put networks under government control.

The government, in turn, has said the new armed forces structure is in response to Korea's changing military needs and the broadcast laws seek to accommodate demands for more varied information and improve management.

Opposition politicians have demanded that the government-dominated National Assembly be dissolved and replaced by new elections because it does not properly reflect popular wishes.

The government party has ruled out early elections, arguing there is no provision for such a move in the constitution. The term of the current Assembly expires in 1992.

#90204u0329 07/23/1990 ~United Press International
NEW DELHI, India (JULY 23) UPI - Prime Minister V.P. Singh departed Monday on a four-day visit to Moscow, hoping to strengthen ties with Soviet President Mikhail Gorbachev at a time when the Soviet Union is looking increasingly to the West.

Singh, accompanied by a high-level delegation that included three senior Cabinet ministers and four government secretaries, was to meet with Gorbachev on Tuesday.

The prime minister told reporters at a news conference Friday it was important for him to establish a rapport with the Soviet leader.

''The U.S.S.R. has been one of our greatest friends and I look forward to pursuing this friendship at a political level as well as other cooperative levels,'' Singh said.

He said he also wanted to ''get a first-hand feel'' for the changes taking place in the Soviet Union under Gorbachev's perestroika and glasnost reform programs and to ''see how we can look forward together.''

Singh's visit to Moscow comes at a time when the Soviet Union has strengthened ties with the West and is asking for help in reforming its economy. The trip was seen as an attempt to shore up Indo-Soviet political trade and defense ties at a time of great change in Moscow.

#90204u0330 07/23/1990 ~United Press International
NEW YORK (JULY 23) UPI - Five years after lethal gas escaped from a pesticide plant in Bhopal, India, and caused history's worst industrial disaster, many people eligible for relief have not been paid, a published report said Monday.

The Indian government estimates about 1 million people in Bhopal were affected by the Dec. 2, 1984 accident, but so far uneven relief distribution has deprived more than 400,000 of them of payments, The New York Times said.

Last year the owner of the plant, Union Carbide, paid $470 million to the government of India, following years of legal fighting. The company is challenging the settlement in court in New Delhi, the Times said.

In February the Indian government announced it would begin dispensing about $210 million to about 500,000 people. In April the 500,000 victims began receiving monthly $12 payments that will continue for the next three

years, the newspaper said.

The remaining $260 million can be distributed only after India's Supreme Court rules on motions filed jointly by Prime Minister V.P. Singh and victim groups. Arguments in the case promise to delay those payments for at least several additional weeks, the newspaper said.

So far more than 3,600 people have died from the accident, which released noxious fumes into the air, causing many cases of lung damage and other chemical poisoning-related syndromes.

The government has ruled that anyone can receive relief benefits if he can prove he was in the Bhopal area at the time of the accident. Beneficiaries need not prove injuries, the Times said.

#90204u0355 07/23/1990 ~United Press International

BAGUIO, Philippines (JULY 23) UPI - Hours after a powerful quake rocked the mountain resort near his hometown of Tuba last week, miner Orlando Bay-os left his family to help rescue hundreds of people buried under flattened buildings.

Bay-os, 41, and some 200 other workers from mining companies outside the city of Baguio trekked more than 12 miles of landslide-covered roads under heavy rains and falling debris.

One week after the temblor, which measured 7.7 on the Richter scale, the miners still were in Baguio, carrying on the difficult task of retrieving bodies after foreign rescue teams gave up hope of finding survivors and left.

''Please call the radio and tell our families that we are all right here '' he told a reporter outside the ruins of the once-opulent Hyatt Terraces Hotel. ''I don't even know if my family is all right.''

About 90 people were believed to have been trapped under the ruins of the hotel, one of 28 inns, schools and office buildings crushed in the July 16 quake in the tourist center 120 miles north of Manila.

Officials said at least 899 people perished in the temblor, the worst in 14 years, and the toll of lives was expected to go up even further once reports come in from isolated villages.

''The miners are the real and unsung heroes of this operation,'' said Denise Molintas, a Hyatt employee. ''They are risking their lives.''

Wearing a helmet with a flashlight attached to it and rubber boots, Bay-os

had just emerged from the narrow 50-foot tunnel under tons of concrete and twisted metal searching for quake victims in the hotel.

He said 26 other miners from the Philex Mining Corp. have been working non-stop at the Hyatt, using picks, shovels, jackhammers and their bare hands. They had burrowed tunnels for British and Japanese rescue experts to bring in their sophisticated equipment to detect signs of life.

''Your miners are the best,'' said Willie McMartin of Grengemouth, Scotland, a member of the British team. He said he had been to seven disaster areas in the world and found that the Philippine miners were ''not only industrious but also experts.''

David Maddock, of Chessire, England, said about 70 percent of the job at the Hyatt was done by the miners, mostly belonging to the hardy Igorot tribe in northern Luzon.

''The miners really really considered our safety,'' McMartin said. ''They worried more about us than they did about themselves. That's a true friend.''

#90204u0361 07/23/1990 ~United Press International

BANGKOK, Thailand (JULY 23) UPI - Cambodian resistance forces charged in a radio broadcast that Vietnamese troops wearing Phnom Penh government uniforms fired toxic gas into two villages, killing or injuring at least 102 civilians.

In a transcript of the broadast, made available Monday, the resistance radio said the Vietnamese forces, wearing Cambodian government uniforms, on July 9 fired several round of toxic gas shells into two villages of Kompong Cham Province, 77 miles northeast of Phnom Penh.

Vietnam invaded Cambodia in late 1978, ousted the Chinese-backed Khmer Rouge and installed the current Phnom Penh government, which has been fighting the U.N.-recognized three-party resistance.

Hanoi announced the total withdrawal of its troops from Cambodia last September but resistance sources insist Vietnamese troops, often clad in Cambodian government uniforms, remain in the country.

The radio broadcast Sunday said the toxic gas ''killed or seriously incapacitated 90 inhabitants and affected some others.''

It said the troops also fired several rounds of 105mm artillery into the two villages, killing seven civilians.

''Sixty-seven of the 102 victims in these two villages are parents, brothers, sisters, wives, children and relatives of the Cambodian soldiers '' it said.

The radio said Vietnam recently also sent more than 2,000 Vietnamese families by boat along the Mekong River to settle along the river banks of Kompong Cham.

''The Hanoi authorities have organized these Vietnamese immigrants into armed groups with guns and ammunition hiding in their motor vessels and boats,'' it said.

#90204u0387 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - Northwest Airlines Chairman Alfred Checchi is expected to propose that his company take over Eastern Airlines and begin a controlled liquidation of some Eastern assets, The Wall Street Journal reported Monday.

Under the plan, Northwest would acquire Eastern holdings including 80 of its newer aircraft, airport gates in Atlanta, and two East Coast maintenance facilities, the Journal said, citing sources familiar with the proposal.

Northwest would sell off all remaining Eastern assets, the newspaper said.

Checchi, who was expected to make the proposal to Eastern on Monday, could not be reached for comment, the Journal said.

An Eastern spokeswoman said, ''We continue to maintain we're not interested in liquidation, but we're willing to entertain proposals for the entire company.''

The spokeswoman said Northwest had not submitted a proposal.

The Journal said the plan would not represent much financial risk to Northwest, and it would give the airline a strong East Coast presence, as well as narrow-body jets to replace its aging DC-9 fleet.

The plan would have to be approved by Eastern, a unit of Continental Airlines Inc. of Houston, and its creditors. The newspaper said it was unclear how the company and its creditors would react to the proposal.

In April, a Texas bankruptcy judge appointed trustee Martin Shugrue to take control of the airline.

Several points need to be worked out in the plan, the newspaper said.

These areas include what to do about Eastern's financial liabilities, which include a pension plan underfunded by at least $500 million.

Checchi reportedly has told intimates he does not intend to enter any agreement that would increase Northwest's level of debt, the newspaper said.

#90204u0503 07/23/1990 ~United Press International

(JULY 23) UPI - Stock prices on the Tokyo Stock Exchange plummeted Monday as rumors of another rise in Japan's key interest rate continued to worry investors. The rumors also sparked a sharp sell-off in the bond market.

The closely watched Nikkei Stock Average of 225 shares, the market's main barometer, tumbled 526.73 points to 31,894.79. Combined with Friday's 634.10-point fall, the Nikkei has lost 3.5 percent of its value in the last two trading sessions.

The broader-based Tokyo Stock Exchange Price Average of all major shares, which dropped 29.65 points Friday, fell another 33.51 points to 2,329.92.

Trading was thin as an estimated 300 million shares changed hands, compared with 504 million shares Friday.

Declines pounded advances 861 to 151, while 110 issues remained unchanged.

Elsewhere in Asia, stock prices on the Hong Kong Stock Exchange climbed sharply higher in heavy trading to another post-crash high amid strong bargain hunting. Activity was centered on blue-chip issues.

The key Hang Seng Index, which gained 16.85 points Friday, tacked on another 19.46 points to 3,559.89.

Among the narrower indexes, industrials rose 35.79 points, financials lost 21.32, utilities added 22.32 and properties surged 45.16 points.

Volume was heavy as an estimated 2.62 billion shares changed hands, up from Friday's turnover of 2.33 billion shares.

In Singapore, stocks closed slightly higher in moderate trading on the Singapore Stock Exchange as bargain hunters pushed prices higher.

The blue-chip Straits Times Industrial Index, which fell 5.01 points Friday, rose 2.83 points to 1,565.38. The narrower All Singapore Index rose 1.71 points to 444.74.

An estimated 49.3 million shares changed hands, compared with 77.3 million

shares Friday.

In Australia, stock prices closed slightly lower in light trading on the Sydney Sharemarket as investors nibbled away at a handful of leading blue-chip stocks.

The key All Ordinaries Index, which eased 5.9 points Friday, slipped 3.1 points to 1,598.4.

An estimated 64.5 million shares changed hands, compared with 77.6 million shares Friday.

#90204u0568 07/23/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 23) UPI - A black activist on the run from police for alleged connections to terrorism requested political asylum Monday in the U.S. Consulate in Durban, fellow activists said.

The action followed a weekend sit-in at the Johannesburg consulate by a group of 17 black township residents hoping to highlight alleged police harassment.

Bhekumusa Ximba, 38, a chemical technician at the University of Zululand, sought refuge and requested asylum at the U.S. legation in the eastern port city after a week in hiding, the activists said.

They noted police last Monday raided Ximba's house in the black township of Umlazi, south of Durban, just hours after he went underground and then put out word they found an arms cache linking him to possible future acts of terror.

A U.S. Embassy spokesman said, ''There is someone in the consulate space and he is discussing with relevant U.S. officials his South African legal problems,'' but declined to comment on whether the issue of asylum was raised.

But a close associate of Ximba said, ''He will stay there as long as is necessary to get what he wants, and what he wants is safety under (U.S.) protection.''

Seventeen residents of strife-torn Tumahole township, southwest of Johannesburg, Saturday morning ended an overnight sit-in at the U.S. Consulate in the city designed to bring alleged police harassment to Washington's attention.

The group chose the venue as ''the U.S. administration shows sympathy to disadvantaged communities around the world and we want to bring this to

their attention,'' a spokesman for Tumahole said after the protest, noting it followed months of confrontation between residents and police over apartheid policy.

BEIRUT, Lebanon (JULY 23) UPI - Visiting British parliamentarians spoke Monday with House Speaker Hussein Al Husseini, officials said, but one of the lawmakers denied speculation the delegation sought help in the hostage crisis.

The officials said Conservative Party deputies Robert Adley, Colin Shepherd and Tim Rathbone met with Husseini at his residence in west Beirut on the Lebanese situation.

Husseini, a prominent Shiite politician who has a good relationship with Syria, held later a banquet in honor of the delegates at the seaside Summerland Hotel.

The delegation arrived in Moslem west Beirut Sunday on a so-called fact-finding mission, but analysts believed the visit would touch on the plight of Western hostages, notably British captives, held in Lebanon by Moslem extremists.

Adley, reached by telephone, denied reports the delegation was seeking freedom for Western hostages, saying, ''Our visit has nothing to do with the hostages' issue whatsoever.''

In London, the Independent newspaper reported that Gerlad Kaufman, the shadow foreign secretary for the Labor Party, traveled to Syria to try to break the deadlock over the British hostages held in Lebanon.

The envoy would ask the Syrian government to intervene and speed up the hostages' release, the Independent said.

''This is not in any sense an attempt to negotiate with Syrians,'' the Independent quoted Kaufman as saying.

Britain severed diplomatic relations with Syria in 1986 after it found evidence implicating Damascus in an attempt to blow up an Israeli El Al passenger plane at London's Heathrow airport.

Syria, with 35,000 troops in Lebanon, has played a technical role in the release of Western hostages in the past.

The Independent quoted Kaufman as saying he would not be officially representing the British government.

''But it seems to me that the release of the American hostages and reports in the press of the possible release of (Irishman) Brian Keenan mean that it would be useful to see whether the Syrian government can assist with the release of British hostages,'' he declared.

The simultaneous visits to both Lebanon and Syria came after fruitless efforts earlier this month to release Keenan.

As Irish diplomats exerted efforts in Beirut and Damascus earlier this month to obtain the release of Keenan, Iranian press reports had suggested that he was on his way to freedom.

Pro-Syrian sources in Beirut said Syria sought to use Keenan's release to start a dialogue with Britain, but was met with an intransigent stance by London.

There was no official word as to why Keenan did not surface, but the sources, who requested anonymity, reported that Syria expressed no enthusiasm to help arrange the release.

Keenan is believed held hostage by pro-Iranian fundamentalists along with 15 other Westerners, including three Britons and six U.S. nationals.

LONDON (JULY 23) UPI - Condemned author Salman Rushdie told British officials Monday he would not file a libel suit against a banned Pakistani film in which he is portrayed killing Moslems and is eventually slain by a divine bolt of lightning.

The owner of a Pakistani-owned video company that planned to market ''International Guerrillas'' said he will take legal action against the British Board of Film Classification for refusing to allow distribution of the film.

News reports Sunday revealed Britain had banned the 3 1/2-hour film because the government believes it could be criminally libelous since its central villain is named Salman Rushdie.

It also fears the film could inspire public hatred against Rushdie, who has lived in hiding since Feb. 14, 1989, when the late Iranian spiritual leader Ayatollah Ruhollah Khomeini sentenced him to death for writing the novel ''The Satanic Verses.'' Khomeini said the book was a blasphemy against Islam.

The Indian-born Rushdie told Frances D'Souza of the Rushdie Defense

Committee he would take no legal action against the film.

''He wanted it to be known that if the film got a classification and was cleared by the British film board, he would not pursue any case against it in any court,'' said D'Souza, who explained that Rushdie called her from his hiding place.

''He said that if (the film) infringed other laws, such as The Race Relations Act, then it would be (up to) other people to take legal action '' she said. ''He said that he has been libeled so much in the past year and a half, that if he started on this now, where would he stop?''

''The Satanic Verses,'' which includes a character resembling the Prophet Mohammed, is regarded as blasphemous by many Moslems. Its publication was supported in Britain on the grounds that banning it would inhibit freedom of expression.

Rushdie earlier said the film should be distributed in adherence with the same principle.

''International Guerrillas'' depicts Rushdie wielding a bloody sword, hanging Moslems and torturing other Moslems by playing them tapes of his book.

Rushdie is later struck down by lightning, which is seen as an act of God for the author's role in an international syndicate trying to destroy Islam.

The movie has drawn record audiences in Pakistan, where viewers have paid five times the normal price to see it.

BBFC director James Ferman said the film contravened criminal libel laws and would expose Rushdie to public hatred.

He said if the film were edited to change Rushdie's name and remove all statements calling for his death, it might be cleared.

''This would turn it into a more traditional entertainment, with a villain who is an enemy of Islam in a general sense, rather than a specifically named individual,'' Ferman said in the letter to the distribution company.

Mohammed Fayyaz, whose south London video center holds world rights to the film, said he will appeal the decision.

''The establishment wants to protect Rushdie,'' Fayyaz said. ''They say this is an independent country, but they ban a film which gives the real feeling of Moslems.''

Fayyaz was hoping to sell 5,000 of the film copies at $36 each in Britain. In British cities with large Moslem communities, pirate video cassette tapes of the film are selling for $180 to $360.

The BBFC ban is expected to renew the bitter debate over Rushdie's novel in Britain. Moslem leaders said Britain was using double standards by banning the film without banning the book that inspired it.

MOSCOW (JULY 23) UPI - Two men tried to hijack an Aeroflot jetliner with 74 passengers to Sweden on Monday but its crew landed the plane in northern Russia and foiled the latest in a rash of air piracy bids from the Soviet Union, Tass said.

The official Soviet news agency said the hijacking attempt occurred on a flight bound from the Latvian capital of Riga to the port of Murmansk on the Barents Sea.

''Two young men staged an abortive attempt to hijack another Soviet airliner to Sweden today,'' Tass said.

Deputy Civil Aviation Minister Mikhail Timofeev said the two men threatened to blow up the plane if it did not fly to Stockholm. But the crew consulted with ground security and landed instead in Petrozavodsk, the regional capital of the Karelia region about halfway between Riga and Murmansk, he said.

The two hijackers, a 22-year-old student identified only by his last name of Kovalenko and a 27-year-old bricklayer identified only as Kuznetsov, were arrested when the aircraft landed in Petrozavodsk, Tass said. Timofeev said they did not have explosive devices or firearms with them.

At least six Soviet domestic flights have been hijacked to Sweden, Finland or Turkey in the past six weeks, and a spate of other attempts in the same period have failed.

Sweden honored a Soviet request last week and extradited Dmitri Semyonov, a 17-year-old accused of carrying out the June 9 hijacking that started the recent wave of air piracy.

Semyonov was the first person expelled from Sweden to the Soviet Union in 44 years. Soviets were previously granted political asylum and tried in Sweden, but Swedish authorities said they broke with past policy in the hope the extradition would discourage further hijackings.

Two other accused Soviet hijackers in Sweden are awaiting the government's

decision, as are two accused air pirates in custody in Finland.

HELOTES, TX (JULY 23) UPI - A 13-year-old boy was trapped in a water-filled well in a creek bed for more than eight hours before rescuers pulled him to safety.

''No blood, no broken bones. He's a fighter,'' Guy Burnett of Helotes said about his son, William Burnett.

The boy was pulled free just before midnight Sunday after rescue teams dislodged his leg, which had become stuck in the submerged well.

The eighth-grader from the small town in South Texas had been playing near Helotes Creek with his 13-year-old friend, Brandon Zumwalt, when Burnett noticed a whirlpool in the water and stuck his right foot in the center of it.

His leg was sucked up to the thigh into what authorities suspect is a core sampling well believed to be about 6 feet deep and 1 foot in diameter.

Similar wells litter the area to test for mineral content, although they also can be used to test for the presence of oil, gas or water.

The boy was prevented from freeing his leg from the well because of gravel and rocks lodged between his thigh and the sides of the well.

''I almost got him but the gravel kept pouring into the hole and packing his leg,'' Zumwalt said. ''I was afraid to leave him but I knew he needed help.''

Zumwalt ran to his home in a nearby neighborhood, and his parents summoned authorities.

When John Blaylock, volunteer fire chief in Helotes, arrived with other rescuers, they found Burnett in water up to his shoulder.

''He was lucky the water wasn't higher,'' Blaylock said.

Teams drilled around the area and painstakingly removed debris trapping the boy's leg. He was pulled from the well about 11:35 p.m.

HOUSTON (JULY 23) UPI - Domestic oil drilling activity increased last

week, industry surveys showed Monday. Baker Hughes Inc. reports 1,022 rotary rigs were working in the United States last week, up from 1,001 the week before and 830 the same week a year ago.

Meanwhile, drilling activity in the Gulf of Mexico was at the lowest level in about ten months but activity in European waters was at an all-time high, Offshore Data Services said.

Offshore Data Services found one less rig working in the Gulf of Mexico last week, dropping the utilization rate to 64.8 percent with 138 mobile offshore rigs under contract out of a fleet of 213.

Rig utilization in the Gulf was at the lowest level since September 1989, said Tom Marsh, Offshore Data's drilling editor. He said 129 rigs worked in European waters out of a fleet of 136 last week. The 94.9 percent utilization rate broke the previous record high set in 1985.

Worldwide, the utilization rate among mobile offshore rigs dipped slightly to 80.6 percent, with 539 rigs working out of a total fleet of 669.

Other rig counts included: Louisiana, 150 last week, 154 the week before and 136 the same week a year ago; New Mexico, 49, 55 and 31; Oklahoma, 143 132 and 106; Texas, 322, 319 and 234; and Canada, 103, 104 and 95.

PORTLAND, OR (JULY 23) UPI - A memorial service will be held Tuesday for Vernon ''Buster'' Wiles, who worked as a movie stunt double for 22 years, standing in for such stars as Errol Flynn and Humphrey Bogart.

Wiles, of Beaverton, died Friday at a Portland hospital of causes related to age. He was 79.

Wiles moved to Hollywood in the early 1930s and doubled for the swashbuckling Flynn for 13 years in such pictures as ''The Adventures of Robin Hood'' and ''They Died with Their Boots On.''

Wiles lived with Flynn for four years and co-wrote the book ''My Days with Errol Flynn.'' He also worked as a stunt double for Bogart, George Raft and Raymond Burr, among others.

Wiles later worked as a jockeys' agent and racing judge and did public relations for the Portland Meadows race track in the late 1970s. He also worked at Longacres in Seattle in a similar capacity.

Survivors include his wife, one son and three daughters. Private interment will be in Skyline Memorial Gardens.

#90204u0959 07/23/1990 ~United Press International
NEW YORK (JULY 23) UPI - The Dow industrials plummeted more than 100 points in heavy early trading Monday, shoved down by last week's earnings disappointments in the technology sector and by market sentiment that interest rates will not be coming down soon.

The Dow Jones industrial average, which sank 32.67 Friday, rebounded slightly but was still down 63.87 to 2897.27 shortly before 11 a.m.

Declines thumped advances 1315-158 among the 1,796 issues crossing the NYSE tape. Volume amounted to about 85,000,000 shares just before 11 a.m.,

compared with 47,250,000 in the same period Friday.

The Dow opened lower and was down about 30 points after a half hour of trading. Over the next hour, prices plummeted with the blue-chip index down as much as 106 points before rebounding on a combination of bargain hunting and program buying, used to profit on price spreads between stocks and stock-index futures.

"I think what precipitated this was that in the technology stocks, every earnings report has been a negative surprise," said Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co., referring to last week's earnings reports from Advanced Micro Devices and Texas Instruments, among others. "These stocks have been the market's leadership in the last two quarters," he said.

#90204u0970 07/23/1990 ~United Press International

GAINESVILLE, FL (JULY 23) UPI - Couples in violent relationships have sex more often than other couples, according to a study that also said spouses with common interests and several children are the most sexually active.

Next to youth, shared interests were the greatest indicator of sexual frequency in a marriage, according to a University of Florida study released Monday.

''Whether it's something as simple as taking walks together or enjoying the same hobbies, sharing activities outside the bedroom is a big predictor of how often married couples have sex,'' said Denise Donnelly, a sociologist who analyzed data from a nationwide survey of 5,292 married couples.

Unlike other studies, Donnelly's research found that partners in violent marriages had sexual relations more often than other couples.

''People in these marriages may have intercourse more because of a honeymoon period that follows each outbreak of violence,'' she said. ''These couples may not only fight with a passion but make up with a passion as well.''

Another explanation might be that people who are physically expressive in showing their anger might be physically expressive in other areas of their lives, including their sexual relationships, she said.

Income, education, race and place of residence had no bearing on how often a couple had sex, Donnelly found.

But contrary to other studies, she found that couples with more children

led the most active love lives.

''Other researchers have thought that the more children present, the fewer the uninterrupted opportunities for intercourse,'' she said. ''In reality, the more one has intercourse, the greater the odds of conceiving a child, and the more children one ultimately has.''

Not surprisingly, husbands and wives with school-aged children said they had sex more often than did those with younger children, Donnelly said.

''That is because preschoolers need more care and tend to intrude more,'' she said. ''Your 13-year-old probably wouldn't pop his head in the bedroom door and say, 'What are you guys doing?,' but your 5-year-old very well might.''

Donnelly found that marital ardor declines as couples age, both for biological reasons and because society doesn't expect senior citizens to have active sex lives.

''One reason for the decline may be that society frowns on grandma and grandpa having sex,'' she said. ''While young people are encouraged to have active sex lives, we tend to think of older people as being asexual.''

Married couples in their 60s and 70s have sexual relations on the average of three times a month, compared to the national average of 6 1/2 times a month, she said.

Donnelly also found that people who lived together before marriage had more active sex lives than couples who did not.

''Since these people are more individualistic and less prone to follow society's expectations, they may also be less likely to have 'normal' levels of coital frequency,'' she said.

The frequency of intercourse declines the longer a couple is married, probably because the partners become increasingly familiar, and in some cases bored, with each other, Donnelly said.

Other studies have shown that men tend to underreport sex in their marriages, while women tend to overreport it, she said.

''This pattern reflects the influence of traditional roles,'' she said. ''Since men often are the ones to seek sex and women are the ones to shy away from it, men tend to think they get sex a lot less - while women think they get it a lot more - than they actually do.''

#90204u1056 07/23/1990 ~United Press International

NEWSTEAD, NY (JULY 23) UPI - A Greyhound bus driven by a strike-breaking replacement driver slid off a rain-slick highway and rolled over Monday, injuring 13 passengers and the driver, state police said.

The driver, Steven McKnight, 41, Brookyln, was charged with driving too fast for road conditions. Police said it was raining and the road was slick when the bus slid off the road shortly after midnight.

The bus went off the right shoulder of the New York State Thruway, down a slight enbankment and rolled over, coming to rest on its wheels, troopers said. They said the bus would be checked for mechanical defects.

McKnight was hired by Greyound April 20th as a replacement for striking drivers who walked off the job March 19 in a contract dispute. McKnight had no previous accidents on his record, Greyound spokesman George Gravley said.

Those injured were taken to area hospitals with injuries ranging from cuts and bruises to broken bones and internal injuries. Six of the victims were thrown from the bus.

The injured included a 4-year-old girl, who suffered two broken arms. The most seriously injured person was listed in serious but stable condition at Buffalo's Millard Fillmore Hospital.

''One of our commercial vehicle inspectors is going to examine the bus for any mechanical difficulties,'' State Police Lt. Timothy Howard said, ''to make sure and certain that that was not contributory to the accident.''

The accident was the second Greyhound incident in the New York State in recent days. On Saturday, a Greyhound in Saugerties caught fire on the Thruway, sending the passengers' luggage up in smoke after a driver tried driving on a flat tire.

#90204u1122 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - The Dow industrials plummeted more than 100 points in heavy early trading Monday, shoved down by last week's technology earnings disappointments and interest concerns, before rebounding.

The Dow Jones industrial average, which sank 32.67 Friday, was still down 63.87 to 2897.27 shortly before 11 a.m.

Declines thumped advances 1315-158 among the 1,796 issues crossing the NYSE tape. Volume amounted to about 85,000,000 shares just before 11 a.m., compared with 47,250,000 in the same period Friday.

The Dow opened lower and was down about 30 points after a half hour of trading. Over the next hour, prices plummeted with the blue-chip index down as much as 106 points before rebounding on a combination of bargain hunting and program buying, used to profit on price spreads between stocks and stock-index futures.

"I think what precipitated this was that in the technology stocks every earnings report has been a negative surprise," said Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co., referring to last week's earnings reports from Advanced Micro Devices and Texas Instruments, among others. "These stocks have been the market's leadership in the last two quarters," he said.

Kaminsky also said computerized program selling and last week's comments by Federal Reserve Chairman Alan Greenspan that the Fed would like to lower interest rates but cannot helped "cast a major psychological cloud over the market.

In the U.S. Treasuries market, the long bond was down about 23/32 in early trading, helping push stocks lower, but rebounded as investors sought a safe haven during the market's freefall and was up 8/32 in late morning trading.

The plunge in the Dow came on the heels of recent sharp declines in the Tokyo market, where the major index has lost 3.5 percent of its value in the last two trading sessions.

NYSE regulations currently call for a trading halt when the Dow falls 250 points.

On the trading floor, McDonalds was the most active issue, showing a loss of more than $2 a share, as did several Dow components. The stock has tumbled 2 7/8 to 32 5/8 after failing to meet Wall Street expectations in its earnings report Friday.

#90204u1161 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - Hospitals are losing millions in caring for the uninsured, and their generosity and patience for national health care are running out, hospital officials told a Senate Finance health subcommittee Monday.

''The crush of the uninsured, the underfunding of Medicaid and Medicare, AIDS, drug abuse, exorbitant medical liability rates and a government and society unwilling to see the health of the less fortunate as a share responsibility leaves financially strapped hospitals as the provider of

last resort,'' said Edward Thomas, president of Detroit Receiving Hospital.

''Until now, hospitals have served as the safety net for those without insurance. But hospitals can no longer sustain the burden alone,'' he said calling for national health insurance for all.

The amount of hospital care uncompensated by insurance in 1988 was more than $8 billion, or 5 percent of hospital expenses, more than twice the 1980 amount, subcommittee chairman Sen. Donald Riegle, D-Mich., said. Community hospitals also are feeling the financial pinch, with 65 such facilities closing in 1989.

''More than ever before, this country needs a national strategy for reforming our health care system,'' Riegle said. ''I believe that we can and must accomplish the goal of universal access to affordable and high quality health care in this country.''

Thomas said 23 percent of his hospital's admissions are not reimbursed by any insurance program. Statewide, Michigan hospitals lost $250 million last year providing care for those who could not, or would not, pay.

Barbara Lord Watkins of Parkland Memorial Hospital in Dallas, where President John Kennedy died of an assassin's bullet, said the nation's public hospitals are shouldering much of the care for the poor.

''In 1988, uncompensated care represented 34 percent of all discharges and 29 percent of all inpatient days,'' Watkins said, adding 70 percent of Parkland's patients quality for ''charity care.''

''While we wait for enactment of universal health coverage, I urge you to protect the Medicare and Medicaid system and to consider additional payments to those hospitals providing trauma care, treatment for AIDS patients and care for alcohol and drug abuse,'' she said.

Lawrence McAndrews, president of Children's Mercy Hospital in Kansas City, Mo., said his facility lost nearly $4 million last year for providing free care to the uninsured.

''Even when we are able to meet our expenses, there is little left over to fund new programs or purchase much-needed equipment. Without philanthropy and an endowment, we would go under,'' he said.

Congress is considering several bills that would provide some form of national health insurance.

-30- 2952

#90204u1204 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - President Bush and Congress try to pick up the pace of their budget summit this week, under pressure to forge a deficit-reduction agreement before an already difficult task faces additional political complications.

The negotiations, held mainly on Capitol Hill to this point, are moving to the White House, where Bush will meet with congressional leaders for 90 minutes Tuesday and an hour each of the following three days in a search for $50 billion or more in spending cuts and revenue increases next year.

''This is a period of very intense negotiations,'' White House press secretary Marlin Fitzwater said Monday. ''The president wants to give it a major push.''

When Bush agreed May 6 to open negotiations on a bipartisan deficit-reduction plan, the idea was that his personal involvement would be limited, called upon only when needed to inject momentum into the process.

With Congress as little as two weeks away from a summer recess that could postpone further work until after Labor Day, the time for presidential intervention has arrived.

Fitzwater acknowledged the decision to accelerate the process followed limited progress to date. The time, he said, has come for ''hard bargaining'' and ''hard decisions'' that will be central to any comprehensive agreement.

Senate Republican leader Robert Dole of Kansas said Sunday that Bush will become ''much more active'' in ''pushing Congress,'' despite complaints from some Democrats that it is the administration that has been slow to come forward with specific proposals, especially in the touchy area of taxes.

On the NBC News program ''Meet the Press,'' Dole said members of both parties agree that ''the posturing stage surely should be over.'' In contrast to the partisan fireworks that erupted last week in the Senate over civil rights legislation, Dole said the budget summit has reached the point where there is ''good faith on both sides.''

Time, however, is running short and Dole conceded it was ''probably not realistic'' to expect an agreement before Congress recesses Aug. 3 or 10.

''It would take something short of a miracle,'' he said.

Dole acknowledged that a curtailment of itemized deductions for such things as mortgage interest payments, charitable contributions and state and local taxes was among the options under consideration for raising tax

revenues, perhaps to be accepted by Republicans in exchange for a cut in capital gains taxes. Both would be aimed at wealthier taxpayers.

But House Republicans went on record last week against higher taxes, and Dole emphasized that no firm decisions have been made on how to achieve a targeted $50 billion in savings next year and $500 billion over five years.

''Everything is on the table,'' he said. ''It's wide open.''

If the budget talks spill over into September, they risk entanglement in other anticipated political conflicts between Bush and Congress, not the least of which is the nomination of a Supreme Court justice.

That also would bring the negotiations perilously close to the Sept. 30 end of the fiscal year. Failure to approve a deficit-reduction plan by then would trigger some $100 billion in automatic spending cuts - disrupting and forcing reductions in virtually every service provided by the federal government - to bring the deficit down from a projected $169 billion to a legal limit for next year of $64 billion.

#90204u1207 07/23/1990 ~United Press International

BEIJING (JULY 23) UPI - Mongolians turned out in large numbers to vote in the country's first multi-party election, which local and foreign observers said Monday was conducted fairly and in an atmosphere of excitement.

Officials estimated that turnout in Sunday's election was more than 80 percent in many precincts in Ulan Bator, the Mongolian capital, according to observers and activists reached by telephone from the Chinese capital.

Mongolia, wedged between the Soviet Union to the north and China to the south, was ruled by feudal warlords from the 13th century reign of Genghis Khan until 1921, when communist revolutionaries declared the nation's independence.

A small democracy movement sprang up in December and mounting protests eventually forced the ruling People's Revolutionary Party to call for multi-party elections. Inspiration for the movement came largely from the stunning ''perestroika'' reforms in the Soviet Union, Mongolia's longtime communist mentor.

About 1.2 million of Mongolia's 2 million nomads, villagers and city dwellers were eligible to vote in the primary, the first step in selecting the 430-seat Great People's Hural, or parliament, which in turn will select a ruling 50-member ''small'' Hural.

The top two vote-getters in the 430 parliamentary districts will face off in a general election next Sunday. Seats in provincial and local assemblies also were up for grabs in Sunday's polling.

Results in the nation's first multi-party election had been expected to be released by late Monday. But officials postponed the scheduled late Monday announcement of the election results, saying they wanted to accommodate a planeload of Beijing-based journalists whose flight had been delayed. The news conference was rescheduled for Tuesday morning.

The voting was meaningful in only 273 of 430 districts, because 44 districts had only one candidate and 113 had two, all of whom were assured places on next Sunday's ballot.

''The elections were quite fair, but the results are not yet clear,'' said Sanjaasurengiyn Oyuna, 26, whose brother Dzorig is a leading candidate of the opposition Mongolian Democratic Union.

''The Democratic Union was showing good results,'' she added.

One of a score of foreign diplomats and observers who monitored the voting at 10 urban polling places and one in the countryside said they witnessed no irregularities, although some opposition candidates said they lacked resources to mount effective campaigns.

''Our initial impression is that the primary was very well organized and carried out fairly and honestly,'' the diplomat said.

''People were aware, interested and even enthusiastic about this first multi-party election, although I'd stop short of calling it festive. You'd have to say this was a success on the road to democracy,'' he said.

There was no noticeable increase in public security and voters cast ballots in an orderly manner. Candidates widely respected an election-day ban on campaigning.

Mongolia's five fledgling opposition parties were only legalized two months ago, and Communist candidates were expected to do well, especially in the vast and sparsely populated desert hinterland.

Many Mongolians said it long had been a tiresome duty to vote in polls the Communists were assured of winning and said it was the element of choice that stirred their enthusiasm, the diplomat said.

''People seemed surprisingly interested and said they were aware that this vote was very different from those in the past,'' he said.

DALLAS (JULY 23) UPI - A prescription drug taken by thousands of Americans to control epileptic seizures is in short supply in at least four states, company officials confirmed Monday.

Officials for Ciba-Geigy, the Swiss drug manufacturer, said higher-than-expected demand and manufacturing problems have created spot shortages of carbamazepine, which is sold under the brand name Tegretol.

''We do have a shortage,'' said Cathy Kernen, a spokeswoman at the company's offices in Summit, N.J. ''We hope not for long, but we're afraid to say at this point how long. It might be a couple of months.''

Shortages of the drug have occurred most frequently in the past two months in Texas, Ohio, Indiana and parts of California, Kernen said.

In February, the Food and Drug Administration asked Ciba-Geigy and makers of the drug sold under more than 15 generic labels to change the drug's packaging to keep out moisture. At that time, the FDA warned the drug could lose one-third of its effectiveness if stored in bathrooms or other humid areas.

Epilepsy patients had complained carbamazepine sometimes varied in its ability to prevent seizures. FDA and University of Tennessee researchers found that when carbamazepine tablets were exposed to humidity they hardened and then dissolved poorly in liquids.

Kernen said Ciba-Geigy's current shortage is not due to the humidity problem, but to equipment problems at a Swiss plant where the active ingredient for Tegretol is made.

''It's something totally mechanical, literally mechanical in the production line,'' she said.

Ciba-Geigy has received no complaints from doctors or patients about the humidity problem since the FDA alert, she said.

More than 2 million Americans have epilepsy, and an estimated one patient in 100 suffers recurring seizures. Although the root of most epilepsy is unknown, the symptoms are caused by brief changes in the brain's electrical system.

The director of the Dallas Epilepsy Association, Carolyn Smith, said people who depend on carbamazepine are worried. Smith has received about two dozen calls in the past month from people who have had problems filling their Tegretol prescriptions.

''They could have a seizure. That's the whole point of them taking the medication. So it's important for them not to miss the medication or skip it,'' Smith told the Dallas Times Herald.

The shortage prompted Ciba-Geigy to alert the FDA, drug wholesalers, pharmacists and physicians nationally as well as the Epilepsy Foundation of America, which has notified its members.

Ciba-Geigy also suggested to pharmacists that they provide no more than 100 tablets per prescription, Kernen said.

The drug company has set up a toll-free hot line that pharmacists and patients can call to make emergency orders for overnight shipments of Tegretol to pharmacies.

WASHINGTON (JULY 23) UPI - Marilyn Quayle, wife of the vice president, received a get well telephone call Monday from President Bush as she recovered from gynecological surgery at Bethesda Naval Hospital, a spokesman said.

Mrs. Quayle's office refused to disclose the type of operation she underwent Saturday, which followed a cervical examination for cancer cells.

There have been unconfirmed reports that Mrs. Quayle had a hysterectomy after cancer cells were detected in her cervix.

White House press secretary Marlin Fitzwater said the president called Mrs. Quayle Monday ''to wish her a speedy recovery.''

''She's doing well,'' he added. ''Her operation was successful.''

Vice President Dan Quayle gave a thumbs up gesture when asked about his wife but has not commented publicly about her condition.

Anna Perez, the first lady's press secretary, said that Mrs. Bush telephoned the vice president to inquire about his wife's health.

Fitzwater and Quayle's press spokesman, Dave Beckwith, told reporters that the family has chosen ''not to disclose any details'' of her surgery.

Beckwith said that Mrs. Quayle, who will be 41 Sunday, will be home ''later this week.'' Friends gave her an advance roller skating birthday party last week.

''She's doing well at Bethesda,'' Beckwith said. ''We're not going to say

what the diagnosis is.''

Beckwith had announced earlier that Mrs. Quayle would be back on her regular schedule of activities in four to six weeks.

Aides indicated that her surgery was pre-planned and not an emergency procedure.

#90204u1306 07/23/1990 ~United Press International

LONDON (JULY 23) UPI - A major investigation began Monday to discover whether aliens, whirlwinds or practical jokers are the cause of mysterious symmetrical circles that appear in crops across southern England.

''Operation Blackbird'' involves the continuous operation of more than $1.8 million worth of heat, light and sound detectors during the next three weeks to try and record the creation of the circles.

Experts have not been able to explain the circles, which for the past decade have been appearing mostly in the southern English counties of Wiltshire and Hampshire at mid-summer.

''We want to show that it is not a hoax,'' said David Morgenstein, a member of the investigation being run by the British Broadcasting Corp. and a Japanese television network. ''Crop circles are caused by something else than young farmers turning out of the pub or little green men in spaceships.''

Organizers have tried to deploy equipment over as wide an area as possible but concede that it will be random chance if the infrared cameras and spectrum sensors record a circle being created.

The phenomena appear as a flattened section in crops, usually wheat, and are very symmetrical with precise boundaries. The appearances have been getting increasingly complex, some now involving bar-shapes and complex loops, and can be hundreds of feet long.

Numerous witnesses have reported seeing airborne orange lights in locations where circles have appeared, fueling theories that spaceships from an alien planet have landed and crushed the crops.

Ideas that the circles are caused by local pranksters have been largely rejected because there are never any signs of a tractor or person going to the location. Surrounding crop areas remain untouched.

A conference last month of various experts concluded the circles were probably the result of freak melding of hot and cold air, creating

vortexes of energy that spun around at ground level, causing patterns of damage to appear in the crops before dissipating.

But Colin Andrews, an author of a book on the subject and the organizer of Operation Blackbird, rejected the whirlwind theory.

''There is no correlation in the data to support it,'' he said. ''We have here something that is extremely graphic, something that is extremely symbolic. I think the bottom line is that we have an energy field that appears to know where it is, an energy field that has optical appreciation.''

Andrews firmly dismissed the hoax theory, but would not reject the possibilities of spaceships.

''We do have here a phenomenon that is associated with an airborne component, at night, often lumninous and orange in color,'' he said. ''You cannot go on year after year disbelieving credible witnesses.''

#90204u1334 07/23/1990 ~United Press International

SEOUL, South Korea (JULY 23) UPI - The South Korean capital boomed with radical political action Monday as 76 opposition politicians resigned from the National Assembly in an attempt to force new elections and as the government sought North Korea's approval to open the border for five days in August.

Sixty-nine members of opposition leader Kim Dae Jung's Party for Peace and Democracy sent in resignations to Assembly Speaker Park Jyun-kyu. Five lawmakers of the minor opposition Democratic Party followed suit and two other opposition politicians - one an independent and another serving a prison term for making a secret visit to North Korea - also tendered resignations.

With some previous resignations, a total of 80 assembly members tried to force the government to call new elections, saying a recent merger of the ruling Democratic Liberal Party with minor parties had subverted a Korean vote that had left the governing party without a parliamentary majority.

The ruling party, which now controls more than two-thirds of 299-seat assembly, said the opposition attempt to dissolve Parliament will be turned down. A legislator's resignation requires consent by a majority of the Assembly.

The political resignations also protest the government's new military command system, which the opposition contends will weaken civilian control over the military, and a government plan to restructure the nation's

broadcast system.

Meanwhile, South Korea's diplomatic effort to briefly open the border with North Korea moved ahead Monday, but response from North Korea threw many roadblocks in the way of the government proposal.

On Friday, the North almost immediately rejected South Korean President Roh Tae-woo's border-opening proposal by laying down conditions the South would find difficult to accept.

But Monday, both North and South still were talking about convening talks Friday to discuss the border opening. Roh proposed Friday to open the border for five days beginning Aug. 13 to mark the 45th anniversary of Korea's liberation from Japanese colonial rule.

The North's conditions for border-opening include removal of a border wall that it asserts was built by the South, abolition of a national security law and the release of South Koreans jailed for unauthorized trips to the North.

North Korea threw more monkey wrenches into the equation over the weekend by proposing that talks include political parties as well as government leaders, meaning inclusion of South Korean opposition politicians in the talks.

North Korean Prime Minister Yon Hyong-muk also proposed that the border remain open all the time and Maj. Gen. Choe Ui-ung demanded that both sides withdraw weapons and armed personnel from Panmunjom.

Northern officials have met to discuss the plan with officials of U.N. force along the border.

U.S. Navy Rear Adm. Larry G. Vogt, speaking for the U.N. command, said, ''The U.N. Command supports the efforts of both sides' negotiations to unify the Korean people and wish them every success.''

Vogt said he will relay North Korean proposals to South Korean government officials. He said new offers were made by the Seoul government Monday morning.

ATLANTA (JULY 23) UPI - The non-stop action in ''Die Hard 2'' may have been too much for Kami Core, who went into labor midway through the movie and gave birth 20 minutes later in the theater restroom.

Core, 18, wasn't particulary concerned going to the theater Saturday since

she wasn't due for almost two months.

But about halfway through the action thriller, Core began feeling labor pains. She went to the restroom, where paramedics were summoned. About 20 minutes later, she gave birth to Cortney Brion Samuels on the restroom floor.

Seven weeks premature, the infant and her mother were taken to Kennestone Hospital. Core was to be released Monday but Cortney won't go home for another two weeks.

''Stuff like that happens on television, but it never happens in real life '' Core said.

#90204u1348 07/23/1990 ~United Press International

LIBBY, MT (JULY 23) UPI - A ''real pretty'' female Canadian grizzly bear has been transplanted to the Cabinet Mountians of Montana as part of an experiment biologists hope will boost the U.S. grizzly population.

The 2 1/2-year-old, 157-pound bear was captured in British Columbia Saturday, fitted with a radio collar and released in the Montana wilderness.

The bear is the first grizzly to be moved into northwest Montana to bolster the grizzly population. Previously, only ''nuisance'' bears have been moved.

''She'll probably take a week to settle down,'' said Chris Servheen, grizzly coordinator for the U.S. Fish and Wildlife Service.

The operation followed four years of planning and debate over whether to transplant grizzlies into the Cabinet Mountains.

Grizzlies are listed as a threatened species in the lower 48 states. The population is recovering in the Northern Continental Divide and Yellowstone ecosystems of Montana, but not in the Cabinet ecosystem.

Servheen estimated 12 to 15 grizzlies live in the Cabinet Mountains south of the Kootenai River and north of the Clark Fork River.

''This is an excellent start,'' Servheen said. ''She's a real pretty bear, gold colored with dark legs.''

If the transplant is successful, another two bears will be moved next year.

#90204u1350 07/23/1990 ~United Press International

SRINAGAR, India (JULY 23) UPI - About 150,000 state government employees staged a strike Monday to protest alleged human rights abuses by security forces in the Kashmir Valley, where 13 Moslem militants and two soldiers died in separatist violence, officials said.

The militants were killed during two encounters with security forces who were patrolling the Indo-Pakistan border near the town of Kupwara, about 65 miles northwest of Srinagar, a state government spokesman said.

The official said that security forces spotted a group of militants crossing into Indian territory and ordered them to stop. When the group ignored the orders and began to run, security forces opened fire, killing nine militants, the official said.

Four other militants were killed by security forces in a similar incident along the border, he said.

Several machine guns, five rocket launchers and a rocket were recovered from the two sites, the official said.

Earlier, militants ambushed a security force patrol in Kupwara, killing two members of the party, the official said. No further details were immediately available.

New Delhi believes that Pakistan is arming and training Moslem militants waging a violent separatist movement in the Kashmir Valley, home to the region's 4 million Moslems.

Islamabad denies the allegations but admits to offering moral support to the movement.

Normal life in the valley has been disrupted since mid-January when security forces opened fire on separatist demonstrators, killing at least 35 people.

Since then, more than 600 people have died in near-daily bombings, arson and assassinations. Tens of thousands of Indian troops and paramilitary forces deployed to the region have failed to crush the uprising.

The presence of security forces is opposed by virtually all Kashmiri Moslems, who have charged them with repeated violations of human rights.

On Monday, about 150,000 Moslem Jammu and Kashmir state government employees in Srinagar and other towns in the Kashmir Valley began a three-day strike to protest alleged atrocities committed by security forces against civilians, government sources said.

They said that although Hindu employees did not join the strike, normal work in government offices was paralyzed.

The strike disrupted power and water supplies in Srinagar, the state's summer capital, and many shopkeepers closed their businesses to show support for the striking employees, the sources said.

Militants claim Kashmiri Moslems need a separate state because of years of discrimination by the Hindu-dominated central government. They also claim New Delhi reneged on a pledge to hold a plebiscite to determine if the region would remain part of India or would merge with Pakistan.

Both India and Pakistan claim sovereignty over Kashmir, with New Delhi controlling two-thirds of the region and Islamabad controlling the remainder. The two neighbors have fought three wars in the region since gaining independence from Britain in 1947.

#90204u1383 07/23/1990 ~United Press International

MIAMI (JULY 23) UPI - A weak tropical depression in the mid-Atlantic appeared headed for the Caribbean Monday, but forecasters said it was too soon to tell whether its 35-mph winds would reach tropical storm strength.

At 11 a.m. EDT Monday, tropical depression No. 2 was about 700 miles east of Trinidad, at latitude 9.5 north, longitude 51 west. It was moving westward at about 20 mph, and was expected to continue that motion through Tuesday.

That path would take it between Barbados and Trinidad and into the Caribbean in about three days.

Forecasters at the National Hurricane Center said little change in strength was expected over the next 24 hours.

If the system's sustained winds reach 39 mph, it would become Tropical Storm Arthur, the first named storm of the 1990 Atlantic-Caribbean hurricane season.

The year's first tropical depression brought heavy rains to Cuba in late May, before the official start of the six-month hurricane season, which began June 1. The season continues through Nov. 30.

#90204u1414 07/23/1990 ~United Press International

CHARLOTTE, NC (JULY 23) UPI - Former millionaire preacher Jim Bakker

hasn't paid a dime of the $500,000 in fines assessed last year and officials said Monday they may attach the 11 cents an hour he now earns cleaning prison toilets.

U.S. Attorney Tom Ashcraft, releasing a list of the Top 10 criminal debtors in the western district of North Carolina, said the government will pursue every means possible to make Bakker pay up.

''We pursue every legal way to collect these debts,'' Ashcraft said. ''But some people refuse to make any effort to pay what they owe. Garnishment of wages for federal debts will be possible in all states if Congress passes legislation now pending.''

Bakker, 50, is serving a 45-year prison sentence at the Federal Medical Center in Rochester, Minn., for his conviction on 24 counts of fraud and conspiracy stemming from the way he raised and spent money at PTL. He was also ordered to pay $500,000 in fines for fleecing his flock but is appealing both the conviction and the sentence.

Bakker could not be reached for comment on his debt but one of his lawyers James Toms of Hendersonville, N.C., said he has no money to pay the fine. Toms laughed when asked about the possible garnishment.

''I'll tell you what, those folks are all heart,'' Toms said.

Bakker, whose fall from grace started with the Jessica Hahn sex scandal and cost him his PTL ministry, shares a prison cell with three other men, earning 11 cents an hour as an orderly. Out of that he must buy his own toiletries, postage and any other item he needs.

Bakker was not at the top of the Top 10 debtor list. That dubious distinction went to two of his aides at PTL, interior decorator James Taggart and his brother, David Taggart, who was Bakker's personal assistant.

The Taggart brothers were convicted last year of income tax evasion for failing to pay taxes on more than $1 million they embezzled from PTL. Each man was sentenced to more than 17 years in prison and they were ordered to pay $535,174.64 in fines apiece. Bakker was No. 3 on the list, owing $501,025.

Sixth on the list was Richard Dortch, Bakker's top lieutenant at PTL who now resides at the Federal Prison Camp at Eglin Air Force Base in Florida.

He pleaded guilty in the PTL case and was fined $199,975 in addition to an eight-year prison term that has since been reduced to 2 1/2 years because he testified against Bakker.

#90204u1439 07/23/1990 ~United Press International
CAIRO (JULY 23) UPI - Jordan's King Hussein began talks with Egyptian President Hosni Mubarak Monday on cooling the midsummer oil dispute between Iraq and Kuwait as Iraq's state-run media blasted its Persian Gulf neighbor as an American stooge.

Egyptian foreign ministry officials said Iraq's charges that Kuwait and another Gulf producer, the United Arab Emirates, had been dumping crude oil on world markets, would ''figure very high on the agenda'' set for the meeting, which is to take place in the Mediterranean port city of Alexandria.

Meanwhile in Baghdad Monday, four government-run Iraqi dailies called Kuwaiti Foreign Minister Sheikh Sabah al Ahmad al Sabah ''America's man in the region and the executor of (U.S.) policy in Kuwait.''

The newspapers said the Kuwaiti minister ''was behind his country's oil policy, which has the goal of weakening Iraq.''

Last Thursday, Sabah accused Iraq of pumping oil from Kuwaiti oil fields despite repeated Kuwaiti protests.

The dispute erupted six days ago, when Iraqi President Saddam Hussein accused Arab Gulf states of harming Iraq's oil-based economy by dumping crude on world markets and forcing world prices down.

Iraqi Foreign Minister Tareq Aziz on Wednesday then specifically accused Kuwait of causing Iraq to lose billions of dollar in oil revenue by driving prices lower through dumping excess crude on world markets.

There were signs that Egypt and Jordan would side with Kuwait and the UAE if the crisis got worse. Both Jordan and Egypt receive substantial aid and investments from the Gulf Arab oil producers.

Iran, Iraq's arch foe and opponent in their eight-year war, has indicated that it would support Baghdad's case against the overproducing Gulf nations. Iran's economy also has been hurt by lower oil prices.

Two Iranian newspapers said iraq was right to demand that Kuwait and the UAE adhere to their quotas.

Although Iraq and Iran have not yet signed a comprehensive peace treaty after their 1988 ceasefire, their foreign ministers have met and a war of words between the two neighbors has ceased.

State-run Cairo Radio said Iraqi Foreign Minister Tareq Aziz, who arrived

in the Egyptian capital Sunday, would also take part in the Alexandria talks.

Aziz denied in remarks made to reporters after talks with Mubarak Sunday that his country, which maintains one of the biggest and most experienced military forces among the Arab nations, was threatening either Kuwait or the UAE.

On the contrary, Aziz said, ''it is Kuwait and the UAE which are threatening the Iraqi economy.''

Iraq's outburst came as oil ministers of the 13-nation Organization of Petroleum Exporting Countries were preparing for their semiannual conference in Geneva Thursday to discuss future production limits. Jordan and Egypt are not members of the cartel.

OPEC pumps more than a third of the world's crude and attempts to support higher prices by limiting its output.

Flagrant violations of their OPEC quotas by Kuwait and the UAE led to overproduction by other members, especially Saudi Arabia. The result has been a world glut of crude oil and declining prices.

The UAE had refused to accept any quota at the last semiannual meeting in November and has been pumping 1 million barrels above its previously assigned 1.1-million-barrel daily limit.

A meeting two weeks ago of six Gulf producers, led by Iraq and Saudi Arabia, in the Saudi resort of Jeddah set the outlines of a new OPEC production accord,with the UAE tentatively agreeing to abide by a daily output limit of 1.5 million barrels.

Oil analysts said Iraq hoped the past week's ''war of words'' would persuade OPEC members to reach a satisfactory agreement in Geneva and then stick to quotas that would enable world oil prices to rise.

#90204u1453 07/23/1990 ~United Press International

DETROIT (JULY 23) UPI - The National Auto Dealers Association Monday praised the new sales and service agreement between General Motors Corp. and its 9,600 dealers, saying for the first time dealers will have a significant voice in GM's decision-making process.

NADA President Ray Green said the new five-year contracts, which take effect Nov. 1, embody much of the association's model agreement, and said he hoped other manufacturers would adopt similar philosophies and practices in theirs.

''GM offers great opportunity for dealers to become formally involved in the entire marketing process for automotive products,'' he said.

NADA, which represents over 20,000 franchised new car and truck dealers, both import and domestics, helped GM develop the new pact, which Green called ''No. 1 in the industry.''

GM will distribute and explain it to its dealers over the next 45 days, while NADA will send complete analysis of the agreement.

Of the dealers contacted who had already seen the agreement, several said they had only glanced at the document because briefings were scheduled for next month.

''But it really doesn't matter much because if you don't sign it, they stop sending you cars,'' said Dennis Slatkin, owner of Dexter Chevrolet in Detroit. ''You can't even change a comma.''

Green said that while the new agremeent does not contain all of the provisions wished for by NADA, it is a vast improvement over the 1985 pact.

For the first time, for instance, sections of the agreement differ along the lines of GM's six current vehicle divisions.

''That is something the dealers asked for,'' GM spokeswoman Karen Longridge said. ''They must maintain their identity, because sometimes what's right for a Cadillac dealership is not right for a Pontiac dealership.''

The new GM pact also calls for novel dispute-resolution mechanisms aimed at avoiding prolonged legal battles between dealers and manufacturers. Instead of a third-party mediator - usually a retired judge - a panel of dealer and factory representatives will hear disputes.

Dealers will also be able to advise and counsel GM on standards relating to dealership design, image, equipment and training.

''The result is a partnership document of which we can all be proud,'' said GM Executive Vice President Lloyd Reuss, who helped develop the pact during the last 18 months.

Reuss was scheduled to become GM's president Aug. 1.

GM's new Saturn Corp. subsidiary, scheduled to start selling a new line of cars under a seventh nameplate this fall, has a separate franchise agreement which GM still considers the most advanced in the industry.

''This is as close to the Saturn one as anybody else in the industry has gotten,'' Longridge said.

#90204u1481 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - Office occupancy rates in the United States and Canada have fallen to 81.8 percent at mid-year from from 83.1 percent a year ago, a building owners association said Monday.

The mid-year survey, by the Building Owners and Managers Association International, also showed an increase in suburban occupancy rates apparently at the expense of downtown office markets.

The association's North American office market review reported an 0.9 percent decline in downtown occupancy rates to 84.9 percent while suburban occupancy rates gained 0.3 percent to 79.3 percent.

The overall U.S. office occupancy rate totaled 81 percent, down 0.1 percent from year-ago levels, including 83.8 percent for downtown markets and 79.3 percent in the suburbs.

The Canadian office market posted an overall occupancy rate of 88.6 percent, up 1.2 percent from year-ago levels, including 90.1 percent in downtown areas and 85.3 percent in suburban markets.

Added amenities such as free parking are helping suburban markets attract and keep tenants, the association said.

The declining occupancy rates are good news for tenants, who will continue to be offered incentives, such as rent concessions, moving allowances and equity participations, by hungry building owners eager to fill their properties, the association said.

Office rents also continue to ''drift downward,'' the association said.

Roland Downing, the association's president, attributed the overall decline to the current conservative lending environment and weak, overbuilt conditions in many urban areas in the United States and Canada.

''We do not anticipate an improvement in occupancy rates for the next year as absorption rates catch up with new office inventory,'' Downing said.

Downing said rates will be affected by the sale of office properties by the Resolution Trust Corp., the government agency responsible for selling the assets of failed thrifts, cutbacks in defense spending and the shift of foreign investment away from North America.

Of the 33 metropolitan markets studied, Southern California's Orange County office market posted the greatest decline at mid-year, with the occupancy rate dropping 3.8 percent to 76.8 percent, the association said.

The greatest occupancy increase was reported in Edmonton, Alberta, which gained 3.9 percent to 85.1 percent from year-ago levels.

Vancouver, British Columbia, posted the highest occupancy level in North America at 92.7 percent, while Oklahoma City, once teeming with growing oil companies, reported the lowest occupancy rate at 73 percent.

The highest U.S. occupancy rate, 90 percent, was reported in Cambridge, Mass.

#90204u1489 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - The city's fire chief and a candidate for Congress testified Monday at Mayor Marion Barry's drug and perjury trial, as defense lawyers tried to show Barry attended an official meeting the morning a drug dealer testified she sold him crack cocaine.

Defense lawyer R. Kenneth Mundy said he can prove that Barry could not have bought crack from drug dealer Lydia Pearson at the Frank D. Reeves Municipal Center on the morning of Sept. 7, 1988, as Pearson charged and as the government alleges in one of 10 misdemeanor cocaine possession counts.

Pearson testified she sold Barry crack at about 10 a.m. that day, handing him a completed city government job application at the same time.

Mundy said Barry was at an early morning ribbon-cutting for a Safeway supermarket, and then went directly to a meeting at fire department headquarters on the city's ambulance service that lasted until nearly noon.

Both Fire Chief Ray Alfred and Joseph Yeldell, the former director of the city's Office of Emergency Preparedness, said Barry was at the meeting, which was scheduled to begin at 10 a.m., but neither was sure what time he arrived.

Yeldell testified Barry was late, which Mundy acknowledged, and said the meeting lasted about an hour and 15 minutes.

''We did have a slight delay in the meeting,'' said Yeldell, now a candidate for the city's non-voting delegate seat in Congress.

Assistant U.S. Attorney Judith Retchin said the meeting - held only five blocks from the Reeves Center - started about 10:40 a.m. and ended about 11:50 a.m., giving Barry time to consummate the drug deal.

Mundy contends the meeting began only minutes late.

''The focal point is the time of his arrival,'' Mundy said. ''No one disputes that he was there. No one disputes that he opened the meeting.''

Retchin said that in rebuttal - after the defense rests - the government plans to show jurors a television news tape of the meeting. She said the tape shows a wall clock at one point and will help establish that Barry was 40 minutes late to the meeting and thus had enough time to purchase the crack.

In the tape, Barry is heard apologizing for being late, explaining he was dedicating a new Safeway store.

Retchin asked U.S. District Judge Thomas Penfield Jackson to order that portion of the tape excluded.

''Of course, Mr. Barry is not going to say he is late because he was buying crack from his supplier,'' she said.

Mundy also said he plans to call a police officer to the stand to testify he saw Pearson entering a known crack house during time she was testifying this month.

Also Monday, the start of the eighth week of the trial, Mundy said he expected to call the husband of a government witness to the stand.

Carol Bland Jackson had testified she was present when Barry snorted cocaine at a city apartment in the summer of 1986.

But Mundy said Jackson's husband, Roscoe Jackson, would testify he heard former model Rasheeda Moore offer his wife $5,000 to ''back her up'' about Barry's drug use on that occasion.

Moore had testified she and Barry used cocaine more than 100 times together. Mundy contends she lied under oath and set out to get Barry after he took another lover when their two-year extramarital relationship ended in 1988.

Retchin said Roscoe Jackson, who is in jail on ''11 or 12 prior convictions,'' is not a credible witness.

Judge Jackson told Mundy that, if he plans to call Roscoe Jackson, he must first recall Carol Bland Jackson to the stand to testify directly about the allegation. Mundy said he would call both.

Barry is charged with three felony counts of perjury and 11 misdemeanors:

10 counts of cocaine possession and a single charge of conspiracy to possess cocaine.

If convicted of all 14 counts, Barry could be sentenced to 26 years in prison and fined $1.85 million.

Barry, 54, was arrested Jan. 18 at the downtown Vista International Hotel after being lured to the hotel by Moore, who was working with the FBI.

Barry was videotaped smoking crack cocaine, but has never acknowledged a problem with illegal drugs. He went through seven weeks of in-patient substance abuse treatment after his arrest, claiming his addiction was to alcohol and prescription drugs.

#90204u1490 07/23/1990 ~United Press International

LONDON (JULY 23) UPI - Prices on the London International stock exchange plummeted in late trading Monday, apparently reacting to the sharp plunge on Wall Street.

The blue-chip Financial Times 100-stock index, which gained 12.8 points Friday, fell 40.4 points to 2,359.7. The narrower top 30 industrial average plunged 31.0 points to 1,867.1.

Volume amounted to around 370 million shares, compared with 437 million shares changing hands Friday.

Analysts said worries that U.S. interest rates will not be coming down in the near future and disappointing earnings in the technology sector that pushed the Dow Jones industrials sharply lower in New York and dragged the London market down in its wake.

Earlier, a government report showing Britain's June merchandise trade balance came in better than had been expected nudged prices slightly higher.

The Central Statistical Office reported Britain's June trade balance on a seasonally adjusted basis showed a deficit of around $2.47 billion, compared with a $2.40 billion deficit in May.

Among the most widely traded stocks, Reuters fell 68 cents to $22.23 ahead of the release Tuesday of financial results.

Thorn EMI fell 56 cents to $13.10 on rumors of a $90.6 million acquisition of Filmtrax.

Firmer crude oil prices continued to help oil stocks. Burmah Oil gained 13

cents to $12.18 and Lasmo jumped 18 cents to $7.78.

Hopes of expansion into Eastern Europe boosted Cable and Wireless 16 cents to $9.57.

Among some of the day's other highlights, Speyhawk jumped 31 cents to $4.68 and Priest Marians gained 18 cents, also to $4.68.

#90204u1491 07/23/1990 ~United Press International

GENEVA (JULY 23) UPI - The United States and the European Community, together with other big farming nations, agreed Monday to start substantive negotiations on freer agricultural trade.

Delegates opening a one-week assessment of the Uruguay Round trade liberalization talks warned that the entire undertaking could collapse because of a deadlock over U.S. farm supports and EC farm export subsidies.

The Uruguay Round began in late 1986 and is to end this December, but genuine negotiations have yet to begin on main trading sectors, such as agriculture, textiles, service industries, and safeguarding patents and copyrights. But developing countries bitterly attacked the industrial nations at the opening of the reveiew meeting for all but ignoring to this point their needs.

However, attention clearly was focused on the dispute over the future of agricultural trade during the first day of the GATT session.

''A deadlock has been broken,'' said Arthur Dunkel, director general of the General Agreement on Tariffs and Trade, the international regulatory body whose members account for 97 percent of world commerce.

''The time for statements and posturing is past,'' a U.S. statement said.

Participants in the talks agreed that negotiations covering ''all agricultural products'' should start next month, according to a statement.

This point was crucial, officials said, because of the EC's previous refusal to discuss any major cuts in its farm export subsidies.

Washington has said that successfully concluded the Uruguay Round would require hefty reductions in the EC's annual $34 billion in farm export subsidies, arguing that state assistance costs American farmers $11 billion a year in lost sales.

But the EC's 11 million farmers actually receive less support per capita than their 2 million American counterparts through $8.4 billion in annual

internal U.S. farm support payments, the European organization has countered.

Despite serious differences over subsidies, the agreement to start real bargaining was welcomed by leaders of the American contingent - Julius Katz, the U.S. deputy trade negotiator, and Agriculture Under-secretary Richard Crowder.

''We expect that all the participants will engage seriously in all areas of the agriculture negotiations,'' they said.

''It remains to be seen whether this process will serve to unblock the differences that have stymied progress in the negotiations to date,'' they said.

''Now I know that everyone is committed to start the negotiations in all areas,'' GATT's Dunkel said.

At the same time, he warned that deep differences on trade rules continue not only on agriculture but on other services like banking and insurance and textiles and clothing.

Dunkel said he would center efforts during the week on achieving similar procedural progress in the other main negotiating areas.

It had been planned to have ''profile'' or ''draft'' agreements ready for a meeting of GATT's supervisory Trade Negotiations Committee, but each group generally managed only documents outlining divergent positions.

For instance, the United States, although it had demanded at the outset that services be included for the first time in world trade negotiations, wants to exclude certain services, such as shipping and civil aviation.

#90204u1494 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - The stock market stabilized with broad, sharp losses in heavy trading early Monday afternoon, following a morning plunge that took the Dow industrials down more than 100 points.

The Dow Jones industrial average, which tumbled 32.67 Friday, was down 72.53 to 2888.61 at 1 p.m. EDT after having been down by as much as about 106 points.

But the broad market failed to show a similar partial recovery, as declines pummeled advances 1,431-182 among the 1,945 issues crossing the NYSE tape.

Volume amounted to about 142,610,000 shares at 1 p.m., up sharply from 91,970,000 traded in the same period Friday.

The Dow plummeted more than 100 points during the morning, shoved down by earnings disappointments concentrated in the technology sector last week and by market sentiment that interest rates will not be coming down anytime soon.

The bellwether Dow industrials opened lower and were down about 30 points after a half hour of trading. Over the next hour, prices plummeted with the Dow down over 100 points before rebounding on a combination of bargain hunting and program buying, a computerized trading technique used to profit on price spreads between stocks and stock-index futures.

Despite the rout, trading was never in danger of being halted by stock exchange authorities. NYSE regulations currently call for a one-hour trading halt when the Dow falls 250 points and a two-hour halt if its falls another 150 points.

"I think what precipitated this was that in the technology stocks every earnings report has been a negative surprise," said Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co., referring to profit reports and forecasts announced by Advanced Micro Devices, Storage Technology and Texas Instruments. "These stocks have been the market's leadership in the last two quarters," he said.

Kaminsky also said program selling and last week's comments by Federal Reserve Chairman Alan Greenspan that the Fed would like to lower interest rates but cannot with inflation remaining stubbornly high helped "cast a major psychological cloud over the market."

In the U.S. Treasuries market, the long bond was down about 23/32 in early trading, helping push stocks lower, but rebounded as investors sought a safe haven during the market's free fall and was up 3/32 in early afternoon trading.

The plunge in the Dow came on the heels of sharp declines in the Tokyo stock market, where the major index has lost 3.5 percent of its value in the last two trading sessions.

On the trading floor, McDonald's was the most active issue, showing a loss of 3 1/4 to 32 3/4. The fast-food company failed to meet Wall Street expectations in its earnings report Friday. The results were especially troubling, analysts said, because McDonald's - a safe, non-cyclical consumer-based business - is viewed as one of the more reliable issues in terms of earnings.

McDonald's said Monday afternoon it plans to switch to vegetable oil to

cook its french fries and hash browns.

Prices plunged in active trading on the American Stock Exchange, with only 79 issues advancing out of the 734 issues crossing the tape.

#90204u1514 07/23/1990 ~United Press International

MOSCOW (JULY 23) UPI - A Soviet lawmaker demanded Monday that President Mikhail Gorbachev drop a Russian nationalist writer from his top advisory panel, charging that the author is an anti-Semite.

The call for the ouster of writer Valentin Rasputin from the Presidential Council coincided with the Pravda newspaper's publication Sunday of an article warning that anti-Semitism is on the rise throughout the Soviet Union.

Leonid Shkolnik, who represents the Jewish Autonomous Region in the U.S.S.R. Congress of People's Deputies, urged Valentin Rasputin's replacement on the council in a letter to Gorbachev.

''I have had more than one occasion to see the consistently chauvinistic thrust of a number of Rasputin's oral and printed statements,'' Shkolnik wrote in the letter, which was published in a local newspaper and quoted by the official Tass news agency.

''All this impelled me to use my right as a people's deputy and appeal to the Soviet president to protect the Jewish people from attacks by the 'titled' anti-semite Rasputin,'' Shkolnik said in apparent reference to the state prizes Rasputin has received.

The Jewish region that Shkolnik represents is a remote area of the vast Russian Federation in the Soviet Far East. Established by dictator Josef Stalin in 1934 as a sham homeland for Jews, less than 12,000 of its 216,000 current residents are Jewish.

Rasputin, who lives in the Siberian city of Irkutsk on Lake Baikal, has built a large following for his evocation of traditional Russian themes and his idealized portrayal of the Russian countryside.

Gorbachev's selection of Rasputin for his new Presidential Council in April surprised many Soviet and Western analysts. Some saw it as an attempt to appease conservative Russian nationalists strongly critical of Gorbachev.

In a letter published July 14 in the official Izvestia government newspaper, Rasputin complained that The New York Times Magazine had distorted his views in an article six months ago and depicted him as

anti-Semitic to Western readers.

''It is not possible to make an anti-Semite out of me,'' Rasputin said.

Shkolnik, however, said he had read a transcript of part of Rasputin's interview with Bill Keller, chief of the New York Times' Moscow bureau, and that the writer's position regarding Jews ''is absolutely unambiguous and reeking with anti-Semitism.''

Keller said he sent the transcript and a letter to Izvestia several weeks ago, but that the newspaper so far has not published them.

Keller, who said he did not know how Shkolnik had obtained the transcript, admitted that there was a minor error in the translation of some of Rasputin's comments, but he stood by his article's depiction of Rasputin.

Moscow in recent months has been swept by rumors of impending pogroms against its Jewish residents, and the KGB intelligence agency published several statements guaranteeing the safety of Jews, Armenians and members of other reportedly threatened ethnic groups.

Pravda, the official newspaper of the Soviet Communist Party, said Sunday that hatred of Jews is no longer the preserve of extremists and has spread to some circles of intellectuals.

The newspaper said that ''this unprecedented respectability of anti-Semitism is the most alarming thing of all'' and that ''the terror of pogroms is becoming ever more widespread.''

More than 100,000 of the estimated 1.8 million Soviet Jewary 1986 assassination of Swedish Prime Minister Olof Palme - a crime that has still to be solved.

The Iranian who was interviewed, identified as Ibrahim Razin, claimed the murder of Palme was a return favor to Iran for holding off on the release of American hostages until after President Reagan's election, with Bush as vice president, in 1980.

#90204u1524 07/23/1990 ~United Press International

JAKARTA, INDONESIA (JULY 23) UPI - Southeast Asian foreign ministers, bristling over Washington's about-face on Cambodia, accused the United States Monday of hindering peace efforts by withdrawing diplomatic recognition from a resistance coalition.

After a marathon meeting on the eve of the annual Association of Southeast Asian Nations ministerial meeting, the delegates issued a joint statement

denouncing the U.S. move to oust the resistance from the United Nations.

The dignitaries from Indonesia, Thailand, Malaysia, the Philippines, Singapore and Brunei also said Prince Norodom Sihanouk, leader of the three-party resistance, should play ''a key role'' in working for a comprehensive political settlement of the 11-year Cambodian conflict.

They called for the creation of a Supreme National Council representing all the parties to provide an interim government for Cambodia pending elections.

Diplomats said the display of unity was in response to U.S. Secretary of State James Baker's surprise announcement last week that Washington was withdrawing recognition of the coalition dominated by the Khmer Rouge and opening a new dialogue on Cambodia with Vietnam, the chief backer of Phnom Penh's Communist regime.

Baker said the change in the U.S. position was aimed at preventing a return to power in Cambodia of the Khmer Rouge, blamed for the deaths of 1 million before the regime was ousted by Vietnam in 1979 and the current government installed.

The three-part resistance, including the Khmer Rouge, has since then waged a battle to topple the Hanoi-installed government. Hanoi announced the total withdrawal of its troops in Cambodia last September, but resistance sources insist they remain in the country.

The U.S. policy shift ''seems unhelpful to the Asian peace process,'' said Singapore Minister for Foreign Affairs Wong Kan Seng.

''I cannot figure out how asking the resistance to vacate their seat in the U.N. will help stop the Khmer Rouge from returning to power,'' Wong said.

The delegates grappled with their joint statement during a four-hour working dinner sponsored by Indonesian Foreign Minister Ali Alatas, who has hosted three unsuccessful peace talks between the resistance and the Phnom Penh government in a frustrating search for an end to the 11-year-old conflict.

''The representation of Cambodia at the U.N. is a delicate political question and attempts to change the representation at this time would set back the search for a solution,'' the statement said.

Washington's turnaround undercut a decade of diplomacy among the Southeast Asian nations and longtime U.S. allies.

Thai Foreign Minister Siddi Sevetsila criticized the timing of the announcement last Wednesday, contending it ''overshadowed'' the ASEAN

meeting.

Baker arrives in Jakarta Thursday to elaborate on the U.S. move along with ASEAN's other dialogue partners from Japan, Canada, the European Community Australia and New Zealand.

France, Britain, Japan, Australia, New Zealand and the Soviet Union have welcomed the U.S. initiative, as have Vietnam and Phnom Penh.

China, the chief arms supplier of the Khmer Rouge, criticized the decision and said it would continue to arm the rebel faction until a peace settlement is in place. Sihanouk described the switch in strategy as ''an act of very serious injustice.''

Alatas and Wong said they wanted to hear first-hand from Baker how vacating the U.N. seat will advance the negotiating process. Alatas said he feared the untimely announcement could complicate the search for peace.

ASEAN, with the support of the United States until last week, has insisted for eight years that the military might garnered by the Khmer Rouge made it essential it be accepted as a partner in any settlement along with the two non-communist factions.

While the statement condemned ''all resplonsible for the policies and practices which led to the extermination of Cambodians on a large scale,'' it did not rule out giving the Khmer Rouge a role in a future government.

The arrival of the foreign ministers Monday coincided with claims by resistance forces in a radio broadcast monitored in Bangkok that Vietnamese wearing Phnom Penh government uniforms fired toxic gas into two villages, killing or injuring more than 102 civilians.

Delegates to the ASEAN meeting said they were not opposed to the United States opening a dialogue with Hanoi, but feared withdrawing recognition of the resistance at the United Nations will spur the Khmer Rouge into becoming more resolved about achieving a military victory in Cambodia.

#90204u1528 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - Congress wants to reduce the steady diet of television commercials that hawk candy, cereal and toys to America's children.

By a voice vote, the House passed a bill Monday that would direct the Federal Communications Commission to require television broadcasters to limit commercial advertising on children's programming to no more than 10.5 minutes per hour on weekends and 12 minutes per hour on weekdays.

Also, when the FCC reviews applications for television licenses, it would have to consider whether the station has served the educational and informational needs of children in its overall programming, as well as its adherence to the advertising limits.

The Senate passed a similar bill last week. Differences will have to be worked out in a conference committee if the Senate does not change its version to mesh with the House bill.

''Passage (of this bill) once and for all would provide broadcasters and children with programs that produce the necessary incentives to educate our nation's children, rather than to exploit them economically,'' said Rep. Edward Markey, D-Mass. ''Children's television should and can be the video equivalent to textbooks and the classics, rather than the video equivalent of a Toys 'R Us catalog.''

In 1984, during the height of Reagan administration deregulation, the FCC issued an order repealing commercial guidelines for children's television. At the time, broadcasters had been limited to 9.5 minutes per hour on weekends and 12 minutes per hour on weekdays.

In 1987, the U.S. Court of Appeals for the District of Columbia ruled the FCC had not sufficiently justified the 1984 decision, and in response the FCC sought public comments on the matter. It has taken no further action.

President Reagan pocket vetoed similar legislation in 1988 and the Bush administration opposes the bill. The White House feels the measure infringes on broadcasters' First Amendment rights.

However, Action for Children's Television, a public interest group, contends stations will load up children's programs with commercials if the government does not requires limits.

The group said that in 1988, some stations were airing as many as 11 or 12 minutes of commercials per hour during weekend programs and up to 14 minutes per hour during the weekday. This compared with an average of less than eight minutes per hour during adult prime time programs, the group said.

#90204u1531 07/23/1990 ~United Press International

MARSEILLE, FRANCE (JULY 23) UPI - The chief suspect in an arms trafficking case told a judge Monday the weapons were shipped from Lebanon to France on military flights, countering a claim a Cabinet minister's bodyguards smuggled the guns on the minister's plane.

Judicial sources said Brigadier Jean-Claude Labourdette, the former chief of security at the French embassy in Beirut, told investigating judge Patrick Ardid in Marseille the arms were transported on regular military flights.

Labourdette, charged Sunday with operating the arms smuggling ring, also said the guns were originally intended for collectors, and that formal organization to ship the weapons illegally never had been created.

He said other security officers took advantage of the opportunity to make money through sales of the weapons.

Investigators believe some of the guns were sold to underworld gangs in southern France and may have been used in an attack on a security van in Marseille that resulted in the death of two officers.

Earlier Monday, state prosecutor Olivier Dropet said security officer Patrick Schaller, also charged with participating in the smuggling ring, told investigators the weapons were twice shipped to France on a special government plane used by Humanitarian Action Minister Bernard Kouchner.

Dropet said Schaller, who worked under Labourdette at the embassy, told prosecutors the arms were turned over to the minister's bodyguards by Labourdette and the weapons were flown in the airplane's cargo compartment.

Several French newspapers reported during the weekend that Schaller accused Kouchner of being involved in the arms-smuggling scheme, but the prosecutor denied Schaller directly implicated Kouchner.

Kouchner, who has frequently visited Beirut to deliver medicine and other supplies to war victims in his role as humanitarian action minister, cut short a summer vacation on the Mediterranean island of Corsica to return to Paris.

''It is not the role of a minister who represents France under difficult circumstances to survey the baggage compartments,'' Kouchner said before leaving Corsica.

He added he had no idea whether his plane had been used to ship the weapons, adding such an operation seemed unlikely ''because a large network of accomplices would be needed.'' In a related development, the government announced Monday it was immediately sending a team of investigators to Beirut. A government spokesman said the investigators belonged to both the Foreign Affairs and Interior Ministries but refused to release further details.

Police last week searched a villa belonging to Labourdette and confiscated three rocket-launchers, automatic pistols, and a number of Soviet

Kalashnikov AK-47 and U.S.-manufactured M-16 automatic assault rifles, as well as large stocks of ammunition.

Investigators have described Labourdette as the ring leader of the arms smuggling group, but it remains unclear whether higher ranking officials were involved.

In addition to Labourdette, two other members of the elite, paramilitary CRS security force responsible for protecting French embassies were charged in the case Sunday. Investigators said at least 10 other CRS officers may be implicated.

The two other CRS officers charged Sunday, Patrick Jacquin and Jean-Noel Lebat, returned to France last week from their security duties at the French Embassy in Washington. The two men had previously served in Beirut.

About 150 CRS officers are assigned to the heavily-protected French compound in Beirut. Labourdette frequently was seen carrying an automatic weapon amid security for the French ambassador or visiting dignitaries such as Kouchner.

Interior Minister Pierre Joxe said last week he was indignant about the revelations and promised to strongly punish those found guilty. He said the case had ''gravely damaged not only the honor but also the authority'' of the French police forces.

#90204u1536 07/23/1990 ~United Press International

LOS ANGELES (JULY 23) UPI - Marlon Brando's son said he killed his half-sister's boyfriend in the actor's house during a struggle that began when the boyfriend ''went nuts,'' a police officer testified Monday.

Christian Brando said the fatal shot was fired accidentally as the two men wrestled over a handgun kept in the actor's Hollywood Hills mansion for family protection.

''Christian Brando said he wasn't sure who was trying to shoot who,'' Officer Steve Cunningham said.

Cunningham was the first witness called at the preliminary hearing to determine whether Brando, 32, will stand trial for murder in the death May 16 of Dag Drollet.

Drollet, 26, son of an influential political figure in Tahiti, was the boyfriend of Cheyenne Brando, who recently gave birth to his child in Tahiti.

Cunningham said he was summoned to Marlon Brando's gated Mulholland Drive mansion by reports of a shooting. Seeing a dead man shot in the face in one room, he found Christian and Cheyenne Brando sitting on the floor of the living room.

The first thing Christian said to the officer was that he ''didn't mean to shoot him,'' Cunningham said.

As they waited for detectives to arrive, Christian Brando started talking, sitting handcuffed on the couch.

''He stated he and his sister had gone out to dinner ... and when they got back to the residence things got crazy and that's when the deceased went nuts and the struggle over the weapon occurred.''

''He stated he didn't care for the guy (Drollet) a whole lot, but he didn't want him to be killed, but if something would happen to him to that effect, it would be OK with him (Brando).''

Christian Brando said he kept the loaded gun under the couch for family protection and the struggle began when Brando told Drollet to ''get off the couch,'' Cunningham said.

''The deceased grabbed his hand and that made the gun go off,'' Cunningham said.

Marlon Brando watched the testimony from the front row of Municipal Court Judge Larry Fidler's courtroom, packed with reporters, photographers and the public. More than a dozen other photographers waited in the hallway.

Defense attorneys said Marlon Brando will not testify at his son's preliminary hearing.

Christian Brando, appearing in beige slacks, white shirt and blue tie, remains in custody without bail. If convicted, he could be sentenced to 25 years to life in state prison.

Cheyenne Brando had been subpoenaed to testify, but a spokeswoman for the District Attorney's office said Cheyenne will not make the trip from Tahiti because her doctor said she is not medically fit to travel.

Before leaving Los Angeles for Tahiti on June 15, Cheyenne said in a statement to police that Christian told her he intended to kill Drollet because the victim had mistreated her, police said.

The victim's father, Jacques Drollet, told reporters last week Cheyenne was charged in Tahiti as an accomplice to the slaying.

But the District Attorney's Office said last Friday that authorities in Tahiti have not charged Cheyenne in Drollet's death, although she remains under investigation.

#90204u1540 07/23/1990 ~United Press International

MONROVIA (JULY 23) UPI - Rebel forces stormed into the center of the capital Monday after outflanking government troops by wading through a swamp, and were poised to make a final advance on the heavily fortified mansion of President Samuel Doe.

The guerrillas battled street-by-street with Doe's forces, many of whom were seen to drop their weapons and flee for their lives.

Fighters of Charles Taylor's rebel National Patriotic Front were less than 1 mile from the Israeli-designed executive mansion in Monrovia, where Doe was barricaded with about 500 elite soldiers from his minority Krahn tribe.

The surprise rebel attack outflanked government defenses set up on two key bridges across the Mesurado River.

Doe has spurned all offers of asylum and vowed Sunday to fight to the finish.

There was heavy machine-gun fire around the telecommunications headquarters in the heart of Monrovia's business district. The combat knocked out the last remaining telephone service in the West African city, which has been without electricity and water for almost one month.

All but a few shops remained closed, and starving civilians besieged the few shops that still had stocks available. Armed troops tried to control riotous crowds trying to gain access by force.

Taylor, a former civil servant who lived in the United States after being accused of corruption by Doe, launched the full-scale assault last Thursday after laying siege to the capital for more than two weeks.

Taylor has promised to hold free elections within six months if he takes over.

With the majority Gio and Mano tribes firmly on Taylor's side, the civil war has become an ethnic conflict with members of Doe's Krahn tribe.

Doe, who had not been seen in public for more than two weeks, was said by a diplomatic source over the weekend to to have lost touch with reality, becoming ''convinced he is invincible'' and clinging to the tribal belief that magic will save him.

U.S. diplomats in Monrovia have been unable to persuade Doe to flee from his encircled capital and leave Monrovia to Taylor.

In some places in downtown Monrovia, disorderly lines formed outside some shops, even though those in the queues did not know whether food was available.

Beatrice Thompson, standing outside a padlocked supermarket and hoping it would open, said she and eight children living with her had eaten nothing for four days.

''There is no food,'' she said. ''I try to cook leaves without pepper or oil, but it's no good.''

Youssef Fawaz's supermarket across from the main military barracks operated in near darkness, dimly lit by a few candles. There has been no main power in Monrovia for almost a month.

His shelves were virtually empty of anything edible. A few cans of powdered milk, boxes of tea bags and crates filled shoe polish were still available.

''Are you planning to leave?'' Fawaz was asked.

''Now I have no more stock. There is nothing else left for me to do,'' he said sadly. ''Only, I don't know how to leave.''

Air Cargo of Liberia, which ran the last air link into Monrovia, operated its last flight on Sunday, filled with fleeing refugees.

Frightened and leaderless government troops forced their way to the head of food lines and set up random checkpoints, sometimes stopping and searching the same cars as many as two or three times at the same place.

#90204u1546 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - Investors attracted to the often high-risk penny stock market would be given new protection from fraud under provisions of a bill passed by the House Monday.

The measure approved by voice vote would give the Securities and Exchange Commission greater authority to police the largely unregulated penny stock market. The Senate has approved a similar bill and the two chambers are expected to work out a compromise version of the legislation.

Penny stocks are low-priced, highly speculative stocks sold on the

over-the-counter market and usually not listed on a regular exchange. The stocks often are sold over the telephone.

Under present law, sellers are required to disclose very little information to prospective buyers. As a result, penny stocks have become a major means of defrauding investors.

Rep. Ed Markey, D-Mass., said the reform bill represents a "powerful expansion of the enforcement weapons available to combat the problems of securities fraud."

Markey noted Congress is developing other measures to reform the financial markets and that taken together they "give SEC the legal foundation to right the wrongs perpetrated over much of the last decade."

Rep. Matthew Rinaldo, R-N.J., said the legislation makes "a powerful statement that Congress will never allow the integrity of the securities markets to be compromised and that investors will be protected."

The bill requires that brokers and dealers must give their customers specific information about stocks, including the bid and ask prices, the number of shares at specified prices, and the amount of commissions or other fees the brokers or dealers receive.

The brokers also would have to provide their customers with a risk disclosure document that describes the risky nature of the penny stock market and specifies the customer's rights and remedies.

The SEC would be given authority to void the sale of certain penny stocks unless they comply with SEC rules. The bill also authorizes the SEC to seek civil monetary penalties against violators and to bar or suspend persons who violate securities laws from serving as an officer or director of a company registered with the SEC.

#90204u1557 07/23/1990 ~United Press International

GENEVA (JULY 23) UPI - The major Persian Gulf powers are determined to finally restore discipline within OPEC during a meeting of the cartel this week, in a bid to bolster world oil prices, OPEC officials said Monday.

Oil ministers of the 13-nation Organization of Petroleum Exporting Countries are scheduled to meet Thursday in Geneva to discuss production limits and pricing strategy for the rest of the year. The semiannual conference will be preceded by a meeting Wednesday of OPEC's eight-member Market Monitoring Committee.

OPEC officials said they expected Iraq, Iran, and Saudi Arabia will lead

the drive toward tighter output controls, aimed at ensuring members do not produce more than their allocated quota.

Several OPEC members have said they wanted to increase the cartel's target price from its $18 a barrel average for seven Mideast crudes, to $20. The reference price had fallen to $14.45 a barrel earlier this month. OPEC sources said some delegations wanted to drop the reference price altogether and let the market set the price.

The Thursday meeting follows a flurry of recent diplomatic activity in the Gulf by several OPEC members trying to ease the dispute between Iraq on the one hand and Kuwait and the United Arab Emirates on the other.

The midsummer oil crisis erupted after Iraq's President Saddam Hussein indicated he will get tough if neighboring Kuwait and the United Arab Emirates persist in ignoring OPEC quotas and dumping oil on world markets, which he said has depressed prices and damaged Iraq's economy.

Iraq can expect support at the conference from its longtime foe, Iran. Both countries rely heavily on oil revenue to rehabilitate their economies wracked by the eight-year war that opposed them until 1988.

Saudi Arabia's ruler, King Fahd, has already indicated his delegation will side with Iraq and Iran in seeking a return to adherence to production quotas by OPEC members.

Kuwait and the United Arab Emirates, under strong pressure from Iraq, Iran and Saudi Arabia, the three major military powers in the Gulf, have each announced they were prepared to cut production by several hundred thousand barrels to 1.5 million barrels a day. Iraqi officials promptly claimed that the two states were likely to cheat again.

OPEC sources said the oil ministers meeting in Geneva was likely to increase the United Arab Emirates' quota by 400,000 barrels to 1.5 million barrels a day, the limit tentatively agreed on at a meeting of six Gulf states two weeks ago in the Saudi resort of Jeddah.

The United Arab Emirates was assigned a 1.1 million-barrel quota after refusing to accept any limit at the last semiannual OPEC conference in November. It had produced as much as 2.2 million barrels a day.

Kuwait, which has pumped nearly two million barrels a day, would keep its current 1.5 million barrel-a-day limit with the understanding that it would be raised later this year if prices improved.

As a result of the increase in the UAE quota, OPEC President Sadek Boussena, Algeria's oil minister, said last week that OPEC will set a new overall cartel ceiling of 22.5 million barrels a day, compared with the

current 22.1 million barrels.

OPEC officials say the sharp decline in prices over recent months stemming from overproduction has resulted in losses of between $5-$7 billion since March.

-30- 3612
#90204u1560 07/23/1990 ~United Press International
NEW YORK (JULY 23) UPI - A man convicted of twice bombing a prestigious Hudson Valley cooking school was arrested Monday and charged in the bombing of a college that had baffled investigators for more than a year, police said.

Detectives from the arson and explosives squads arrested Peter Kruzcko, 22 at his Queens home and charged him with the bombing of the library of Queensboro Community College on May 4, 1989, a police spokesman said.

A pipe bomb exploded in the library of the college, but no one was injured.

A note left near the site said the bomb was set to protest tuition hikes at the school. Kruzcko was a student there at the time.

Kruzcko was charged with first-degree arson, first-degree criminal possession of a deadly weapon and first-degree reckless endangerment.

Kruzcko earlier this year was convicted of bombing the Culinary Institute of America in Hyde Park, N.Y., on Dec. 19, 1989, and Jan. 2, 1990, Bloch said.

He said Kruzcko apparently was a student at the institute at the time. It was unclear how much damage the two blasts caused or whether he served jail time for the convictions.

#90204u1578 07/23/1990 ~United Press International
FAIRBANKS, AK (UPI) - More than 1 million acres of Alaska were on fire Monday, blanketing a large area with smoke, triggering health alerts, forcing evacuations and interfering with traffic on roads to Canada and to the Prudhoe Bay oil fields.

State officials issued health warnings for residents in the smokiest places, including Fairbanks and Denali National Park, one of Alaska's most popular tourist attractions.

''Smoke is all over the interior (of the state),'' said Sue Mitchell at Alaska Fire Service headquarters. ''When you walk outside, you can smell

smoke and you can see smoke. The fires are 50 miles from Fairbanks, but the smoke drifts in and then just sits there with no wind to blow it away.''

Five fires in the remote western end of Denali National Park and Preserve and other nearby fires have reduced visibility at times to as little as a quarter-mile at park headquarters, National Park Service spokesman John Quinley said.

''Park staff met people as they came into the park and warned them to limit their physical activity if they intended to hike; or if they were elderly or had respiratory problems, to consider staying indoors,'' Quinley said.

''But with a quarter-mile visibility, people probably don't need a suggestion from us that it's not very healthy to go hiking around in the smoke,'' Quinley said.

Denali Park, between Anchorage and Fairbanks, is Alaska's best-known tourist attraction, drawing thousands of people daily throughout the summer.

The broad air alert, issued by the state Department of Environmental Conservation, covered a wide swath of Alaska between the Brooks Range and the Alaska Range because smoke was trapped between the two, DEC spokesman Chuck Kleeschulte said.

While smoke hampered firefighting efforts, it smoke also blocked out the sun, reducing the abnormally high temperatures, increasing humidity and ''keeping fires from being so active,'' Mitchell said.

But 129 fires were active across the state on nearly 1.2 million acres, and 2,600 firefighters were battling the few dozen that posed the most threat in the three-week battle against the lightning-sparked blazes that are burning forests and tundra.

Ninety miles north of Fairbanks, a 25,000-acre fire burned right up to the Dalton Highway, a supply route to Prudhoe Bay and the North Slope oil fields that officials were hoping would provide a firebreak. But 50 miles farther north a larger fire, 120,000 acres, on the Kanuti National Wildlife Refuge was burning toward the highway.

The Department of Transportation issued a travel advisory because of heavy smoke and limited visibility on the oil field supply road. Officials said the 800-mile trans-Alaska oil pipeline was not threatened and was considered fireproof.

In eastern Alaska, smoke and fire intermittently closed the Taylor Highway

to Dawson City in Canada's Yukon Territory.

The Alaska Indian village of Tetlin was evacuated by 100 residents days ago with flames just a few miles away. Winds have kept the 60,500-acre blaze from reaching Tetlin, now inhabited by as many firefighters as there were villagers, Mitchell said.

Alaska firefighters also crossed the border to help Canadian crews battle a blaze that threatened the town of Old Crow, evacuated by more than 200 residents.

Forecasters predicted continued hot, dry weather, with no relief in sight for firefighters. Many of the blazes dampened by rain in mid-July or contained by firefighters have flared up again and jumped containment lines.

#90204u1600 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - House Armed Services Committee Chairman Les Aspin dealt the B-2 stealth bomber a major blow Monday, declaring the radar-eluding plane should be killed in an act of "fiscal reality" after consuming nearly $30 billion in Cold War tax dollars.

The bat-like plane, which could become the most visible victim lessening world tensions and domestic budget pressures, has steadily risen in cost, in part because the program has been slowed and scaled back from 132 planes to 75 planes. The per-copy price, including research expenses, has hit $840 million.

The issue will be the biggest floor fight of the 1991 defense budget, with the administration and Air Force pulling for its survival. It could be an uphill fight in the House, but there is more sentiment for the plane in the Senate, where the Armed Services Committee agreed with Defense Secretary Dick Cheney that two planes should go into the budget.

Senate debate on the issue is expected next week. Aspin, D-Wis., said he will insert language to kill the plane in his bill July 31 in committee, and it will be on the floor in early September.

While Rep. Ike Skelton, D-Mo., whose district is due to become home to the first squadron of stealth bombers, said he thinks the plane can survive. But he said the White House's recent interest in the isssue "may be a day late and a dollar short."

In deciding to oppose the plane, Aspin sided with liberal Rep. Ron Dellums D-Calif., and conservative Rep. John Kasich, R-Ohio, who have led efforts in the House to quash the program.

"We won the debate last year but lost the vote. I think (Aspin's backing) is going to go a long way toward us winning," said Dellums, who said his side has about 210 votes and is seeking a winning margin from 91 to 93 undecided members. "We feel now even more confident." "It makes the job easier for us," added Kasich.

So far, about $27 billion has been spent and 15 planes have been ordered and are in various stages of construction. Finishing those planes will take about $9 billion more. The program started out seeking 132 planes for about $75 billion, but Defense Secretary Dick Cheney recently scaled it back to 75 planes and $62.8 billion, or $840 million a plane.

Aspin wants to finish the 15 planes that have been ordered, and do all the research and testing work associated with them before terminating the program.

The plane is built in California by the Northrop Corp., which has about 12,000 people working on the project. In addition, a Northrop spokesman said tens of thousands of jobs are tied to the project through 4,000 B-2 subcontractors.

At the White House, presidential spokesman Marlin Fitzwater restated the administration's support for the plane, saying, "We're for it. It's in our budget. We believe it's necessary."

Aspin, in remarks prepared for delivery to the House, said much has happened to the program since the House last dealt with the issue, but "nothing that has happened has improved the case for the B-2."

"Five programs alone - the B-2, the Air Force's C-17 and advanced tactical fighter, the Navy's A-12 with its Air Force variant and the Army's light helicopter - are going to cost more than $300 billion," Aspin said.

"Unlike last year, it is clear today that the defense budget is going down steeply for years to come. We've already decided to protect personnel over weapons. Clearly we're not going to be able to afford all of these programs. We've got to cut back some of them. Terminating the B-2 may be but the first step in moving toward fiscal reality," he said.

Abandoning the B-2 program will leave the United States at the turn of the century with a shrinking number of older B-52s and - barring more crashes - 97 B-1B bombers, a plane that President Carter canceled because the futuristic B-2 was on the drawing board. President Reagan revived the B-1B which has had its own share of problems with its offensive and defensive electronics gear.

Air Force supporters argue that killing the B-2 will effectively put the

Air Force out of the bomber business and take away one of the three legs of the so-called strategic triad, a combination of bombers, submarines and land-base missiles that comprise the nation's nuclear deterrent force.

Air Force Chief of Staff Michael Dugan said the plane was the "lead element" in efforts to modernize the nation's strategic triad. "My first priority in strategic modernization is the B-2, no doubt about it," he said in an interview with CNN.

Yet B-2 critics say the bomber was primarily designed to penetrate Soviet airspace and drop nuclear bombs on its most heavily defended targests - a mission that has become outdated in the post-Cold War era.

#90204u1601 07/23/1990 ~United Press International

JERUSALEM (JULY 23) UPI - Former Defense Minister Yitzhak Rabin said Monday he viewed the surprise defeat of his bid to replace Labor Party leader Shimon Peres as a tactical failure and said he still intended to work for change within the party.

Commentators said Sunday's Labor Central Committee vote, which in effect delayed a showdown on party leadership for a year, provided Labor with an opportunity to concentrate on organizing itself as a strong opposition to Prime Minister Yitzhak Shamir's right-wing Likud Party-led government.

In separate meetings with the party's secretary-general, Rabin and Peres pledged to cooperate to prepare Labor as an alternative to a Likud government, Israel Radio reported. Political columnist Dan Margolit maintained Peres would increase his criticism of the government's hawkish policies.

But Rabin's comments Monday still sounded like fighting words. He called the defeat a ''tactical failure.''

''Yesterday was not a showdown. Yesterday was a debate on the timing for the showdown,'' Rabin told Army Radio. ''True, the fact that Shimon remained in his position has some meaning until the showdown takes place.

''I intend to work, together with my friends, and today they are not few, for a change in the direction of the party,'' he said.

''I have already been the chief of staff, an ambassador, prime minister, defense minister. I do not collect titles. ... I feel that, if I can do things in the fields that suit me, I will participate in them.''

In Sunday's party vote, Rabin sought a leadership vote this month, apparently believing he could capitalize on Peres' failure to form a

Labor-led government after the March collapse of the Likud-Labor coalition.

But the attempt failed and Peres succeeded in delaying leadership elections until next year. The vote was 54 percent to 46 percent in favor of Peres' position.

Before the vote, whose outcome was a surprise, political analysts had begun writing Peres' political obituary.

In remarks to the Central Committee, Peres Sunday hinted he might step aside to encourage a younger leadership to take the helm. But he also indicated he still might be in the race for the party leadership if Rabin sought the post.

The vote was seen as a gauge to judge the political strength of Peres and Rabin within the party. But other Labor Party members also are indicating a desire to run for the party chairmanship.

''I believe that this (Central Committee) is a body that was moved mainly by emotions,'' Rabin said of Sunday's vote. ''But if this is the decision, this is the decision. ... I believe in my way within the party and, within the framework of the decisions that have been made, I'll continue my activities.''

When asked whether he would place himself as a candidate for national elections in the next balloting, expected in 1992, Peres told Army Radio Monday, ''It is not me who leads. The way leads.''

''I see myself as an instrument of the peace process in the state of Israel,'' Peres said. ''If I see that there is a better leader than me, and works in a way I believe in, why wouldn't I make a place for him?''

In unrelated news, two Palestinians died in the Israeli-occupied territories Monday after they were kidnapped and attacked by other Arabs, Palestinian sources said.

The sources said one of the slain Palestinians apparently was suspected of collaborating with Israeli authorities. The underground leadership of the Palestinian uprising, however, said it was not responsible for the death of the second Arab, the sources said.

WASHINGTON (JULY 23) UPI - The State of Michigan said in a filing with the Securities and Exchange Commission Monday that it purchased 18 million shares of common stock issued by Navistar International Transportation Corp.

The purchase, made under the name of the Michigan Department of Treasury's Bureau of Investments, gives the state a 7.24 percent stake in Navistar, a Chicago-based manufacturer of trucks.

#90204u1614 07/23/1990 ~United Press International

SAN ANTONIO DE BELEN, COSTA RICA (JULY 23) UPI - Salvadoran government officials said Monday they expect to reach a cease-fire in September with leftist rebels who have waged a decade-long insurgency against the U.S.-backed government.

Salvadoran Justice Minister Oscar Santamaria, who is the government's chief negotiator in peace talks at San Antonio de Belen - a tourist resort about 7 miles northwest of San Jose - said the government of President Alfredo Cristiani believes ''it is indeed possible to agree on a cease-fire in September, as is anticipated.''

The third round of United Nations-mediated talks between the government and representatives of the rebel Farabundo Marti National Liberation Front or FMLN, began Friday and are aimed at ending the civil war that has cost over 72,000 lives.

There was no immediate comment from the rebels indicating that a September cease-fire was likely.

Santamaria said the government's answer to rebel proposals made three weeks ago in the last round of talks held in Mexico ''responds almost 100 percent to what the FMLN put on the table regarding military matters.''

Rebel proposals call for the dismissal of a large number of military officers, overall reductions in the country's security forces and the prosecution of military personnel involved in specific cases of human rights abuses, such as the killings on Nov. 16 of six Jesuit priests at the University of Central America.

FMLN spokesman Jorge Schafik Handal said Sunday ''the government's counterproposal adds nothing new to its official stand, aside from perhaps to discharge some middle-level commanders from the army, nothing more.''

The two sides have agreed, however, to extend the third round of talks through Wednesday.

On Sunday, government and rebel negotiators ruled out any major breakthrough in the latest round of talks, still bogged down over separate proposals for military reforms.

The issue of the armed forces has been the toughest point on the agenda drawn up in May at a round of meetings in Caracas, Venezuela.

The armed forces maintain they must clean up their own institutions, and say reductions will come naturally as a result of the war ending.

#90204u1644 07/23/1990 ~United Press International

BUDAPEST, HUNGARY (JULY 23) UPI - The Soviet Union will be asked to apologize for crushing Hungary's 1956 revolution, the National Assembly decided Monday.

The deputies voted 250-1 in favor of a motion submitted by Gyorgy Csoti, a Democratic Forum deputy, and unanimously backed by the Foreign Affairs Committee.

A petition will be sent to the Supreme Soviet requesting the highest Soviet body apologize to Hungary for crushing the ''Freedom Fighter'' revolt.

''Some 33 years and 267 days have not been long enough for the Soviet Union to offer moral restitution to our country for the aggression and the grave sin it committed against the Hungarian nation,'' Csoti said.

The Hungarian uprising broke out on Oct. 23, 1956 and was crushed by Soviet tanks on Nov. 4. A pro-Moscow government was installed with Janos Kadar at the helm.

Thousands of people were imprisoned and about 300 executed during the reprisals, including revolutionary Prime Minister Imre Nagy.

Csoti said Prime Minister Jozsef Antall had repeatedly told Soviet leaders they should review the events of 1956, as well as similar ones in 1968 in Czechoslovakia.

He said there had never been legal grounds for the Soviet Army to station troops in Hungary. Even the bilateral agreements that have been concluded since then, lack a legal explanation for the presence of Soviet troops, he added.

Matyas Zombori, a deputy of the Free Democrats, told the house the issue was of great political importance now that Hungary is negotiating with the Soviets for payment in return for troop withdrawals, which are to be completed by June 30, 1991.

''We think their demand is in excess because they do not regard their devastation of Budapest in 1956 as material damage,'' he said. ''...They

do not acknowledge the environmental damage their troops have done here, either.''

The Soviets have been trying to buy time by saying a thorough historical study was necessary to understand what happened in 1956.

Analysts said the Supreme Soviet will be put into a delicate position as it will have to react to the petition of the Hungarian Parliament. If it bows to pressure and offers an apology to Hungary, the decision may improve the bargaining position of the Hungarian military on payment to the Soviets after the troops are finally withdrawn.

#90204u1680 07/23/1990 ~United Press International

PARIS (JULY 23) UPI - Joe Turner, a jazz piano master who played with such greats as Louis Armstrong, Rex Stewart and Benny Carter, died of cardiac arrest in a hospital in Montreuil in northwestern France, news reports said Monday.

Turner, 82, was an expatriate who moved to Paris in 1962 after having made his mark on the American jazz scene.

He was known to Parisian jazz lovers for his ever-present trademark big cigar.

Born in Baltimore, Md., Nov. 3, 1907, Turner moved to New York when he was 18 and already an accomplished piano player. He played at a number of Harlem clubs through the 1930s.

With the threat of World War ii looming, Turner joined the Army and played in the Army band, then under the the direction of Sy Oliver. After the war and until he moved to Paris, Turner performed with cornetist Stewart.

In Paris, he often performed at the night club La Calvados on the Champs-Elysees, and made it a top jazz lover's haunt.

The news reports published here said Turner died last Saturday.

#90204u1684 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - West Coast cities have the ''dirtiest'' gasoline in the country and Chevron nationwide sells the gasoline with the highest average levels of cancer-causing benzene, an environmental group said Monday.

The group, Citizen Action, released a study saying Seattle, Los Angeles and

San Francisco consistently were among the cities where unleaded gasoline had the greatest average concentrations of benzene as well as highly toxic chemicals called aromatic hydrocarbons, such as toluene and xylene.

Boston and Atlanta also were rated poorly in the study, which was based on a survey of gasoline in 18 cities conducted by the Motor Vehicle Manufacturers Association in the summer of 1989.

Among the 12 oil companies covered by the study, Chevron was singled out for selling gasoline with the highest average benzene content nationwide.

Citizen Action officials said they hoped their study would be used by consumers to avoid the most contaminated brands and fuel blends, both for environmental and health reasons.

Neither the oil industry nor Chevron officials had any immediate comment on the study.

The study comes as Congress is acting on clean air legislation that would set limits on benzene levels in the new cleaner-burning ''reformulated'' gasolines now being developed by several oil companies.

While the highest benzene levels are around 3 percent of gasoline content, the Senate clean air bill would limit benzene to 1 percent and the House bill to eight-tenths of 1 percent.

Benzene is emitted in auto exhaust, but the main threat to motorists comes in the form of gasoline vapors released during refueling. The Environmental Protection Agency estimates motorists face an eight in 100,000 chance of getting cancer from lifetime exposure to benzene emissions at the pump.

In comparison, EPA guidelines generally bar use of pesticides posing a cancer risk greater than one in a million.

Aromatic hydrocarbons cause a wide variety of toxic effects, ranging from liver and kidney damage to birth defects, and also promote urban smog. Clean air legislation would regulate levels of those chemicals in gasoline as well.

In its study, ''Cancer at the Pump,'' Citizen Action charged that since 1972 oil companies have been putting increasing amounts of benzene and aromatic hydrocarbons in gasoline to boost octane levels once provided by lead, which is being phased out because of its toxic effects.

Citizen Action officials acknowledged the survey data on which its study was based provided only rough estimates of contaminants in gasoline because it did not account for the amount of fuel sold by each company in each city. They said that could affect both city and company averages.

However, they said their study clearly documented that gasoline in West Coast cities generally had the higher levels of benzene and, to a lesser degree, aromatic hydrocarbons, than other regions.

Citizen Action officials said they believed West Coast cities fared the worst because refineries in that region could find no other markets for benzene and aromatic hydrocarbons and, thus, simply dumped them into their fuel blends.

In contrast, they said Gulf Coast refiners could sell benzene and aromatic hydrocarbons to local chemical plants that need those substances to manufacture petrochemical products.

The group said it had no explanation for the poor ratings given Boston and Atlanta.

Among the study's other findings: -Across the board, premium unleaded gasoline is dirtier than regular unleaded gasoline. -Of the oil companies surveyed, Chevron had the highest benzene levels for both premium and regular unleaded gasoline. Chevron had 2.8 percent benzene in its premium, much higher than the next highest brand, Shell, at 1.9 percent. For regular, the gap was smaller, with Chevron at 2 percent, followed by Amoco and Union, both at 1.8 percent. -For benzene in premium unleaded, Seattle had the highest levels at 3 percent, followed by Atlanta, 2.9 percent; Los Angeles and San Francisco, both 2.7 percent; and Boston at 2.1 percent. -For benzene in regular unleaded, Seattle again led the pack at 2.7 percent, followed by Boston, 2.3 percent; San Francisco, 2.2 percent; Los Angeles, 1.9 percent; and Denver, 1.7 percent. -For aromatic hydrocarbons in premium, Los Angeles was the worst at 43.3 percent, then Boston, 42.7 percent; Seattle, 40.8 percent; Philadelphia, 39.6 percent; and Miami, at 39.1 percent. -For aromatic hydrocarbons in regular, Seattle was highest at 36.2 percent, then Los Angeles at 34.4 percent; Minneapolis at 32 percent; Boston, 31.2 percent; San Francisco and Atlanta, both 30.8 percent.

#90204u1734 07/23/1990 ~United Press International

REDWOOD CITY, CA (JULY 23) UPI - Jury selection began Monday in the trial of Ramon Salcido, charged with killing seven people, including his wife and two of his daughters, in a wine-country rampage.

The trial, in a special high-security courtroom, was moved to San Mateo County from Sonoma County on a defense motion for a change of venue on grounds pretrial publicity made it impossible for Salcido to get a fair trial in Sonoma County.

The trial was expected to last three to six months, and costs to the taxpayers could reach $1 million.

Salcido, 29, a winery worker, was accused of going on a murderous spree in Sonoma County on April 14, 1989, after a cocaine and alcohol binge.

The victims included his wife, Angela, 24, two of their daughters, Sofia, 4, and Teresa, 1, his mother-in-law, Marion Richards, 47, Angela's sisters Ruth, 12, and Marie, 8, and Tracy Toovey, 35, who worked with Salcido at the Grand Cru winery in Glen Ellen.

Salcido's 4-year-old daughter, Carmina, survived the slaughter with a severe knife wound to the throat. She and the bodies of her two sisters were found in a refuse area in a remote section of Sonoma County.

Salcido was arrested near his grandmother's house in Los Mochis, Mexico, four days after the slayings and returned to California two days later.

Authorities said sheriff's deputies obtained a statement from Salcido as he was being flown back to Sonoma County. The defense sought unsuccessfully to have it barred from the proceedings.

While in custody in Mexico, Salcido appeared on television and admitted the killings.

#90204u1752 07/23/1990 ~United Press International

EAST BERLIN (JULY 23) UPI - East German Prime Minister Lothar de Maiziere, his coalition government split over the pace of German unification, will meet Thursday with West German Chancellor Helmut Kohl in Austria, a spokesman said.

East German government spokesman Matthias Gehler said the meeting is unrelated to the coalition crisis which can only be solved in East Berlin.

''The meeting, which follows an official visit to Austria, was planned long before (the crisis),'' Gehler said. ''We cannot go to Bonn for a solution.''

East and West German opposition leaders have before accused de Maiziere of acting in the interests of the Bonn government rather than in East Germany's.

But de Maiziere denied being influenced by Kohl or other members of the West German government.

''I can say a clear 'no' to this,'' de Maiziere said in an interview made

available Monday. ''My administration is fully capable of governing.''

De Maiziere, who speaks to Kohl daily on the telephone, steadfastly maintains that all-German elections should be held before unification, Gehler said.

The two will meet in the Austrian town of St. Gilgen, where Kohl is currently vacationing.

Two East German junior coalition parties, the Liberals and the Social Democrats, have called for the merger to take place before the planned all-German elections Dec. 2 to guarantee equal election procedures.

The proposals were rejected by the majority of de Maiziere's Christian Democratic Union.

''The SPD and the Liberals played high-stakes poker, and it is very difficult to climb a tree without a ladder,'' de Maiziere told the daily Bild Zeitung in an interview to be published Tuesday.

De Maiziere's CDU demands separate elections in East and West Germany to give smaller East German parties the chance to send delegates to the new 600-seat all-German parliament.

''I want to get reasonable conditions put down in the unification treaty for the people in East Germany,'' de Maiziere. ''I don't want to solve the whole question of merging right now, because very grave problems have to be solved first.''

The Social Democrats and the Liberals, who oppose the CDU's position, threatened last week to leave the coalition if the parties do not reach a compromise soon.

The West German government has kept quiet throughout the debate, but has offered to sign an agreement with the East German government on the procedures of all-German elections.

East German party officials from the seven-party coalition will meet Monday night for their regular meeting, Gehler said, but he did not disclose the meeting's agenda.

In a 12-hour special parliamentary session Sunday, the parties failed to agree on a unification date. The Volkskammer, the East German parliament, officially began its summer recess Monday.

#90204u1753 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - The stock market stabilized with sharp, broad losses late Monday in heavy trading after the Dow industrials flirted twice with a 100-point loss.

The Dow Jones industrial average, which tumbled 32.67 Friday, was down 74.51 to 2886.63 at 3 p.m. EDT. The Dow bottomed out with a loss of about 106 points at late morning.

Volume at 3 p.m. amounted to about 184,000,000 shares, up sharply from 129,860,000 in the same period Friday.

Prices plunged in active trading on the American Stock Exchange, with only 75 issues advancing out of the 774 issues crossing the tape.

The Dow plummeted more than 100 points during the morning, shoved down by disappointing earnings reports concentrated in the technology sector last week and by market sentiment that interest rates will not be coming down anytime soon.

The bellwether Dow industrials opened lower and were down about 30 points after a half hour of trading. Over the next hour, prices plunged, with the Dow down over 100 points before rebounding on a combination of bargain hunting and program buying, a computerized trading technique used to profit on price spreads between stocks and stock-index futures.

But in afternoon trading, another bout of program selling swept through the market, sending the Dow back down to a loss of almost 100 points before the index again bounced back slightly.

Despite the rout, trading was never in danger of being halted by stock exchange authorities. NYSE regulations currently call for a one-hour trading halt when the Dow falls 250 points and a two-hour halt if it falls another 150 points.

"I think what precipitated this was that in the technology stocks every earnings report has been a negative surprise," said Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent and Co., referring to profit reports and forecasts announced by Advanced Micro Devices, Storage Technology and Texas Instruments. "These stocks have been the market's leadership in the last two quarters," he said.

Kaminsky also said program selling and last week's comments by Federal Reserve Chairman Alan Greenspan that the Fed would like to lower interest rates but cannot with inflation remaining stubbornly high helped "cast a major psychological cloud over the market."

In the U.S. Treasuries market, the long bond was down about 23/32 in early trading, helping push stocks lower, but rebounded as investors sought a

safe haven during the market's free fall and was up 3/32 in early afternoon trading.

The plunge in the Dow came on the heels of sharp declines in the Tokyo stock market, where the major index has lost 3.5 percent of its value in the last two trading sessions.

On the trading floor as of 3 p.m. EDT, McDonald's was the most active issue, plummeting. The fast-food company failed to meet Wall Street expectations in its earnings report Friday. The results were especially troubling, analysts said, because McDonald's - a safe, non-cyclical, consumer-based business - is viewed as one of the more reliable issues in terms of earnings.

McDonald's said Monday afternoon it plans to switch to vegetable oil to cook its french fries and hash browns.

#90204u1756 07/23/1990 ~United Press International

DETROIT (JULY 23) UPI - General Motors Corp. said Monday it will reduce the workforce at its North Tarrytown, N.Y., minivan assembly plant by about 450 workers when 1991-model production starts the week of Aug. 20.

The plant, which employs 3,600 hourly workers, is to close July 30 for changeover to the 1991 versions of the Chevrolet Lumina APV, Pontiac Trans Sport and Oldsmobile Silhouette.

"We are trying to adjust our schedules to align production more closely with sales on a steady, consistent basis instead of all the ups and downs " GM spokeswoman Nettie Seabrooks said. The plant had been producing about 4,200 vans a week, Seabrooks said, which is close to full production levels.

Earlier this month, GM raised the buyer rebates on all three models vans to $1,250 in efforts to stimulate their sales, as well as grab a larger share of the market as Chrysler Corp. - only Number Three overall among U.S. carmakers but the clear leader in the minivan segment of the market - closes its minivan plants for about one month each to convert them to production of an all-new 1991 model.

Industry figures show the Lumina APV had an unsold inventory equal to 91 days as of July 10, while the Trans Sport and Slhouette had 115 and 177 days, respectively - all above the normal level of 65 to 75 days for this time of year.

Those front-drive vans, which share essentially the same plastic bodies and mechanical underpinnings, were introduced for the 1990-model year.

#90204u1797 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - President Bush announced new steps Monday to bolster the economies of the Andean nations of South America, including preferential trade treatment for 67 products from Colombia, Bolivia, Ecuador and Peru.

Bush, ending a meeting with Ecuadoran President Rodrigo Borja, outlined some steps he will take to fulfill commitments he made at the Cartegena anti-drug summit last December to help nations fighting against the drug trade by bolstering their economies.

On the other side of the counter-narcotics effort, Assistant Secretary of State Bernard Aronson said an additional $3 million in military equipment would be made available to Ecuador for anti-drug missions.

Bush announced he would expand U.S. cooperation and technical assistance to Latin American and Caribbean countries in the agricultural sector ''to encourage alternatives to narcotics production.''

Borja is the first Latin American president to visit Washington since Bush announced his ''Enterprise for Americas Initiative,'' designed to create stronger economic relations within the Western Hemisphere.

Bush said he would seek congressional approval for duty-free exports to the United States, patterned after the Caribbean Basin Initiative, until the creation of a hemispheric free-trade zone, which he proposed last month.

In the meantime, he lowered tariffs on 67 products ranging from asparagus to formed zinc. Exports to the United States of those goods amount to almost $27 million and would be expected to increase with the lower tariffs.

Bush also proposed negotiating comprehensive long-term agreements on trade and investment liberalization and said bilateral accords ''are appropriate vehicles for achieving these goals.''

Launching that effort, Bush said the United States and Ecuador would sign an agreement establishing a joint council ''to help our efforts to expand trade and investment between our two countries.''

Borja, struggling to control inflation and hopeful of renegotiating part of Ecuador's $11.3 billion foreign debt, met with Bush in the Oval Office and they continued their talks over lunch.

The Latin American leader, accompanied to Washington by several top aides, also plans talks with officials of the International Monetary Fund, the World Bank, the Inter-American Development Bank and other creditors.

Bush said his new package of measures for the Andean region ''will build on my Enterprise for Americas Initiative and will be steps en route to achieving our ultimate objectives of trade and investment liberalization and economic reform in the region.''

Borja applauded the Americas initiative and praised the fact that it ''depends basically on trade and not assistance.''

''Our country offers an excellent environment for foreign investment,'' he said. ''We welcome foreign investment.''

He also spoke of the foreign debt ''that weighs so heavily upon us,'' saying that solving the debt problem is ''a matter of survival.''

Assistant Secretary Bernard Aronson said the debt issue was discussed, but in no way resolved. The debt-relief component of Bush's recent Latin America initiative has not yet been submitted to Congress.

#90204u1808 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - The importation of modified versions of banned semiautomatic ''assault weapons'' is ''entirely within the law,'' a White House spokesman said Monday.

Press secretary Marlin Fitzwater made the statement in a written response to a Washington Post report that Bush administration officials have approved importations of modified versions of the rifles that were banned a year ago.

The Post said the Bureau of Alcohol, Tobacco and Firearms had granted requests of gun dealers to import new versions of the Uzi, AK-47, Galil, HK-91 and other so-called assault weapons that were prohibited following the schoolyard massacre in Stockton, calif.

The Post said the new versions have been altered to remove flash suppressors, grenade launchers, bayonet attachments and other military-style features that made them unsuitable for ''sporting purposes '' according to a BATF spokesman.

''The importation of weapons that meet the legal criteria for sporting purposes will continue to be allowed,'' Fitzwater said.

He said the current ban on semiautomatic weapons was implemented last

Julyafter a comprehensive review because the weapons had features that rendered them unsuitable for sporting purposes under the 1968 Gun Control Act.

''As manufacturers redesign these weapons to eliminate the undesirable features, the manufacturers may reapply for approval to import the redesigned weapons,'' he said. ''If the redesigned weapons meet the criteria of the 1968 Gun Control Act the application will be approved by the BATF.''

''Thus, the requests for imported weapons, reported in today's Washington Post, were granted because the weapons had been redesigned,'' he said.

''This is entirely within the law,'' Fitzwater said.

He noted that the administration's crime bill limits the number of cartridges in detachable magazines. ''However,'' he said, ''it will not influence the redesign of weapons within the configuration of traditional sporting rifles.''

Fitzwater had suggested earlier to reporters that the new crime bill will influence redesigned weapons.

He added that the goal of keeping ''firearms out of the hands of felons is deeply held by this administration.''

#90204u1821 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - A U.S. district court judge Monday ordered assets to be frozen in a suspected insider-trading case stemming from the proposed merger between two communications companies, GTE Corp. and Contel Corp.

The Securities and Exchange Commission began investigating trading in Contel immediately after the July 12 announcement of the $6.2 billion merger with GTE, the largest U.S. utility company with assets of $31.9 billion.

Charles Haight, U.S. district judge for the southern district of New York, granted a preliminary injunction to freeze assets and bar alteration of documents in the suspected insider trading case filed July 13 by the SEC against a number of foreign investors in Contel stock.

"There is no question that a case of violations of the SEC Act has been made here," Haight told a hearing. "I am satisfied, based on the circumstances, that sufficient showing has been made to justify a preliminary injunction."

The SEC said it was the abnormally high volume of transactions involving Atlanta-based Contel, only two days before the merger announcement, which triggered the regulatory agency's action.

"The trading volume in Contel call options contracts for July 5, July 6, and July 9 was 329 contracts," the SEC said. "For July 10 and July 11, it was 6,546 contracts, an increase of nearly 2,000 percent over the previous three trading days." Following the merger announcement, Contel stock jumped $6.50 on the New York Stock Exchange to $34.50. It was trading Monday down $1 to $33.125.

Haight pointed out that the possibility of repeated insider trading practices was a key factor in granting the order. "There is a reasonable likelihood that the wrong will be repeated," Haight said. "It seems inherent to the nature of insider trading that if the forbidden fruit has been eaten once, it will be eaten again, whether we are dealing with an arbitrageur or an individual."

The SEC so far has identified four West German nationals among an unidentifed number of European investors suspected of insider trading in the Contel case.

The SEC named Ortwin Heider, Hans-Jurgen Klisch, Hannelore Mirbach-Krahn and Bodo Pawlik, among the foreign investors who purchased the Contel stock, "while in possession of material non-public information obtained by misappropriation or in breach of a duty of trust and confidence concerning a possible merger offer for Contel by GTE Corp."

Heider told the SEC he decided to buy Contel shares after he "overheard discusion in a restaurant to the effect that the price of Contel stock would increase because something was going to happen with the company."

The four West German investors traded call options in Contel through the same bank in Dusseldorf, Simonbank AG, which, in turn, had the orders executed through the brokerage firm of Dean Witter Reynolds in New York.

James Kidney, representing the SEC, said no Wall Street firm was suspected in the case, nor was GTE and Contel. The two companies said they would fully cooperate with the SEC investigation.

Also named in the case are two Swiss companies, Geneva-based Nalasag Corp. and Lausanne-based Sigesse SA, which placed call options for their yet unnamed investors through Smith Barney, Harris Upham & Co.

The SEC tracked down other sources of heavy trading in Contel from yet unknown investors through nine other banks in Switzerland and Luxembourg - two countries which have strict bank secrecy laws - and said a total of $215,800 was invested in Contel stock for estimated profits of $1.09

billion, or a 505-percent gain.

"The only customers of Swiss banks to have come forward are certain employees of Union Bank of Switzerland and the bank itself," the SEC said.

The SEC said six of nine Union Bank employees came forward in the investigation and were identified as Frederic Gaillard, Alfred Keller, Rolf Koechli, Philippe Colliard, Thierry Racine and Olivier Roth. All were named in the case because they reportedly invested in Contel shares after witnessing strong activity in the stock by a still unknown investor who placed his orders through Union Bank.

The preliminary injunction gives the SEC time to pursue its investigation. The agency has contacted authorities in West Germany, Switzerland and Luxembourg to gather further information in the case. If found guilty, insider traders could pay fines of up to three times the amount of the profits they would have made.

#90204u1838 07/23/1990 ~United Press International

PHILADELPHIA (JULY 23) UPI - Philadelphia Electric Co. reported second-quarter earnings Monday of $120.4 million, or 45 cents a share, up from net income of $108.9 million, or 41 cents a share, for the same period the previous year. Second-quarter revenues rose to $841.9 million over the 1989 second quarter figure of $777.5 million, the utility reported.

Earnings rose on the force of cost-cutting measures and electricity sales to neighboring utilities, but growth was hampered by higher operating costs at the Limerick Unit 2 nuclear power plant, PE Chairman J.F. Paquette Jr. said. Earnings were also dampened by lower retail sales of electricity due to a mild spring, Paquette said.

For the first six months of the year, earnings totaled $60.4 million, or six cents a share, compared with net income of $252.3 million, or 98 cents a share, for the first two quarters of 1989, PE reported.

The low six-month earnings figure was due to a first-quarter one-time charge in a rate case with the Public Utility Commission, Paquette said. Revenues for the first two quarters of 1990 were $1.75 billion, up from revenues of $1.67 billion for the same period the previous year.

#90204u1893 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - A veteran homicide detective testified Monday about how he duped one of the suspects in the rape and beating of a Central Park jogger into admitting he took part in the brutal attack.

Detective Thomas McKenna, a 25-year police veteran, testified in state Supreme Court in Manhattan that he warned suspect Yusef Salaam that he faced rape charges because of evidence left at the scene of the April 19, 1989, attack.

Salaam at first denied he was in the park when the jogger was attacked by a gang of youths, McKenna said. The detective then told him police had taken fingerprints from the victim's pants, which he described as ''satin and smooth,'' and from which it was easy to lift prints.

''I just said, 'If they match, you are going for rape','' McKenna said he warned Salaam.

Salaam then told McKenna, ''I was there, but I didn't rape her,'' the detective said.

It was the first testimony directly linking Salaam with the attack on the jogger, who was beaten, raped and left for dead in Central Park. The jogger was so severely beaten, allegedly with a rock, a brick, and the attackers' fists, that doctors initially gave her little chance to live.

Salaam, co-defendants Raymond Santana, 15, and Antron McCray, 16, are being tried on 13 criminal counts, including attempted murder, rape, and sodomy. Three other youths are to be tried later.

Throughout the 4-week-old trial, defense attorneys have asserted the youths were tricked into making written and videotaped confessions by police eager to make an arrest in the highly publicized case.

In a rapid-fire, detached delivery, the detective rattled off what Salaam told him of the night of the attack - how a gang of youths gathered

outside the Schomburg Plaza apartments in Harlem where Salaam lived, and decided to go into Central Park where they harassed bikers and joggers.

Salaam told him of how Kevin Richardson, not a defendant in this trial, ''ran out and punched her (the jogger),'' McKenna said.

''He (Salaam) stepped out and hit her with a pipe and she went down,'' the detective said in recounting Salaam's confession. ''She was struggling and he hit her with the pipe again. He was feeling her, one of her (breasts) ... and (Salaam) started feeling her breasts again.''

McKenna then repeated Salaam's narrative of how four teens had intercourse with the victim. Salaam, he said, described himself as sickened by the attack and claimed to have fled to a subway.

The detective said that when Salaam's mother came to the station house with information that he was only 15 years old, he stopped questioning the youth, had him sign a Miranda rights card as proof he had been read his rights, and took his stained jacket from him as evidence.

During the detective's lurid testimony, Salaam sat leaning on the defense table, staring at the witness.

Prosecutors planned to wrap up their cases this week. One of the key pieces of evidence, a videotape confession by defendant Raymond Santana, was expected to be shown to the jury Tuesday or Wednesday.

The videotape confessions are the centerpiece of the prosecution's case against the three suspects.

#90204u1899 07/23/1990 ~United Press International

DETROIT (JULY 23) UPI - Ford Motor Co. said Monday it has tentatively raised prices on 1991 models by an average 3.2 percent, or $528, after raising prices on most 1990 and early 1991 models by 0.3 percent, or an average $49, last month.

Ford also has raised pre-sell prices on its 1991-model light-duty trucks by

3.6 percent, spokesman Dave Krupp said said. No dollar amount was immediately available.

The latest price increases are on a pre-introductory basis. Final prices will be set later this summer, but traditionally do not vary much from the pre-sell prices.

Ford, as well as other top carmakers, announced price increases on 1990 models within the last several weeks, partly to make price increases on new 1991 models seem smaller when they enter showrooms this fall.

Among Ford's car lines, the price of the Taurus L sedan was raised the most during the latest round, up 5.7 percent, or $738, to $13,717 on a per model basis. The lowest increase was placed on the large Crown Victoria sedan, up 1.5 percent, or $312, to $18,227. But Ford raised prices on that model in June, by 0.3 percent, or $61.

Ford declined comment on specifics of its new truck prices, citing a longstanding industry practice. However, light trucks now account for more than a third of all U.S. vehicle market sales since they are now popular alternatives to cars.

Krupp said Ford's price increases were calculated on a sales-weighted basis, including changes in equipment levels, options, and destination fees. However, trade publication Automotive News said the latest price increases average 3.9 percent, or $581. Its calculation is sales-weighted but excludes adjustments for equipment changes.

It also counts the price increase announced last month on most 1990 models. Including that increase, the publication estimated Ford has raised prices by an average of nearly 4.2 percent, or $630.

#90204u1933 07/23/1990 ~United Press International

MOSCOW (JULY 23) UPI - Foreign Minister Eduard Shevardnadze differed with Mikhail Gorbachev over his plan for a new Soviet federation, saying it fails to consider local interests, a participant at a high-level meeting said Monday.

Gorbachev convened another joint meeting of the Presidential Council and the Council of the Federation in his bid to accelerate economic reforms and push forward with a fundamental redistribution of power within the country.

Andrejs Krastins, deputy chairman of the Latvian Parliament, said Shevardnadze was the only person at Friday's meeting of the two advisory panels who objected when Gorbachev presented the 8 basic principles of his new national compact.

''I am afraid of a union treaty,'' Krastins quoted Shevardnadze as saying about Gorbachev's vision for a looser association of states with wide independence rather than the current union of 15 republics controlled from the center.

Shevardnadze, Krastins said, believes that the central government should hold separate negotiations at the highest level with each republic, similar to the forthcoming talks ''with our friends the Lithuanians.''

In another indication of high-level dissension in the Gorbachev camp, senior econonic adviser Abel Aganbegyan chafed over the Aug. 15 deadline given his commission for choosing the best plan for a transition to a market economy.

Gorbachev last week called a new union treaty and the movement away from rigid central planning ''two sides of the same coin.''

Any hesitancy by Shevardnadze about the new national compact could hamper Gorbachev's plan for a decentralized union. Others would likely take such

reluctance seriously because of Shevardnadze's reputation as a brilliant negotiator and his penchant for compromise.

Gorbachev's difficulties as he tries to restructure his huge country were evident at the meeting Friday, which the presidents of Estonia, Latvia and Lithuania did not attend in another manifestation of the Baltic region's growing aloofness from Moscow.

Krastins, who attended the high-level conclave only as an observer, said Gorbachev noted that he had personally invited the Baltic leaders to the meeting and sharply criticized their absence.

''The directives of the center are being ignored,'' Krastins quoted Gorbachev as saying.

Krastins, in a statement released to Western news organizations in Moscow by the Latvian government, provided the first detailed account of Gorbachev's vision for a new Soviet Union.

Gorbachev, who chaired the meeting Friday, outlined eight spheres to be reserved for the central government, some of which are sure to meet with opposition from republics straining for greater sovereignty or outright secession.

Gorbachev said the Kremlin should remain in control of:

-Defense, borders and the KGB.

-Coordination of market relations, unified monetary policy, prices and standards.

-Guarantees of energy supplies for all republics.

-Coordination of transport.

-Foreign policy, foreign trade and customs.

-Environmental regulation and emergency help in the event of natural disasters.

-Personal and legal rights, and the creation of an institution to prevent interethnic conflicts.

-Guarantees for scientific and technical progress.

In the parallel drive toward a more radical economic pogram, Aganbegyan told the newspaper Izvestia that the Aug. 15 deadline was unrealistic because it would leave too little time for the government to develop the

plan before presenting it to the Soviet Parliament in September.

Finance Minister Valentin Pavlov went on Soviet television to deliver the government's latest assurances that it will take steps to protect ''those who cannot provide for themselves in market conditions.''

Pavlov said that ''special measures are envisioned'' that would provide low-income families with welfare payments based on their number of children, give wage bonuses to compensate for planned price hikes and increase interest earnings on savings deposits.

#90204u1967 07/23/1990 ~United Press International

WEST BEND, WI (JULY 23) UPI - A Germantown man pleaded innocent Monday to charges he buried alive his 11-month-old son.

Peter Chapman, 39, is charged with first-degree intentional homicide in the June 24 death of his son, Michael. Tests showed the child was buried alive in a wooded area near Germantown.

Public defender Robert Deters asked for a change of venue, claiming Chapman could not get a fair trial because of publicity in the media.

''It's (news reports) not representative of what went on in court,'' Deters said. ''It's funerals and things like that, that can prejudice a jury.''

Chapman originally told authorities his child was abducted in Milwaukee, but led police to the boy's body the next day. Chapman now says he found the boy dead in his bed, panicked and buried the body.

An Aug. 9 motions hearing was slated before Circuit Judge Richard Becker, and a hearing on the change of venue motion was scheduled for Sept. 14. No trial date has been set.

#90204u1982 07/23/1990 ~United Press International

MENLO PARK, Calif. (JULY 23) UPI - Consolidated Freightways Inc. Monday posted a second-quarter loss of $6.8 million, compared with a profit of $7.6 million, or 19 cents a share, in the second quarter of 1989.

Revenue for the two quarters was $1.04 billion.

The result represented a decline from the previous year but a sharp improvement over the disastrous first quarter.

The results were up sharply, however, from the first quarter, when the company lost $37.1 million on revenue of $997.7 million.

The company's battered stock climbed $1.75 to $15 a share in late trading on the New York Stock Exchange.

Operating losses at the company's Emery Worldwide air freight subsidiary narrowed to $30.9 million in the quarter from $69.5 million in the first quarter. Emery's problems have dogged Consolidated since its purchase of the Connecticut air freight company last April for $230 million.

Lary Scott, president and chief executive officer, said much work remains on the Emery turnaround but he was encouraged by the ''considerable progress'' made in the second quarter.

Consolidated's two trucking companies, CF Motor Freight and Con-Way Transportation Services, posted combined operating profits of $40.1 million in the quarter, up from $29.4 million in the second quarter of 1989.

For the first six months of the year, the company posted a loss of $43.8 million, compared with a profit of $40.1 million, or $1.05 a share, in the first half of 1989.

Revenue rose to $2.04 billion from $1.76 billion in the year-earlier

period.

#90204u2018 07/23/1990 ~United Press International

STARKE, FL (JULY 23) UPI - Florida's electric chair works well enough to carry out a humane execution, a team of experts said Monday after using a tub of salt water, a kitchen colander and a length of metal tubing to test the chair.

Department of Corrections Secretary Richard Dugger said he would immediately forward results of the test to Gov. Bob Martinez, who ordered the test in hopes of satisfying the 11th U.S. Circuit Court of Appeals in Atlanta.

The court has suspended the executions of three Florida inmates because their lawyers have maintained that the chair malfunctions and kills inhumanely.

''I'd say it's safe to conclude that the electric chair works as it's supposed to,'' said Michael Morse, assistant professor of electrical engineering at Auburn University in Auburn, Ala.

''It causes current sufficient to cause cessation of brain function and to cause cessation of life,'' Morse said, describing the test ''a letter-perfect demonstration.''

State officials present at the test in the death chamber at Florida State Prison said they also were convinced that the chair is in good working

order, said state Rep. Ron Silver, chairman of the House Criminal Justice Committee.

''Based on what was demonstrated to me, I believe this should be satisfactory to the court of appeals. I really hope this does satisfy them because I don't know what else we can do,'' Silver said.

Lawyers for the three condemned convicts have argued that their clients could suffer cruel and unusual punishment because the chair may malfunction as it did during the May execution of Jesse Tafero, who was convicted of killing two law enforcement officials. Flames shot from the headpiece and it took three surges of electricity to complete the execution.

''I don't know any other way to simulate this operation any better than what was done here (Monday),'' Dugger said.

But Jerome Nickerson, a lawyer with the state-funded office of Capital Collateral Representative, which handles the cases of indigent death-row inmates, said he was not satisfied with the test.

''It works real good on a colander. ... I certainly don't want to use it on my clients right now,'' he said.

Nickerson also questioned whether the test would satisfy the appeals court since no judge or independent expert was present.

The test inside the small death chamber involved a small table that was set up across from the electric chair. Atop the table was an oval rubber tub filled with salt water and covered with a circuit board measuring voltage and wattage.

The chemical composition of the salt water was the same as what the human body provides in terms of resistance to electricity, Morse said.

The circuit board was connected by a wire to the headpiece on the electric chair where the colander was placed. Morse said a colander was used because it closely represented the size of a human head.

Another wire ran from the circuit board to the chair's electrical connection for one leg and was attached to a length of metal tubing that was connected to a separate rod in the solution.

Morse and prison officials simulated an execution for a crowd of witnesses made up of 11 news reporters and nine state officials, including representatives of the state prison systems in Virginia and South Carolina which use electric chairs similar to Florida's in their executions.

In the test, an official turned on the current three separate times. The voltage meter registered just under 2,000 volts on each test. Morse said the voltage amperage measurements were within the proper readings for an execution.

Morse also said he and state officials had tested the chair Sunday in a simulation of Tafero's execution and had recreated the arc of flames that surrounded Tafero's head.

Prison officials had blamed the flames on a bad sponge in the chair's headpiece, which Morse said was used again in the Sunday test. The sponge is soaked in salt water and acts as an electrical conductor.

The Sunday test also resulted in lowered reading of both voltage and amps, Morse said, adding that he believes there was ''enough to prevent him (Tafero) from feeling pain.''

Morse was paid $150 an hour by the DOC to conduct the tests. He said his final tab should run about $3,000.

#90204u2020 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - The Pentagon cleared the way Monday for the removal of 400 tons of nerve gas weapons from West Germany by the end of the year and their transfer to a remote Pacific island for destruction.

Deputy Defense Secretary Donald Atwood, acting in place of traveling Defense Secretary Dick Cheney, removed the last hurdle by certifying to Congress that the U.S. chemical weapons incinerator on Johnston Atoll in the Pacific Ocean is working and has adequate storage capacity for weapons.

''That means the retrograde (removal of the chemical weapons in West Germany) can begin and probably can begin very shortly,'' Army spokesman Maj. Joe Padilla said.

Removal of all U.S. chemical weapons in West Germany is expected to take one to four months. Padilla said the exact date for beginning removal will have to be coordinated with the West German government.

President Bush and Soviet President Mikhail Gorbachev signed an agreement June 1 to halt production of chemical weapons as soon as the pact is ratified by U.S. and Soviet lawmakers and to reduce each side's chemical stockpile to 5,000 tons by 2002.

The United States has about 25,000 tons of chemical weapons, the Soviet Union about 50,000 tons.

In his notice to Congress, Atwood certified that the ''Johnston Atoll Chemical Agent Destruction System has destroyed live agent chemical munitions, and that adequate storage capacity exists at Johnston Atoll to accommodate any chemical munitions or hazardous materials transported to that site,'' the Pentagon said.

Congress required the certification before weapons could be removed from West Germany.

The nerve gas is in about 100,000 artillery shells stored in a large, secluded depot at Clausen, near the French border in the state of Rhineland-Palatinate.

The stockpile consists of two types of nerve gas, Sarin and VX, odorless and colorless agents that attack the nervous system and can cause convulsions and death within minutes.

Under the U.S. withdrawal plan, the shells will be placed in vapor-proof containers, trucked in high-security convoys 28 miles to a rail station at Miesau, taken by train several hundred miles to the North Sea port of Nordenham, and then shipped to Johnston Atoll, 700 miles southwest of Hawaii, for destruction by the U.S. Army.

The removal is projected to cost $46 million.

An initial U.S.-German plan called for withdrawal of the weapons by 1992 but West German Chancellor Helmut Kohl successfully pressed the Bush administration in 1989 to move more quickly.

The weapons to be removed from West Germany are ''unitary'' shells that contain deadly gas. The more modern ''binary'' weapons carry two chemical agents that are harmless until mixed together shortly before reaching their targets.

The removal will leave the United States without chemical weapons in Western Europe for the first time in more than 20 years.

As a result of the new U.S.-Soviet accord, Cheney earlier this month canceled planned tests of the nation's newest chemical weapon and told military officials to begin to prepare to put chemical production facilities into mothballs.

He also withdrew the administration's request for $140 million in new production funds for binary chemical warheads for artillery shells and bombs.

The United States resumed production of chemical weapons in 1987 following an 18-year moratorium.

#90204u2063 07/23/1990 ~United Press International
JERUSALEM (JULY 23) UPI - European Community foreign ministers told Israeli Foreign Minister David Levy Monday that European-Israeli relations could suffer if the Middle East peace process does not move forward, something they said cannot happen without PLO participation.

After two hours of talks between Levy and the foreign ministers of Ireland Italy and Luxembourg - the past, present and future presidents of the EC Foreign Ministers Council - Levy repeated Israel's rejection of talks with the PLO. But he said differences of opinion should not poison Israel-EC relations.

''The PLO is not a partner to speak with. The PLO has shown that it has remained a terrorist organization,'' Levy told reporters after meeting with the Europeans. After European ministers delivered their message to Levy, Levy said they all agreed ''divergencies of opinion'' should not ''bring about a deterioration in the relationships between Israel and the European Community.''

But Italian Foreign Minister Gianni de Michelis, the current president of the EC ministers council, said economic, cultural and social cooperation between Israel and its biggest trading partner would ''become more and more difficult if the situation continues to deteriorate'' and the peace process is not advanced.

De Michelis said Israel must advance the peace process and respect the human rights of Palestinians living in the occupied West Bank and Gaza Strip.

''We are concerned that there has been a delay in the peace process. The government of Israel must recognize that a Palestinian interlocutor that really represents the will of the Palestinian people can be found - and that interlocutor is the PLO,'' he said.

''We feel that basic human rights guarantees must be made to the Palestinian people,'' he added.

Levey said Israel remains committed to making peace with Palestinians and its Arab neighbors, even though it will not meet with Palestine Liberation Organization.

Israel's relations with the EC have been strained since the beginning of the year when the European Parliament suspended joint technical and scientific projects because of Israel's handling of the Palestinian uprising and the lack of progress in the peace process.

The Europeans, who arrived in Israel late Monday afternoon, said they did not discuss establishing a permanent representative in the occupied territories to administer EC aid because the EC has yet to take a formal position on the plan.

Last week a senior Israeli official said Israel would oppose the establishment of a permanent EC office in the occupied territories but would welcome additional aid to the Palestinians.

The ministers are scheduled to leave Israel Tuesday after a meeting with Prime Minister Yitzhak Shamir. Their next stop is Tunis where they will meet with Arab League ministers.

#90204u2079 07/23/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 23) UPI - The launch of an Atlas 1 rocket carrying a $189 million science satellite was postponed at least 24 hours Monday because of an electrical problem, the third delay in four days for the commercially built rocket's debut.

The countdown was proceeding smoothly until a few minutes before the scheduled 3:26 p.m. EDT launch, when engineers could not switch on the rocket's internal power.

General Dynamics Corp., the rocket's builder, could not pinpoint the source of the problem in time to make two launch windows, forcing the blastoff to be scrubbed for the day.

''It would appear there will not be enough time to troubleshoot the problem with the Atlas vehicle power changeover switch,'' said NASA launch commentator George Diller from the mission control center.

Technicians began draining the rocket's fuel, a two-hour process necessary before they could begin inspecting the rocket to determine what repairs were necessary.

Engineers hoped to find and repair the problem in time to launch the rocket at the next opportunity, at 3:23 p.m. EDT Tuesday. Favorable weather conditions were forecast.

Before Monday's problems, the 143-foot booster sitting on launch pad 36-B at the Cape Canaveral Air Force Station had already been delayed twice before, Friday because of a helium leak and Sunday by stormy weather.

Mounted inside its protective 14-foot-wide nose cone is the Combined Release and Radiation Effects Satellite, or CRRES, a joint NASA-Defense

Department satellite built to study the interaction between the supersonic solar wind, Earth's upper atmosphere and the planet's magnetic field.

CRRES, a solar-powered, 3,732-pound satellite built by Ball Corp. of Denver, is equipped with 24 canisters of barium and lithium that will be released into space and detonated over the next year, ''painting'' the otherwise invisible magnetic field with vast clouds of glowing chemicals.

Program manager Richard Howard said the releases, scheduled to begin in September and continue through next July, should be ''very visible'' to observers in the United States, creating celestial displays that bear ''an uncanny resemblance'' to the aurora borealis, or northern lights.

The satellite also carries Defense Department experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

The mission marks the debut of the Atlas 1 rocket, a commercial version of the workhorse Atlas-Centaurs built by General Dynamics of San Diego, Calif. A successful launch was considered crucial to the company's plans to win a share of the lucrative commercial launch market, dominated by the European Ariane rocket program.

CRRES originally was scheduled for launch Friday, but a liquid helium leak between the first stage of the Atlas and its Centaur second stage forced NASA managers to delay the flight with less than an hour to go before blastoff. The leak was fixed Saturday.

The Atlas 1 was valued at $64 million. But under the terms of the launch contract, General Dynamics swapped the rocket for out-of-use government launch equipment that will be modified for use in the commercial Atlas program.

CRRES was built to study the invisible bubble of Earth's magnetic field, called the ''magnetosphere,'' to learn more about how it interacts with the solar wind, a stream of electrons, protons and other particles blasted away from the sun. The importance of such research is easily seen.

When high-energy particles from a solar flare smash into the magnetosphere, for example, a ''geomagnetic storm'' can occur, disrupting communications and causing problems for electrically sensitive satellites.

To learn more about how the process works, CRRES will release chemical ''tracers'' into space that will briefly paint the otherwise invisible magnetic field with bright colors.

For each experiment, one or two canisters will be ejected into space and

detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively-charged electrons in a given atom to give the gas an electrical charge.

The resulting ''plasma'' clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

#90204u2087 07/23/1990 ~United Press International

ATLANTA (JULY 23) UPI - Equifax Inc. said Monday it has signed a definitive agreement to acquire Telecredit Inc., a Los Angeles check and credit authorization company, for about $600 million.

Equifax had announced last month an agreement in principle to acquire Telecredit. The deal is the company's largest acquisition. The stock-for-stock transaction, which was unanimously approved by the boards of directors of both companies, is expected to be completed by the fall.

The deal would give Equifax a large, new line of business related to its information services. The deal calls for Telecredit shareholders to receive 2.69 shares of Equifax stock for every share of Telecredit stock they own.

If that exchange rate would result in Telecredit stockholders receiving less than $50 a share in value of Equifax stock for each share of Telecredit stock, based on an average of Equifax closing prices for a specified period, Equifax may increase the rate to yield $50 in value of Equifax stock.

If Equifax does not choose to increase the exchange rate, Telecredit may terminate the agreement. If the exchange rate yields Telecredit stockholders more than $62 in value of Equifax stock, the exchange rate will be reduced to yield $62 in value of Equifax stock.

Equifax already is one of the nation's leading suppliers of credit reports on individuals, retailers and banks, and a leading supplier of motor vehicle records and other data to insurers.

Telecredit provides check guarantees, and authorizes and processes credit card transactions at the point of sale. Equifax, which has 12,714 employees, reported earnings of $35.7 million on revenues of $840.3 million last year. Telecredit employs 1,041 persons and had earnings of $24.9 million on revenues of $149.7 million last year.

Equifax has been aggressive in the past two years, making 28 acquisitions in as many months. Previously, the company's largest acquisition was the $25-million purchase of National Decision Systems, a California-based company acquired in two portions in 1986 and 1988.

When the deal was first announced last month, Equifax president C.B. Rogers Jr. said there would be no duplication of services between the two companies. "We are at the back of the credit cycle and Telecredit is at the front," said Rogers. "While we are in the same industry, we don't overlap or compete."

#90204u2126 07/23/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JULY 23) UPI - Britain and Czechoslovakia signed an agreement Monday under which they will share information on terrorism, drugs and other serious crimes in the first case of formal East-West intelligence cooperation.

Britain and Czechoslovakia first cooperated after the Czechoslovak-made Semtex plastic explosive was suspected in the downing of a Pan Am 747 jet over Lockerbie, Scotland on Dec. 21, 1988, killing 270 people, including 11 on ground.

Investigators said the blast was caused by a bomb, but it could not be determined who was responsible.

In London early this year, President Vaclav Havel said Prague had sold enough Smetex plastic explosive to Libya for ''150 years'' of terrorism.

A senior diplomatic source said the intelligence-sharing agreement signed Monday by British Foreign Secretary Douglas Hurd and Foreign Minister Jiri Dienstbier would deal mostly with drug trafficking, and Prague might not necessarily offer more information about the previous regime's close ties to international terrorism.

Czechoslovakia in the past trained Palestinian terrorists and harbored others, including the international terrorist Carlos.

''Some sharing has already been going on,'' said the source, ''but Czechoslovakia will have to determine for itself what information about the past it will share with Britain.''

Senior Czech security officials said privately it is highly unlikely that all previous links have been broken. They said top officials are unlikely to share information that might anger or reawaken the remaining terrorist support networks.

Hurd also said Britain would step up economic counseling to Czechoslovakia sending a team of economic advisers to advise on privatizing its state-run economy.

''It is a striking example of where the best and most relevent aid we can offer is our knowledge and skills,'' he said.

Hurd said preparations for the November's Paris summit of the 35-nation Council for Cooperation and Security in Europe were ''moving forward in the general direction Czechoslovakia and Britain have favored and prepared over the past few months.''

He added that the CSCE reforms proposed at the London Nato summit meeting earlier this month were close to the Czech proposal to abolish the system of opposing blocs, and create a Council on European Security headquartered in Prague.

(JULY 24) UPI - SPORTS TRANSACTIONS

BASKETBALL

Chicago - Signed free-agent forward Scott Williams.

Milwaukee - Signed free-agent guard Miles Clarke.

Washington - Waived center Mel Turpin.

FOOTBALL

Cleveland - Signed receiver Joey Clinkscales and safety Falanda Newton as free agents; placed defensive lineman Rhondy Weston on the physically unable to perform list.

Green Bay - Signed linebacker Bobby Houston, quarterback Kirk Baumgartner and fullback Harry Jackson.

Kansas City - Signed offensive lineman Tim Grunhard to a four-year contract; signed defensive tackle Tom Sims, running backs Michael Owens and James Saxon and linebacker Craig Hudson to two-year contracts.

NY Giants - Signed punter Sean Landeta, wide receiver Stacy Robinson and 8 draft picks: defensive linemen Greg Mark, Clinton James, Otis Moore and Tim Downing, defensive back David Whitmore, quarterback Craig Kupp, tackle Barry Voorhees and kicker Matt Stover; placed linebacker Chad Robinson on did not report list.

NY Jets - Waived running back Curtis Adams, defensive back Michael Hall, receiver Phil Vinson, kicker Neil Weaver and safety Patrick Williams; placed on physically unable to perform list tight end Patick Kelly, safety Rich Miano and cornerback Terry Williams; placed on non-football illness list defensive end-tackle Paul Frase.

Philadelphia - Signed safety Kevin Thompson; acquired rights to punter Shawn McCarthy; waived wide receiver Willie Vaughn.

Washington - Released cornerback Derrick Richie.

#90204u2171 07/23/1990 ~United Press International

AUSTIN, Texas (JULY 23) UPI - Federal officials negotiating the General Agreement on Tariffs and Trade (GATT) in Geneva are working to undermine family farmers and reduce food safety standards, Agriculture Commissioner Jim Hightower and a coalition of farm and environmental groups charged Monday.

''If they succeed, millions of family farmers throughout the world will go bankrupt, our borders will be opened up to a flood of low-priced food and fiber imports and the right of Congress and individual states to set adequate pesticide residue and food safety standards will be eliminated,'' Hightower said at a Capitol news conference.

He said U.S. negotiators at the GATT talks, which include the European Community and other big farming nations, support a program that would eliminate price floor and supply management mechanisms, including the marketing loan - the lynchpin of the cotton and rice programs in Texas.

The negotiators would also do away with Farmers Home Administration loans; deficiency payments, which compensate for artifically low market prices; federal export promotions, import quotas on beef, textiles, dairy products peanuts, cotton, sugar and other products; state and federal marketing assistance programs and publicly funded agriculture research and extension programs.

If current U.S. proposals are accepted, it could cost agriculture producers in Texas up to $1 billion a year, Hightower said.

He also said that a non-elected, unaccountable international panel of scientists, the Codex Alimentarius Commission, would have the authority to set safety standards for pesticide residues on imported agriculture products.

Hightower said produce would be allowed to enter the United States under

Codex standards instead of U.S. Food and Drug Administration Standards.

Tom Smith, director of Public Citizen of Texas, said that GATT really stands for Guarantee of A Toxic Tomato.

He said it would be legal to sell imported produce in the United States that had been treated with chemicals that are banned from use in this country.

Lois Wales, a member of the Texas Corn Producers Board; and Joe Rankin, president of the Texas Farmers Union, said the GATT talks are being conducted without any imput from American farmers and that that field hearings should be conducted before any final agreement is reached.

''In truth, GATT is yet another (Bush) Administration attempt to bust farm prices on behalf of commodity processors and shippers,'' Hightower said, noting that the U.S. position on GATT was developed by Daniel Amstutz, former chief executive officer of Cargill, an international grain processor and shipper; and U.S. Agriculture Commissioner Clayton Yeutter, former chairman of the Chicago Mercantile Exchange.

''These guys have never represented family farmers, and they don't represent family farmers at GATT,'' Hightower said.

In the first day of GATT talks on Monday, attention focused on the dispute over the future of agricultural trade. Participants agreed that negotiations covering all agricultural products should start next month.

#90204u2175 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - A 100-point intraday plunge in the Dow Jones Industrial average Monday sunk the dollar, which fell to a 2 1/2-year low against the deutsche mark and lost ground against all major currencies.

Traders said the dollar sustained its largest losses against the German monetary unit, which was quoted at 1.6215 late Monday against 1.6380 Friday, and the Swiss franc, quoted at 1.3825 against Friday's 1.4020.

The dollar had not been quoted so low against the deutsche mark since the first week of January 1988, when it was changing hands at 1.5858 marks.

"The dollar got attacked by the lack of confidence over the stock market plunge," said Jim Merrill, senior international economist at McCarthy, Crisanti & Maffei Inc.

The Dow, which is a widely followed average of 30 blue chip issues, closed down 56.44 points to 2,904.70 after recovering somewhat from a late

morning dip of just over 100 points.

The selling spree was sparked by disappointing earnings results from the high-technology sector and concern that interest rates will remain stubbornly aloft in the near future.

In late New York trading, the dollar was quoted at 148.20 Japanese yen against Friday's 148.60. The U.S. unit was buoyed somewhat against the yen by cross selling of the Japanese currency against the mark, traders said.

Other New York dollar rates: 5.4430 French francs, off from 5.4950; and 1,188 Italian lire, down from 1,200. The British pound moved up to $1.8255 from $1.8180.

In London, the pound closed higher against at $1.8215 against $1.8135 at Friday's close.

The dollar was down across the board in Europe. In Frankfurt, the dollar fell at one point to a low of 1.6245 German marks but climbed again slightly to close at 1.6285 marks as Wall Street picked up from the initial tumble.

The dollar was down in Zurich at 1.3925 Swiss francs from 1.4085. The U.S. unit fell in Paris, and Milan, at 5.4920 French francs against 5.5075, and at 1,198.75 lire from 1,202.50 Friday.

The close in Milan was the lowest fixing for the dollar in Italy since Jan. 13, 1988, when it closed at 1,196.50. The market was closed in Brussels for a Bank holiday. It will reopen Tuesday.

Earlier in Tokyo, the U.S. dollar made a slight gain against the yen in reaction to another sharp drop in prices on the Tokyo Stock Exchange.

The dollar closed at 148.50 yen, up 0.15 yen from Friday's close at 148.35 yen. Dealers traced the dollar's rise to the dramatic fall in prices on the Tokyo Stock Exchange, which has lost 3.5 percent of its value in the last two sessions.

The stock market has been hit by speculation that the Bank of Japan will soon increase interest rates to cool a quick rise in Japan's money supply.

In Zurich, gold closed higher at $366.50 an ounce from $361.50 an ounce, and also was higher in London at $368.25 an ounce against $361.25 an ounce Friday.

Analysts said dealers were buying gold as a safe haven out of equities in the wake of plunging prices on Wall Street.

Republic National Bank in New York closed cash gold at $368.75 an ounce, up from $361.00 Friday. The New York Commodity Exchange settled gold at $369.10 an ounce, up from $361.30.

Silver closed higher in Zurich at $4.92 an ounce from $4.85 an ounce at close Friday, and was up in London at $4.92 an ounce from $4.88 an ounce Friday.

Republic closed cash silver at $4.90 an ounce, up from $4.85. Comex silver moved ahead to $4.882 an ounce from Friday's $4.848.

#90204u2179 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - Ford Motor Co. will undertake a program to eradicate one of the automotive industry's scourges, the cumulative trauma disorders suffered by workers performing repetitive motions, the Labor Department said Monday.

Ford agreed with the department's Occupational Safety and Health Administration to reduce ergonomic, or work, hazards in 96 percent of its plants, Labor Assistant Secretary Gerard F. Scannell said.

Ford will also pay $1.2 million in penalties stemming from an OSHA inspection of Ford Electronics and Refrigeration. OSHA proposed July 7, 1989 a penalty of almost $2 million against the facility in Lansdale, Pa. for alleged violations of occupational safety and health recordkeeping requirements.

OSHA said the settlement was the most extensive in the agency's history.

Dick Routh, a company spokesmen, called the settlement fair and said the company was commited to carry it out at the 81 plants.

Cumulative trauma disorders are painful and sometimes crippling conditions of the musculoskeletal and nervous system caused by repetitive motions over extended periods of time.

Among the most common CTDs are lower back injuries and carpal tunnel syndrome, a nerve ailment of the hand and wrist, and various tendon disorders. CTDs are prevalent in the automotive industry, OSHA noted.

''Injuries resulting from ergonomic hazards will be one of the greatest worker health and safety concerns in the next decade,'' Labor Secretary Elizabeth Dole said in announcing the Ford agreement.

The Ford program, which will be jointly administered by Ford and the United Auto Workers Union, includes analysis of jobs for ergonomic hazards

engineering and administrative controls, a medical management program, employee training and education, and annual ergonomic audits.

OSHA said that Ford is seeking similar agreements with the unions at its remaining three sites.

Last November, OSHA, Chrysler and the UAW reached a pact to control cumulative trauma disorders in five Chrysler auto assembly plants.

#90204u2181 07/23/1990 ~United Press International

NEW YORK (JULY 23) UPI - The Dow industrials fell more than 100 points during Monday's trading for the first time since the October "minicrash," rebounded late in the day, but still rang up their third-largest loss of the year.

Analysts blamed the early debacle on poor earnings reports, a gloomier outlook for interest rates after last week's inflation data, and stock prices that had become overvalued relative to earnings.

The Dow Jones industrial average, which tumbled 32.67 Friday, sank 56.44 to close just above the 2900 level at 2904.70, a loss of about two percent.

The Dow bottomed out with a loss of about 106 points at late morning. Its two larger losses in 1990 came on Jan. 12, when it fell 71.46 and on Jan. 22, when it sank 77.45. The Dow transportation average also fell two percent, losing 23.18 to 1136.13.

The broad market failed to show any rebound from the early sell-off, however, as declines overpowered advances, 1,404 to 225, among the 2,012 issues crossing the NYSE tape. In fact, the broad list had its worst day of the year as the lead of losers over gainers was the biggest of 1990.

Among broad market gauges, the New York Stock Exchange composite index slumped 3.43 to 194.22. The price of an average share plunged 60 cents. Standard & Poor's 500-stock index slid 6.30 to 355.31.

Volume amounted to about 209,030,000 shares, up sharply from the 177,867,000 shares traded Friday.

For the first time since its 190-point drop on Oct. 13, the Dow plummeted more than 100 points during a session.

Despite the rout, trading was never halted. NYSE regulations now call for a one-hour trading halt when the Dow falls 250 points and a two-hour halt if it falls another 150 points.

Analysts blamed disappointing earnings reports concentrated in the technology sector last week such as Advanced Micro Devices, Storage Technology and especially Texas Instruments, which late Friday reported quarterly earnings of two cents a share compared with $1.14 a year ago.

And the feeling that interest rates will not be coming down anytime soon after last week's report of unexpectedly high inflation drained the market of much of the fuel that powered its rally to the 3,000 mark.

The bellwether index opened lower and was down about 30 points after a half hour of trading. Over the next hour, prices plummeted, with the Dow down over 100 points before rebounding on a combination of bargain hunting and program buying, a computerized trading technique used to profit on price spreads between stocks and stock-index futures.

But in afternoon trading, another bout of program selling swept through the market, sending the Dow back down to a loss of almost 100 points before the index again bounced back to recover almost half of that loss.

"When you lose 105 points in an hour, before you've even had your first cup of coffee, you've kind of exhausted all the selling," said Alfred Goldman, a market strategist at A.G. Edwards & Sons Inc. in St. Louis, in explaining the late recovery.

"The market did a month's worth of damage in the first hour, paused, and then we had some bargain-hunting by the bulls. And sell programs, which also played a big part in the early plunge, diminished," Goldman said.

But along with poor earnings and a darker outlook for interest rates, said Goldman, a main reason for the morning collapse was that the "market was primed and ready for a pullback. We're up 350 points since the first of May. Excesses (in prices) had built up in relation to book value and earnings."

As for whether the sharp decline in the Tokyo market over the last two sessions played a part in the plunge, Goldman said, "It didn't help but if the market weren't vulnerable it wouldn't have been a problem.

On the trading floor, McDonald's was the most active issue, plummeting three to 33. The fast-food company failed to meet Wall Street expectations in its earnings report Friday. The results were especially troubling, analysts said, because McDonald's - a safe, non-cyclical, consumer-based business - is viewed as one of the more reliable issues in terms of earnings.

McDonald's said Monday afternoon it plans to switch to cholesterol-free vegetable oil to cook its french fries and hash browns.

Philip Morris was the second most active issue, down 1 1/8 to 49. Wal-Mart was third, off one to 32 1/2. General Electric was also active, sinking 1 1/2 to 72 1/2.

Among the other blue chips showing especially dramatic losses were IBM, down 1 3/4 to 115 7/8; Eastman Kodak, down 1 1/8 to 38 3/4; Merck, off 1 5/8 to 88 1/2; Coca-Cola, losing 1 1/8 to 46 1/8, and General Motors, which fell 1 1/8 to 48 1/2. AT&T fell 3/8 to 37 1/4.

Prices plunged in heavy trading on the American Stock Exchange. The Amex Market Value index sank 5.53 to close at 354.92. Declines overpowered advances, 502 to 100, among the 816 issues traded. The price of an average share fell 19 cents. Volume totaled 17,170,000 shares compared with 11,436,825 shares traded Friday.

The National Association of Securities Dealers composite index plunged 10.63 to 444.63, its worst loss since losing 14.90 points Oct. 13.

#90204u2202 07/23/1990 ~United Press International

SAN FRANCISCO (JULY 23) UPI - Chevron Corp. said Monday it would take a $30 million charge against second-quarter earnings to sell a number of mineral assets and restructure its Chevron Resources Co. subsidiary.

In a ''fundamental shift'' in strategy, Chevron said it would sell all but three major non-coal minerals projects - a platinum and palladium mine in Montana, a copper and silver property in Chile, and zinc and lead deposits in Ireland.

Control of those projects will be shifted to its Pittsburg & Midway Coal Mining Co. subsidiary in Englewood, Colo. The company will cease all non-coal minerals exploration outside of the three projects.

Chevron Resources will oversee the sale of other minerals assets, which are expected to fetch more than $70 million before taxes and result in a net loss.

The sales and restructuring will affect about 60 employees at the headquarters of Chevron Resources in San Ramon, Calif., and 150 employees in exploration and field operations.

About 10 of the headquarters employees will be transferred to Pittsburg & Midway Coal Mining. The company said it would seek jobs within Chevron for other workers and hoped asset buyers would retain many of the field workers.

Those that are not retained will be offered severance packages, Chevron

said.

The three projects that will be retained have ''significant cash flow and earnings potential over the long term,'' Chevron said.

The projects are the Stillwater mine and smelter in Montana, the only U.S. producer of platinum and palladium; the Collahuasi copper and silver property in Chile; and the Lisheen zinc and lead property in Ireland.

The assets planned for sale include a 50 percent interest in the Golden Bear gold mine in British Columbia, three other gold properties in Chile, Canada and Oregon, and the American Gilsonite Co. in Salt Lake City, which produces a substance used as an oil-drilling additive.

-30- 2148

#90204u2223 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - NASA officials trying to speed the repair of the Hubble Space Telescope said Monday they should be able to figure out in about two weeks the prescription of the nickle-sized mirrors needed to correct its blurry vision.

Hubble project scientists planned to travel to the Jet Propulsion Laboratory in Pasadena, Calif., Tuesday to discuss strategies that may push ahead the shuttle mission to repair the $1.5 billion orbiting telescope by as much as six months. The original date set for the first trip to service the telescope was June 1993.

''We are hoping for something like three to six months acceleration,'' said Hubble project scientist Edward Weiler, adding that speeding the repair effort would probably cost about an additional $10 million.

Hubble is suffering the effects of a flaw in one of its two light-focusing mirrors, a slight error in curvature that blurs its pictures of stars, galaxies and other light-emitting objects.

It is suspected the mistake, called spherical aberration, occurred when the primary mirror was made 10 years ago by a firm now known as Hughest Danbury Optical Systems of Danbury, Conn.

NASA officials think they can compensate for the mirror flaw by inserting corrective mirrors in a new camera already scheduled for installation during the space shuttle mission about three years from now.

Scientists are now trying to determine what optical prescription they should use to grind the mirrors, which Weiler described as ''about the size of a nickel.''

''Determining an accurate prescription (for the new camera's mirrors) is the No. 1 priority of this program right now. We are probably talking in the order of a couple weeks,'' Weiler said.

Unless the independent panel investigating Hubble's woes turns up a relatively simple mistake in equipment or written orders used to grind the main mirrors, NASA scientists will have to rely on analysis of the out-of-focus pictures taken by the telescope in its current state to determine the shape of the corrective mirrors.

Weiler said he expects no problems in persuading space agency administrators to move the Hubble repair mission ahead of schedule. ''I'm sure NASA will come through with a shuttle flight,'' he said.

Hubble, launched from the shuttle Discovery April 25 into orbit above Earth's hazy atmosphere, is expected to peer into the universe with greater clarity than ever before.

In other developments, Weiler said NASA had ruled out the possiblity of installing a doughnut-shaped shield on the end of the telescope's tube to prevent light from falling on the outer portions of the primary mirror where the problem is most pronounced.

Efforts to halt the jitter that shakes the telescope when it goes from night to day are also running about two weeks behind schedule, Weiler said. It now appears the computer software needed to fix the problem will not be in place until late August or early September, after which the observatory's scientific mission can begin in earnest.

Despite the problems with observations of visible-light objects, Hubble can still perform important scientific work using ultraviolet light. Weiler said the latest estimate is that the giant telescope can perform about 56 percent of the scientific work it was originally scheduled to conduct in the first year.

PITTSBURGH (JULY 23) UPI - As many as 95 people will lose their jobs beginning this fall when Cyclops Industries Inc. closes its Pittsburgh high-temperature sheet plant, company executives said Monday.

The move is part of an attempt to realign the product lines of its Cytemp Specialty Steel division, Cyclops Executive Vice President Joseph Nowak said.

The layoffs will inlclude 80 to 85 hourly workers and 10 salaried employees, Cyclops spokeswoman Susan Breon said. The layoffs will be

phased in and could begin as early as mid-September, she said. Breon said all of the layoffs will take place by the end of the year.

''High-temperature sheet has been a low volume product for some time,'' Nowak said. ''Moreover, we are adjusting the mix of our stainless long products to focus on more profitable markets.''

Other changes:

- the Cytemp operations at Titusville, Pa., will be dedicated primarily to high-temperature bar and billet and precision-rolled products used principally for the aerospace market;

- the Bridgeville, Pa., operation will be called Bridgeville Stainless and Alloy Products. It will pursue semi-finished stainless sales, manufacture and market stainless long products and produce tool steel plate. It also will provide melting and blooming mill conversion for outside customers.

Cytemp also said it is seeking a buyer for its powder metals business.

Cyclops will record a one-time charge to earnings which it estmates will not exceed $16 million before income taxes, officials said. The result will be a loss for the company for the second quarter and the first half of the year, Nowak said.

''In evaluating our strategy for these divisions, we believe these moves are necessary in order to enable us to focus on those products having the greatest profit potential and eliminate loss operations,'' Nowak said.

LOS ANGELES (JULY 23) UPI - The jury in the McMartin Pre-School molestation retrial returned a second sealed verdict Monday but indicated it was deadlocked on six other charges against Raymond Buckey, a former teacher at the nursery and the sole defendant remaining in the once-massive case.

The district attorney's office said the judge was to meet with defense lawyers and prosecutors before deciding whether to urge the jury either to resume its deliberations or simply accept its verdict on two of the eight counts against Buckey.

The verdict returned earlier in the day was the second in the case that turned the nation's attention to the problem of child molestation.

Court officials said the jury also told the judge ''they were having some trouble'' and apparently could not reach verdicts on the six other charges.

The jurors began their third week of deliberations Monday morning. They had returned their first verdict Friday, the 10th day of deliberations.

At that time, Superior Court Judge Stanley Weisberg ordered the verdict sealed until jurors had decided the remainder of the molestation counts against Buckey.

Buckey, 32, is accused of molesting three young girls at the now-closed Virginia McMartin Pre-School in Manhattan Beach from 1979 until 1983. The former preschool teacher has steadfastly maintained his innocence.

At the end of a marathon first trial in January, Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted of 52 other molestation counts involving a total of 11 children.

The first jury deadlocked on the eight counts on which Buckey is being retried.

TRUCKEE, Calif. (JULY 23) UPI - Archaeologists said Monday they have found campsites thought to have been used by the Donner brothers, leaders of an ill-fated group of settlers whose winter of starvation and rumored cannibalism forms one of the more harrowing chapters in pioneer history.

The 87-member group led by brothers George and Jacob Donner lost 40 of its members, including the brothers and their wives, in northern California's rugged Sierra Nevada during the winter of 1846-47.

Richard Markley, the Tahoe National Forest's archaeologist, said Monday that a dig that ended two weeks ago uncovered tiny but significant items at two sites near the spot where the brothers themselves were believed to have camped. The area is now within the national forest.

The artifacts included crockery, handmade nails and other items typical of 1840s pioneer expeditions, he said. Also found were wagon parts, musket balls and tiny bits of charred bone. Markley said the bone pieces were too small and blackened by cooking fires to identify.

Anthropology professor Don Hardesty, who brought students from the University of Nevada-Reno to the dig, said the biggest items found were wagon parts only 3 or 4 inches long.

''This place has been picked over literally since it was abandoned by the Donners,'' he said.

Markley said Gold Rush travelers often made special stops on their journeys west to look for souvenirs of the Donner group, which was snowed in while attempting to cross the mountains and settle in the valleys beyond.

The best indications that the campsites date to the time of the Donners came from fragments of a type of china called shell-edged pearlware that was popular in the early 1800s and from percussion caps, which were used briefly in guns before the invention of the cartridge, Hardesty said.

Markley said this summer's discoveries are important because most of what has been known about the horrible winter comes from the larger of two campsites, at what is now called Donner Lake.

The Donner brothers, their families, and several teamsters - 22 people in all - were forced to camp at the smaller site because of a broken wagon axle suffered when an early snowstorm hit.

There was not much contact over the winter between the Donner Lake camp and the Donner brothers' camp 5 miles away, Markley said.

One adult and 10 children made it out of the Donner brothers' camp alive. Hardesty said the adult was the person most suspected of cannibalism.

For the first three weeks of the dig, the project concentrated on a fruitless search around an ancient tree traditionally believed to have supported the George Donner family's shelter, Hardesty said.

The two excavations that turned up artifacts were elsewhere. Hardesty said one was at the traditional site of the Jacob Donner shelter and the other was next to the rotting stump of a tree apparently cut down by loggers in the late 1800s.

Markley said the ''tantalizing results'' found at the end of the dig seem to represent ''the tip of the iceberg.'' Another weeklong dig starts Aug. 13, and participants are trying to get funding to continue work next year.

Nothing found by the 20-odd scholars and students establishes beyond a doubt that the campsites belonged to the Donners.

''We haven't found anything that says 'George Donner' on it,'' Markley said. ''It could be another 1840s immigrant party. But our sense is, it's got to be more than coincidence.''

Hardesty went further, saying, ''We're 99 percent certain that the two sites are those of the Donner Party.''

#90204u2341 07/23/1990 ~United Press International
CINCINNATI (JULY 23) UPI - Eagle-Picher Industries Inc. Monday filed a motion in federal court in New York seeking nationwide class action status for all asbestos-related personal injury claims.

''Class certification is appropriate in order to avoid the needless expenditure of tens of millions of dollars to relitigate the same issues in case after case, thus making these dollars available to satisfy meritorious claims,'' said Eagle-Picher. ''Class certification also minimizes the risk that the resources available to compensate deserving claimants will be insufficient.''

Eagle-Picher has been handling asbestos litigation cases individually for several years.

The company's request came one week after the chief federal judge for the Northern District of Ohio ordered establishment of a national class action to coordinate asbestos-related personal injury and wrongful death suits.

U.S. District Judge Thomas Lambros in Cleveland cited many of the same concerns cited by Eagle-Picher. Lambros said the Northern District of Ohio has the largest concentration of cases involving asbestos claims in the federal court system.

Eagle-Picher's class action application was made to the Eastern and Southern Districts of the New York federal court, which has jurisdiction over all matters arising out of the reorganization proceedings of Johns-Manville Corp.

''A full and proper resolution of the asbestos litigation will require the participation of the Manville Personal Injury Trust, which was created in those proceedings,'' said Eagle-Picher. ''That court also is experienced in and has been successful in managing and resolving complex personal injury litigation such as that involving Agent Orange.''

Eagle-Picher said class action status ''will increase the likelihood of achieving a negotiated nationwide resolution of present and future claims and is more likely to take into account the real damages suffered by the claimants and the ability of the defendants to make payments over time without destroying the viability of their businesses.''

#90204u2361 07/23/1990 ~United Press International
WASHINGTON (JULY 23) UPI - Workers at the Arco Chemical Co. plant in Texas where 17 people died in an explosion feared losing their jobs if they complained about safety, relatives of victims told a House panel Monday.

The families of two men who perished in the July 5 blast in Channelview, Texas, told a panel of the House Government Operations Committee that many workers also had scant safety training, were often pressured to work long hours of overtime and were fearful of safety conditions at the plant that produces an additive used to raise the octane in gasoline.

''We were concerned always with the safety at the plant,'' said Sandra Davis of the conversations she had with her husband, Greg, about his job as an instrument technician for Austin Industries, a subcontractor at the Arco plant.

Choking back tears, Davis told the subcommittee the last time she saw her husband alive was early on the night of the explosion when she took the couple's year-old son to the plant to kiss his father good night during an extended shift of overtime.

About 11:30 p.m. an explosion tore through the utilities section of the plant where Greg Davis was working, killing 11 contract workers, including Davis, five ARCO employees and a truck driver.

Sandra Davis said her husband was often asked to work long hours of overtime and feared he would lose his job if he refused, even though he told supervisors he preferred to stay home with his young family.

''Some contract workers live with the fear of their jobs (because of lack of safety) and the fear of losing their jobs,'' Davis said. ''All workers deserve the right to refuse to work in unsafe conditions.''

Bernard Blackstock of Crosby, Texas, said his son, John, an Arco employee who also died in the blast, had recently joined other workers in sending an anonymous letter to Arco managers expressing concern about safety at the plant. Blackstock said the letter was anonymous because the employees feared being fired if their names were known.

Blackstock told the panel the extensive overtime Arco required of some employees was unsafe.

''If you refuse this overtime, Arco also has a policy that they put a bad mark on your record,'' Blackstock said. ''I don't think it's right if a man thinks maybe he's had too much to drink or is too tired to be safe.''

#90204u2371 07/23/1990 ~United Press International

PLYMOUTH, Mich. (JULY 23) UPI - A small plane on a training flight collided Monday with another on a courier run, sending the two aircraft crashing into a field and killing all three people aboard.

The accident occurred at 9:38 a.m. over Plymouth Township, about 5 miles northwest of Mettetal Airport.

Ashley Heimbaugh, who operates Mettetal Airport, said one of the planes, a single-engine Cherokee, left his airport carrying two licensed pilots on an instrumentation training flight. They were identified as Robert Gunn, 66, of Livonia, and Charles Nix, 44, of Detroit.

''Mr. Nix was attempting to upgrade his license,'' Heimbaugh said.

The other plane, a twin-engine aircraft, took off from Detroit City Airport. It had one occupant - pilot Daniel Z. Starr, 34, of Cedar Springs - and was hauling canceled checks to Jackson, Kalamazoo and Grand Rapids, Heimbaugh said.

Police said all three men were dead at the scene.

''It was a mid-air collision on a clear visibility day,'' Heimbaugh said. ''It was a fluke of an accident to happen like that.''

The Federal Aviation Administration and National Transportation Safety Board were investigating the cause of the collision.

#90204u2432 07/23/1990 ~United Press International

WASHINGTON (JULY 23) UPI - President Bush, emphasizing ability over ideology, chose Judge David Souter of the 1st Circuit U.S. Court of Appeals on Monday as ''a fair arbiter of the law'' to succeed liberal William Brennan on the Supreme Court.

In one of the most important decisions of his 18-month-old presidency, Bush selected Souter as ''a remarkable judge of keen intellect and the highest ability'' and predicted no ''contentious battle'' over his Senate confirmation.

''We're not bracing for some horrendous fight with the United States Senate,'' Bush said, ''and given his record, I would expect that the chances of that are minimal.''

At a White House news conference, called on short notice, Bush said Souter was chosen for being ''extraordinarily bright'' and ''extraordinarily fair '' but asserted political issues, particularly abortion, had no role in the decision.

Bush urged the Senate to act on the nomination soon enough to ensure the nine-member high court is back to full strength for the traditional start

of its new term on the first Monday in October.

Bush's nomination of a replacement for Brennan, who was the anchor of the liberal wing of an increasingly conservative court, is being viewed with particular care because any new justice is likely to change the face of the court drastically.

The initial reaction was restrained. Because of his relative obscurity, Souter did not immediately emerge as a lightning rod for criticism. At the same time, his uncertain views were sure to demand scrutiny by the Senate.

Though the Senate Judiciary confirmed him just three months ago for the Court of Appeals, most members knew little of Souter. A review of his opinions led Sen. Paul Simon, D-Ill., to say, ''there are things that raise some questions.''

On one side of the spectrum, the National Right to Life Committee, the nation's largest anti-abortion group, expressed cautious optimism that Souter, as a narrow reader of the Constitution, would will ''continue the erosion of the tragic error of Roe vs. Wade,'' the landmark 1973 decision that legalized abortion on demand.

The liberal People for the American Way, which helped lead the successful fight against Supreme Court nominee Robert Bork in 1987, said Souter's record on First Amendment rights and civil liberties ''raises more questions than it answers.''

Sen. Warren Rudman, D-N.H., called longtime friend Souter a ''classic conservative.''

#90204u2493 07/23/1990 ~United Press International

STAMFORD, Conn. (JULY 24) UPI - General Signal Corp. reported a second-quarter loss of $21.9 million in contrast to net income of $18.6 million, or 98 cents a share, for the same period last year.

The company attributed the loss to a pretax charge of $60 million related to a previously announced divestiture of three semiconductor businesses.

Revenues for the quarter were $481.6 million, compared with $488.7 million a year earlier.

''The divestiture of these businesses is part of a consistent business strategy aimed at focusing solely on those operations'' that have profit potential, said Edmund M. Carpenter, chairman and chief executive officer of General Signal.

''These three businesses have been unprofitable and were not forcasted to grow in accordance with our targeted objectives,'' Carpenter said.

Despite the loss, Carpenter said operating profits improved in the quarter adding the electrical sector's earnings were down from the first quarter due to weak commercial construction markets and a construction trades strike in Canada.

Figures for the first six months of the year were more encouraging, Carpenter said.

The company reported a loss of $1.6 million in the first half of 1990, compared with net income of $38.5 million, or $2.02 a share, in the first six months of the previous year.

''Based on first-half order input and divestitures, we feel very positive about second half results,'' Carpenter said.

''We expect to enter 1991 as a more favorably balanced capital equipment company capable of producing consistent earnings preformance and providing higher returns for our shareholders,'' Carpenter predicted.

General Signal Corp. manufactures equipment and systems for the process control, electrical, semiconductor, telecommunications and transportation industries.

#90204u2544 07/23/1990 ~United Press International

LOS ANGELES (JULY 23) UPI - The woman whose attempt to have an abortion led to the landmark Roe vs. Wade decision said Monday she will press on in her fight to uphold legalized abortion and would testify before Congress if President Bush's Supreme Court nominee emerges as a foe of abortion.

But Norma McCorvey withheld comment on Bush's selection of Judge David Souter of the 1st U.S. Circuit Court of Appeals, saying she needed time to review his record.

McCorvey, better known as the ''Jane Roe'' of the historic case in which the Supreme Court legalized abortion in the United States in 1973, called a news conference Monday and was ready to urge Bush to nominate a pro-abortion justice.

But she was upstaged by word out of Washington that Bush had just selected Souter as his choice to replace retired Justice William Brennan.

McCorvey, 42, was joined at the news conference on the steps of the U.S. District Courthouse in Los Angeles by her lawyer, Gloria Allred.

''We won't comment on any name until we have the opportunity to review ... his record,'' Allred said after learning of the news.

McCorvey, who only a year ago revealed herself as the Texas woman whose attempt to have an abortion sparked the controversial Supreme Court right-to-privacy case, said she wanted to send Bush a letter urging him to ''take your time on this, your first crucial appointment, so that you will make the right decision.''

Bush, at a White House news conference, said there was no ''litmus test'' that he applied to the nomination and that he did not ask Souter, 50, for his opinion on any of the sensitive issues that will face the court, including abortion.

Allred, a longtime civil rights lawyer, said Souter should be made to answer on whether he would uphold the Roe vs. Wade decision and other legal precedents set by the court in the last two decades.

''This goes beyond any litmus test on abortion,'' the lawyer said. ''The (Senate) Judiciary Committee has the right to inquire whether or not the nominee will uphold U.S. Supreme Court precedents on all matters. So the issue is, let the decisions stand.''

The Judiciary Committee must approve Souter's appointment before he can be confirmed by the full Senate.

Although she refused to comment on Souter's nomination, McCorvey, who has traveled around the country in support of abortion rights, said she would be willing to testify before the Judiciary Committee if Souter's views are anti-abortion.

In his decisions, Souter has not written extensively on political issues, particularly abortion.

-30- 2808

#90204u2702 07/23/1990 ~United Press International

SEATTLE (JULY 24) UPI - Turner Broadcasting System could lose up to $26 million on the 1990 Goodwill Games, cable television mogul Ted Turner said Monday.

Speaking at TBS' annual meeting in Seattle, where most of the Goodwill Games events are taking place, Turner said losses from the games could be ''considerably more than the $13 million we had already written off.''

Turner, TBS chairman, said losses from the games this year will be at least as much as the $26 million TBS lost on the inaugural games in 1986.

Turner is spending about $90 million worldwide to broadcast the games. In addition, the non-profit Seattle Organizing Committee will spend about $68 million, and federal, state and local governments about $40 million to stage the games.

Turner said he still considers the games ''a good investment.''

TBS spokesman Bob Dickinson also said losses from the games could total as much as $26 million, but the company still plans to stage the 1994 Goodwill Games in Moscow and Leningrad, and the 1998 games at an as-yet undetermined U.S. site.

He said the total costs of the 1990 games wouldn't be known for several months.

''TBS has always been a company that focuses on the long term, rather than the short term in its investments,'' Dickinson said.

Ticket sales and media coverage of the games have fallen short of expectations. Organizers said tickets still were available for most of the events.

They said only 950 of 1,500 expected reporters had checked in for media credentials by the fourth day of the game, which began Friday and will continue through Aug. 5, and some of the seats that had been set aside for reporters had gone on sale to the general public.

-30- 1903

#90204u2855 07/23/1990 ~United Press International

LAS VEGAS, NV (JULY 23) UPI - Attorney Steve Stein said Monday he has been contacted by UNLV players about initiating legal action in an attempt to overturn an NCAA ruling that prevents the Runnin' Rebels from defending their national title in the 1990-91 basketball season.

''The probability (of court action) is high and should happen soon,'' Stein said in an interview with KVBC-TV, Channel 3 in Las Vegas.

Any legal action would not involve the university nor would it be linked to the university's plan to appeal to the NCAA to reconsider its Infractions Committee action that bans the Rebels from all post-season play.

Stein made it clear that court action would be solely on behalf of the players.

''They want some action. They are not happy. They are hurt. They feel they

should not be penalized for something that occurred when they were six or seven years old,'' said Stein.

He said the players feel ''they are being penalized, not the university and not the coaching staff.''

The Las Vegas lawyer did not say whether he would file action in state or federal court and declined to discuss what a suit would allege. Observers speculated litigation could revolve around civil rights violations or possibly seek damages.

Stein said he had talked with all of the Rebels who are in Las Vegas, including junior Anderson Hunt and senior Greg Anthony. Larry Johnson and Stacey Augmon were not included in the conversations because they are out of town. Both Johnson and Augmon have said they will finish their college basketball careers at UNLV, rather than exercise an NCAA exemption which would allow them to transfer to another school.

At the UNLV campus, administrators, coaches and staff met Monday to draft a game plan for filing an appeal with the NCAA by the Aug. 4 deadline.

Dr. Robert Maxson, president of UNLV, said one possibility considered was a request that the NCAA consider a lesser and alternative penalty.

''We could ask for some alternatives or modifications,'' said Maxson. ''We will try to get the NCAA to impose a lighter penalty.'' One alternative discussed was that coach Jerry Tarkanian be barred from recruitment activities for a certain period of time.

Officials said the thrust of the appeal would be that banning UNLV from post-season play was unfair action and constituted double jeopardy.

Tarkanian said Monday he was getting more angry each day.

''It makes me madder and madder. But I've been coaching for 30 years and I got about 30 more years,'' he said.

Maxson said the possibility of pursuing legal action against the NCAA was not part of the university game plan.

''I am very optimistic that we will win our appeal. If we don't, then we will consider out options,'' he said.

The NCAA Infraction's Committee ban that prevents the defending champion Rebels from competing in the NCAA Tournament and National Invitation Tournament in 1991 stems from a 1977 decision. That NCAA decision barred the Runnin' Rebels from the tournament for two years and ordered the school to suspend Coach Jerry Tarkanian for two seasons because of rules

violations.

The University fulfilled its penalty. But Tarkanian waged a lengthy court battle and never left the UNLV bench.

Maxson particularly was annoyed at the NCAA's order Friday for him to ''show cause'' why Tarkanian should not be suspended from coaching for two years. Maxson said his hands were tied.

Tarkanian won a permanent injunction in the state court system during his 13-year court battle against the NCAA. Despite a U.S. Supreme Court ruling backing the NCAA's right to suspend Tarkanian, the state court order remained in force.

UNLV is the second national champion to be banned from the tournament by the NCAA. Kansas, which won the 1988 title, was barred from defending in 1989.

#90205b0005 07/24/1990 ~Business Wire

MILWAUKEE (JULY 24) BUSINESS WIRE - Fiserv Inc. (FISV), a leading computer services company providing data processing and information management systems to financial institutions worldwide, has announced continued record results for the second quarter of 1990.

For the three-month period ended June 30, 1990, Fiserv revenues were $45.4 million, a 13 percent increase over the $40.1 million reported for the second quarter of 1989. Net income rose to $3.4 million, an increase of 22 percent over the $2.8 million reported in 1989. Net income per share for the period based on 8,616,000 shares outstanding was 39 cents per share, an 18 percent increase over the 33 cents per share on 8,455,000 shares outstanding for the second quarter of 1989.

For the six month period ended June 30, 1990, revenues were $89.8 million, a 13 percent increase over the $79.1 million reported in 1989. Net income rose to $6.5 million, a 21 percent increase over the $5.4 million in 1989. Net income per share for the 1990 six-month period based on 8,599,000 shares outstanding increased 19 percent to 76 cents per share from 64 cents on 8,429,000 shares in 1989.

A substantial portion of the revenue increase reported since the beginning of 1990 relates to revenues of companies acquired after June 30, 1989. The company also has experienced overall revenue growth in the operation of its previously existing business.

In the past six years Fiserv, a Milwaukee-based company, has grown into a national network of specialized information management centers and

subsidiary companies. The company's Data Centers are located throughout the United States, processing over 19.5 million customer accounts for more than 950 client financial institutions. A publicly held company, Fiserv stock is traded in the NASDAQ over the counter market system under the symbol FISV.

#90205b0011 07/24/1990 ~Business Wire
LOS ANGELES (JULY 24) BUSINESS WIRE - MagneTek Inc. (NYSE:MAG), a leading U.S. producer of electrical equipment, Tuesday announced the establishment of MagneTek Europe GmbH, a new strategic business unit based in Bonn, Germany.

MagneTek Europe will incorporate all of MagneTek's European operations, including: MagneTek EuroAtlas, a manufacturer of frequency converters and transformer/rectifiers located in Bremen, Germany; MagneTek Universal Electric Co. Ltd., a Gainsborough, England manufacturer of fractional horsepower electric motors; MagneTek EVIG Kft, an integral horsepower motor builder in Budapest, Hungary; and MagneTek's U.K.-based electrical

equipment service operations.

MagneTek Europe's combined annual sales, which will approximate $50 million this fiscal year, are expected to approach $250 million by the mid 1990s, according to Frank Perna Jr., president of MagneTek. ''As a European domiciled strategic business unit, MagneTek Europe will grow both internally and through acquisitions, ultimately offering the full line of electrical equipment and services supplied by MagneTek Inc.,'' Perna said.

''Our corporate growth srategy entails international expansion and emphasis on energy-saving products and services,'' he added. ''MagneTek Europe will help us attain those objectives while enabling us to extend our technical leadership in such areas as energy-saving lighting products and transformers to markets throughout Eastern and Western Europe.''

Serving as managing director of MagneTek Europe will be Dr. Klaus Henrich, since 1980 managing director of Deugra GmbH, a manufacturer of sophisticated fire and explosion protection systems. Prior to 1980, Dr. Henrich held positions of increasing responsibility with Deutsche Wurlitzer GmbH, Italy's Montedison Group, and Vacuum Generators GmbH. Dr. Henrich, 48, received his doctorate in Physics from the University of Bonn in 1972. He is married and the father of two.

Founded in 1984, MagneTek manufactures lighting ballasts, transformers, motors, generators, drives and controls, and provides electrical equipment repair and rebuilding services to utilities and industrial customers. The company operates more than 50 manufacturing and service facilities in North America and overseas, and employs some 15,000 associates. MagneTek reported sales of $962 million for its fiscal year ended June 30, 1989.

KANSAS CITY, MO. (JULY 24) BUSINESS WIRE - BMA Corp. (BMAC) announced Tuesday that the stock purchase agreement pertaining to the sale of its wholly-owned subsidiary, Business Men's Assurance Company of America, to Generali-Assicurazioni Generali S.p.A. has been modified.

W. Thomas Grant II, president and chief executive officer of BMA Corp. said, ''As a result of the modified agreement and estimating second quarter operating results, the after-tax gain from the sale of insurance operations is now expected to total approximately $35 million.

''This compares to earlier estimates ranging from $15 to $20 million. Accordingly, the anticipated gain on sale and operating earnings for the

second quarter should increase book value of BMAC to an estimated $40 to $41 per share.''

Grant further said, ''Following BMAC shareholder approval of the Purchase Agreement on June 27, both Generali and BMAC have worked diligently toward the closing of this transaction. After conditions of the agreement were negotiated and met, certain modifications and changes were agreed upon by Generali and BMAC.

''In addition to the agreement to close the transaction on July 31, 1990, the modification provides that certain excluded assets currently held by the insurance company will be retained by Business Men's Assurance Company of America. We are pleased that the after-tax earnings from the modified agreement will further enhance shareholder value.''

#90205b0018 07/24/1990 ~Business Wire

CORALVILLE, Iowa (JULY 24) BUSINESS WIRE - Heartland Express Inc. announced Tuesday second quarter operating results.

Heartland's operating revenues for the second quarter of 1990 increased 16.1 percent compared to the same period of 1989. Net income for the second quarter increased 20.2 percent from $1,505,589 reported the second quarter of 1989 to $1,809,223 the second quarter of 1990. Earnings per share increased from 30 cents per share to 36 cents per share for the compared periods.

Year-to-date 1990, Heartland revenues have shown a growth of 22.7 percent compared to the first six months of 1989. Net income for the compared periods reflects an increase of 20.2 percent. Earnings per share increased from 60 cents per share for the first half of 1989 to 72 cents per share the first half of 1990.

The company projects completion of the announced conversion of its 48-foot trailer fleet to 53-foot units during the third quarter of 1990. During the third quarter the company expects to complete the conversion of the company tractors to cabover units.

Renovation has begun on a truck stop facility located adjacent to Heartland's corporate offices. The facility will provide fuel, washing facilities as well as additional equipment parking and additional administration office facilities.

The company continues to maintain a debt free position at the end of the

second quarter of 1990. The company projects the fleet conversion and added tractors will be funded from cash flow and cash on hand.

Heartland Express Inc. is the parent company of Heartland Express Inc. of Iowa, an irregular-route truckload motor carrier with principal markets within the central and southeastern United States. The company became publicly traded in November 1986.

WESTLAKE VILLAGE, CA (JULY 24) BUSINESS WIRE - On July 17, Canada Crown Investment Corp. (OTC:CCRW) received the following drilling report from Coffman & Temple, the operator, regarding the status of the new Millett Seal 1 well in which the company has an investment:

''Well flowing at 1,220 barrels of oil per day on 20/64-inch choke. Open flow rate estimated at 10,000 barrels per day. Allowable production rate 1,135 barrels per day.

''Two million cubic feet of gas per day presently being flared. Have received commitment for line hook-up within two weeks.

''It is now confirmed that our expectations of the prospect have been correct, and that this area has higher pressures and gas/oil ratios than most other parts of the Pearsall Field.''

There is sufficient acreage to complete four wells on this lease. Seismic information indicates that all four wells could be as prolific as this first well.

The company has secured a 25 percent interest in a 1,055-acre adjacent block and is presently negotiating for another 9,300-acre block that shows the same fault lines.

LOS ANGELES (JULY 24) BUSINESS WIRE - Santa Anita Realty Enterprises Inc. (NYSE:SAR) announced Tuesday that it has acquired an additional 25 percent interest in the Lumberyard Shopping Center in Encinitas, Calif., from its general partner James Youngblood Sr., giving the company 100 percent

ownership of the property.

Royce B. McKinley, chairman and chief executive officer of Santa Anita Realty, stated: ''The Lumberyard is a prime real-estate holding located within walking distance of the ocean. It has been highly successful to date, and we believe it has even greater potential.'' He added that the terms of the transaction were favorable to both parties.

The Santa Anita Cos. comprise Santa Anita Realty Enterprises Inc. and Santa Anita Operating Co.

The Santa Anita Realty Enterprises Inc., one of the nation's leading real estate investment trusts, owns the Santa Anita racetrack property, a 50 percent interest in the operation of Santa Anita Fashion Park and a 32.5 percent interest in Towson Town Center (major regional shopping centers), a number of neighborhood shopping centers, and interests in an industrial park, three apartment projects and three office buildings.

Santa Anita Operating Co. conducts thoroughbred horse racing at Santa Anita Park through its subsidiary, the Los Angeles Turf Club Inc.

The shares of the two Santa Anita companies trade on a ''paired'' basis on the New York Stock Exchange under the symbol ''SAR.''

#90205b0027 07/24/1990 ~Business Wire

FREMONT, CA (JULY 24) BUSINESS WIRE - VeloBind Inc. (NASDAQ:VBND) Tuesday announced sales for the quarter ended July 1, 1990, of $11,038,000, the highest in the company's history and an increase of 9 percent over sales of $10,092,000 in second quarter 1989.

Sales of $21,646,000 for the first six months of 1990 also marked a record up 5 percent over sales of $20,523,000 for the first six months of last year.

Net income for the second quarter of 1990 was $279,000, or 6 cents per share, three times higher than last year's $86,000 (2 cents per share). Earnings for the six months ended July 1, 1990, were $694,000, or 15 cents per share, an improvement of 47 percent over earnings of $472,000 (10 cents per share) for the first six months of 1989.

Earnings were restricted by high legal fees in May, incurred as VeloBind aggressively pursued the successful resolution of a patent infringement matter. Earnings were also affected by heavy manufacturing start-up expenditures associated with the introduction of a major new product.

The company attributes its improved performance in a sluggish office products marketplace to major new product introductions and a stepped-up marketing and sales effort.

Carl J. Swenson, VeloBind's president and chief executive officer, said today: ''Market reception to our most recent new product, DocuBind, has been quite gratifying.

''The record numbers reflect relatively few DocuBind sales, since orders have outstripped our initial ability to manufacture the product. We see this machine as an important step toward our goal of being a world leader in binding solutions.''

DocuBind is a combination plastic-comb binding system and three-hole punch offered at significantly less than the cost of two separate machines.

VeloBind has manufactured and marketed professional-quality office binding systems for more than 20 years. The company's products are widely used by law offices, accounting firms, government agencies, schools and other organizations that require attractive, securely-bound documents.

PALO ALTO, CA (JULY 24) BUSINESS WIRE - Hewlett-Packard Co. Tuesday announced it has signed a contract under which Visionary Design Systems will resell HP workstations and HP computer-aided design software.

HP expects the value of this contract to total $40 million during the next three years, making Visionary Design Systems the largest reseller of HP's mechanical-engineering software worldwide.

HP was one of the largest suppliers of turnkey mechanical- engineering CAD/CAM (computer-aided design and manufacturing) systems sold worldwide in 1989, according to Daratech Inc. of Cambridge, Mass., a market-research firm.

HP mechanical-engineering software includes HP ME10d for 2D design and drafting; HP ME30 for 3D design, drafting and solids modeling; and HP Data Management System for design management and engineering process control.

The software runs on HP 9000 engineering workstations based on the Motorola 68040 microprocessor. HP ME10d software runs on personal computers based on Intel microprocessors and the MS-DOS operating system.

''HP ME software has gained substantial acceptance in the CAD marketplace, and this agreement will add to the momentum,'' said William H. Thurston, manager of U.S. business development for HP's Mechanical Design division. ''Two keys to our success have been our high reorder rate and our ability to develop strong relationships with value-added resellers such as Visionary Design Systems.''

''From conceptual design to documentation, these tools are the most reliable and easy-to-use products in the industry,'' said David Tiley, president of Visionary Design Systems.

''Our goal is to make HP ME10 and ME30 software the leading ME design tools in North America, just as they are in Japan and Germany,'' said Tiley.

Visionary Design Systems, a nationwide distributor of mechanical-engineering products, will offer HP's entire family of mechanical-engineering systems and software. In addition to selling HP workstations and software, the company will provide consulting, training and custom software to fully support the mechanical-design environments of its customers.

Visionary Design Systems is based in Mountain View, Calif.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 93,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

#90205b0030 07/24/1990 ~Business Wire

DENVER (JULY 24) BUSINESS WIRE - Denver-based Natural Fuels Corp., the first full-service alternative transportation motor fuel company in the United States, announced Tuesday it is providing a portion of the funding

for General Motors Corp. to produce the first group of commercially available vehicles that are natural gas-powered, light duty trucks.

The trucks will all be original equipment manufactured (OEM) vehicles.

The venture allows General Motors to lead the ''auto giants'' in the first commercial production of natural gas-powered vehicles (NGVs) which will operate exclusively on compressed natural gas with a driving range of at least 200 miles. GM's announcement helps support and legitimize the natural gas industry's commitment to establishing CNG as a viable alternative fuel, explained Rajeana Gable, president of Natural Fuels Corp.

CNG is considered by air quality, environmental and transportation officials to be a viable alternative fuel because it's clean burning, safe abundant and less expensive than gasoline.

''It's a strategic move to support GM's efforts because Natural Fuels Corp. provides the CNG. We are also opening public fueling stations, conversion centers and establishing mechanic training and certification programs,'' said Gable.

Natural Fuels Corp. is part of a consortium that is financing the nearly million dollars necessary for the initial design, engineering and development of the GM vehicles. The other participants include Southern California Gas, Pacific Gas & Electric and San Diego Gas & Electric in California, Energas Co., Entex, Enron Corp., El Paso Natural Gas, Southern Union Gas and Lone Star Gas Co. in Texas.

Natural Fuels Corp. is the only participant which is not a utility or pipeline company.

GM is manufacturing the 1,000 natural-gas-burning 1991 GMC Sierra pickup trucks beginning as early as January 1991. The trucks will be distributed through GMC truck dealerships to utility and private fleet buyers with the direction of consortium members.

#90205b0040 07/24/1990 ~Business Wire

FREMONT, CA (JULY 24) BUSINESS WIRE - Interlink Computer Sciences Inc. Tuesday announced a support agreement with International Business Machines Corp. (IBM).

Under the agreement Interlnk's domestic customers can call IBM's National Service Division (NSD) support center for first level support of Interlink

products.

The agreement covers all of Interlink's software products including the SNS/SNA Gateway family for communication between IBM S/370 mainframes and DECnet networks, the SNS Network Integration family for communication between IBM MVS mainframes and TCP/IP networks, and the SNS LAN Technologies family of bridge and router software.

The agreement will allow Interlink domestic customers to call IBM's support center for resolution of problems. IBM service representatives will be trained on Interlink's products, and will provide first level support including logging annd tracking calls.

In instances where IBM is unable to resolve the problem, Interlink service representatives will provide advanced level support, and will contact the customer with a resolution and update the call tracking system.

The agreement will offer Interlink domestic customers numerous benefits. The IBM worldwide remote technical assistance and information network, which manages customer and problem information, will be available.

The service will be available 24 hours per day, seven days per week, and will offer a toll-free telephone number to callers. Interlink's European support centers will also have access to the IBM network, allowing for global integration of problem management facilities.

Interlink's European customers will continue to contact Interlink's support organizations except in Sweden where a similar support agreement is in place.

Interlink Computer Sciences creates customer solutions, based on industry standards, that integrate computer networks, applications, data and peripherals. With headquarters in Fremont, Interlink has branch offices and distributors located throughout the United States, Europe, Latin America, and Asia Pacific. For more information, write or call Interlink Computer Sciences Inc. at 47370 Fremont Blvd., Fremont, CA, 94538; 800/422-3711, or 415/657-9800 (in California).

#90205b0042 07/24/1990 ~Business Wire

PORTLAND, Ore. (JULY 24) BUSINESS WIRE - Electro Scientific Industries Inc. (NASDAQ:ESIO) reported a net loss of $5,426,000 (89 cents per share) on sales of $73.9 million for the fiscal year ended May 31, 1990.

This compares with a net income of $6,338,000 ($1.05 per share) on sales of $82.1 million for the previous year.

ESI reported a fourth quarter loss of $2.29 million (38 cents per share) on sales of $16.2 million compared with a net income of $2.2 million (36 cents per share) on sales of $23.0 million in the same period last year.

The year end results reflect both a loss on continuing operations of $3.2 million (52 cents per share) and a loss on discontinued operations of $2.3 million (37 cents per share). The loss on continuing operations was due to a slowdown in the microelectronics capital equipment market, corporate restructuring costs and increased research and development expenses. The loss from discontinued operations was the result of ESI's decision to discontinue the operations of its subsidiary Ballantine Laboratories Inc. of New Jersey and dispose of the inventory, equipment and assets.

''The semiconductor capital equipment piece of the electronics market was down for most of the fiscal year,'' said Mike Ellsworth, ESI's president and chief executive officer. ''In response, we made changes in manufacturing, organization and strategic focus that will allow us to permanently reduce our cost structure and respond more readily to market conditions.''

Over the past year the company reduced its workforce by fifteen percent, trimmed both fixed and variable expenses and made major organizational changes. ESI will continue to reduce its vertical integration of manufacturing over the next year.

ESI is a world leader in the production of laser systems for trimming and processing of microelectronic circuitry and a major materials and equipment supplier to the passive component industry.

DULUTH, Ga. (JULY 24) BUSINESS WIRE - Honda Power Equipment, a division of American Honda Motor Co. Inc., Tuesday announced that it has relocated its national administrative headquarters from Gardena, Calif. to Duluth, Ga.

At Tuesday's official open house, Duluth Mayor Bobby Williams and other local community and business leaders joined American Honda Motor Co. President K. Amemiya, division Senior Vice President Shoichi Tanaka and Senior Manager, Sales Operations Steve Bailey at the new 40,000-square-foot Duluth facility.

''Strategically, Georgia is the ideal location for Honda Power Equipment '' said Bailey. ''It is conveniently located for national travel and is nearer our R & D facility in Ohio and Honda Power Equipment Mfg., producing Honda lawnmowers in North Carolina. Our proximity to these facilities will enable us to work even more closely together to develop and market products that consumers demand.''

Amemiya thanked Mayor Williams and the Duluth community for welcoming Honda Power Equipment to the area. In appreciation, he presented a Honda lawn tractor which the mayor accepted on behalf of the City of Duluth.

''Honda is an extremely prestigious organization and we're delighted that the company selected Gwinett County as the location for its new national headquarters,'' said Williams.

Currently employing a staff of approximately 70, the division office houses all administrative operations, including sales and marketing, service, dealer development, training, engineering support, product planning and customer relations. Complementing the division office are four zone sales locations and warehouses nationally.

''The United States is the world's largest market for power equipment and the Power Equipment division is an important pillar of American Honda's business overall,'' said Amemiya. ''We're confident that this move will strongly position the division for growth as we enter a competitive new decade.''

Honda Power Equipment offers a complete line of premium walk-behind and riding lawn movers, lawn tractors, utility tractors, tillers, portable generators, recreational vehicle generators, outboard motors, snowthrowers water pumps, general purpose engines and construction generators, welders and pumps. These products, related parts and accessories are available through a nationwide network of servicing Honda Power Equipment dealers. Honda is also well-known for the production of quality Honda automobiles and motorcycles, as well as Acura automobiles.

DENVER (JULY 24) BUSINESS WIRE - Schield Management Co. (NASDAQ:SMCC) Tuesday announced that it has entered into a letter of intent with Cohig & Associates Inc. of Denver to underwrite a 'firm commitment' offering of approximately $1,800,000.

The registration for the offering is expected to be filed shortly.

The offering will be structured as a unit to include shares of common stock, warrants, convertible into common stock and convertible bonds. As a condition of the offering, Schield Management Co. will propose a one-for-five reverse stock split to its shareholders.

President Marshall Schield indicated that the previously announced merger with Progressive Ventures Inc. is proceeding as planned and closing is anticipated on or before Sept. 30.

Among other things, offering proceeds are contemplated to be applied toward several functions including:

Funding for acquisitions of investment management or other synergistic companies

Increased marketing of money management, market timing and mutual fund products

Expanding the various business activities to be acquired in the Progressive Ventures merger

Schield Management Co. has provided investment management services since 1972 and has over $220 million in assets under management. They are one of the larger providers of market timing services in the country. The Schield Portfolios Series (SPS), formed in 1985, consists of five mutual funds, including the recently launched Progressive Environmental Fund which was ranked as the 1 mutual fund for the second quarter of 1990 according to Lipper Analytical Services.

Schield Management Co. shares are listed in the additional over-the-counter market under the NASDAQ symbol: SMCC. Progressive Ventures Inc. shares are listed on the over-the-counter 'pink sheets' quotation lists.

This announcement shall not constitute an offer to sell or solicit an offer to buy in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

#90205b0064 07/24/1990 ~Business Wire

HOUSTON/LOS ANGELES (JULY 24) BUSINESS WIRE - Plans to begin production of a minimum of 1,000 natural gas-powered, light-duty trucks were jointly announced by the Texas General Land Office, the GMC Truck Division of General Motors Corp., and a consortium of utilities from Texas, California and Colorado.

The natural gas trucks will be for utility and private fleet use in California and Texas.

''We are pleased to add compressed natural gas (CNG) to the growing list of alternative fuel test programs, either sponsored by GM or using GM vehicles,'' GM officials said. ''This real-world program will evaluate the performance of CNG truck fleets, and help resolve the health, safety, cost and consumer acceptance issues with respect to alternative fuels.''

At one of two media briefings, Texas Land Commissioner Garry Mauro said the GMC Truck light-duty, natural gas program would begin in early 1991 and is one of several projects using natural gas as a vehicle fuel that are under consideration.

''This will be the first time natural gas-powered vehicles will be commercially available in the U.S.,'' said Mauro. ''GMC Truck is to be commended for this major step toward meeting the alternative fuel demands of the 1990s.''

At the Los Angeles briefing, representatives of California's three major natural gas utilities said the initial fleet is being partly funded by a $935,000 engineering and manufacturing grant.

The three-phase grant will cover initial design, engineering and development of a natural gas fuel system, engine and emission testing, and design of assembly processing required to produce these vehicles.

The program will use the 1991 GMC Truck, 3/4-ton pickup models, equipped with a 5.7 liter engine, and a throttle-body, manifolded fuel injection system. PAS Inc., a Troy, Mich., engineering and development firm, will develop and install the natural gas fuel system.

The completed vehicle will be sold and serviced through selected GMC Truck dealerships in California and Texas. GMC Truck will be responsible for warranty and service on the natural gas-powered trucks.

Tecogen Inc. of Waltham, Mass., has been contracted by the utilities to provide technical input.

California participants include: Pacific Gas and Electric Co., San Francisco; San Diego Gas & Electric, San Diego; and Southern California

Gas Co., Los Angeles.

Texas utility participants are: El Paso Natural Gas, El Paso, Texas; Energas Co., Midland, Texas; Enron, and Entex, both of Houston; Lone Star Gas, Dallas, Texas; and Southern Union Gas, Austin, Texas.

Natural Fuels Corp., Denver, Colo., is also a member of the consortium.

#90205b0067 07/24/1990 ~Business Wire

KANSAS CITY, Mo. (JULY 24) BUSINESS WIRE - The West Kootenay Power subsidiary of UtiliCorp United (NYSE:UCU) Tuesday denied a published report in Electric Utility Week that it has entered into a joint venture to build non-regulated power facilities that would export electricity into the northwestern U.S. power market.

The publication stated that Railex, a privately owned rail car leasing and industrial transportation firm based in Vancouver, has joined with West Kootenay Power in a project to build up to four coal-fired power facilities at a total cost ranging between $850 million and $1.7 billion.

J.S. McKay, senior vice president, operations for West Kootenay Power, said that the company is prohibited by the British Columbia government from participating in the project. McKay noted that Railex representatives have approached West Kootenay Power regarding the joint venture but that no formal or informal agreements or understandings were reached.

West Kootenay Power serves about 104,000 retail and wholesale customers in south-central British Columbia.

Based in Kansas City, UtiliCorp serves approximately 820,000 gas and electric customers in eight states and in British Columbia through six divisions and its Canadian subsidiary.

#90205b0082 07/24/1990 ~Business Wire

EL SEGUNDO, CA (JULY 24) BUSINESS WIRE - Net earnings of Computer Sciences Corp. (NYSE:CSC) rose to $13.7 million, or 85 cents per share, for its fiscal first quarter, from $13.1 million, or 82 cents per share, a year ago.

Revenues for the quarter ended June 29, 1990, increased by 19 percent, climbing to $407.6 million from $342.1 million last year.

''We've made a strong start on the year, '' said William R. Hoover, chairman and president of the computer services company. ''Revenues advanced across all three of our operating groups, and operating results were generally quite positive.''

The sharpest growth occurred in the commerical and international markets where the company has concentrated on rapidly growing its market share by supplementing internal growth with acquisitions.

Consulting Group revenue climbed by 92 prcent to $83.5 million, while the Industry Services Group had a 26 percent jump in revenue to $72.6 million. The Systems Group, which principally serves federal government agencies, recorded a moderate rise in revenue to $251.5 million.

Operating income, before corporate charges, was up 12 percent to $29.3 million from $26.1 million a year ago. Overall operating income margin was slightly lower than in the year-ago period primarily due to investments to build consulting operations in the United States and Europe.

After corporate general and administrative expenses and other expenses, pre-tax income was $21.5 million, compared with $20.8 million for the same period last year.

Higher net interest expense and the absence of equity earnings from a former affiliate were the principal factors in a rise in net corporate expenses in the quarter just ended. The year-earlier quarter included $870,000 in equity earnings from an ownership interest in Infonet, which CSC divested in the fourth quarter of its 1990 fiscal year.

GLENDALE, CA (JULY 24) BUSINESS WIRE - GLENFED Inc. (NYSE:GLN), the parent company of Glendale Federal Bank, Tuesday announced that its board of directors has declared a regular quarterly cash dividend on GLENFED common stock of 30 cents per share, for the quarter ended June 30, the fourth quarter of GLENFED's fiscal year.

The dividend will be payable Aug. 17 to shareholders of record on Aug. 6.

''This is GLENFED's 21st consecutive dividend, and represents the board of directors' continued commitment to shareholder value and their confidence in the corporation's earnings capability, while maintaining Glendale Federal Bank's capital in excess of current requirements,'' said Norman M. Coulson, chairman and chief executive officer.

''As noted when we recently announced our earnings for full-year fiscal 1990 and the fourth quarter, our earnings were the second highest in the corporation's history, a significant accomplishment in today's banking and thrift environment.

''In addition, in the fourth quarter of the fiscal year, our core earnings improved compared to both the previous quarter and the comparable year-ago quarter, and our non-performing assets declined by $20 million from March 31, 1990. This latter decline is especially noteworthy in view of the asset quality problems reported by several major financial institutions.

''We strongly support the recently announced Office of Thrift Supervision dividend regulations,'' said Coulson. ''They provide the ability for healthy, capital-complying institutions like GLENFED to continue to pay competitive, capital-attracting returns to shareholders. In the case of GLENFED, this ability is reinforced by GLENFED's strong cash position.

''The dividend also reflects the board of directors' current confidence in the corporation's earnings prospects and asset quality.''

GLENFED Inc. is a real estate and consumer bank holding company, and is the parent company of Glendale Federal Bank, the nation's third largest savings bank, which operates 235 branch offices in California, Florida and Washington.

VAN NUYS, Calif. (JULY 24) BUSINESS WIRE - Robert L. Denton has been appointed vice president of finance and chief accounting officer at LIVE Entertainment Inc. (NYSE:LVE), it was announced Tuesday by Roger R. Smith, executive vice president and chief financial officer for the company.

In his new position, Denton will oversee LIVE's accounting and financial reporting structure, working in cooperation with the chief financial officers of each of LIVE's operating companies.

Prior to joining LIVE, Denton spent more than eight years with Ernst & Young, most recently as senior manager.

Regarding Denton's appointment, Smith said: ''Robert brings to the company a wealth of diverse accounting experience. Having spent four years on the IVE/LIVE account at Ernst & Young, he already is extrememly familiar with the company and its operations. We look forward to having such a talented individual as part of the LIVE financial team.''

KENT, OH (JULY 24) BUSINESS WIRE - CPAid Inc., a leader in tax and accounting software, announced the appointment of Terri Kysilka to the position of advertising and public relations director.

''CPAid is a national leader, with more than 8,000 users around the country,'' stated Helen Rosenberg, CPAid chief operating officer. ''Terri's position in advertising and public relations represents our way of ensuring the CPAid message reaches across our entire customer base.''

Kysilka comes to CPAid from Dun & Bradstreet Software Services, in Atlanta where she coordinated publications and related marketing materials for the international mainframe vendor. She also has worked on advertising and public relations projects for such high tech companies as Contel Corp. IBM and Peachtree Software. A native of Cleveland, Kysilka graduated from Bowling Green State University in 1976.

''CPAid has a great story to tell,'' Kysilka stated. ''They've been a pioneer in tax preparation software development since 1978 and today, CPAid has the most comprehensive accounting and tax packages on the market.''

With more than 10,000 installed packages throughout the United States, CPAid is the only software vendor to provide an interactive family of programs for federal, state, Corporate 1120, Corporate 1120S, and Partnership 1065 tax preparation, as well as tax planning, client write-up and time and billing processing.

For more information about CPAid or its family of products, contact the national CPAid helpline, 1-800/227-2437.

SAN MATEO, CA (JULY 24) BUSINESS WIRE - Franklin Resources Inc.

(NYSE:BEN) Tuesday reported unaudited record earnings for the quarter and nine months ended June 30, 1990.

Charles B. Johnson, president of the diversified financial services company, said net income for the quarter increased 15.7 percent, to $22.8 million from $19.7 million, or to 58 cents a share from 50 cents a year ago.

Revenues for the period increased 20 percent to $75.6 million, compared to $63.0 million. Average shares outstanding for the quarter were 39,346,494 compared to 39,258,863.

Net income for the nine months increased to $66.6 million from $56.6 million, or to $1.70 a share from $1.44 a share in the same year-earlier period. Revenues came to $214.3 million, compared to $185.1 million. Net income per share and average shares outstanding for 1989 were restated to reflect a 3-for-2 stock split declared in December 1989.

Johnson attributed the gains in net income to the increase in total net assets under management by the company's subsidiaries to more than $44.4 billion, up from $40.1 billion this time last year. Franklin Resources' main business is the management of the 56-member Franklin Group of Funds.

The company has its headquarters at 777 Mariners Island Blvd., San Mateo, CA, 94404.

Franklin Resources Inc., Financial Highlights

	3 Months Ended June 30, 1990	1989
Revenues	$75,600,000	$63,000,000
Net income	$22,800,000	$19,700,000

SACRAMENTO, CA (JULY 24) BUSINESS WIRE - American Recreation Centers Inc. (NASDAQ:AMRC) announced Tuesday that for the fiscal year ended May 30, 1990, operating revenues reached a record high of $47,114,000, up 23 percent over last year's revenues of $38,356,000.

Net income for fiscal 1990 was $1,502,000, or 31 cents per share, an 85 percent increase over net income of $811,000, or 17 cents per per share for fiscal 1989.

The Right Start Catalog Division, acquired in July 1988, had dramatic growth during the year with sales of $14,300,000, up 64 percent over last year's sales of $8,681,000. Bowling Division revenues were up 9 percent over last year to $31,800,000.

The significant improvement in revenues and profits is largely due to the marketing and restructuring programs put into place in the bowling division during the year as well as the strong performance of the Right Start Catalog.

The increase in profits is without the benefits of significant gains on sales of assets which totaled $1,481,000 in pre-tax gains last year and just $508,000 in pre-tax gains this year.

American Recreation Centers Inc. is the largest publicly held corporation in the country devoted primarily to the operation of bowling centers. The company operates 27 bowling centers, 22 in California, and five in Texas with an aggregate 1,126 lanes.

American Recreation Centers Inc.'s wholly owned subsidiary, the Right Start Catalog Inc., is a nationwide direct marketer of high-quality products for infants and children.

The company is also active in the development and management of commercial real estate. Real estate activities include management and operation of bowling division real estate assets, as well as the conversion of non-productive real estate assets, including nonprofitable bowling centers into more productive assets.

#90205b0118 07/24/1990 ~Business Wire
LOS ANGELES (JULY 24) BUSINESS WIRE - Heritage Entertainment Inc. (AMEX:HHH), recorded Tuesday that it anticipates that results from operations, for the fiscal year ended March 31, 1990, will show significant losses.

Although final audited results are not yet available, the company stated that the losses relate primarily to the re-evaluation of certain unamortized film costs and to an increase in the bad debt expense for the year.

Results for fiscal 1990 will not be directly comparable with the prior year-end results as the company acquired the Landmark and Seven Gables theater chains (Heritage Theatre Group ''HTG'') during that fiscal year. Accordingly, HTG's results will be included for the latter nine months only.

HTG is expected to show revenues in excess of $21 million, whereas total revenues for the company are expected to exceed $25 million. For the fiscal year ended March 31, 1989, Heritage reported losses of $5,625,000 with revenues of $5,990,000.

Heritage further announced that it has received a written proposal which, if accepted, would provide substantial equity capital to the company; the stated purpose of which would be principally to provide financing for the proposed expansion of HTG's theater chain. The company is also talking with several other interested parties regarding possible debt and/or equity capital and is exploring other alternatives through an independent committee of its board of directors.

The company is also in discussions with City National Bank with whom Heritage has a revolving credit agreement which is due to expire on July 31, 1990. The company is seeking to renew, extend, or replace that agreement, but no such arrangement has yet been made.

MORGAN HILL, CA (JULY 24) BUSINESS WIRE - Redlake Corp., Morgan Hill-based manufacturer of high speed instrumentation film camera equipment and videographic imaging products, announced Tuesday the unaudited results of

its first quarter ended June 30 as follows:

	Quarter Ended June 30 1990	June 30 1989
Net revenues	$ 976,636	$ 571,435
Costs and expenses	964,415	632,720
Income (loss) before income taxes and extraordinary credit	12,221	(61,285)
Income tax expense	4,800	1,200
Net income (loss) before extraordinary credit	7,421	(62,485)
Extraordinary credit/a	3,200	---
Net income (loss)	$ 10,621	$(62,485)
Net income per share/b	3 cents	(16 cents)

(a) Tax benefit arising from carryforward of prior period operating loss.
(b) Based on weighted average outstanding common shares and common share equivalents.

For the first quarter ended June 30, 1990 of fiscal year 1991, net revenues increased substantially and there was a net income compared to the first quarter ended June 30, 1989 of fiscal year 1990. Net revenues increased $405,201, or 71 percent, from $571,435 in the first quarter of fiscal year 1990 to $976,636 in the first quarter of fiscal year 1991.

Net revenues increased as a result of higher shipments in both the photographic instrumentation and the graphics imaging products. Net revenues were $787,895 and $188,741 for photographic instrumentation and graphics imaging products, respectively.

There was a net income of $10,621 in the first quarter of fiscal year 1991 compared to a net loss of $62,485. The increase in revenues was primarily responsible for the net income.

The backlog at June 30, 1990 was $1,133,028 compared to $790,474 at June 30, 1989. The increased backlog at June 30, 1990 was higher as a result of a large government subcontract from Southwest Aerospace Corp. of Tustin Calif.

DENVER (JULY 24) BUSINESS WIRE - TRI-R Systems Corp. (NASDAQ:RRRC), a Denver-based diversified recycling firm, said Tuesday it has completed the

registration of shares of the company's common stock underlying Class A common stock purchase warrants.

The completed registration will enable holders of TRI-R Systems Class A warrants, if they choose, to exercise their Class A warrants for TRI-R Systems common stock.

Each Class A warrant entitles the holder thereof to purchase one share of common stock at $3 per share. Holders of Class A warrants who wish to exercise the Class A warrants should complete the exercise form on the warrant certificate and send the Class A warrants with the completed exercise form and a check in the amount of the exercise price plus $7 per stock certificate to be issued (to cover transfer fees) made payable to TRI-R Systems Corp. to: American Securities Transfer Inc., 938 Quail St. Suite 101, Lakewood, CO, 80215.

This announcement does not constitute an offering of TRI-R Systems common stock underlying its Class A warrants. Such an offering is made through the company's prospectus, a copy of which is available upon written request to TRI-R Systems Corp., 3600 E. 48th Ave., Denver, CO, 80216, or by telephone request to the company at 303/399-6351.

The company's stock trades on the over-the-counter market (NASDAQ) under the symbol under the symbol RRRC.

PHOENIX (JULY 24) BUSINESS WIRE - Nix-O-Tine Pharmaceuticals Ltd. (NASDAQ:NIXXF, VSE:NIX.V) Tuesday announced that it has entered into a joint venture arrangement with Jon V. Eylands, M.D., to establish a clinical laboratory at Nix-O-Tine's corporate office in Phoenix.

The laboratory is being established to process the Nix-O-Tine LungCheck test for existing customers and expand services to new customers. LungCheck is a nationally distributed take-home test that uses quantitative sputum cytology for early evaluation of lung health assessment and as a motivational aid for smoking cessation. The company acquired LungCheck in March 1990.

''The Nix-O-Tine LungCheck test can detect cell changes that could lead to lung cancer two to five years before it shows on x-rays,'' said Eylands. ''This test should be a vital part of America's preventative medicine program. Just like the Pap Smear, the Nix-O-Tine LungCheck test helps identify abnormal cells before cancer is discovered. I am very excited about the market opportunity for the proprietary LungCheck testing and reporting method.''

The joint venture terms include the contribution of existing pathology contracts and a capital investment by Eylands in the newly formed laboratory. Nix-O-Tine is contributing its LungCheck assets and technology. The arrangement contemplates completion of construction and initiation of joint venture operations by Oct. 1.

Eylands will serve as chief operating officer and medical director of the laboratory and will be responsible for staffing, professional services and medical marketing activities. Eylands is presently the chief pathologist and director of laboratory services for Phoenix Baptist Hospital and Medical Center and chief pathologist and medical director for National Health Laboratories in Phoenix. He obtained his medical training at the University of North Dakota and McGill University, Montreal, Canada.

Bryant I. Pickering, M.D., chairman stated, ''We are very pleased by the high confidence Dr. Eylands has demonstrated in the LungCheck technology by agreeing to contribute capital, profitable laboratory contracts and significant time and effort to this new joint venture. This arrangement should allow us to significantly expand the marketing of LungCheck.''

Nix-O-Tine is a public company that owns a patented drug treatment method and a physician-directed behavioral modification program for nicotine addiction and smoking withdrawal. The company announced on July 13 the proposed acquisition of Behavioral Services of America which through its RxFast subsidiary offers a proprietary physician supervised weight loss program.

PASCO, WA (JULY 24) BUSINESS WIRE - United Express, operated by NPA Inc. Tuesday announced the addition of Julie Dearman who just recently joined the sales staff.

NPA Inc. is a wholly owned subsidiary of WestAir Holding Inc. (ASE:WAH). Dearman will serve as a sales representative for NPA.

In her new position Dearman will be responsible for sales and marketing activities in the greater Spokane, Wash., area as well as Kalispell and Missoula, Mont. Dearman has over 15 years experience in the travel industry.

Most recently she served as coordinator for the Travel and Hospitality program at Trend College in Spokane. She also spent the last two years as a marketing consultant for various businesses in and around Spokane. With her new position she will remain in Spokane.

''I am pleased to have Julie joining us,'' said Director of Sales and Marketing, Warren Wilkinson. ''Her experience in the travel industry, coupled with the knowledge she has of the Spokane community will be a great asset to NPA. We believe this underscores our commitment to the Spokane community.''

NPA Inc., headquartered in Pasco, is one of three airline operations that is part of WestAir Holding Inc. which is the largest regional airline company in the United States.

As a marketing partner with United Airlines, United Express passengers receive many United Airline benefits, including worldwide reservations, advance seat assignments and boarding passes. Passengers who are members of United's popular Mileage Plus Frequent Flier program earn a minimum of 500 miles credit for each United Express flight.

NPA/United Express currently serves 15 cities throughout Washington, Oregon, Montana and Idaho.

MUNCIE, IND. (JULY 24) BUSINESS WIRE - Directors of Ball Corp. (NYSE:BLL) Tuesday increased the company's quarterly cash dividend on common stock to

29 cents from 28 cents, a 3.6 percent increase.

The dividend is payable Sept. 14 to shareholders of record on Aug. 31.

Today's action marks the 19th consecutive year the company's dividend has been increased. Richard M. Ringoen, Ball's chairman and chief executive officer, said the dividend increase reflects the corporation's optimism for continued profitable growth.

The company last Wednesday reported record second quarter net income of $18.8 million, 25 percent above the same period in 1989, on $381.9 million in sales, a 13 percent increase. Earnings per share rose 25 percent to 80 cents.

Ball Corp. manufactures and markets packaging, industrial and consumer products, and provides aerospace systems and professional services to the federal sector. The company participates in the domestic glass container industry and Canadian packaging market through two joint venture companies Ball-InCon Glass Packaging Corp., and Ball Packaging Products Canada Inc.

SAN JOSE, CA (JULY 24) BUSINESS WIRE - Network Real Estate of California Inc., a publicly traded real estate company based in Soquel, Calif., with over 30 offices in Northern California, and Winchester Mortgage Co., a 25-year-old mortgage banking firm based in San Jose, announced Tuesday that the companies have signed a definitive agreement for Network to acquire Winchester.

According to Lee J. Danna, ERA Network chairman and chief executive officer, this acquisition will position Network to meet consumer needs by providing mortgage services throughout its real estate outlets.

''Our research strongly demonstrates that homebuyers would like the convenience and service to be able to obtain competitive mortgage financing through their Realtor,'' Danna said.

On May 30, ERA Network Real Estate became the nation's first publicly traded franchisee. Currently its stock is traded over the counter. With the acquisition of Winchester, Network's assets and book value will substantially increase and position it to qualify and be listed on a major stock exchange.

Danna pointed out that Winchester is the first building block in an acquisition program to establish Network as a major player in the real estate industry.

''This move with Winchester and the establishment of Network's Home Loan Center, a mortgage processing and support unit, are two more examples of Network's dedication to providing total consumer oriented homeowner services.

''We are very excited about this acquisition because it brings a strong management team to Network,'' said Danna. ''Leo Raiche, Winchester chairman; Don Ryals, president; and Roger McCurdy, executive vice president, bring over 100 years of mortgage banking and real estate experience to the Network organization.

''Network is very fortunate to have this in-depth management experience and expertise in assisting our company to provide financial services to the consumer,'' Danna said.

Raiche has served on Network's board of directors for the past two years and was appointed to the Board's Executive Committee on July 18.

Winchester Chairman Raiche stated that, ''In my 38 years of experience, which includes operating a 200-agent real estate company, the founding of a major title company, real estate development and mortgage banking, I have never seen a concept so ready for the marketplace.

''It is a very competitive marketplace and one that is changing very rapidly. The companies like Network that establish services that meet the consumer needs are going to be the winners,'' stated Raiche. ''In the final analysis, the consumer always wins.

''Winchester is primarily a wholesale mortgage banker,'' said Raiche. ''By joining forces with Network, we will be able to expand our retail mortgage lending through Network's real estate offices, which are growing every month.''

''This is the concept for the nineties and beyond,'' said Danna. ''More service and convenience for the consumer is being demanded every day. This service philosophy has been the mission of Network from day one. As long as we focus on that philosophy, the company will prosper.''

The terms of the acquisition provide that Winchester Mortgage Co., upon completion of due diligence and the raising of additional capitalization for expansion, will receive 24 percent of the outstanding shares of Network Real Estate.

HONOLULU (JULY 24) BUSINESS WIRE - Pacific Resources Inc. has completed construction of a new $5.25 million asphalt plant at its Campbell Industrial Park refinery.

According to Robert G. Reed III, PRI's chairman, president and chief executive officer, the plant has a production capacity of up to 700 barrels per batch, with each batch taking approximately 12 hours to manufacture.

Its primary feedstock or ingredient will be a by-product from other refining processes.

''We are confident that our plant will be able to provide a product of consistently high quality through an air blowing process which allows quality control to be measured throughout production,'' Reed added.

''It is fully computerized and utilizes modern technology which allows it to be operated from the refinery's central control room.

''This marks a new marketing opportunity for PRI,'' Reed said, ''and we plan to market our product here in Hawaii and in certain areas of the South Pacific region.''

In addition to the main unit, PRI upgraded its loadrack facility to accomodate asphalt delivery trucks and acquired special heated containers for transporting the asphalt. It also constructed a new 30,000-barrel capacity insulated tank for storing the finished material and purchased special laboratory equipment to conduct specification testing on the asphalt.

PRI's laboratory has applied for accreditation with the American Association of State Highway and Transportation Officials, which would make it the only manufacturer in Hawaii and one of few nationwide to have such an accreditation.

PRI is a wholly owned subsidiary of BHP Petroleum of Melbourne, Australia, one of the top 12 integrated oil companies in the world, with oil exploration and production facilities and interests in 24 nations.

Headquartered in Hawaii, PRI is an international energy company with interests in oil refining, trading, marketing, distribution, retail gasoline operations and utility gas and propane distribution.

RENO, NE (JULY 24) BUSINESS WIRE - International Game Technology reported higher revenues, operating income and net income as well as earnings per share for the quarter and nine months ended June 30.

Revenues for the third quarter were $58,747,000, as compared to $43,170,000 for the corresponding quarter ended June 30, 1989. Income from continuing operations was $6,691,000, or 46 cents per share. This compares to $4,052,000 and 26 cents per share for the third quarter of the prior year.

Net income for the third quarter increased 65 percent over the prior year, and the gain in earnings per share was approximately 77 percent. The growth realized in the third quarter of fiscal 1990 resulted primarily from increased sales of the company's gaming products.

IGAM also reported gains in the nine month period ended June 30. Revenues for the first nine months of the fiscal year were $154,213,000 as compared to $105,628,000 for the first nine months of the prior fiscal year. Net income for the first nine months was $15,099,000, or $1.03 per share as compared to 56 cents for the corresponding period in fiscal 1989.

The gains in net income and earnings per share were 76 percent and 84 percent, respectively. The increase in revenues and net profits for the nine months ended June 30, resulted from increased business volume and related gross profits in all of the company's operations.

The company effectuated a two-for-one stock split on July 16. All earnings per share amounts have been adjusted to reflect the increased number of shares resulting from the stock split.

International Game Technology is a world leader in the design, development and manufacture of microprocessor-based gaming products and gaming monitoring systems.

ARCADIA, CA (JULY 24) BUSINESS WIRE - Santa Anita Operating Co. Chairman, President and Chief Executive Officer Robert P. Strub, and Santa Anita Realty Enterprises Inc. Chairman and Chief Executive Officer Royce B. McKinley, Tuesday reported improved combined income for The Santa Anita Cos. for the second quarter ended June 30, 1990.

Net earnings for the period amounted to $2,976,000, or 27 cents per share on an increased number of shares outstanding, compared with combined income of $2,715,000, or 25 cents per share for the year-earlier quarter.

Realty reported income of $3,360,000, or 30 cents per share for the quarter, compared with income of $2,879,000, or 26 cents per share for the year-ago period. Operating Co. reported a loss of $265,000, or 2 cents per share for this year's second quarter, compared with a year-earlier loss of $112,000, or 1 cent per share.

For the six months ended June 30, 1990, combined income for The Santa Anita Cos. was $9,870,000, or 89 cents per share on increased shares outstanding. This compares with combined income of $9,301,000, or 94 cents per share for the first six months a year ago. Realty earned $10,235,000, or 91 cents per share for the six months, compared with $9,415,000, or 94 cents per share in the comparable year-ago period. Operating Co. incurred a loss of $209,000, or 2 cents per share for the six months of 1990, compared with income of $35,000 a year earlier.

The Santa Anita Cos. comprise Santa Anita Realty Enterprises and Santa Anita Operating Co. The shares of the two Santa Anita companies trade on a ''paired'' basis on the New York Stock Exchange under the symbol SAR.

Santa Anita Realty Enterprises, one of the nation's leading real estate investment trusts, owns the Santa Anita racetrack property, a 50 percent interest in the operation of Santa Anita Fashion Park and a 32.5 percent interest in Towson Town Center (major regional shopping centers), a number of neighborhood shopping centers, and interests in an industrial park, three apartment projects and three office buildings.

Santa Anita Operating Co. conducts thoroughbred horse racing at Santa Anita Park through its subsidiary, the Los Angeles Turf Club Inc.

SCOTTS VALLEY, CA (JULY 24) BUSINESS WIRE - Seagate Technology Inc. (NASDAQ:SGAT) Tuesday reported net sales of $668,074,000, and net income of $29,694,000, or 46 cents per share, for the three months ended June 30, 1990.

For the fiscal year ended June 30, 1990, net sales were $2,413,178,000 and net income was $117,241,000, or $1.92 per share.

Results for the quarter and fiscal year ended June 30, 1990, include the operations of Imprimis Technology from the date of acquisition by Seagate. Imprimis, the former disc drive and related technologies subsidiary of Control Data Corp., was purchased by the company effective Oct. 2, 1989. The acquisition has been treated as a purchase for accounting purposes.

Seagate is the world's leading supplier of disc storage products to original equipment manufacturers and remarketers.

IRVINE, CA (JULY 24) BUSINESS WIRE - Russell E. Leatherby, president and chief operating officer of UniCARE Financial Corp. (ASE:UFN), Tuesday announced that net income for the second quarter ended June 30 rose 17 percent to $2,178,000, or 40 cents per share, compared with net income of $1,869,000, or 34 cents per share, in the second quarter of 1989.

Total revenues for the period increased 31 percent to $23,231,000, from $17,766,000 in the second quarter of 1989.

Leatherby said that ''our growth trend continued in the second quarter.'' Net premiums earned increased 32 percent to $20,544,000 for the second quarter compared with $15,602,000 for the second quarter of 1989. Net investment income grew 31 percent to $2,687,000, compared with $2,058,000 for the second quarter of last year.

Net income for the six months ended June 30 increased to $4,196,000, or 77 cents per share, a 16 percent increase over the $3,613,000, or 66 cents per share, for the six-month period of 1989. Revenues for the first six months of 1990 rose to $44,580,000, a 25 percent increase over the $35,542,000 for the like six-month period in 1989.

The company's cash flow provided by operating activities increased to a record $12,202,000 for the six months ended June 30, compared with $9,910,000 for the like period last year.

Leatherby said: ''The company continues to experience net increases in new accounts and a high renewal rate on existing business. Further, for the first six months of 1990, our combined ratio, which measures operating profitability, continued to be favorable at 98.6 percent.''

UniCARE Financial Corp., through its subsidiary, UniCARE Insurance Co., is engaged in the business of underwriting workers' compensation insurance in California, targeting larger accounts and emphasizing service to its policyholders.

SANTA ANA, CA (JULY 24) BUSINESS WIRE - Alpha Microsystems (NASDAQ:ALMI) announced Tuesday that it has been selected by Dun's Marketing Services, a division of The Dun & Bradstreet Corp., to be featured in a national advertising campaign promoting Dun's full range of marketing products and services.

According to the announcement made by Alpha Microsystems' executive vice president Douglas J. Tullio, Alpha Microsystems is one of just three companies selected by Dun's from its list of 30,000 customers to be showcased in Dun's new national advertising campaign.

The initial ad, featuring Alpha Microsystems, appeared in the June 25, 1990 and July 23, 1990 issues of the WALL STREET JOURNAL, and is also running in the July issues of SALES & MARKETING MANAGEMENT, BUSINESS MARKETING, TARGET MARKETING and CALIFORNIA BUSINESS.

Alpha Microsystems, known for supporting its dealers with a broad and comprehensive range of dealer-oriented marketing support programs, has been using Dun's Marketing Services for the past five years.

Alpha Microsystems' dealer-oriented marketing programs include an outstanding co-operative advertising program; results-proven direct mail and lead-generation programs; professional sales training and sales consulting; as well as marketing, advertising and public relations advisory services.

With a successful history of generating sales leads and sales productivity improvements, the marketing programs are based on Alpha Microsystems' 13 years of experience in developing and supporting its vertical-market oriented dealer organizations.

Dun & Bradstreet is the world's leading provider of business and consumer information services. Dun's Marketing Services, a division of Dun &

Bradstreet, helps business-to-business firms define marketing strategy by analyzing the size and scope of key markets, identifying business prospects in those markets and measuring the effectiveness of campaigns to those prospects.

Dun's Marketing Service specializes in providing dealer and franchise networks with highly qualified lead generation programs.

Alpha Microsystems manufactures, markets and services multi-user business computer solutions for a variety of vertical markets and industries worldwide. The company's products support a range of business oriented operating software environments including Alpha Microsystems' proprietary AMOS and RECAP multi-user operating systems; the widely used XENIX, Pick and MS-DOS operating systems; and Business Basic.

The company also manufactures, markets and services VCRCopy, based on its patented VIDEOTRAX technology, for IBM PS/1 computers.

For dealer and reseller information and requirements, product specifications or further information on the company's marketing programs, contact Denny Michael, Alpha Microsystems, 3501 Sunflower, P.O. Box 25059, Santa Ana, Calif., 92799; 714/957-8500 or toll free 800/992-9779 (except California). Dealer and reseller inquiries invited.

AMOS and VIDEOTRAX are registered trademarks, and VCRCopy and RECAP are trademarks of Alpha Microsystems. PS/1 is a trademark of International Business Machines, and all other trademarks and registered trademarks are of their respective companies.

#90205b0193 07/24/1990 ~Business Wire

ATLANTA (JULY 24) BUSINESS WIRE - Patrick H. Thomas, chairman, president and chief executive officer of First Financial Management Corp. (NYSE:FFM) Tuesday announced record financial results for both the second quarter and first half of 1990.

Net income for the second quarter of 1990 increased 28 percent to $15.5 million, up from $12.1 million earned in the second quarter of 1989. Fully-diluted earnings per share were 55 cents, up 12 percent from 49 cents in 1989. Revenues for the second quarter were up 49 percent to $211.4 million compared with revenues of $141.8 million for the same period last year.

For the six months ended June 30, revenues increased 53 percent to $403.1 million compared with $263 million in the prior year. Net income for the first half of 1990 rose 30 percent to $28.1 million from $21.6 million in the first six months of 1989. Fully-diluted earnings per share were up 11 percent to $1.01 from 91 cents.

At the end of the period, the company had total assets of $4.9 billion, equity capital of $565 million and cash on hand (excluding Georgia Federal) of $102 million.

Second quarter 1989 earnings included 3 cents of non-recurring earnings per share, resulting from asset sales at Georgia Federal Bank, which dilutes the impact of quarterly and year-to-date growth comparisons. Without inclusion of the 3 cents in 1989, the earnings per share increase would be 20 percent for the quarter and 15 percent for the six months.

There were several highlights during the quarter in the operating business segments. Data Services and Merchant Services had solid revenue growth of 13 percent and 59 percent, respectively. Data Services operating margins showed significant improvement from the first quarter of 1990 to 16.8 percent compared with 10.4 percent for the first quarter as Basis, the financial data processing business, begins to benefit from its consolidation activities.

Consumer Services accounted for 25 percent of operating income for the second quarter compared with 44 percent in the first quarter of 1990. For the quarter, total operating revenues increased 51 percent and operating income was up 41 percent from the same period in 1989.

During the second quarter, FFMC's board of directors authorized the open market purchase of FFMC common stock. To date approximately 525,000 shares have been purchased and were reissued in the acquisitions of Nationwide Credit and Online Financial Communications Systems.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries. It is a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing and is one of the largest merchant credit

card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia and its subsidiary, First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

IRVINE, CA (JULY 24) BUSINESS WIRE - Russell E. Leatherby, president and chief operating officer of UniCARE Financial Corp. (ASE:UFN), Tuesday announced the filing of a registration statement with the Securities and Exchange Commission covering a proposed public offering of 1.5 million shares of common stock of the company.

The shares are being offered by Ralph Leatherby, the company's founder, through two trusts and a foundation. The offering will be underwritten by a group led by Smith Barney, Harris Upham & Company Inc. and Dean Witter Reynolds Inc.

Russell Leatherby said the sale of shares by these entities should enhance market liquidity for all shareholders and broaden the independent shareholder base of the company. Upon completion of the offering, Ralph Leatherby, who has not previously sold shares to the public, will continue to hold a controlling interest with an ownership position of approximately 32 percent of the shares outstanding.

Copies of the prospectus relating to the offering may be obtained from Smith Barney, Harris Upham & Company Inc., 333 S. Grand Ave., 51st Floor, Los Angeles, CA 90071, and Dean Witter Reynolds Inc., 800 Wilshire Blvd., Suite 718, Los Angeles, CA 90017.

UniCARE Financial Corp., through its subsidiary, UniCARE Insurance Co., is engaged in the business of underwriting workers' compensation insurance in California, targeting larger accounts and emphasizing service to its policyholders.

CUPERTINO, CA (JULY 24) BUSINESS WIRE - Symantec Corp. (NASDAQ/NMS:SYMC)Tuesday announced financial results for its first fiscal quarter ended June 30, 1990.

Revenues increased 53 percent to $17.1 million as compared to $11.2 million in the quarter ended June 30, 1989. Net income increased 67 percent to $2,076,000, or 31 cents per share, as compared to $1,243,000, or 23 cents per share, in the quarter ended June 30, 1989.

''Our revenues and earnings exceeded expectations this quarter, due in part to the rapid acceptance of products released earlier this year such as Time Line version 4.0 and Symantec AntiVirus for Macintosh (SAM) version 2.0,'' said Gordon E. Eubanks Jr., president and chief operating officer.

''In addition, we finalized the definitive agreement to merge Peter Norton Computing into Symantec and shipped enhanced versions of MORE (version 3.0) and The Budget Express (version 1.1).''

As explained at the time of the announcement, the Peter Norton Computing merger will be accounted for as a pooling of interests. As a result, Peter Norton Computing's historical and future results of operations, along with expenses associated with the merger, will be combined with Symantec's financial results.

Symantec will restate all financial results when the deal is complete to reflect the combined financials of both companies.

Symantec is a leading international software company which provides award-winning application and system software products for IBM PC and Apple Macintosh computer users. Founded in 1982, Symantec is a public company traded on the NASDAQ National Market System. The company is based in Cupertino.

DERRY, NH (JULY 24) BUSINESS WIRE - Cornerstone Financial Corp. (NASDAQ:CSTN), a two bank holding company located in Derry, N.H., announced a net loss of $734,000, or 35 cents per share for the second quarter ended June 30, 1990, compared to net income of $409,000, or 19 cents per share for the second quarter ended June 30, 1989.

Net income in the second quarter of 1990 and 1989 included extraordinary gains from the repurchase of Cornerstone's convertible subordinated debentures of $1,000 and $66,000, respectively. As previously announced on June 29, 1990, the 1990 second quarter loss was a result of provisions for estimated possible losses on loans, real estate acquired through foreclosure, and the company's limited partnership interest in a real estate joint venture, aggregating $1,250,000. The provision for estimated loan losses in the second quarter 1989 was $88,000.

For the six months ended June 30, 1990, Cornerstone incurred a net operating loss of $696,000, or 33 cents per share, and with an extraordinary gain of $41,000, or 2 cents per share. Cornerstone experienced a net loss of $655,000, or 31 cents per share. For the six months ended June 30, 1989, Cornerstone earned $654,000, or 31 cents per share before extraordinary gains of $66,00, or 3 cents per share, for net income of $720,000, or 34 cents per share.

The balance of non-accrual status loans declined from $2,889,000 at March 31, 1990 to $2,290,000 at June 30, 1990. Other real estate owned also declined from $3,928,000 at March 31, 1990 to $2,942,00 at June 30, 1990. The results for the second quarter in 1990 also reflected loan charge-offs of $148,000 during the period. The reserve for loan losses was $1,383,000 or 1.5 percent of outstanding loans and 60 percent of non-performing loans, at June 30, 1990.

John M. Terravecchia, chief executive officer of Cornerstone, stated that ''the company is being affected by the generally adverse real estate market in New England and by other factors beyond its control. The $1,250,000 of provisions, as previously announced, were steps taken due to a regional economy which has not stabilized.''

Terravecchia further stated, ''that although the second quarter

results were not favorable, Cornerstone remains a strong financial institution with solid core earnings and a substantial capital base. While there can be no assurances as to the direction of the regional economy in the near term, and that further adjustments may not be necessary, we believe the company has taken prudent steps to generate net interest income, control operating expenses and provide an adequate reserve for loan losses.

Total assets at June 30, 1990, were $162,697,000, a slight increase from the Dec. 31, 1989, balance of $161,682,000, while deposits increased over the same six month period by approximately 4 percent to $141,087,000. Cornerstone's primary capital level at June 30, 1990, was approximately 9.6 percent.

Cornerstone Financial Corp. is the holding company for Derry Bank and Trust Co. and Cornerstone Bank. On Oct. 1, 1990, Cornerstone intends to merge the two banks together under a commercial bank charter with the name ''Cornerstone Bank.'' Cornerstone previously announced that the board of directors voted to forego the payment of its regular quarterly dividend for the second quarter and that future dividends will be considered on a quarter by quarter basis.

HONOLULU (JULY 24) BUSINESS WIRE - Bancorp Hawaii Inc. announced Tuesday that it has completed its purchase of FirstFed America Inc.

FirstFed, which is now a wholly owned subsidiary of Bancorp Hawaii, is the parent company of First Federal Savings & Loan Association of America, which has 26 offices throughout the state of Hawaii.

Other FirstFed subsidiaries include First Savings & Loan Association of America, which does business in Guam and Saipan, and FirstFed America Bank a Federal Savings Bank, doing business in Utah.

The total purchase price was approximately $140 million.

The transaction was first announced in November 1989 when the parties entered into a non-binding letter of intent, and in January 1990, they entered into a definitive agreement. FirstFed shareholders gave their approval for the transaction on June 20, the Office of Thrift Supervision gave its approval on July 12 and the Federal Reserve Board granted its approval on July 23, l990.

Prior to joining Bank of Hawaii in 1985, Humphreys, one of Bankoh's four executive vice presidents, was with First Federal as executive vice president and loan administrator. He will continue to be responsible for Bankoh's Retail Products Group.

FirstFed's board of directors and three of its officers, Wayne Jack, president; Michael L. Seabolt, vice president; and Rodney R. Shinkawa, vice president, resigned as part of the agreement with Bancorp Hawaii.

The shareholders of FirstFed will receive $38.50 in exchange for each of their shares. Shareholders of FirstFed whose stock was registered in their names will receive materials for use in surrendering their stock certificates in exchange for payment by the Bank of New York, which is acting as the exchange agent for the transaction.

Bancorp Hawaii Inc., one of the nation's top 100 bank holding companies, now has assets of $9.8 billion. Its principal subsidiary, Bank of Hawaii, has 62 offices in Hawaii, as well as branches, representative offices, and affiliates in the South and West Pacific and Asian Rim.

NEW ORLEANS (JULY 25) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE:FTX) Tuesday reported second-quarter 1990 net income of $43,481,000, or primary earnings of 80 cents per common share, on an average 54,490,000 common shares outstanding compared with second-quarter 1989 net income of $25,907,000, or primary earnings of 41 cents per common share, on an average 62,846,000 common shares outstanding.

Second-quarter 1990 net income reflects a net gain from restructuring activities, including the sale of Korean assets after taxes and minority interests, of $29,843,000. Second-quarter 1990 and 1989 revenues totaled $377,994,000 and $519,468,000, respectively.

Financial results for the second quarter of 1990 benefited from continued strong world copper prices, record gold production and sales at the company's Indonesian copper/gold operations, reduced interest expense as proceeds from asset sales were used to reduce debt, and a natural gas contract settlement.

However, second-quarter 1990 operating results were adversely affected by lower prices for phosphate fertilizer products and Frasch sulphur, lower realizations for natural gas and crude oil, and reduced crude oil production due in part to the ongoing sale of less strategic oil and natural gas properties.

These property sales are improving the efficiency of FTX's oil and natural gas operations by reducing both operating and general and administrative costs.

For the first six months of 1990, net income was $258,760,000, or primary earnings of $4.77 per common share on an average 54,193,000 common shares outstanding, compared with net income of $90,455,000, or primary earnings of $1.38 per common share on an average 65,691,000 common shares outstanding during the first six months of 1989.

Net income for the six months ended June 30, 1990 and 1989, included gains from the sale and/or the restructuring of assets, net of taxes, minority interests and restructuring costs, of $241,375,000 and $27,700,000, respectively. Revenues for the first six months of 1990 and 1989 totaled $770,582,000 and $990,288,000, respectively.

The company's successful restructuring efforts in late 1989 and 1990 and the net after-tax cash proceeds, including working capital adjustments, generated by asset sales have included:

CARPINTERIA, Calif. (JULY 24) BUSINESS WIRE - Digital Sound Corp. (NASDAQ NMS: DGSD) announced Tuesday that a class action lawsuit has been filed against the company by one of its shareholders.

The complaint alleges violations of certain federal securities laws in connection with the company's initial public offering of Feb. 27, 1990 and subsequent public statements. The complaint requests that the court determine that the action is a proper class action. The complaint also names certain officers and directors of the company. While the complaint has yet to be served on the company, one of the company's directors was served on July 20, 1990.

The complaint, which was filed in the United States District Court for the Central District of California in Los Angeles, does not specify any amount

of damages. The company believes that the lawsuit is without merit, and intends to contest the action vigorously.

Digital Sound Corp. designs, manufactures and markets general purpose voice processing platforms for voice messaging, interactive voice response and other applications.

For further information, please contact Eugene F. Hovanec, vice president-finance and chief financial officer, Digital Sound Corporation, 6307 Carpinteria Ave., Carpinteria, Calif. 93013.

#90205b0377 07/24/1990 ~Business Wire

MILPITAS, Calif. (JULY 25) BUSINESS WIRE - Adaptec (NASDAQ/NMS:ADPT) Tuesday announced the financial results of its first fiscal quarter ended June 29, 1990.

Revenues during the quarter were $32,454,000, a 40 percent increase from $23,202,000 for the like period last year. Net income was $4,467,000, a 123 percent increase from $2,002,000 for the like period last year.

Earnings per share were 43 cents, a 72 percent increase from 25 cents for the like period last year even though common share equivalents increased from 8,080,000 to 10,465,000 resulting in a dilutive impact of 12 cents per share.

''Adaptec's record quarterly revenues demonstrate our success in both securing and expanding design win programs with international system and peripheral manufacturers.

''We recently signed a significant OEM contract with Conner Peripherals, expanding Adaptec's participation into all major 2-1/2 and 3-1/2-inch embedded disk drive designs,'' stated John G. Adler, president and chief executive officer.

''This agreement expands our relationship with Conner to include their high-volume AT as well as SCSI disk drives and formally establishes a framework for continued joint development between Adaptec and Conner.

''Increasing microprocessor performance and more complex applications are creating significant opportunities for Adaptec's high-performance I/O solutions,'' continued Adler.

''IBM's recent introduction of several SCSI products in their Micro Channel systems is both validating and accelerating the adoption of SCSI

in high-performance microcomputer applications. In addition, Microsoft, in conjunction with Adaptec, Compaq, NCR and Western Digital, announced an enhanced SCSI device driver architecture for the OS/2 operating system.

''This architecture enables SCSI peripheral manufacturers to interface their devices easily with OS/2 based systems, widens the market for SCSI products and supports Adaptec's strategy of providing I/O solutions within the framework of open industry standards.

''Adaptec has now achieved its fifth consecutive quarter of record operating income. Gross margin reflects manufacturing efficiencies and a shift in product mix to our higher performance offerings,'' said Paul G. Hansen, Adaptec's chief financial officer.

''In addition, Adaptec's increased investment in R&D reflects our commitment to expanding our market leadership. This is demonstrated by our introduction of the industry's first single-chip host adapter, recently selected by GRiD Systems for their TEMPEST 386-based laptop.''

Adaptec is a leading supplier of high-performance semiconductor and software Input/Output (I/O) solutions. Products include proprietary VLSI circuits for SCSI, AT and MCA interfaces, high-performance ESDI controllers for AT and EISA interfaces, SCSI-based host adapters, a family of SCSI test and development systems, and a recently introduced family of laser printer controllers.

#90205b0390 07/24/1990 ~Business Wire

REDWOOD CITY Calif. (JULY 25) BUSINESS WIRE - Network Equipment Technologies Inc. (NYSE:NWK) Tuesday reported a net loss of $13.3 million, or 94 cents per share, for the first fiscal 1991 quarter ended July 1, 1990, compared with a net income of $4.8 million, or 34 cents per share, for the like period last year.

Revenue for the quarter was $26 million, down from $41.8 million for the first quarter fiscal 1990.

The company commented that results of the first quarter were disappointing but consistent with N.E.T.'s previous statement that near-term shipments and revenue would decline as compared to last year, resulting in an operating loss.

A significant reason for the poor financial performance was a decline in shipments primarily as a result of the absence in the latter half of fiscal 1990 of sufficient new account sales activity.

In addition, management believes that concerns among its current and prospective customers about recent events may have extended or otherwise affected their purchase decisions.

Gross margin was adversely affected by a number of factors, including the low level of product shipments, a write-off of certain capitalized software and adjustments to reserves established for inventory in excess of current demand.

In the first quarter, the company concentrated its efforts on identifying new prospects and reaffirming its relationships with its current customer base. The company noted that in the first quarter the IBM distribution channel exceeded N.E.T.'s expected level of sales.

Increased domestic and international new account sales activity supports management's belief in the continued demand for its products. In addition, the company has established expense control plans, adjusted overall employment levels, and continues to monitor spending to reflect changes in revenue levels.

Two management changes were also announced today.

The title and responsibilities of chief executive officer shift from Bruce D. Smith to Daniel J. Warmenhoven, now president and chief executive

officer. Warmenhoven joined the company as president and chief operating officer in November, 1989.

As chairman of the board of directors, Smith will concentrate its efforts on strategic business and technology issues affecting the company. Smith intends to resign from the board on Dec. 31, 1990 to pursue venture capital activity, but will continue in a long-term consulting capacity with the company.

''Given my long-felt and often expressed desire to extend my entrepreneurial experience beyond N.E.T., I brought Dan into the company to begin the transition process,'' said Smith. ''I believe it is in the best interest of N.E.T. and its shareholders that Dan assume leadership of the company at this time. He has my full support,'' stated Smith.

''I am confident in the long-term prospects of N.E.T.,'' said Warmenhoven. ''With the support of Bruce, the board and the shareholders, I'm convinced that the fundamental strengths of the company will continue.''

To provide Warmenhoven the opportunity to select his own management team, Barrett B. Roach has elected to resign as a member of the board of directors and vice president, finance and administration, chief financial officer and secretary. He will continue with the company in a long-term consulting capacity.

Craig M. Gentner, who joined the company in August of 1989 as vice president, finance, has been elected vice president and chief financial officer.

''Barry has made significant contributions to the company, and we look forward to his continuing assistance,'' said Warmenhoven.

Warmenhoven also reported that the company's investigation into the events of the last fiscal year has concluded and appropriate actions have been and will continue to be taken.

N.E.T. develops, manufactures, markets and supports advanced communication products and services that enable large, information-intensive organizations to build and manage wide area networks. These networks interconnect computer and communications devices among geographically dispersed locations, enabling organizations to utilize their information systems to competitive and economic advantage.

#90205b0610 07/24/1990 ~Business Wire

NEW YORK (JULY 24) BUSINESS WIRE - White Hall Investments Inc. (formerly Mauna Corp.) Tuesday announced it had contracted to purchase London's largest and most profitable independent bus company.

The business of Ensign Bus Services has been transferred to Front Runner Buses (South East) Ltd., a 100 percent owned subsidiary of White Hall Investments. The contract requires final approval of the London Regional Transit Authority, which is expected to be shortly forthcoming.

Ensign reported profits pre-tax and group management charges of 747,000 pounds ($1.4 million) for the year ended December 1989 on a turnover of 5.2 million pounds ($9.4 million).

The initial consideration paid is approximately 4.4 million pounds ($8 million) in cash and White Hall shares with a deferred consideration related to pre-tax profits expected to be approximately a further 2 million pounds ($3.6 million) if the expected profits of 1.2 million pounds ($3 million) are made in the year ending September 1991.

The company operates a fleet of traditional double-decker buses under long-term contract to London Regional Transport. Revenues are received on a mileage basis, thus providing a definable and reliable income stream to the company.

The company is increasing its fleet from the current 84 buses through the acquisition in the fall of 24 new vehicles. This will allow the company to decrease maintenance charges and increase revenue miles through allocated new routes.

A company spokesman said: ''This acquisition fits with the overall business strategy of buying companies with positive cash flow allied to substantial underlying assets. The existing operational management is remaining and the handover has been completed smoothly.

''The commanding positions that Front Runner enjoys within the Greater London area ensures that the company has potential to expand further within high-traffic and profitable routes.''

White Hall Investments recently changed its name from Mauna Corp. and also effected a 10:1 share reversal. The company's shares are traded in the U.S. Over-The-Counter market.

LYNBROOK, NY (JULY 24) BUSINESS WIRE - Martin J. Simon, chairman and president of First Central Financial Corp. (ASE: FCC), announced Tuesday that the insurance holding company achieved record results in both the three-month period and in the six-month period ended June 30.

The company, whose wholly owned subsidiary First Central Insurance Co. writes property and casualty insurance, reported that written premiums for the second quarter of 1990 were at a record level of $7,343,607 compared to $6,386,894 for the second quarter of 1989.

Earned premiums were $6,379,848 compared to $5,151,000 in the comparable 1989 period. Net income for the three-month period ended June 30, was $859,569, or 16 cents per share, compared to net income of $895,000, or 15 cents per share, for the second quarter of 1989. The weighted average number of shares outstanding was 5,592,451 in the second quarter of 1990 vs. 5,967,320 in the comparable 1989 period.

For the six months ended June 30, 1989, First Central Financial Corp. reported that written premiums were at the record level of $15,153,160 compared to $12,194,531 for the first half of 1989.

Earned premiums were $12,938,268 compared to $9,653,000 in the same period of 1989. Net income for the first half was $1,553,725, or 28 cents per share, compared to net income of $1,628,103, or 27 cents per share, for the 1989 first half. The weighted average number of shares outstanding was 5,624,091 in the first half of 1990 vs. 6,015,423 in the comparable 1989 period.

The increases in net premiums written and earned in the first half of 1990 chairman Simon said, reflect the insurance company's continued expansion in the insurance market.

First Central Financial Corp.'s insurance company, which focuses on the property and casualty insurance needs of small and mid-sized businesses, is rated A (Excellent) for its financial soundness and operating performance by A.M. Best & Co., a leading insurance industry rating organization.

SAN JOSE, CA (JULY 24) BUSINESS WIRE - Impact Systems Inc. (OTC:MPAC)

Tuesday announced that for the first quarter ended June 30, 1990, it had approximately breakeven results on net revenues of $6.8 million.

This compares to net revenues of $7.8 million and a net loss of $44,000 for the comparable quarter of last year.

The company noted that the breakeven results were achieved on lower revenues primarily due to reduced operating expenses of $3.2 million, compared to $3.6 million for the comparable quarter last year.

The reduction in operating expenses resulted from certain restructurings completed and previously reported in the company's fourth quarter.

Impact Systems Inc.

Kenneth P. Ostrow, president and chief executive officer, stated: ''Our results for the quarter were in line with our expectations.

''In spite of a weakening North American market, we continue to believe that overall results for fiscal 1991 will show an improvement over fiscal 1990, and, we expect that second quarter results for this year will show improvement over last year's second-quarter loss.

''Historically, our second quarter results of operations are usually lower than other quarters. However, on a year-to-year comparison, we expect to report higher margins on lower revenues compared to last year, along with reduced operating expenses for this year's second quarter.''

Impact's products can be sold on the basis of improved quality and efficiency of manufacturing during economic slowdowns, or for increasing production during economic expansion periods.

GARDEN CITY, N.Y. (JULY 24) BUSINESS WIRE - Computer Associates International Inc. (NYSE:CA) Tuesday announced its financial results for the first fiscal quarter ended June 30, 1990.

Revenues for the quarter were $255,058,000, a decline of 16 percent when compared with revenues of $303,207,000 for the quarter ended June 30, 1989.

Pre-tax income was $5,888,000, a decrease of 79 percent compared to pre-tax income of $27,785,000 in last year's quarter. Net income dropped 66 percent from $10,689,000, or 6 cents per share, a year ago to $3,592,000, or 2 cents per share, for this year's quarter.

The results for the quarter ended June 30, 1989 have been restated to include the operations of Cullinet Software Inc. which was acquired by the

company on Sept. 12, 1989 and treated, for accounting purposes, as a ''pooling of interests.''

On July 12, 1990, the company announced that, on the basis of preliminary information, revenues for its fiscal quarter ended June 30, 1990 were significantly lower than revenues for the comparable fiscal quarter of 1989 and that, consequently, earnings were lower.

Following this announcement, the share price for the company's common stock as traded on the New York Stock Exchange dropped approximately $6.25 per share, closing on July 12, 1990 at $10.25.

Computer Associates International Inc.

#90205b0626 07/24/1990 ~Business Wire

AUSTIN, TX (JULY 24) BUSINESS WIRE - SunRiver Corp. Tuesday announced that its family of fiber-optic-based, multi-user workstations and terminals will support Lotus Development Corp.'s (NASDAQ:LOTS) recently announced 1-2-3 package for UNIX System V Release 3.2.

The company's line of workstations and terminals, which provide high-performance graphics processing for Intel-based UNIX platforms, will offer complete support for the new Lotus 1-2-3 version, which is designed specifically for UNIX users.

SunRiver's fiber-optics-based workstations and terminals perform in a multi-user configuration, whereby several of the stations are linked to an 80386 or 80486 machine. This configuration provides each user in a workgroup with workstation performance at a cost-effective price.

When linked to an industry-standard 80386 running the new 1-2-3 version,

the SunRiver Fiber Optic Stations can provide multiple users with all of 1-2-3's advanced color-graphics features, as well as the multi-tasking capabilities of UNIX, at their desktops.

A UNIX-based workgroup configuration using the SunRiver workstations or terminals is easier to install and administer, simpler to use and more powerful than individual PC-based configurations. SunRiver's 32 Mbps fiber-optic-transmission speed provides fast response and the bandwidth necessary to process bit-mapped graphics such as those used by the new Lotus package.

The SunRiver Fiber Optic Station is the only graphics terminal recommended specifically by Lotus for use with the new Lotus 1-2-3 release's advanced graphics features. In addition, the Fiber Optic Stations were actually used in the development of the new 1-2-3 package and are supported by the Lotus 1-2-3 installation scripts.

''With the combined power of the new Lotus 1-2-3 UNIX version and SunRiver's Fiber Optic Stations, each user in a workgroup will experience the full range of features afforded to PC users of the new Lotus 1-2-3, plus powerful multi-tasking capabilities such as the ability to use multiple applications simultaneously,'' said Peter Davis, president of SunRiver.

''Our multi-user configuration offers users workstation performance at the best price/performance available,'' he continued.

''Lotus 1-2-3 for UNIX System V provides 1-2-3 fuctionality to the millions of UNIX Suystem V users in the federal government and commercial markets,'' said David Rome, director of UNIX products for Lotus.

''The SunRiver stations provide a unique, high-performance platform for our product that support all of the features found in PCs -- such as advanced graphics and text modes -- but provide added benefits to those users who desire a cost-effective, multi-user configuration,'' Rome said.

SunRiver Fiber Optic Stations and connectivity products are available from authorized SunRiver dealers worldwide.

SunRiver is a leading worldwide supplier of workstations and connectivity products for the CAD/CAM, graphics and imaging markets. SunRiver's Fiber Optic Systems, including the CADSystem, provide true multi-user/multi-tasking solutions for graphics-intensive application environments such as those found in the engineering, manufacturing and medical fields.

VANCOUVER, WA (JULY 24) BUSINESS WIRE - Red Lion Hotels & Inns broke ground on a new property in Glendale July 17, 1990.

A baby lion and a bagpipe band were on hand to welcome the newest Red Lion to Southern California. The hotel will be built between Arden Avenue and Glenoaks Boulevard in Glendale, a Los Angeles suburb located 15 minutes from the Burbank airport.

The hotel will have 349 guest rooms, two presidential suites, and eight parlor suites. Two floors feature concierge service and a lounge. The meeting and banquet facilities include a ballroom, junior ballroom, boardroom, and meeting rooms, the largest one accommodating 1,000 people.

''We are pleased to offer Red Lion's high level of customer service and quality accommodations to the community of Glendale,'' said Jerry Best, president and chief executive officer of Red Lion Hotels & Inns. ''Our research shows this is a key market for the Red Lion customer,'' added Best.

In keeping with its reputation for high-quality food and beverage, the Red Lion/Glendale will feature a fine-dining specialty restaurant, cafe, cocktail lounge, lobby lounge, and rooftop lounge.

Guests at the new Red Lion/Glendale will enjoy the indoor/outdoor swimming pool, jacuzzi, steam and dry sauna, and a 4,175 square foot health club. The hotel is expected to open in spring 1992.

Headquartered in Vancouver, Red Lion Hotels & Inns operates 55 hotels in 11 western states.

#90205b0628 07/24/1990 ~Business Wire
SPOKANE, WASH. (JULY 24) BUSINESS WIRE - Pegasus Gold Inc. (AMEX; TSE; PGU) today reported second quarter earnings of $3.2 million, or $0.13 per

share, on revenues of $49.1 million before a write-down of $1.0 million.

Net income after the write-down was $2.2 million, or $0.09 per share. This compares with net earnings of $2.8 million, or $0.12 per share, for the second quarter of 1989. Second quarter gold production of 94,800 ounces was an increase of 2.5 percent over the comparable three months last year.

Net income for the six months ended June 30, 1990, was $2.8 million, or $0.12 per share, compared to $4.5 million, or $0.19 per share, for the same period last year. Gold production for the six months increased 7,100 ounces over 1989 to 150,900 ounces.

Results for the second quarter included a write-down of $1.0 million related to the company's equity investment in Pioneer Metals Corp. The investment, which was previously written down in the third quarter of 1989 from $4.7 million to $1.0 million, has now been written-off completely.

The major factor reducing net earnings for the quarter compared to the same period last year was lower gold prices. The gold price realized in the second quarter of 1990 was $393 compared to $412 in the same period last year.

For the six months, the company realized $400 per ounce of gold compared to $414 in 1989.

Pegasus Gold Inc. is a major North American gold producer that currently produces over 340,000 ounces of gold from six mines in the western United States. The company also produces significant quantities of silver, lead and zinc. Pegasus Gold common shares are traded on the American Stock Exchange and the Toronto Stock Exchange under the symbol PGU. Options on the company's common shares are traded on the Chicago Board Options Exchange and the Montreal Stock Exchange.

BREMERTON, WA (JULY 24) BUSINESS WIRE - GNW Financial Corp. (NASDAQ:GNWF) the holding company for Great Northwest Federal Savings and Loan Association, Tuesday announced that Ralph Lintz has been named president and chief operating officer of the savings and loan.

Raymond L. Soule will remain chairman and chief executive officer.

''Ralph Lintz's dedication and hard work as executive vice president have

helped the association become one of the more profitable and well capitalized thrifts in the state. He has been with Great Northwest since 1970 and has served in virtually every department in the association becoming executive vice president and a director in 1979,'' said Raymond L. Soule, chairman and CEO.

''I am confident that Great Northwest, under Ralph's leadership will continue to grow and prosper. We have an excellent board, a solid management team and staff, and a strong financial and market position,'' Soule added.

''I am honored by this promotion and plan to continue the conservative policies of steady growth, careful lending practices, and friendly, efficient service to our customers in this dynamic market,'' Lintz said.

Lintz holds both a B.A. and M.B.A. from the University of Montana. He is especially active in the local community having served as chairman of the board of Harrison Memorial Hospital, as president of Kitsap Health Care Foundation, and as a board member of the Kitsap Family YMCA.

Great Northwest Federal Savings and Loan Association was established in Bremerton in 1916 and operates 17 branches in the Puget Sound and Spokane areas.

TORRANCE, CALIF. (JULY 24) BUSINESS WIRE - MDT Corp. (NASDAQ:MDTC) reported that their gross profit margin increased to 30.6 percent in the first quarter of fiscal 1991, from 29 percent and 26.5 percent in the fourth quarter and the third quarter of fiscal 1990, respectively.

The company also reported that their net income increased to $225,000 in the first quarter, from $11,000 and a loss of $710,000 in the fourth quarter and the third quarter, respectively, but decreased from $811,000 in the first quarter of fiscal 1990.

Thomas M. Hein, vice president for finance, chief financial officer and treasurer, said that these results affirm the company's earlier assessment that margins and earnings had bottomed in the third quarter of fiscal 1990. ''We continue to experience relative softness in our hospital, governmental and international segments, and relative firmness in our medical, dental and industrial segments,'' Hein continued.

''On July 20 we received a commitment to renew our unsecured credit

facility with Wells Fargo Bank for another year at the same interest rates and on substantially similar terms as before. Our financial position is sound and our projected cash flow will fund our anticipated business, capital spending and debt reduction,'' he stated.

Hein added that their first quarter report would be mailed on or about Aug. 7, 1990.

#90205b0642 07/24/1990 ~Business Wire

AUBURN, CA (JULY 24) BUSINESS WIRE - HeartFed Financial Corp. (NASDAQ:HFED), the holding company formed in 1989 for Heart Federal Savings and Loan Association, Tuesday reported net income of $2,069,000, or 46 cents per share, for the three months ended June 30.

Net income for the three months ended June 30, 1989 was $1,799,000, or 40 cents per share. HeartFed's net income was $4,070,000, or 91 cents per share, for the first six months of 1990. Net income for the first six months of 1989 was $3,544,000, or 80 cents per share.

Net interest income increased to $7,744,000 for the three months ended June 30, 1990 from $6,042,000 for the three months ended June 30, 1989. For the three- and six-month periods ended June 30, 1990, Heart Federal's net interest rate spread increased to 3.45 percent and 3.38 percent, respectively, from 2.83 percent and 3.01 percent for the similar periods a year ago.

Total noninterest income decreased 23.7 percent to $1,071,000 in the second quarter of 1990 from $1,404,000 for the like period a year earlier, primarily due to gains on the sales of investment and mortgage-backed securities recorded during the second quarter of 1989.

At June 30, 1990, total assets amounted to $902,076,000, a 9.3 percent increase over the last twelve months. Total loans and mortgage-backed securities increased 11.3 percent to $793,519,000 at June 30, 1990. Deposits rose 10.6 percent, reaching $780,698,000 at June 30, 1990.

Heart Federal Savings, with 29 offices throughout Northern California, offers savings and consumer, mortgage, construction and commercial real estate finance services. On July 17, 1990, HeartFed Financial Corp. announced that it had reached a definitive agreement of merger with U.S. Bancorp of Portland, Ore.

Under the terms of the proposed transaction and subject to stockholder and

regulatory approvals, HeartFed and its subsidiary, Heart Federal Savings and Loan, will become subsidiaries of U.S. Bancorp.

#90205b0646 07/24/1990 ~Business Wire

SEATTLE (JULY 24) BUSINESS WIRE - Increased sales of natural gas contributed to improved earnings during the third quarter for Washington Energy Co., chairman and chief executive officer James A. Thorpe announced Tuesday.

Net income was $3.3 million for the quarter ended June 30, 1990, compared with a net loss of $1.4 million for the same period a year ago. Earnings per share for the quarter were 17 cents, compared to a loss per common share of 15 cents a year ago, even with an increase of 2.3 million average common shares outstanding because of a public offering in January 1990.

Operating revenues were up 4 percent, at $70.6 million, compared with $67.6 million during the same three month period last year.

Thorpe noted that Washington Natural Gas, Washington Energy's principal subsidiary, had a gross margin (gas revenues less gas purchases) on its sales of gas that was 10 percent better than during the same quarter last year. Sales to residential customers were up 18 percent during the quarter, due to the increase in the number of customers and weather which was 17 percent colder than last year, all contributing to increased earnings for the utility.

The number of customers served by Washington Natural Gas during the current quarter has increased by 26,000, or 8 percent, over the same quarter last year.

Net income increased 38 percent, to $25.7 million for the 12-month period ended June 30, 1990.

Washington Energy is a diversified energy company with interests in natural gas distribution, oil and gas exploration and production, biowaste technology, coal property holdings for future development, proposed development of rail transportation of coal, and the marketing of energy and conservation products and services.

The Washington Energy Co. trading symbol is ''WECO'' on the NASDAQ National Market System, and is quoted as ''WashEngy'' or ''Wash Energy Co'' in other sources.

LOUISVILLE, KY (JULY 24) BUSINESS WIRE - Vencor Inc. (NASDAQ/NMS:VCOR) Tuesday announced an increase in earnings per share for the quarter ended June 30, 1990.

Earnings totaled $608,000, or 10 cents per share, on 6,003,000 average shares compared with $107,000, or 2 cents per share, a year ago on 4,431,000 average shares. Revenues for the second quarter were $17.7 million, up 35 percent from $13.1 million in the year-earlier period.

For the six months ended June 30, 1990, revenues were up 38 percent to $34.8 million compared with $25.3 million a year ago. Net earnings amounted to $911,000 compared with $299,000; and earnings per share more than doubled to 15 cents per share on 5,994,000 shares compared with 7 cents per share on 4,431,000 shares outstanding in 1989.

The increase in the number of shares outstanding was due primarily to Vencor's public offering of 1.6 million shares in September, 1989.

W. Bruce Lunsford, chief executive officer, said that the second quarter gains primarily reflected an increase during the last month of the quarter in the number of long-term hospital patients covered by some form of private health insurance.

He commented: ''The second quarter results demonstrate that the effective end of Medicare Catastrophic Coverage this year has led to an increase in the company's profitability. Our plan now is to use this expansion in earnings, together with our recently increased borrowing resources, to support our continued growth.

''The addition of the 105-bed Doctors Hospital in Denver, last week and the increase in the revolving term credit agreement from $15 million to $25 million indicate how we are steadily developing the long-term hospital niche while maintaining operating efficiencies at our more mature hospitals,'' Lunsford concluded.

Vencor specializes in providing long-term hospital care for patients who suffer from catastrophic illness. The company has ten hospitals in Arizona, Colorado, Florida, Illinois, Indiana, Louisiana and Texas.

ROSELAND, NJ (JULY 24) BUSINESS WIRE - Automatic Data Processing Inc. announced Tuesday that it has reached agreement with three major brokerage firms to install ADP's FS Partner advanced market data quotation and branch automation systems.

Bear, Stearns & Co. Inc., Oppenheimer & Co. Inc., and Interstate/Johnson Lane Inc., have each committed to multi-year, multi-million dollar contracts to install FS Partner systems in their headquarters and branch offices. A total of about 5,000 workstations will be installed in the three firms over the next 12 months. The financial impact of these transactions will be relatively minor in fiscal 1991.

ADP, with well over $1.5 billion in revenue and more than 200,000 clients, is the latest independent computing services firm in the United States. Brokerage Services is the leading provider of information services and security operations processing to the investment community.

#90205b0650 07/24/1990 ~Business Wire
MEMPHIS, TN (JULY 24) BUSINESS WIRE - TBC Corp. (NASDAQ/NMS:TBCC) Tuesday reported new highs in net sales and earnings for the second quarter and first six months of 1990.

For the three months ended June 30, 1990, net sales rose 14 percent to $134,108,000 compared with $117,880,000 in the year-earlier period. Net income was $4,268,000, or 30 cents per share, compared with $4,011,000, or 26 cents per share, in the second quarter of last year.

The second quarter results led to a 9 percent increase in net sales through the first half to a record $249,121,000 compared with $229,138,000 in the year-earlier period. Net income amounted to $7,696,000, or 54 cents per share, compared with $7,379,000, or 47 cents per share, in the year-earlier period.

The per share results and the number of shares outstanding for the second quarter and first half of 1989 have been adjusted to reflect the 3-for-2 stock split distributed in October 1989.

In announcing the results, Marvin E. Bruce, president, noted that TBC attained a strong gain of 22 percent in unit shipments of tires for the

second quarter.

He remarked, ''We are pleased with this continuation of the favorable trend in demand which was evident in the first quarter. We did experience some selective price adjustments but were able to adjust our product costs to minimize any impact on earnings.

''Similar to the first quarter, we benefited from fewer shares outstanding as a result of our stock repurchase program, a positive factor which will also aid our earnings per share in the second half. ''The gains for the first half reinforce our confidence about TBC's prospects for achieving record net sales and earnings for 1990 as a whole.''

TBC Corp. is one of the nation's largest marketers and distributors of products for the automotive replacement market. The company's common shares are traded over- the-counter under the National Market System symbol TBCC.

SANTA MONICA, CALIF. (JULY 24) BUSINESS WIRE - National Medical Enterprises Inc. (NYSE/PSE/LoSE:NME) (''NME'') Tuesday announced the opening of two physical rehabilitation hospitals -- one in California and a second in Texas -- which represent an investment of more than $35.3

million.

Norman A. Zober, president of NME's Specialty Hospital Group, noted that the company's Rehab Hospital Services Corp. (RHSC) subsidiary recently dedicated San Diego Rehabilitation Institute in La Mesa, Calif., and The Rehabilitation Hospital of Austin in Austin, Texas.

''Strong demand continues throughout the United States for quality physical rehabilitative care that enables an increasing number of people to enjoy a caliber of life unknown years ago,'' said Zober. ''For American industry alone, disability costs are now a $140 billion a year expense. Our rehab hospitals can help to drastically reduce that expenditure.''

He reported that a recent study completed by Northwestern National Life Insurance Co. in Minneapolis calculated that every dollar spent on rehab services results in $30 in savings in future disability payments.

He added that throughout the nation an estimated 500,000 people each year become disabled.

Rehab Hospital Services currently operates 27 free-standing rehabilitation hospitals in 10 states with approximately 2,400 beds. Its parent company, National Medical Enterprises, one of the nation's largest health care services companies, also operates acute and psychiatric hospitals as well as substance abuse treatment centers throughout the United States and internationally.

ATLANTA (JULY 24) BUSINESS WIRE - Superior TeleTec Inc. (AMEX:STT) Tuesday reported record revenues and earnings for the first quarter of fiscal 1991 ended June 24, 1990. Net income for the first quarter was $2,287,492, or $0.26 per share, on revenues of $38,465,609. This compares to net income of $876,121, or $0.09 per share, on revenues of $35,862,416 reported for the first quarter of fiscal 1990. There were 8,673,974 shares used in calculating per share results for the first quarter of fiscal 1991 compared with 9,828,856 shares in the first quarter of 1990. The decrease is due to a buyback and retirement of certain stock warrants in December 1989. Superior TeleTec attributed the improved results to continued strong performance at its copper cable and wire operations and to improved performance at its fiber optics operations.

Superior TeleTec Inc. (formerly Superior Holding Corporation) is a

diversified telecommunications company primarily serving the independent telephone holding companies, the Regional Bell Operating Companies (RBOC's), and the interexchange carriers.

The company offers several product lines including copper wire and cable, specialty fiberoptic cable products, equipment used to measure and test digital fiberoptic and analog transmission lines, plug-in circuit boards used in telephone switches, and a digitized voice and data transmission product line.

NEW YORK (JULY 24) BUSINESS WIRE - As part of W. R. Grace & Co.'s continuing efforts to strengthen its environmental and safety standards around the world, the company today announced that more than $7 million will be spent in 1990 at the headquarters of its Teroson unit in Heidelberg, West Germany on these efforts. Teroson is operated by Grace Specialty Chemicals Co., the largest operating unit of Grace.

The Teroson facility in Heidelberg is Grace Specialty Chemicals' largest manufacturing site in Europe, employing 1,200 people. Grace Specialty Chemicals will spend approximately $80 million this year on environmental initiatives around the world, more than $30 million of which will be spent in Europe.

In addition to the money being spent now at the Heidelberg site, Grace Specialty Chemicals will invest another $4 million at this site by 1991 for waste water basins and related improvements to surface storage areas.

Teroson manufactures and markets a wide range of adhesives, coatings, sealants and sound-deadening materials for the automobile and general industries.

In 1984, Grace Specialty Chemicals developed a program designed to enhance its environmental and safety commitments at the Heidelberg location. This spending is the fourth phase of that effort. Upon completion of the program in 1991, the company will have spent more than $15 million on environmental efforts there.

Grace Specialty Chemicals is the world's largest specialty chemicals company, with sales of $3.3 billion. Grace is an international specialty

chemicals company with interests in energy, manufacturing and service businesses. Its sales exceed $6 billion.

#90205b0664 07/24/1990 ~Business Wire

SANTA MONICA, CA (JULY 24) BUSINESS WIRE - FirstFed Financial Corp. (NYSE:FED), parent of First Federal Bank of California, Tuesday reported 1990 second-quarter net earnings of $7.1 million, or 81 cents per share, of common stock compared with $4.1 million, or 47 cents per share, for the second quarter of 1989.

This 74 percent increase in net earnings is the result of continued growth in core earnings which increased 92 percent over the prior-year period. Net earnings for the first quarter of 1990 were $7 million, or 81 cents per share.

On a year-to-date basis net earnings improved 76 percent over the prior year. Earnings for the first six months of 1990 were $14.1 million, or $1.62 per share, compared with $8.1 million, or 92 cents per share, the year before.

Net interest income, the major component of core earnings, was favorably affected by a more stable rate environment during 1990 and a growth in interest-earning assets. The net interest spread improved to 2.57 percent for the second quarter and 2.69 percent for the first six months of 1990. Spreads for the second quarter and first six months of 1989 were 1.78 percent and 1.76 percent, respectively.

Average earning assets grew 16 percent during both periods in 1990 compared with the prior year.

Loan originations of $271.7 million for the second quarter and $509.7 million for the first six months were on schedule with the bank's $1 billion goal for the year. These origination levels represent 35 percent and 6 percent increases over the prior year second-quarter and six-month periods, respectively.

Over 90 percent of loan originations were adjustable rate mortgages. As of the end of the second quarter, the percentage of adjustable rate mortgages in the loan portfolio stood at 94.4 percent.

The bank's one-year GAP (the difference between rate sensitive assets and liabilities repricing within one year as a percentage of total assets) was a positive 8.3 percent as of June 30, 1990.

The quality of the bank's assets remains among the best in the nation with a non-performing assets to total assets ratio of just one-half of 1 percent as of the end of June. This ratio includes 12 basis points of performing loans which are classified substandard.

#90205b0666 07/24/1990 ~Business Wire

LA PUENTE, CA (JULY 24) BUSINESS WIRE - Southwest Water Co. (NASDAQ:SWWC) Tuesday announced increased revenues and earnings for both the three and six months ended June 30, 1990.

Revenues for the second quarter of 1990 rose 3 percent to $9,971,000, compared with $9,676,000 for the same period in 1989. Net income for the three months ended June 30, 1990, advanced 59 percent to $853,000, compared with $535,000 in the second quarter of 1989.

Earnings per share were 37 cents (primary) and 36 cents (fully diluted) vs. 23 cents (primary) and 22 (fully diluted) for the same period a year ago.

For the six months ended June 30, 1990, revenues were $18,474,000 and net income was $1,214,000 or 53 cents per primary share and 51 cents per fully diluted share. This compares with revenues of $17,373,000 and net income of $640,000, or 28 cents per primary share and 27 cents per fully diluted share, for the same six-month period in 1989.

Results for the six months ended June 30, 1990, include an after-tax gain of $160,000, or 7 cents per fully diluted share, from the sale of real estate in the first quarter of 1990.

Commenting on the company's performance, Anton C. Garnier, president, said: ''We are very pleased with our performance in the second quarter and first half of 1990. The dramatic increase in net income is due primarily to the positive impact of various cost-saving measures, as well as improved service business performance.''

Southwest Water is the parent company of Suburban Water Systems (water service in parts of Los Angeles and Orange Counties), New Mexico Utilities Inc. (water supply and sewage disposal services northwest of Albuquerque), ECO Resources Inc., Line-One Inc. and SOCI Inc. (operational and maintenance services for water supply and wastewater treatment facilities in Texas, Mississippi and California).

#90205b0670 07/24/1990 ~Business Wire

TACOMA, WASH. (JULY 24) BUSINESS WIRE - Weyerhaeuser Co. Tuesday reported second quarter earnings of 54 cents per common share, down 26 percent from the 73 cents per common share earned in the second quarter of 1989.

Sales totaled $2.4 billion, down 10 percent, and net income of $114 million was down 26 percent.

The results brought first-half income per common share to $1.15, down 20 percent from the $1.43 earned in the 1989 period. Sales for the six months totaled $4.7 billion, down 6 percent, and net income of $244 million was down 19 percent.

The quarter's results were most heavily affected by a 40 percent year-to-year decline in pulp and paper products operating earnings, Chairman and Chief Executive Officer George H. Weyerhaeuser said.

The variance was centered in the company's pulp division, where maintenance downtime and market weakness resulted in lower shipments and sales as well as margin erosion. Paper division earnings also were lower in the second quarter, in part because of weak prices which turned upward late in the quarter. Newsprint prices weakened in international markets during the quarter due primarily to the strong dollar. Weyerhaeuser raised prices $31.50 per ton effective June 1 for domestic newsprint shipments.

Forest products results were flat year-to-year, with lower export volumes and weakening Western product prices in April and May being offset by stronger markets for Southern lumber and plywood and by improved results in engineered fiber panels and in wholesale distribution reflecting in part business improvements from Weyerhaeuser's refocusing process.

Weyerhaeuser Real Estate Co.'s operating earnings were off substantially from the year-ago quarter, while operating earnings of Weyerhaeuser's financial services subsidiaries, which were only marginally profitable in the 1989 second quarter, were strong. The real estate results reflected weakness in the Baltimore area, and Southern California and Florida markets. The financial services improvement reflected consolidation of operations under Weyerhaeuser Mortgage Co.'s business improvement plan, as well as a strong quarterly performance by GNA, Weyerhaeuser's 90 percent-owned insurance and annuity subsidiary.

IRVINE, CA (JULY 24) BUSINESS WIRE - Laser Precision Corp. (NASDAQ:LASR) announced Tuesday that net income for the second quarter of fiscal 1990 ended June 30, 1990 was $111,000, or $.03 per share, compared to net income of $264,000, or $.07 per share, for the second quarter of fiscal 1989.

Revenues rose to $6,835,000 from $6,693,000 for the prior year.

Net income for the first six months of fiscal 1990 was $216,000, or $.05 per share, on revenues of $13,710,000. This compares to net income of $546,000, or $.15 per share, on revenues of $13,120,000 for last year's first half.

Second quarter bookings advanced 11% from the prior year to $7,275,000, mainly the result of increased orders at the Utica Division and a positive contribution from Ridgefield, Conn.-based Lightwave Communications Inc., a manufacturer of optical modems, cable links, and multiplexers embodying fiber optic technology acquired in March 1990.

Laser Precision Corp. is a manufacturer of test and measurement instruments combining advanced optical designs with microprocessor technology. The company's products are used in fiber optic telecommunications, data communications, laser research, process control, environmental monitoring, and chemical analysis. The company is headquartered in Irvine.

LOS ANGELES (JULY 24) BUSINESS WIRE - Gamma Electronic Systems Inc. (ASE:GE.A)(OTC) announced Tuesday that they are currently negotiating a joint venture with the Lasarray Corp. for the development of an integrated chip of the B.A.S.E. technology.

B.A.S.E. is the multidimensional sound technology that has been winning over the professional audio community with its use on such films as ''The Hunt for Red October,'' Disney's ''The Little Mermaid,'' ''Presumed Innocent'' and approximately 20 others. Its impressive list of artists using the process in their recordings include Barbara Streisand, Shadowfax Chicago and approximately 80 others.

''The development of this integrated bi-polar chip will allow Gamma to

aggressively pursue licensing agreements with manufacturers of consumer audio products,'' said Michael D. Mayer, president and chief executive officer of Gamma. ''It will open up the single largest market for our B.A.S.E. technology.''

The Lasarray Corp. is a multinational group of companies that specialize in IC and System-Level Development. ''We're very excited about the concept,'' said Jon R. Hopper, vice president and director of Lasarray. ''I believe that we can produce a digital chip which would be easily mass produced and could become the audio standard of the future much in the same way Dolby was a standard for tape.''

SEATTLE (JULY 24) BUSINESS WIRE - Arctic Alaska Fisheries Corp. (NYSE:ICE) Tuesday reported results for the second quarter and the six months ended June 30, 1990.

For the quarter revenues grew to a record $50.3 million compared with revenues of $34.2 million in the 1989 quarter. Net income was $4.7 million, or 28 cents per share, vs. $3.0 million and 21 cents per share in the year-ago quarter.

For the six months Arctic Alaska posted revenues of $100.4 million with net income of $12.2 million compared with revenues of $82.0 million and net income of $12.4 million in 1989. Earnings per share were 74 cents vs. 86 cents last year. Per share earnings for both the quarter and the six-month period reflect a 14 percent increase in the number of shares outstanding in 1990.

''Increased production and favorable pricing in many species we sell brought strong revenue growth and larger profits for the quarter,'' said Ronald R. Jensen, Arctic Alaska's president and chief executive officer. ''Inventory declined slightly from the end of the first quarter and is right in line with our strategy to sell additional products in domestic markets throughout the year.''

The larger inventories built in early 1990 for domestic markets are expected to continue to decline as they are sold during the remaining two quarters. For the first six months domestic sales were 52 percent of revenues compared with 47 percent in the first six months of 1989.

Arctic Alaska's European sales have increased due to fish stock shortages in the North Atlantic, a situation broadening the company's marketing opportunities. The company reported that it has adapted its vessels to fish productively in line with recent fishing gear regulatory changes in the Bering Sea.

Arctic Alaska Fisheries Corp. is the largest fishing and at-sea processing company in the United States. The company's vessels operate in the 200-mile zone off Alaska catching crab and bottomfish such as pollock, cod perch and sole. The catch is processed into a variety of seafood products that are sold in the United States, Japan and other export markets primarily under the Arctic Ice Trademark.

NEW YORK (JULY 24) BUSINESS WIRE - As part of W. R. Grace & Co.'s continuing efforts to strengthen its environmental and safety standards around the world, the company today announced that more than $7 million will be spent in 1990 at the headquarters of its Teroson unit in Heidelberg, West Germany on these efforts. Teroson is operated by Grace Specialty Chemicals Co., the largest operating unit of Grace.

The Teroson facility in Heidelberg is Grace Specialty Chemicals' largest manufacturing site in Europe, employing 1,200 people. Grace Specialty Chemicals will spend approximately $80 million this year on environmental initiatives around the world, more than $30 million of which will be spent in Europe.

In addition to the money being spent now at the Heidelberg site, Grace Specialty Chemicals will invest another $4 million at this site by 1991 for waste water basins and related improvements to surface storage areas.

Teroson manufactures and markets a wide range of adhesives, coatings, sealants and sound-deadening materials for the automobile and general industries.

In 1984, Grace Specialty Chemicals developed a program designed to enhance its environmental and safety commitments at the Heidelberg location. This spending is the fourth phase of that effort. Upon completion of the program in 1991, the company will have spent more than $15 million on environmental efforts there.

Grace Specialty Chemicals is the world's largest specialty chemicals

company, with sales of $3.3 billion. Grace is an international specialty chemicals company with interests in energy, manufacturing and service businesses. Its sales exceed $6 billion.

NEEDHAM, MA (JULY 24) BUSINESS WIRE - Cognex Corp. (NASDAQ:CGNX) Tuesday announced net income for the second quarter ended July 1, 1990, of $1,560,755, or $0.36 per share, a 106 percent increase from last year's results of $758,948, or $0.22 per share.

Revenues for the second quarter ended July 1, 1990, increased 57 percent to $5,707,656, from $3,632,826 for the same quarter a year ago.

For the six months ended July 1, 1990, Cognex reported net income of $2,893,738, or $0.68 per share (on a fully diluted basis), compared with $1,326,925, or $0.37 per share, for the same six-month period in 1989. Revenues for the six months ended July 1, 1990, were $10,874,349, an increase of 57 percent from $6,934,345 for the six months ended July 2, 1989.

''Strong demand for our products throughout our three major geographic markets -- the United States, Japan and Europe -- were responsible for our record performance this quarter,'' said Robert J. Shillman, chairman, president and chief executive officer. ''The Japanese and European markets accounted for 45 percent of our total sales for the period, compared with 24 percent at this time last year. Also, our ability to maintain healthy gross margins contributed to this quarter's outstanding earnings.''

Cognex Corp. designs, develops, manufactures and markets a family of machine-vision systems -- computers that can ''see'' -- which are used to replace human vision in a wide range of manufacturing processes in the semiconductor, electronics, pharmaceutical and aerospace industries.

A condensed statement of operations and balance sheet for the company follows.

#90205b0686 07/24/1990 ~Business Wire

CLEVELAND (JULY 24) BUSINESS WIRE - Security Federal Savings & Loan Association of Cleveland today reported net income of $555,000 for the first quarter ended June 30, 1990.

This represents an increase of 3 percent over the $541,000 earned for the same period in 1989.

Per-share earnings for the first quarter of 1990 on a primary and fully diluted basis were both 65 cents per share, compared to 65 cents per share and 64 cents per share, respectively, for the first quarter of 1989. The previously reported per-share earnings for the 1989 period have been restated to reflect the three-for-two stock split, which was distributed in September, 1989.

Charles F. Valentine, Security Federal's chairman, said, ''While we grew only 4 percent in asset size in the past year, our core earnings, that is, our net interest income, increased more than 9 percent in the first quarter of this year, from the same period in 1989. The net yield on Security Federal's average interest-earning assets for the 1990 first quarter improved to 3.18 percent, compared to 3.05 percent last year.

''Although our operating expenses increased nearly 8 percent in the first quarter 1990 over 1989, we are pleased to report our ratio of net interest income to operating expenses in the 1990 quarter improved to 140 percent, from 138 percent for the same period in 1989,'' Valentine said.

Shareholders' equity (capital) increased by $3.0 million, or 20 percent to $17.9 million as of June 30, 1990, from $14.9 million at June 30, 1989. As of June 30, 1990, the Association's regulatory capital ratios continue to exceed the minimum capital requirements specified by federal regulations.

Security Federal operates nine offices in a five-county area in Northeast Ohio. As of June 30, 1990, the Association had assets of $340 million, compared to $326 million a year earlier. Security Federal is traded in the national over the counter market and is quoted on the NASDAQ National Market System under the symbol ''SFSL.''

ROCHESTER, NH (JULY 24) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) can now offer its customers worldwide on-site network support through an agreement with Intel Corp.

Under the agreement Cabletron will be the single point of contact and responsibility for its customers, while Intel will provide same day or next day service through its international field service operation.

''As applications on LANs become more sophisticated, service will increase in importance to those organizations who depend on them,'' said Robert Levine, Cabletron's president and chief executive officer. ''We're addressing the service need by combining Cabletron's technical support services with Intel's on-site maintenance resources, a union that will expand our service capabilities by providing customers with immediate on-site network support.''

As a result of this agreement, Cabletron's rapidly growing domestic and international customer base will gain the availability of on-site support services for the company's complete line of networking products, as well as support for a variety of third party hardware systems. These services include comprehensive maintenance and installation programs, training for systems managers, and hardware and software support.

''Intel is pleased to team with a networking leader such as Cabletron, and is ready to deliver top quality service throughout the world. Coming on the heels of our agreement with Banyan Systems to support their customers' network related products, this agreement is an important addition to our growing network service and support business,'' said Matt Diethelm, vice president, Intel Systems Group.

According to International Data Corp., companies will spend approximately $760 million in 1990 on service and maintenance for their information systems. This segment of the LAN industry is expected to grow 26 percent annually -- keeping pace with projections for LAN market growth.

Cabletron is a leading independent developer and manufacturer of standards-based solutions, including software, hardware and connectivity products. The company currently has a worldwide installed base exceeding 1.3 million nodes.

Cabletron recently reported record annual revenues of $104.7 million and earnings of $22.3 million for fiscal year 1990. The company has reported 130 percent revenue growth and 255 percent earnings growth annually since 1986.

Intel is an international manufacturer of micro-computer components,

modules and systems.

#90205b0690 07/24/1990 ~Business Wire

BALTIMORE (JULY 24) BUSINESS WIRE - Alex. Brown Inc. Tuesday reported revenues for the quarter ended June 29, 1990 of $77.2 million, a 9 percent increase from revenues of $70.8 million in the second quarter of 1989.

Net earnings increased by 7 percent to $4.5 million and earnings per share increased by 12 percent to 29 cents, compared to the second quarter of 1989.

Donald B. Hebb Jr., president, commented, ''Our quarterly performance was positively influenced by strength in a number of our areas of strategic focus.

''Alex. Brown's capital markets business, which includes investment banking, institutional sales and OTC trading, produced excellent results. For the second quarter of 1990, Alex. Brown was the top ranked manager of initial public offerings of common stock and second among managers of all common stock offerings.

''These results were complemented by steady growth in our retail business, which has increased the number of investment representatives by 11 percent during the past 12 months, and significant expansion of our correspondent services business.

''During the quarter we continued to place emphasis on controlling costs as part of our ongoing efforts to improve margins.''

Alex. Brown's board of directors approved an increase in the quarterly cash dividend on Alex. Brown common stock to 7 cents per share, which would generate 28 cents per share on an annual basis. The cash dividend for the quarter of 7 cents per share is payable on Aug. 15, 1990 to stockholders of record on Aug. 3, 1990.

Alex. Brown's liquidity remains excellent and its balance sheet continues to be strong, with capital funds at the end of the second quarter of

nearly $202 million and a book value per share of $11.54, 10 percent higher than a year ago. During the second quarter, Alex. Brown repurchased 243,000 shares of its common stock pursuant to a repurchase program, which has a remaining authorization of approximately 480,000 shares.

For the six months ended June 29, 1990 revenues totalled $145.7 million, an 11 percent increase from $130.9 million in 1989. Net earnings were $7 million and earnings per share were 44 cents for the first half of 1990 compared to a loss of $2 million, or 13 cents per share, in the first half of 1989. Results for 1989 include an after-tax charge of $6.9 million related to anticipated losses in eliminating excess office space.

Alex. Brown Inc. is a holding company whose primary subsidiary is Alex. Brown & Sons Inc., the oldest investment banking firm in the United States. Alex. Brown is traded in the NASDAQ National Market System, symbol ''ABSB.''

#90205b0692 07/24/1990 ~Business Wire

COLUMBIA, SC (JULY 24) BUSINESS WIRE - Colonial Companies Inc. (NASDAQ/NMS:CLACB) Tuesday reported net income for the first six months of 1990 of $16,199,000, or $1.07 per share, an increase of nine percent over net income of $14,862,000, or 99 cents per share, earned in the first half of 1989.

After-tax operating income, excluding realized gains on investments, totaled $15,867,000, or $1.05 per share, compared with $14,222,000, or 95 cents per share, for the first six months of 1989, an increase of 11 percent.

For the second quarter ended June 30, 1990, net income was $7,699,000, or 51 cents per share, an increase of 10 percent over the second quarter 1989 net income of $6,963,000, or 47 cents per share. After-tax operating income, before realized investment gains, for the second quarter of 1990 was $7,685,000, or 51 cents per share, compared with $6,589,000, or 45 cents per share, for 1989, an increase of 16 percent.

Commenting on the results, President Stephen G. Hall said: ''The positive trends from the first three months of the year continued through the second quarter. Sales for the first six months increased 26 percent.

''As a result of this solid growth, we now expect sales to increase 15 to 20 percent for the full year, which exceeds our stated goal of 10 to 12 percent. Continued improvement in policyholder retention has aided the increase in premiums of 14 percent for the first half of the year. This puts us well on our way to meeting our goal for the full year of 10 to 12 percent increase in premiums.

''The outlook for the last half of the year is good. We expect 1990 to be another year of consistent growth,'' Hall concluded.

Colonial Companies Inc. is a holding company whose shares are traded on the National Market System with the NASDAQ Symbol CLACB. Its principal subsidiary is Colonial Life & Accident Insurance Co., which operates in 49 states and underwrites a broad line of personal accident, life, and cancer insurance policies.

WOODBURY, NY (JULY 24) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ:CMVT) announced the signing of a distribution agreement with TriGem Computer Inc., a South Korean-based company.

TriGem will market Comverse's TRILOGUE voice and facsimile message management systems in Korea.

Brian Wiltshire, president of Comverse International, stated that ''This signing represents the seventh significant international agreement consummated by Comverse as part of its major international penetration. TriGem now joins GPT (U.K.), Ascom (Switzerland), GPT (Australia), Oki (Japan), Voice Data System (the Netherlands) and Nokia (Finland) as OEMs of Comverse's TRILOGUE.'' Wiltshire went on to say, ''The current Korean market is growing very rapidly and is predicted to be one of the major growth areas in the Pacific Rim. We are very pleased to have such a powerful partner.''

TriGem Computer Inc. is a $300 million revenue company specializing in computer, telecommunications, and voice processing products. TriGem has demonstrated spectacular success since its formation in 1980, showing an average 244 percent per annum growth rate in revenues. TriGem has also penetrated KTA, the Korean PTT, with its voice processing products.

Oh Keun Soo, director of Communications Business Division of TriGem, stated, ''I am very pleased with this opportunity to take such an advanced

product into our rapidly growing markets.''

Comverse, located in Woodbury, develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including multi-media message management systems under the name of TRILOGUE.

#90205b0698 07/24/1990 ~Business Wire

RESEARCH TRIANGLE PARK, NC (JULY 24) BUSINESS WIRE - CompuChem Corporation (NASDAQ:CCEM) Tuesday announced results for its second quarter ended June 30, 1990.

Included in results for 1990 are those of Lifedata Medical Services, which the Company acquired in early January 1990. The 1989 results do not include Lifedata.

Revenues for the quarter were up 42% to $16,101,000 from $11,304,000. Net income for the second quarter was $736,000 or $.10 per share compared to $991,000 or $.15 per share for the second quarter of 1989. Earnings per share in the current second quarter were calculated on 13% more shares than last year's second quarter primarily because of the June 1989 public stock offering and concurrent note conversion.

Revenues for the first six months of 1990 increased 40% from $21,387,000 to $29,947,000. Net income for the six months was $946,000 or $.13 per share compared to $1,798,000 or $.27 per share for the first six months of 1989.

Kees Verkerk, President and Chief Executive Officer, commented, ''Our commercial drug testing revenue continued to show strong growth and was up 21% over last year's second quarter. The start-up of new accounts, both for pre-employment screening and random testing, offset lower new employment hiring activity by clients in our base business. Lifedata has continued to make excellent progress as they posted a 43% year-to-year revenue increase for the second quarter.''

Mr. Verkerk continued, ''While our EPA environmental revenue continues to be significantly down from last year, our commerical environmental revenues were up 20% over last year's second quarter. Unfortunately, the combination of volume, product mix and lower unit prices caused our total environmental business to operate at a loss, although at a lesser loss than the first quarter. We did make a profit on our environmental business in June and we entered July with a strong backlog that indicates

profitable environmental operations in the third quarter.''

Summing up the outlook, Mr. Verkerk added, ''We expect our businesses to show stronger revenue growth in the last half of the year than in the first half. With the strong backlog in our environmental business and volume-related margin improvements in our other businesses, we should have improved second half earnings performance.''

CompuChem Corporation, through its three subsidiaries, CompuChem Laboratories, Inc., ChemWest Analytical Laboratories, Inc. and Lifedata Medical Sevices, Inc., provides specialized analytical testing services for the accurate measurement of toxic chemicals and hazardous wastes in the environment, urinalysis collection and testing services for the detection of drugs of abuse, as well as physical examinations for life insurance applicants.

The Company also provides on-line data management systems for use by customers in managing their environmental and drug testing data bases. The Company's environmental testing services are provided to major industrial companies, waste management companies, and consulting engineering firms, as well as the Environmental Protection Agency.

The Company's forensic drug testing services are provided to the military, other government agencies and major industrial firms. The Company's physical examination services are provided to insurance carriers nationally.

#90205b0700 07/24/1990 ~Business Wire

CHATTANOOGA, TN (JULY 24) BUSINESS WIRE - Inter Federal Savings Bank (NASDAQ/NMS:IFED) Tuesday announced that net income for the six months ended June 30, totaled $1,152,884, or $1.11 a share, as compared with $1,142,587, or $1.10 a share in the first half of 1989.

Net interest income increased to $3,519,049, or 3.5 percent during the period.

Assets for the six months period increased to $373 million, from $310 million, or 20.5 percent. This increase was partially due to the bank acquiring First Federal Savings of Summerville, Ga., extending the bank's activities and rights to branch into Georgia.

For the quarter ended June 30 Inter Fed reported net income of $587,510, or 57 cents per share, as compared with $609,171 or 59 cents per share in the corresponding quarter of last year.

Net income in both the 1990 and 1989 second quarters included extraordinary income of $175,173, and $167,577, respectively, resulting from the utilization for tax purposes of prior years' net operating loss carryforwards.

Vernon W. Cox, chairman and chief executive officer, said he was very thankful and pleased with the bank's performance for the first half of the year. Cox stated, ''The operating climate for financial institutions has been most challenging. However, Inter Fed's earnings were good and growth was better than planned. We are following a very good year in 1989, and our comparisons are quite favorable.''

Cox added, ''We are delighted to have expanded our market thrust in the North Georgia area. We have been warmly received in Summerville and are most pleased to have added this institution as part of our banking family. Our fine management team has folded this new addition into our organization with speed and efficiency.''

''Asset quality continues to be good and our delinquency ratio is well below industry levels due to sound lending policies. We monitor our operating expenses carefully to maintain our productivity. In. 1989, net income of $2.05 per share placed Inter Fed in the country's top ten in return on equity of stock savings institutions.''

Inter Fed is a federally chartered savings bank insured by the FDIC. It now has nine full-service offices, including strategic locations in Chattanooga, Signal Mountain, Rossville, South Pittsburg, and the new office in Summerville, Ga.

The bank's stock is traded in the NASDAQ National Market System under the symbol IFED.

#90205b0702 07/24/1990 ~Business Wire

GLENVIEW, IL (JULY 24) BUSINESS WIRE - Zenith Electronics Corp. (NYSE:ZE) Tuesday reported a second-quarter 1990 loss from its continuing operations (consumer electronics and components) of $11.2 million, or 42 cents per share.

In 1989, the second-quarter loss from continuing operations was $5.2 million, or 20 cents per share.

Second-quarter sales from continuing operations were $334 million in 1990, compared with $385 million in 1989.

CONSUMER ELECTRONICS.

Sales in the second quarter were $286 million, down 13 percent from $328 million a year ago. A general slowdown in industry sales during the second quarter resulted in reduced shipments of Zenith color television sets and picture tubes. Color television pricing also was adversely affected by industry conditions.

Included in the sales decline was the repurchase of color TV and VCR products from an independent distributor whose marketing area was acquired by Zenith in the quarter. Consumer electronics operating income was reduced by about $2 million in the second quarter as a result.

Sales of cable products continued to improve with a significant increase over 1989's second quarter.

COMPONENTS.

Sales of $48 million in the second quarter were down 16 percent from $57 million in 1989, principally due to reduced shipments of monochrome monitors.

HIGH-DEFINITION SYSTEMS.

Expenditures for Zenith's two major high-definition systems development programs were about $3 million in the second-quarter of 1990, a substantial increase over the same period last year. Both programs -- new, larger ''flat tension mask'' high-resolution color displays and the high-definition TV broadcast transmission system -- continue to advance on schedule.

FIRST-HALF RESULTS.

For the first six months of 1990, Zenith reported a net loss from continuing operations of $15.2 million, or 57 cents per share. In 1989, the first-half loss from continuing operations of $11.9 million, or 45 cents per share, included a nonrecurring pre-tax gain of $1.1 million from the disposition of properties.

First-half sales from continuing operations were $690 million in 1990, compared with $729 million in 1989. Consumer electronics sales were $594 million in the first six months of 1990, compared with $627 million in 1989. First-half 1990 components sales were $96 million, compared with $102 million in 1989.

DISCONTINUED OPERATIONS.

The six-month loss from discontinued operations (the computer business sold on Dec. 28, 1989) was $11.0 million (recorded in the first quarter of 1990), compared with a six-month loss of $5.1 million in 1989.

PORTLAND, ME (JULY 24) BUSINESS WIRE - ImmuCell Corp. (NASDAQ:ICCC) Tuesday announced that at its annual meeting held yesterday, the stockholders of the company voted in favor of a 1-for-100 reverse split of the company's common stock effective as of the close of business on July 23, 1990.

Company President Thomas Adelman commented, ''I am very pleased by the support shown by our stockholders in approving the board of directors' proposal to reverse split the common stock. The achievement of this goal should benefit ImmuCell by positioning the company out of the 'penny stock' market.''

Adelman further commented, ''Second quarter results are expected to show improvement over the previous quarter and over the same quarter in the prior year. Furthermore, our product license application process continues to move along on schedule in anticipation of USDA approval of our bovine enteritis product which is currently expected to be received by year end.''

#90205b0706 07/24/1990 ~Business Wire

PONCE, PUERTO RICO (JULY 24) BUSINESS WIRE - Ponce Federal Bank, F.S.B. (NASDAQ:PFBS) Tuesday reported earnings for the second quarter and six months ended June 30, 1990.

The bank reported net income of $317,397, or 6 cents per share, for the second quarter ended June 30, 1990, compared to a net loss, in the comparable 1989 quarter, of $3,788,732, or 73 cents per share.

Net income for the six months ended June 30, 1990 was $612,979, or 12 cents per share, compared to a loss of $6,917,075, or $1.34 per share, in same period last year.

On an operating basis, the bank's second quarter net interest income and net operating income improved over the results for both the 1989 second quarter and the first quarter of 1990.

The bank's 1990 second quarter provision for loan losses amounted to $3,822,669, compared to a provision of $5,010,410, in the same period last year. Non-operating income was favorably impacted by an aggregate $2 million, resulting from the reduction, on appeal, of penalties assessed against the bank for Bank Secrecy Act violations and a reduction in the reserve for contingencies.

As previously announced in April 1990, the Office of Thrift Supervision (OTS) and the Federal Deposit Insurance Corp. recently concluded an examination of Ponce Federal's loan portfolio. The OTS requested that the bank establish incremental loan loss reserves amounting to $5.4 million.

The bank's second quarter loan loss provision reflects acceptance of the OTS recommendation with respect to specific reserves. Ponce Federal believes that its second quarter provision for loan losses and its unallocated $2.1 million general valuation allowance reserve should satisfy the overall reserve request made by the OTS.

As of June 30, 1990, the bank had both tangible and core capital ratios

equal to 4.62 percent of adjusted total assets and a risk-based capital ratio equal to 8.10 percent of risk-weighted assets, all of which are in excess of the minimum OTS requirements of 1.5 percent and 3 percent of adjusted total assets and 6.4 percent of risk weighted assets, respectively.

Ponce Federal Bank, F.S.B., the third largest thrift institution in the Commonwealth of Puerto Rico, is a federally chartered, full-service financial institution headquartered in the Southern Coastal city of Ponce. The bank maintains an Island-wide network of 26 branches and executive offices in Ponce as well as Hato Rey, the financial center of metropolitan San Juan.

BEDFORD, MA (JULY 24) BUSINESS WIRE - Computervision, one of the leading developers of workstation and PC CAD software, announces that its VersaCAD Design micro-based CAD software now supports the X Window System. The X Window System is rapidly emerging as a UNIX graphics standard for interfacing different hardware platforms across a network.

VersaCAD Design (Version 5.4 Revision 7) takes advantage of the consistent window interface afforded by the X Window System. Companies with a variety of UNIX workstations connected by a network can load VersaCAD drawing files on one platform and display them on any terminal or workstation on the network.

Another inherent benefit is that a company now has the flexibility to move the VersaCAD Design software to any platforms that support the X Window System. The software has precisely the same look and feel on each hardware platform on the network. With the support of the X Window System, VersaCAD Design becomes more of a network-wide CAD solution.

This product release creates some attractive possibilities for Computervision's site license program. A company can purchase the right to copy VersaCAD Design on multiple UNIX platforms up to a predetermined limit. This provides an affordable way for companies to economically grow their CAD software installations.

VersaCAD Design (Version 5.4 Revision 7) supports the X Window System 11.3 and is currently available for the Sun SPARCstation and Sun 4 series,

Apollo DN-4500, and Hewlett-Packard 9000 Series 300. The product has a U.S. list price of $3,495.

The VersaCAD product line includes software solutions for DOS, DOS-Extended, Macintosh, and UNIX platforms. VersaCAD, a product of Computervision's Personal CAD/CAM Business Unit, is sold exclusively through value-added resellers. Computervision, a Prime Company, is the world's second largest supplier of CAE/CAD/CAM solutions.

Prime and the Prime logo are registered trademarks of Prime Computer Inc. Computervision and the Computervision logo are registered trademarks of Computervision Corp., a subsidiary of Prime Computer Inc.

VersaCAD is a registered trademark of Versacad Corp., a subsidiary of Prime Computer Inc. SPARCstation is a trademark of Sun Microsystems Inc. UNIX is a registered trademark of AT&T. The X Window System is a trademark of the Massachusetts Institute of Technology.

#90205b0712 07/24/1990 ~Business Wire

CHICAGO (JULY 24) BUSINESS WIRE - Sears, Roebuck and Co. (NYSE:S) Tuesday reported second quarter consolidated net income of $237.9 million or 69 cents per share from continuing operations compared with $334.9 million or 95 cents per share a year ago, reflecting higher than expected underwriting losses in its property-liability insurance operations and a decline in merchandising results.

Discontinued operations accounted for 16 cents per share in 1989, bringing final net income for the year-ago period to $391.2 million or $1.11 per share. Consolidated revenues for the three months ended June 30 reached a record $13.85 billion, up 4.3 percent from $13.28 billion a year ago.

In an announcement on July 13, Edward A. Brennan, chairman and chief executive officer, indicated quarterly earnings were expected to be approximately 65 cents per share.

For the first half of 1990, Sears consolidated income from continuing operations was $333.7 million or 97 cents per share compared with $591.2 million or $1.65 per share last year.

Discontinued operations added $10.5 million or three cents per share this year and accounted for $57.7 million or 16 cents per share in 1989, bringing first half final net income to $344.2 million or $1.00 per share in 1990 compared with $648.9 million or $1.81 per share a year ago.

Consolidated revenues rose 4 percent to $26.46 billion compared with $25.44 billion a year ago.

Sears Merchandise Group reported second quarter income of $110.0 million compared with $161.6 million in 1989. Revenues totaled $7.88 billion compared with $7.71 billion last year.

For the first half, merchandise group income was $72.6 million compared with $195.4 million in 1989. Revenues totaled $14.72 billion compared with $14.46 billion a year ago.

Allstate Insurance Group reported second quarter income of $142.2 million compared with $199.8 million in 1989. Property-liability income was $93.6 million compared with $158.5 million last year, reflecting increased underwriting losses which include claims from recent California fires.

Average premiums continued to grow at a slower pace than losses, causing an increase in the combined ratio. Income from life operations rose 17.7 percent to $48.6 million from $41.3 million in 1989. Group revenues rose 8.2 percent to $4.53 billion from $4.19 billion a year ago.

For the first half, Allstate group income was $335.4 million compared with $443.7 million in 1989. This year's income included $10.5 million from discontinued group life-health operations. Revenues rose 6.9 percent to $8.92 billion from $8.35 billion last year.

The Dean Witter Financial Services Group reported second quarter income of $58.2 million compared with $44.5 million in 1989. Discover Card operations contributed income of $24.4 million compared with $16.6 million a year ago, and Dean Witter's securities business reported income of $32.4 million compared with $32.1 million last year. Group revenues rose 10.9 percent to $1.15 billion from $1.04 billion in 1989.

For the first half, the Dean Witter group reported income of $118.9 million compared with $81.9 million in 1989. Discover Card operations contributed income of $59.8 million compared with $36.7 million last year, and Dean Witter's securities business reported income of $57.1 million compared with $53.1 million in 1989. Group revenues rose 12.1 percent to $2.25 billion compared with $2 billion a year ago.

Coldwell Banker Real Estate Group reported second quarter income of $7.3 million from continuing operations compared with a loss of $9.9 million last year. The year-to-year comparison was affected by the timing in the sale of property. In 1989, second quarter results included $56.3 million from discontinued operations, making final net income $46.4 million.

Group revenues totaled $357.9 million compared with $379.4 million in 1989 reflecting softer real estate markets, the consolidation of real estate

offices and the successful conversion of some company-owned offices to affiliates in selected markets.

For the first half, the Coldwell Banker group reported a loss of $26.2 million from continuing operations compared with a loss of $27.5 million last year. Discontinued operations accounted for $57.7 million in 1989, resulting in income of $30.2 million for the first half. Group revenues totaled $677.5 million compared with $690.1 million last year.

#90205b0719 07/24/1990 ~Business Wire

COLUMBUS, OHIO (JULY 24) BUSINESSS WIRE - Borden Chemicals and Plastics Limited Partnership (NYSE: BCP and BCU) Tuesday announced a cash distribution of 56 cents per preference unit and enhanced common unit for the second quarter of 1990.

This is significantly higher than the minimum quarterly distribution of 30 cents per unit and the 34 cents per unit distribution of the first quarter of 1990, but is a decline from 80 cents for the same period last year.

The distribution was declared at a meeting of the Board of Directors of BCP Management, Inc. (BCPM), the General Partner of the Partnership, and is payable August 13 to unitholders of record August 3.

The Partnership reported revenues of $109.2 million and net income of $14.9 million for the three-month period ended June 29, 1990, versus $130.0 million and $22.7 million, respectively, in the second quarter of 1989. After the General Partner's interest, net income per unit was 40 cents, a decline from 61 cents in the same period of 1989.

Borden Chemicals and Plastics Limited Partnership was formed to acquire and operate Borden, Inc.'s basic chemicals and polyvinyl chloride resins business and assets at Geismar, La., and Illiopolis, Ill.; and began operations on November 30, 1987.

Borden, Inc. retains an ownership interest of two percent and serves as General Partner; publicly traded units account for 98 percent ownership.

EL SEGUNDO, CA (JULY 24) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA), a leader in magnetic suspension and electro-optical technology, has received approval from the U.S. Patent and Trademark Office on all claims related to two new patent applications, Harry Kurtzman, president and chief executive officer, announced Tuesday.

The magnetic technology patent ''Active Damping System'' covers an active damping system for a vehicle based on the use of Aura's Magnetic High Force Actuator. ''The approval of these patent claims, underscores the company's unique technology,'' said Kurtzman, Aura's president.

''This development, together with prior patents, will cause Aura to become a leader in affordable magnetic active suspension systems in the vast automotive market,'' Kurtzman added. According to Kurtzman, a major application of this technology is to replace automotive shock absorbers with magnetic active suspension systems. These systems provide a safer, more controlled ride because as the automobile encounters road hazards, the system ''actively'' and immediately compensates for them. Magnetic suspension technology makes such systems feasible and affordable.

Simultaneously, all of the company's claims covering ''Continuous Source Scene Projection'' technology have been allowed by the Patent Examiner. This is the first of a series of patent applications covering Aura's unique modulation large display high resolution techniques.

Aura Systems Inc., founded in 1987, is a leader in magnetic suspension technology, electro-optic projection systems and advanced computing systems. The company is headquartered in El Segundo.

#90205b0728 07/24/1990 ~Business Wire
PALO ALTO, CA (JULY 24) BUSINESS WIRE - ALZA Corp. (ASE:AZA) announced Tuesday net income of $6.1 million or 17 cents per common share for the quarter ended June 30, 1990, compared to net income of $4.4 million or 13 cents per common share for the quarter ended June 30, 1989.

Net income for the six months ended June 30, 1990 was $11.5 million or 33 cents per common share, compared to $8.8 million or 26 cents per common share for the first six months of 1989. Revenues for the second quarter of 1990 were $25.1 million compared to $22.2 million for the like quarter of 1989.

The increases in net income and revenues for the second quarter of 1990 were due primarily to royalties received from Pfizer Inc. based upon sales of Procardia XL in the United States. Procardia XL was introduced by Pfizer in the United States in October 1989 for the treatment of angina and hypertension and has rapidly gained market share since its introduction.

ALZA Corp., headquartered in Palo Alto, is a leading drug delivery systems company focusing on the development, manufacture and marketing of a broad range of proprietary pharmaceutical products. Alza's therapeutic systems provide rate-controlled programmed administration of medication for both human and veterinary applications.

#90205b0730 07/24/1990 ~Business Wire

NEW YORK (JULY 24) BUSINESS WIRE - Allegheny Power System Inc., Tuesday reported consolidated net income for the three, six and 12 months ended June 1990 of $39.1 million, or 74 cents per share, $102.7 million, or $1.94 per share, and $192.6 million, or $3.65 per share, respectively, compared with $42.5 million, or 81 cents per share, $105.0 million, or $2.01 per share, and $205.5 million, or $3.95 per share for the corresponding 1989 periods.

Revenues from sales to regular customers exceeded those for the prior year for each of the three, six, and 12-month periods ended June 30, 1990, reflecting higher kilowatthour sales and the elimination in early January of the previously reported temporary $20 million reduction in annual revenues in Pennsylvania.

The decrease in net income for each of the 1990 periods was due to higher operation and maintenance expenses and depreciation which more than offset the higher revenues from retail customers.

#90205b0733 07/24/1990 ~Business Wire

NEW YORK (JULY 24) BUSINESS WIRE - Telerate Systems Inc. has released a software enhancement of its electronic foreign exchange transaction system The Trading Service, unveiling the feed which can be linked to a bank's computer systems for risk management and back office accounting purposes.

According to Steven Rappaport, Telerate's executive vice president, Trading Room Systems, ''The back office feed will assist clients in getting full value out of their in-house systems. Instead of re-keying the information of each deal into a bank's records, all the details of the trade now can be sent automatically from the trader's desk to the back office systems, eliminating deal checking, foreign exchange risk owing to errors and penalty interest costs on deals executed on TTS.''

The advantages of the back office feed, however, are not limited to a financial institutions's back office operations. ''In a volatile market, deals aren't recorded into a bank's books fast enough to update a trader's position and average rate,'' Rappaport says. ''The Trading Service's back office feed solves that problem, giving traders and head traders more value from their systems as well.''

The Trading Service (TTS), introduced in April 1989, provides traders with the capability to manage four trades concurrently with an average speed of connection of one second or less. The trading dialogue itself is designed to eliminate errors commonly caused by foreign language misunderstandings, ensuring 100 percent accuracy. Additionally, TTS network reliability, at 99.95 percent, is unrivaled.

Telerate Inc., a wholly owned subsidiary of Dow Jones & Co. Inc., is a leading provider of real-time financial information, decision support products and transaction services to the international business community.

#90205b0739 07/24/1990 ~Business Wire

WALTHAM, MA (JULY 24) BUSINESS WIRE - SofTech Inc. (OTC:SOFT) reported

revenue of $44.3 million for the year ended May 31, 1990, compared with $49.2 million for fiscal 1989.

For the fourth quarter of fiscal 1990, revenue was $12.6 million compared with $13.9 million for the fourth quarter of fiscal 1989. As previously reported, the net losses for fiscal 1990 were $606,000, or 16 cents per share, compared with net income of $1.7 million, or 46 cents per share for fiscal 1989.

The net losses in the fourth quarter were $1.3 million, or 34 cents per share, compared with net income of $479,000, or 13 cents per share, for the fourth quarter of fiscal 1989.

The revenue decline is attributable to SofTech's DoD business which was adversely affected by delays in awarding new contracts, and DoD budget uncertainties which resulted in lower overall business volume. As a result profit was reduced because of the impact of the lower overall base of DoD business.

Revenue from commercial businesses, including Information Decisions Inc. acquired in April 1990, contributed approximately $6 million to revenue, up from $2.6 million in Fiscal 1989. The company continued to invest heavily in proprietary compiler software for parallel architecture computers which contributed to the fourth quarter loss.

Founded in 1969, SofTech Inc. is a publicly-held company providing custom software design and development, systems engineering, and integration services to government agencies and commercial companies. Headquartered in Waltham, Mass., the company employs approximately 700 people in 18 locations throughout the United States.

DALLAS (JULY 24) BUSINESS WIRE - National microcomputer systems reseller

CompuCom Systems Inc. (NASDAQ:BYTE) announced that revenues for its second quarter ending June 30 increased 27 percent to $77.3 million from revenues of $60.9 million posted for the same period in 1989.

Earnings for the quarter also increased by 240 percent, to $615,000 (2 cents per share), from $181,000 (1 cent per share) during the second quarter of 1989. For the first six months of 1990, earnings increased 148 percent to $1,058,000 on revenues of $146.1 million compared with earnings of $427,000 on $116.6 million of revenues for the same period in 1989.

As a result of its focused strategy, in the first six months of 1990 CompuCom posted continued productivity increases: annualized revenues per associate (CompuCom's term for employees) grew 25 percent to $489,000 per associate from $391,000 one year ago.

CompuCom Systems Inc. based in Dallas, serves major accounts through 28 offices nationwide. The company sells and supports major personal computer lines, including IBM, Compaq, and Hewlett-Packard, and offers related customer-based services. CompuCom focuses on establishing a partnership relationship with its customers by providing both products and integration services for their Information Technology requirements.

#90205b0762 07/24/1990 ~Business Wire

HOUSTON (JULY 24) BUSINESS WIRE - Tuboscope Corporation (Tuboscope) (NASDAQ:TUBO) and Sound Optical Systems Inc. (SOS) announced today that Tuboscope's wholly-owned subsidiary, Tuboscope Inc. has acquired the business of SOS for approximately $16 million.

The purchase price consists of approximately $12 million in cash and a $4 million note. In connection with the acquisition, Tuboscope entered into employment agreements with key SOS management personnel. Based in Houston, SOS is one of the technological leaders of ultrasonic inspection services for oil country tubular goods. Formed in 1984 with the development of proprietary and patented electronics, hardware and software, SOS's market share has increased to more than 25 percent of the ultrasonic inspection market, which has more than doubled since 1985. The combined ultrasonic inspection business of Tuboscope and SOS positions Tuboscope as the leader in the ultrasonic inspection market.

SOS's customers are primarily major oil and gas exploration companies, and major manufacturers of oil country tubulars.

Headquartered in Houston, Texas, Tuboscope provides specialized services and products to the oil and gas industry worldwide. The company provides inspection and coating services for oil country tubular goods (drill pipe, casing, and tubing), sells tubular connections, provides in-place inspection of oil and gas pipelines, and sells and leases inspection equipment to manufacturers of tubulars. The company designs and manufactures its proprietary inspection and coating equipment and formulates and manufactures its own internal coatings.

The company's common stock is traded on the NASDAQ National Market System under the symbol ''TUBO''.

#90205b0764 07/24/1990 ~Business Wire

LOUISVILLE, KY. (JULY 24) BUSINESS WIRE - Critically short milk supplies due to extreme heat, humidity and drought conditions, coupled with a strong demand for milk and other dairy products, will result in higher milk prices for Southeast dairy processors and consumers alike in August and later this fall.

Suffering from below-normal rainfall and a heat wave which pushed temperatures up to 100 degrees or more in some parts of the region in May and June, dairy herds in the Southeast have been experiencing extreme heat stress.

In such adverse temperature, dairy cows eat less forage and produce less milk. For the second quarter of 1990, the U.S. Department of Agriculture reported that milk production in the region declined 0.06 percent.

During the first four months of 1990, however, demand for milk in the region increased 2.54 percent, compared to the same period in 1989, according to the National Dairy Promotion and Research Board in Arlington, Va. As a result, milk production is not keeping up with increasing consumer demand, making supplies extremely short.

In addition to the extreme heat and humidity, the increasing exodus of farmers from the dairy business due to the low prices they have received for their milk, and the high prices paid for cull dairy cows sold for beef also have contributed to the region's tight milk supplies.

With less local milk production and increased sales, dairy industry

analysts believe that the Southeast could be in the same situation it was last year when millions of pounds of costly supplemental milk were transported into the region from outside sources to meet customer demand.

Dairymen Inc., is one of several farmer-owned, milk marketing cooperatives in the Southeast which supplies raw milk to customers in the region. The cooperative is owned by 5,000 member dairy farmers located in 17 Southeast Mid-Atlantic and Midwest states. The cooperative is headquartered in Louisville.

#90205b0772 07/24/1990 ~Business Wire

DALLAS (JULY 24) BUSINESS WIRE - Southwest Airlines' (NYSE:LUV) net income for the second quarter ended June 30, 1990, was up 22.3 percent to a record $23.5 million, compared to the $19.2 million earned in second quarter 1989.

Earnings per share were 82 cents in 1990 vs. 64 cents in 1989, an increase of 28.1 percent. The large increase in earnings resulted from a 43.5 percent increase in operating income for the quarter, which was somewhat offset by an increase in ''other'' nonoperating expenses, net.

Revenues for second quarter 1990 increased 16.9 percent to $308.2 million compared to $263.6 million for the second quarter 1989. The increase in revenues was derived from a 13 percent increase in passengers boarded and a 6.4 percent increase in revenue passenger miles (RPMs), resulting in a load factor of 62.3 percent vs. the 1989 load factor of 63.7 percent.

The shorter average passenger trip length of 492 miles experienced in second quarter 1990, a 5.7 percent decrease from the 1989 quarter, coupled with several fare increases that have taken place since last year's second quarter, resulted in an increase in the passenger revenue yield per RPM of 10.4 percent to $.1166.

Operating revenue yield per available seat mile (ASM) increased 7.3 percent in second quarter 1990 to $.0750 from $.0699 in second quarter 1989.

Operating expenses for the second quarter 1990 increased 13.6 percent to $266.9 million, or $.0649 per ASM, compared to $234.9 million, or $.0623 per ASM, for second quarter 1989.

Revenues for the six months ended June 30, 1990, increased 15.4 percent to $568.8 million while operating expenses increased 17.4 percent to $519.4

million, resulting in a 2.5 percent decrease in operating income thus far in 1990.

Net income for the six months was $28.6 million in 1990, down 26.4 percent from the $38.9 million earned in 1989, primarily due to increased first quarter 1990 fuel costs and $12.2 million of first half 1989 nonoperating gains, which were not repeated in first half 1990.

#90205b0779 07/24/1990 ~Business Wire

RENO, NE (JULY 24) BUSINESS WIRE - FirstMiss Gold Inc. (NASDAQ-FRMG) reported earnings of $157,000 or 1 cent per share for the 12 months ended June 30, 1990 versus earnings of $5.6 million or 31 cents per share in fiscal 1989.

The earnings decrease was due to start-up expenses at the new mill and to net interest expense for project financing.

Earnings for the fourth quarter were $1.1 million or 6 cents per share versus $1.2 million or 7 cents per share for the fourth quarter last year and a loss of $634,000 or 4 cents per share in the prior quarter this year.

Total production for the fourth quarter was 45,930 ounces, up from 35,721 ounces for the third quarter and 25,121 ounces for the fourth quarter prior year. Cash production cost for the fourth quarter averaged $255 per ounce, versus $329 in the third quarter and about the same as last year.

Sales for the year were $62.0 million on 154,721 ounces of gold up from $22.1 million on 56,257 ounces last year. Sales price averaged $401 per ounce versus $393 last year. Average sales price for the current year includes gold loan repayments at $475 per ounce. Sales for the fourth quarter were $18.4 million on 46,641 ounces, up from $11.0 million on 29,244 ounces last year.

Heap leach production for the year was a record 31,193 ounces, a 71 percent increase over fiscal 1989. The previous record was 19,500 ounces in fiscal 1988.

Total gold production for the year was 154,825 ounces, up from 58,895 ounces in fiscal 1989. Average cash production cost for the year was $277 per ounce versus $185 last year. Prior year costs reflect a greater percentage of low-cost heap leach production and mill production using low-cost oxide ore.

Production costs for the year were high due to start-up of the new mill. Improvements from process modifications and better on-stream time are expected, according to Alvarez.

FARMINGTON, CONN. (JULY 24) BUSINESS WIRE - Otis Elevator Co. has been awarded a $7.6 million contract for an Otis Shuttle system at the J. Paul Getty Museum in West Los Angeles, Calif.

The Otis Shuttle incorporates elevator technology into a horizontal transit system. It uses a standard gearless traction elevator machine and steel cable to pull passenger cars over a concrete guideway. The cars hover above the running surface on a cushion of air.

The Otis HOVAIR air-film suspension system lifts each shuttle car approximately one-half inch off the ground, providing a smooth ride in any weather condition. As in an elevator, the system is automatic.

''Museum visitors riding the Otis Shuttle will get a panoramic view of the museum grounds, Los Angeles and the Pacific Ocean,'' said Kris Balch, manager, shuttle systems, at Otis.

The system will operate 16 hours a day, seven days a week transporting passengers seven-tenths of a mile from a parking area at the bottom of a hill to the museum at the top. A one-way trip will take less than four minutes. Two 93-passenger trains moving at 13 mph will enable the system to transport 1,350 passengers per hour in each direction.

The Otis Shuttle project is scheduled for completion in 1994.

Otis Elevator Co. is a wholly owned subsidiary of United Technologies Corp. United Technologies provides a broad range of products and support services to the aerospace, building systems and automotive industries.

The Hartford, Conn.-based corporation's best known products include Pratt & Whitney aircraft engines, Carrier heating and air conditioning systems, Otis elevators and escalators, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems, and United Technologies Automotive components and systems.

KINGSTON, NY (JULY 24) BUSINESS WIRE - Leading energy project developer

Besicorp Group (''BESI''), together with Kamine Development Corp. (''Kamine''), a New Jersey based firm, has executed a power purchase contract with Rochester Gas & Electric (''RG&E'') for the purchase of 55 MWs of electricity.

The power will be supplied from a natural gas-fired cogeneration facility which Besicorp and Kamine will build, own and operate in Rossberg, N.Y. The 55 megawatts of electrical output planned meets the normal requirements of a city of over 55,000 residents.

The contract has been submitted to the Public Service Commission of New York with approval expected early 1991. Besicorp anticipates contruction to commence mid-1991 with projected full scale on-line operations for Fall 1993.

The project will generate total gross electric and thermal revenues of $30 Million during the first year of the contract. Revenues will then escalate during the 25-year term of the contract. Besicorp is 50 percent owner of the Allegany project.

According to Beta Development Co., Vice President, Richard Altman, ''We at Besicorp are excited about the Rochester Gas & Electric contract signing. Besicorp is continuing to realize the benefits of its labors. Eight of our projects, currently under development, are secured by long-term contracts with the utilities. Current deregulation trends in the power industry assure Besicorp's position as a leading energy developer.''

#90205b0797 07/24/1990 ~Business Wire

AUBURN, ME (JULY 24) BUSINESS WIRE - Mid Maine Savings Bank, F.S.B. (NASDAQ NMS:MMSB) Tuesday announced earnings for the quarter ended June 30 1990, of $171,020, or 12 cents per share, as compared to net income of $394,329, or 29 cents per share, for the same period last year.

Earnings for the first six months of 1990 were $505,060, or 37 cents per share, as compared to $724,076, or 52 cents per share, for the first six months of 1989.

Mid Maine's provision for loan losses of $562,000 in the first half of 1990 represents a $456,000, or 430 percent, increase over 1989's first half provision of $106,000. The increase is a prudent response to both the trend in the New England banking industry of higher delinquency ratios as well as the bank's increased delinquencies and non-performing assets.

The bank's ratio of non-performing assets to total loans equaled 2.19 percent, or $4,039,000, at June 30, 1990, as compared to 1.32 percent, or $2,353,000, at March 31, 1990, and 0.78 percent, or $1,368,000, at Dec. 31 1989, respectively.

During the first half of the year, the bank recognized $340,000 in additional income tax expense, which represents a potential tax liability that may materialize if the Internal Revenue Service issues proposed regulations regarding the recapture of income previously tax exempt for institutions with total assets of less than $500 million.

The bank has recognized this additional tax liability in anticipation of the regulation, which is expected sometime later this year or early next year. Also included in the results for the first half of the year is a before tax gain of $325,000 from the sale of approximately $8.5 million of mortgage loans.

Total assets were $223.7 million and stockholders' equity equaled $22 million at June 30, 1990. The bank operates four branches in Maine and a wholly owned subsidiary, Hampton Co-operative Bank in New Hampshire.

WEYMOUTH, MASS. (JULY 24) BUSINESS WIRE - Sheri Poe, president and chief executive officer of RYKA Inc. (NASDAQ:RYKA), announced Tuesday that the company has completed its public stock offering through Paulson Investment Co. Inc., of Portland, Oregon.

The offering produced $4.7 million in gross proceeds for the company through the sale of 4.7 million units. The units consisted of one share

of common stock and one warrant. Total outstanding shares after the offering are 17,942,000. The warrants were immediately detachable from the units and are presently trading separately under the symbol RYKAW. Units from the offering are currently being traded under the symbol RYKAU.

Commenting on the offering, Poe said, ''We are delighted with the support provided to us by Paulson Investment Co. The proceeds from the underwriting will enable us to aggressively market our new products as they are introduced this Fall, and in general, help us realize our potential this year and beyond.''

RYKA designs, develops and markets high-performance fashionable athletic footwear for women. The company's principal products are mutli-purpose aerobic cross-training shoes and lightweight aerobic shoes.

#90205b0807 07/24/1990 ~Business Wire

CHATTANOOGA, TN (JULY 24) BUSINESS WIRE - Astec Industries Inc. (NASDAQ/NMS:ASTE) Tuesday announced sales for the second quarter ended June 30, 1990 of $49,464,000 and a loss of $6,256,000 or $1.74 per share compared to sales of $60,413,000 and earnings of $2,353,000 or 62 cents per share for the second quarter ended June 30, 1989.

Excluding a patent suit judgment and associated expenses of $6,032,000, the loss for the quarter ended June 30, 1990, was $224,000, or 6 cents per share.

Sales for the six months ended June 30, 1990, were $103,461,000 compared to sales of $112,757,000 for the six months ended June 30, 1989. The company incurred a loss for the six months ended June 30, 1990 of $5,485,000 or $1.52 per share, compared to earnings of $4,211,000 or $1.12 per share for the six months ended June 30, 1989. Excluding a patent suit judgment and associated expenses of $6,549,000, earnings for the six month period ended June 30, 1990, were $1,064,000 or 30 cents per share.

The weighted average number of common and common equivalent shares outstanding in the second quarter of 1990 were 3,604,063 compared to 3,770,970 during the same quarter last year. The weighted average number of common and common equivalent shares outstanding for the six months were 3,604,063 compared to 3,774,528 for the same period last year.

Dr. J. Don Brock, chairman and chief executive officer of Astec Industries stated that the heavy loss for the second quarter could be attributed primarily to the patent litigation between a subsidiary, Barber-Greene Co.

and CMI Corp. The company incurred expenses of $6,032,000 during the second quarter relating to patent litigation and including the jury award in May of $4,457,066.

The company continues to be aggressive in the marketplace and expects to sustain its position as an industry leader.

Backlog at June 30, 1990, was $24,615,000 compared to $21,585,000 at June 30, 1989.

Astec Industries Inc., a manufacturer of asphalt mixing plants, paving equipment, heat transfer equipment, aggregate crushing equipment, and excavating and trenching equipment is traded over-the-counter and is reported on the NASDAQ National Market System under the symbol ASTE.

DFW AIRPORT, TX (JULY 24) BUSINESS WIRE - American Airlines has withdrawn the facilities surcharges it had planned to begin Aug. 1 at five airports: LaGuardia; Newark; New Orleans; West Palm Beach; and Fort Myers.

While the charges are still justified due to excessive and unreasonable costs at the airports, American has been unable to implement the surcharges due to competition. American's goal is to remain competitive on price at all times.

American regrets that there is now no alternative other than to have all customers pay for facilities and services benefitting a few.

#90205b0821 07/24/1990 ~Business Wire

RYE, NY (JULY 24) BUSINESS WIRE - Melville Corp., specialty retailer of apparel, footwear, prescription drugs, health and beauty aids, toys and household furnishings, Tuesday reported sales and net earnings for the second quarter and six months ended June 30, 1990.

For the second quarter ended June 30, 1990, consolidated net sales increased 16.4 percent to $1,949,195,000 as compared to $1,675,270,000 last year. Net earnings for the second quarter of 1990 were $78,250,000, a 27 percent increase over net earnings of $61,626,000 for the second

quarter last year.

Net sales and net earnings for the second quarter of 1990 were favorably impacted by the Palm and Easter week selling periods occurring in the second quarter of 1990 vs. the first quarter of 1989. Also, the second quarter of 1990 had one more selling day than the second quarter of 1989.

Consolidated net sales for the six months ended June 30, 1990 were $3,567,034,000 an 11.3 percent increase over net sales of $3,204,367,000 for the six months ended June 30, 1989. Net earnings for the first six months of 1990 amounted to $86,061,000 as compared to $85,856,000 for the first six months of 1989.

The modest increase in net earnings can be attributed to the softness in the apparel and footwear businesses in the New England Region, which is experiencing an economic decline, coupled with higher than planned markdowns in our leather apparel business.

Net earnings per share were adversely affected for the six month and three month periods ended June 30, 1990 in relation to the comparable prior year periods by the impact of the preferred dividends relating to the ESOP preference stock issued to the employee stock ownership plan in June of 1989 and other employee benefit enhancements. These preferred dividends amounted to $7,900,000 and $3,950,000 for the six month and the three month periods ended June 30, 1990, respectively and $630,000 for the comparable prior year periods. Net earnings per share for the six months ended June 30, 1990 was 76 cents as compared to 78 cents last year. For the second quarter of 1990 net earnings per share was 72 cents compared to 56 cents last year.

As of June 30, 1990, there were 6,925 stores and leased departments in operation, an increase of 2.4 percent from the 1989 total of 6,762.

Melville specialty retail chains, with stores located across the country, include Marshalls, the off-price brand name apparel chain; Chess King, the young men's apparel chain; Wilson's, in leather apparel; Bob's, the casual family apparel and footwear chain; Accessory Lady, the quality fashion accessory stores; CVS, the prescription drugs, health and beauty aids chain; Freddy's, the ''deep discount'' drug and sundries stores; Thom McAn Fan Club and the Meldisco leased department division in footwear; the Kay-Bee toy chain; Linens 'N Things, the brand name linens and domestic chain; This End Up, the casual furniture stores; and Prints Plus, the prints and wall decor stores.

FAIRPORT, NY (JULY 24) BUSINESS WIRE - Detection Systems, Inc. (NASDAQ:DETC) Tuesday reported unaudited results for the first fiscal quarter ended June 30, 1990.

Net sales for the quarter ended June 30, 1990 were $6,479,000, compared to the $5,019,000 of the first quarter a year ago. Net income was $454,000 or $.17 per share as compared to $437,000 or $.16 per share a year ago.

Karl H. Kostusiak, President, stated, ''Sales for the quarter were excellent, with the Company experiencing growth in all product categories. This increase reflects growth with existing customers as well as an increase in the number of security and fire protection service companies who prefer Detection Systems products.

''The bottom line reflects an increasing investment in new product development, which is essential to long-term viability in a trade that has accelerating technology and declining prices. We remain committed to the high end of the market, offering what we believe to be the industry's best features and quality in electronic detection and control equipment.

SOUTHPORT, CT (JULY 24) BUSINESS WIRE - Crystal Brands Inc. (NYSE) Tuesday announced that net sales of $177,477,000 for the second quarter rose 10 percent over net sales of $161,861,000 in the comparable period in 1989. As a result, the company's net loss for the current year's quarter was pared 42 percent to $1,402,000, or 15 cents per share from $2,397,000, or 26 cents per share, in the second quarter of 1989. The loss from continuing operations narrowed 7 percent to $1,402,000, or 15 cents per share, in the quarter ended June 30, from $1,511,000, or 17 cents per share, in the corresponding period one year ago. On a per share basis, the results of continuing operations for the current year's second quarter improved 12 percent over results in the prior year's period.

For the first six months of 1990, net sales increased 3 percent to $396,277,000 from $385,178,000 in the first half of 1989. Net income for the first six months of 1990 rose 43 percent to $5,232,000 from $3,671,000 in 1989. Net income per share rose 42 percent to 58 cents per share for the 1990 period from 41 cents per share in the first half of the previous year. Income for the first half of 1990 from continuing operations rose 16 percent to $5,232,000, or 58 cents per share from $4,517,000, or 50 cents per share, one year ago.

In commenting on the company's performance, Richard F. Kral, chairman of the board and chief executive officer, said, ''We are pleased to report both improved sales and profitability particularly during a difficult retail environment in which a number of our major department store customers are forced to manage their businesses with an unusally high attention to cash flow in order to reduce their burdensome debt loads. Our ability in a difficult market environment to make continued progress toward our objective of increasing shareholder values through improving return on shareholders' equity, reinforces our confidence that significantly improved returns can be achieved when market conditions ameliorate.''

Crystal Brands produces tailored clothing, dress furnishings and sportswear for men, women and boys under the brand names Eagle Shirtmakers Evan-Picone, Gant, Haspel, Izod, Izod Lacoste, Palm Beach, John Weitz, Polo by Ralph Lauren for Boys, Pierre Cardin for Boys, Hunter Haig, Turnbury, Brannoch, Fulcrum, Firenza, Milano and Austin Hill. The company also produces costume jewelry and accessories under the brand names Monet, Trifari and Marvella.

#90205b0836 07/24/1990 ~Business Wire

KEENE, N.H. (JULY 24) BUSINESS WIRE - Cheshire Financial Corporation (NASDAQ: CFNH) Tuesday announced a loss of $1,090,000, or $.30 per share, for the quarter ended June 30, 1990, compared with a profit of $1,324,000, or $.37 per share, for the same quarter in 1989.

For the six months ended June 30, 1990, the company's loss amounted to $506,000, or $.14 per share, compared with earnings of $2,579,000, or $.71 per share, for the same period last year.

While the company achieved improved net interest income during the three- and six-month periods ended June 30, 1990, the company experienced net losses during the periods due to a substantially increased provision for loan losses and write-downs in the value of the company's marketable equity securities portfolio.

Peter J. Baxter, president and chief executive officer of Cheshire, said: ''We believe it prudent, given an increase in nonperforming loans during the second quarter, along with the well publicized economic softening in New England, to boost the allowance for loan losses at our two largest banks.

''Accordingly, during the quarter, we added $1,677,000 to our allowance for loan losses bringing the consolidated total allowance to $4,503,000, or .9 percent of loans and 64 percent of nonperforming loans. By contrast during the second quarter of 1989, we added $150,000 to the allowance for loan losses.

''In addition to increasing allowance for loan losses, we wrote down the book value of our marketable equity securities portfolio by $799,000 for the quarter ended June 30, 1990. The continued deterioration in market value of several bank stocks in our portfolio required us to consider the declines more than temporary.

''At June 30, 1990, nonperforming loans amounted to $7,038,000, or 1.4 percent of total loans, and other real estate owned stood at $4,828,000, for a total of $11,866,000 in non performing assets, or 1.96 percent of total assets,'' Mr. Baxter said. ''While nonperforming assets in most other New England banks are heavily concentrated in real estate development, only about 18 percent of our problem assets fall into this category.

''The remaining problem assets are spread between residential mortgages, loans to companies involved in retail sales and other commercial and consumer loans. This mix is reflective of a slower regional economy rather than a specific troubled economic sector.

''With such a mix,'' he added, ''I believe that we have more options in resolving these problems since we are not dependent on any one major economic sector to recover before we can see improvement in some of these situations. Thus, while our earnings will likely be negatively impacted by the level of nonperforming loans in the short term, we are cautiously optimistic about our ability to resolve our problem loans.

Cheshire Financial Corporation is a multi-bank holding company headquartered in Keene, N.H., with total assets of $605,000,000 as of June 30, 1990. The company's banking subsidiaries are Cheshire County Savings Bank, headquartered in Keene, N.H., with assets of approximately $398,000,000, The Monadnock Bank, headquartered in Jaffrey, N.H., with assets of approximately $125,000,000, The Valley Bank, headquartered in Hillsborough, N.H., with assets of approximately $39,000,000 and Village Savings Bank, headquartered in Greenville, N.H., with assets of approximately $29,000,000.

The company is the largest financial institution in southwestern New Hampshire and operates 17 full- service offices and 42 remote-service units throughout the region.

VALLEY STREAM, NY (JULY 24) BUSINESS WIRE - Nationwide Cellular Service Inc. (NASDAQ:NCEL) Tuesday announced that Portable Cellular Communications Inc. (''PCC'') an 80 percent owned subsidiary of the company, has determined to offer to holders of Nationwide common stock and other security holders of Nationwide the right to purchase common stock of PCC.

The precise terms of the proposed offering have not been fixed. However, it is anticipated that the unsubscribed shares will be purchased by an underwriter and resold to the public.

The securities described above may not be sold, nor may offers to buy be accepted, prior to the time a registration statement relating to the securities is filed and becomes effective and thereafter may only be sold pursuant to the Prospectus contained in such registration statement.

This announcement shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of, the securities in any state in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of such state.

PCC provides cellular telephones and cellular telephone service through car rental agencies and others and has recently entered into an agreement to supply up to 22,000 installed cellular telephones at various Avis Rent A Car locations.

The funds raised by PCC would be used to purhcase cellular telephone equipment to supply to its customers, expand its operations and for other purposes.

After the transaction, it is expected that Nationwide would maintain a controlling interest in PCC.

Nationwide is one of the largest resellers of cellular telephone service in the country, with in excess of 63,000 subscribers.

NEW YORK (JULY 24) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) has agreed in principle with Industriforvaltnings AB Kinnevik, the Swedish industrial holding company, to form a new company which will be called Millicom International Cellular to hold and operate their international cellular properties.

Millicom Inc. and the Comvik International subsidiary of Kinnevik will contribute international cellular properties to the new company, including a minority interest in the Swedish GSM license recently obtained by Kinnevik. The remaining interest in the GSM license will be held by Kinnevik.

Millicom International Cellular will hold licenses to operate cellular telephone systems in the following countries:

Hong Kong	Costa Rica	
Mauritius	Guatemala Sri Lanka	Chile
Pakistan	Mexico	
Philippines	Sweden	

Millicom believes that Millicom International Cellular will hold more cellular licenses in more countries than any other company and that its 10 licenses will represent a substantial advantage in the race to become the world's leading international cellular company.

Millicom International Cellular, to be headquartered in Luxembourg, will operate as an independent company in pursuing new licenses throughout the

world.

Morgan Stanley & Co. Inc. has been hired to advise and assist in the formation of this new company.

In order to reach its full potential, Millicom International Cellular intends to form strategic alliances with substantial telecommunications companies.

The formation of Millicom International Cellular is subject to the negotiations and execution of definitive agreements and the approval of the boards of directors of Millicom and Kinnevik.

Millicom Inc. is a diversified internatioanl communications company with interests in telecommunications, satellite television and media.

LOS ANGELES (JULY 24) BUSINESS WIRE - Imperial Bancorp (NASDAQ:IBAN), parent company of Imperial Bank, Tuesday reported that as a result of recent heavy stock-market activity it is expanding on its second- quarter results to assure stockholders and investors of the continued health and profitability of the organization.

In line with the recently announced second-quarter earnings of $6,329,000, credit quality has remained strong with non-performing assets -- loans on non-accrual, loans 90-days-or-more past due and other real estate owned -- approximating 0.8 percent of total loans at June 30, 1990, down from 1.2 percent at March 31, 1990, and 0.9 percent at June 30, 1989.

The comparable peer group -- bank-holding companies with assets between $1 billion and $3 billion -- non-performing-asset ratio at March 31, 1990, was 2.8 percent. The earnings of $6,329,000 represent an increase of 4 percent from the year-earlier period and $12,226,000 for the six months ending June 30, 1990, is an increase of 10 percent from the prior year's period.

The company uses a conservative approach to accrual of interest on non-performing loans and generally stops accruing interest and writes off any accrued interest when commercial and real-estate loans are 90 days past due. The difficulties of banking organizations in other states has not been experienced by the company.

The company's loan portfolio, and in particular the loans secured by quality California real estate, have not exhibited deterioration in credit quality.

Capital and reserves are at an all-time high of $195,500,000 and exceed all current requirements as well as exceeding the risk-based requirements that will become fully applicable in 1992.

Imperial Bancorp, founded in 1968, is a diversified financial organization with assets in excess of $2.9 billion. Imperial Bank operates 12 regional banking offices and two loan-production offices throughout the commercial centers of California and offers a broad range of financial services tailored to corporate customers, entrepreneurs and professionals.

Other Imperial entities include: Imperial Trust Co., Imperial Creditcorp, Imperial Bank Mortgage, Imperial Ventures Inc., Imperial Global Trading Co. Inc., Southern Pacific Thrift & Loan Association, MFC Financial, Wm Mason Co., The Lewis Horwitz Organization and Imperial International Bank.

NEW ORLEANS (JULY 24) BUSINESS WIRE - GTS Corp. (NASDAQ:GTSC) reports revenues and net income for the quarter and six months ended June 30, 1990.

Net income for the quarter was $128,000 (4 cents per share) versus a loss of $126,000 (5 cents per share) for the same period in 1989. Revenues for 1990's second quarter were $2,247,000 an increase of 56 percent over $1,445,000 in 1989.

For the six months ended June 30, 1990, net income was $149,000 (5 cents per share) versus a loss of $297,000 (11 cents per share) for 1989's first half. Revenues for the six months ended June 30, 1990, were $3,877,000 an increase of 41 percent over $2,752,000 for the same period in 1989.

Commenting on the results, Edwin G. Generes, chief executive officer, said ''The profit for the second quarter marks the third consecutive quarterly profit for GTS -- an event which has not occurred since 1984. With the combination of our massive GEOFILE data base, Data Integrators and GTS/TEKNICA, we remain confident that revenues and earnings will continue to improve during the remainder of 1990 and beyond.''

GTS Corp. provides seismic information and processing services to the oil and gas industry. GTS has offices in Houston, New Orleans, Oklahoma City, Denver, Midland and Bakersfield, Calif.

NEW YORK (JULY 24) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by Vincent A. Sarni, CEO and chairman of PPG Industries.

PPG Industries should achieve by 1994 its major performance goals, with at least 40 percent of $8 billion-$9 billion in sales and $800 million in net earnings from outside the United States rather than the earlier target of one-third, Board Chairman and CEO Vincent A. Sarni said Tuesday.

Speaking at the New York Society of Security Analysts, he said PPG, which earned $465 million on sales of $5.7 billion in 1989, has ''executed a profound change in the way we manage our business ... our strategies have reformed our company into a resilent global competitor.''

Sarni also told anaylsts the Pittsburgh-based maker of glass, fiber glass, coatings and chemicals, after divesting businesses with $430 million in sales, is ''much more optimistic about the growth prospects of our basic portfolio'' responsible for PPG's three percent average annual real sales gain since 1985.

Noting the importance of geographic diversification to a strategy of reduced dependence on the domestic economy, Sarni said success in Europe and a growing Far East presence ''indicate to us that we are on the right track.''

PPG last week reported second quarter net earnings of $141 million, or $1.31 a share, on sales of $1.57 billion, and first half net of $266 million, or $2.47 a share, on $3 billion in sales. Sarni emphasized these all-time highs were achieved although domestic auto production and construction declined substantially, and expressed optimism about full year results.

The chairman said PPG will complete Wednesday ''the most important acquisition we have made in the past several years,'' obtaining 100 percent of Netherlands fiber glass maker Silenka B.V., and is pursuing a fiber glass joint venture in Japan. He said Europe will soon be the world's largest market for fiber glass reinforcements and textiles.

According to Sarni, PPG is rapidly increasing its aftermarkets businesses, with automotive aftermarket sales and earnings up 150 percent in five years. He added that a number of new glass and coatings products are being introduced for original and replacement automotive and architectural

applications.

Trade paint sales nearly doubled with the 1989 purchase of the Olympic and Lucite businesses, and Sarni expects sales growth to be two to three times that of the industry. He said sales of performance chemicals such as surfactants, paper chemicals and optical resins will match those of chlor-alkalies and other commodities by 1994, up from the present 30 percent.

#90205b0846 07/24/1990 ~Business Wire
BRIDGEPORT, CT (JULY 24) BUSINESS WIRE - Connecticut Energy Corp. (NYSE:CNE) Tuesday reported earnings of 3 cents per share for the three month period ending June 30, 1990, compared with a loss of 20 cents per share for the same 1989 period.

''Results reflect measures taken to control expenses and the positive effect of the adjustment for unbilled revenues,'' said J.R. Crespo, chairman and president. ''In addition, new rates went into effect April 18, 1990.''

Earnings for the six month period ending June 30, 1990 were 96 cents per share compared with $1.18 per share for the same period in 1989, and for the twelve months ending June 30, 1990 earnings were $1.07 against $1.47 for the same 1989 period. ''Extremely warm weather in the first quarter was the dominant factor which negatively impacted year-to-date financial

results,'' said Crespo.

Connecticut Energy Corp. is a public holding company whose principal subsidiary, the Southern Connecticut Gas Co. (Southern), provides natural gas service to over 150,000 customers in Fairfield, New Haven and Middlesex counties. ''As a result of this warm weather, sales volumes were greatly reduced because the majority of our customers use natural gas for space heating during the winter months.''

At its meeting today, the board of directors declared a quarterly dividend of $.3075 per share on its common stock, payable Sept. 28, 1990, to shareholders of record at the close of business on Sept. 7, 1990. This is the company's 323rd consecutive quarterly dividend. The indicated annual rate is $1.23.

The board of directors also declared a quarterly dividend for holders of preferred stock issued by the Southern Connecticut Gas Co. A dividend of $1.1875 per share will be paid on the remaining 4.75 percent issue.

#90205b0849 07/24/1990 ~Business Wire

NEW YORK (JULY 24) BUSINESS WIRE - Loral Corp. Tuesday reported net income of $17.8 million for the first quarter ended June 30, 1990, an increase over the $16.6 million from continuing operations in the same period last year.

Primary earnings per share were $.71, up from the $.66 from continuing operations in the comparable period last year.

Last year's first quarter results included $.03 per share from discontinued operations, bringing net income for that period to $.69 per share.

Sales for the quarter were $318 million, up from the $233 million in the same period a year ago. Bookings totaled $250 million, up from last year's $159 million. Backlog at June 30, 1990, totaled $2.019 billion. This year's first quarter results fully reflect the contributions of Fairchild Weston and Honeywell's Electro-Optics division which last year's did not.

''First quarter performance was in line with our expectations,'' Bernard L. Schwartz, chairman and chief executive officer, told shareholders at Loral's annual meeting today. ''We expect this to be another record year for the company.''

Yesterday, Loral announced it was selected as the winning bidder for Ford Aerospace Corp. At the annual meeting, Schwartz said, ''This acquisition would constitute a quantum advance for Loral. Ford Aerospace is a world leader in its technology; its program base is diverse and healthy; it is profitable with growth potential; and it has size. It would bring to Loral a new dimension that could not otherwise be achieved.''

Ford Aerospace's total revenues last year were $1.9 billion, and pre-tax earnings exceeded $130 million.

''The financing of this acquisition will not create a large debt burden for Loral Corporation,'' Schwartz said. ''A new corporation will be formed with two initially equal partners, Loral Corporation and Shearson Lehman. Each will contribute about $150 million as equity.

The balance of the purchase price will be financed by non-recourse bank borrowing. Loral will have the option to increase its equity in the future.

''Thus Loral will maintain maximum flexibility with minimum risk and minimum drain on our resources,'' he continued.

Ford Aerospace is a leader in the design, production and management of space vehicles and communication satellites for commercial and military applications. In addition, its Aeronautics Division produces missiles and its BDM subsidiary is a world leader in system analysis.

Loral Corp. is a high technology company that primarily designs and manufactures defense electronics.

LA HABRA, CA (JULY 24) BUSINESS WIRE - Landmark Bancorp and its wholly owned subsidiary Landmark Bank reported consolidated second-quarter earnings of $540,000, or 36 cents per share, and earnings for the six months ended June 30, 1990, of $1,008,000, or 67 cents per share.

The year-to-date earnings represent an 8-percent increase over the $932,000 reported for the same period in 1989. Revenue for the first six months increased 16 percent from $8,695,000 in 1989 to $10,070,000 in 1990. Loans grew 19 percent from $109,702,000 at June 30, 1989, to $130,842,000 at June 30, 1990. Deposits rose 14 percent during the same period to $166,119,000.

These increases brought the asset base to $181,922,000, or 14 percent, over the $159,944,000 reported in 1989. Landmark Bancorp has increased its shareholder equity to $14,843,000 at June 30, 1990, exceeding 8 percent of total assets. Net book value per share is $9.83.

Craig Collette, president/chief executive officer, said, ''We are pleased with the bank's ability to grow during a period of a softening economic conditions and negative news resulting from the S & L crisis.

WALTHAM, MA (JULY 24) BUSINESS WIRE - Meditrust (NYSE:MT) announced Tuesday a 31 percent increase in cash flow from operating activities, a 22 percent increase in revenues and a 39 percent increase in net income for the second quarter ended June 30, 1990 as compared to the second quarter of 1989.

Cash flow from operating activities, the basis on which dividends are determined, was $11,109,000, or 59 cents per share (based on 18,721,771 shares) for the three months ended June 30, 1990 versus $8,453,000, or 54 cents per share (based on 15,720,859 shares) for the comparable period in 1989.

Revenues for the three months ended June 30, 1990 were $21,111,000, up from $17,321,000 in the second quarter of 1989. Net income for the 1990 second quarter was $7,415,000, or 40 cents per share versus $5,316,000, or 34 cents per share for the second quarter of 1989. These increases were primarily the result of additional investments made by Meditrust.

For the six months ended June 30, 1990, the company had cash flow from operating activities of $21,917,000 versus $16,587,000 for the same period a year earlier, an increase of over 32 percent. Revenues for the six months ended June 30, 1990 were $41,494,000 versus $32,468,000 for the same period in 1989. Net income increased to $13,943,000 for the six months ended June 30, 1990 versus $10,500,000 for the similiar period in 1989.

Meditrust, with headquarters in Waltham, Mass., is the nation's largest Health Care Real Estate Investment Trust, holding investments in 99 health care facilities with 13 different operators in 24 states totalling approximately $700 million of investments. The company specializes in the sub-acute sector of the Health Care industry, including investments in rehabilitation hospitals, long-term care facilities, alcohol and substance

abuse treatment centers, psychiatric hospitals and retirement living communities. A.M.A. Advisory Corp., a Delaware corporation is engaged as the Advisor to Meditrust.

KANATA, ONTARIO (JULY 24) BUSINESS WIRE - Mitel Corporation Tuesday announced a loss of Can $3.1 million in net income in the first three months of Fiscal Year 1991.

Sales for the first quarter at $100.2 million were marginally below the

Can $102.7 million recorded for the same period last year. ''Sales of customer premises telecommunications equipment outside of North America got off to a slow start for the first time in several years and were about 8 percent or $4 million below last year's levels,'' said John Jarvis, president and CEO of Mitel.

''I am confident that this is a short-term problem and that we will see revenue growth in these markets as we move through the fiscal year.''

Mitel's Semiconductor Division recorded outstanding sales performance in the quarter generating Can $13.4 million in sales, a 31 percent increase ove the previous year.

Customer premises equipment sales in the United States at $32 million, were virtually identical to the previous year, after three years of steady declines of sales in this region, the most competitive of the world's telecommunications markets.

Gross Margins improved from 42 to 43 percent, as a result of continuing improvements in the management and quality of manufacturing operations. First quarter Sales and Administration expenses at 32 percent of sales compared to 28 percent in the previous year, reflected a more aggressive approach to support of marketing and sales operations worldwide.

Research and Development was at Can $11 million or approximately 11 percent of revenues for the quarter under review.

On Jan. 22, British Telecom announced its plan to review the future of its 51 percent ownership of Mitel including the possibility of sale of all or part of its majority shareholding. This process, involving British Telecom, Mitel and Morgan Stanley of New York, is proceeding with a number of international firms expressing an interest in a future relationship with Mitel.

Mitel is an international manufacturer of sophisticated, reliable business telecommunications systems, public switching systems and semiconductor products with annual revenues of more than Can $400 million. Nearly 150,000 Mitel telecommunications systems have been sold in over 100 countries.

Mitel's common shares are traded on the Toronto, Montreal, New York and London stock exchanges under the symbol MLT. Since 1986, British Telecommunications plc, a $20 billion telecommunications company based in the United Kingdom, has owned 51 percent of the company.

BURLINGTON, VT (JULY 24) BUSINESS WIRE - Banknorth Group Inc. announced net income for the second quarter of 1990 of $2.4 million, or 35 cents per share, down $2.3 million or 34 cents per share from the second quarter of 1989, a 49.3 percent decrease.

For the six month period ended June 30, 1990, net income of $6.1 million, or 90 cents per share, is down $3.5 million or 52 cents per share from the same period during 1989. Net interest income, a major contributor to earning results, at $17.1 million is down $1.3 million from last year's second quarter. Net interest income for the six month period of $34.1 million is down $2.5 million from 1989. Slow growth in deposits and increased levels of non-accruing loans were cited as the primary causes according to John H. Barry, president and chief excutive officer.

''We continue to see very modest deposit growth and a shift of lower cost deposits into higher yielding accounts,'' Barry told the board of directors at todays regular meeting.

''A continuing increase in non-performing loans has also impacted our net interest income and necessitated an increased provision for possible loan losses,'' Barry said.

A provision of $5.7 million for the quarter ended June 30, 1990, up $4.3 million from the same quarter a year ago was, according to Barry, a prudent response to the increased levels of non-accruing loans. Loans charged off, net of recoveries, were $2.3 million for the second quarter of 1990, compared to $584 thousand in the second quarter of 1989. For the year-to-date period, the 1990 provision rose 194.1 percent to reach $7.3 million as compared to $2.5 million in 1989.

''Banknorth is clearly feeling the effects of a declining real estate market in a slowing regional economy and our second quarter results

reflect that impact,'' said Barry. ''Due to the increase in non-performing loans we have acted to provide loan loss coverage at 72 percent of non-performing loans, which is as much as double that of most New England banking companies. While we have sacrificed some current earnings, we feel we are well positioned to weather any possible future losses. Our non-performing loans are being closely monitored and adequately reserved for given today's economic and credit environment.''

Non-performing assets, including non-accrual loans, loans past-due 90 days or more and still accruing interest restructured loans and foreclosed real estate, were $28.5 million at June 30, 1990, or 1.74 percent of total assets. The allowance for possible loan losses at June 30, 1990, stood at 1.41 percent of total loans at that date, giving 72.1 percent coverage of non-performing loans.

Shareholders' equity at June 30, 1990 was $131.4 million, or 8.02 percent of total assets at that date. Total assets at June 30, 1990, were $1.638 billion, up $9.6 million or .6 percent from June 30, 1989. Total average loans and total average deposits were up 4.1 percent and .4 percent respectively, from last year's second quarter.

Banknorth Group Inc., the largest commercial banking company in Vermont, was formed on Dec. 1, 1989 with the merger of Banknorth Group Inc. and Howard Bancorp and is comprised of First Vermont Bank and Trust Co., Franklin Lamoille Bank, Granite Savings Bank and Trust Co., The Howard Bank N.A., and Woodstock National Bank. Banknorth Group Inc. common stock is traded on the NASDAQ National Market System under the symbol BKNG. Information published prior to Dec. 1, 1989 does not relate to the new BKNG stock.

#90205b0887 07/24/1990 ~Business Wire

GREENVILLE, SC (JULY 24) BUSINESS WIRE - American Federal Bank (NASDAQ:AMFB) announced Tuesday second quarter net income of $1.4 million compared with $2.7 million in the second quarter a year ago.

Earnings per common equivalent share were 28 cents and, after giving effect to the fully dilutive provisions of the preferred stock, were 21 cents.

Roy Abercrombie, president and chief executive officer, said, ''The higher earnings last year resulted from unusual gains on the sale of investments and real estate. After removing the gains on sales in both years, net

income in the second quarter of 1990 was actually $1.5 million higher than in 1989.

''Lower interest rates and an increase in earning assets this year resulted in a higher net yield on earning assets of 3.56 percent, compared with 3.07 percent in 1989.''

During the second quarter of 1990, the bank converted $13.7 million of subordinated debentures into permanent, nonvoting, preferred stock. This transaction increased stockholders' equity and decreased liabilities. It also improved net interest income in the quarter by $373,000.

Abercrombie stated the bank has been successful in reducing general and administrative expenses by $365,000 compared with the second quarter of 1989. The provision for possible loan losses was increased by $429,000 this quarter over the same period in 1989. The allowance for possible loan losses and percentage of nonperforming loans have not changed significantly from their Dec. 31, 1989 levels.

Net earnings and conversion of debentures increased stockholders' equity by $15.7 million in the first six months of 1990. On July 10 the bank announced its intention to sell the receivables of its consumer finance company subsidiary. Completion of the sale is anticipated in the third quarter for a pre-tax gain of approximately $3 million.

''The sale of these receivables will not impact our consumer lending activity,'' Abercrombie said. ''Consumer loan outstandings at June 30 of this year have increased 19 percent over the same period of 1989.

''Mortgage production in our market area is also 15 percent ahead of the first half of last year, while commercial loan production has been slower in 1990. Economic conditions in the Upstate have remained stable and continue to provide ample support for our strategy of modest buy steady asset growth,'' Abercrombie said.

American Federal, whose common stock is traded on the over-the-counter market under the NASDAQ symbol AMFB, has $1.1 billion in assets and operates through 34 offices across eight counties of northwestern South Carolina.

DENVER (JULY 24) BUSINESS WIRE - Apscore North America, a subsidiary of East Hanover, N.J.-based The Ultimate Corp. (NYSE:ULT), Tuesday announced

that it has signed a three-year agreement with San Diego, Calif.-based DataWorks Corp. for Apscore's pacesetting CUE-BIC software environment.

DataWorks is a major developer and reseller of Pick/UNIX- and Pick-based manufacturing systems with installations of its widely renowned software in over 150 locations in the United States, Canada, Mexico, the United Kingdom, Australia, Hong Kong and Singapore.

According to the announcement made by Ultimate Professional Services Division Senior Vice President Rick Dool, DataWorks will use CUE-BIC to re-engineer and re-package its entire family of manufacturing vertical-market applications and software products.

''Apscore's CUE-BIC is an important part of Ultimate's strategy to provide a broad range of software and services to end users and dealers throughout the Pick and Pick/UNIX markets. We are committed to maintaining and supporting the portability of CUE-BIC across a wide range of hardware platforms and operating-system implementations.

''We are aggressively expanding our sales and support resources for CUE-BIC throughout North America and we are vigorously pursuing a strategy of extending CUE-BIC's market reach to include dealers and users of computer-systems solutions supplied by companies other than Ultimate.

''This agreement with DataWorks represents an important milestone for our company in the implementation of that strategy,'' Dool said.

He concluded by saying, ''We are confident that CUE-BIC, with its advanced fourth-generation language and fully integrated software environment, will provide DataWorks with significant benefits in meeting the current and future demands of its markets and customers.''

Stuart W. Clifton, president of DataWorks, said, ''As we move aggressively into the 90s, it is essential that our products continue to cost-effectively address the changing needs of the manufacturing markets.

''CUE-BIC is the only comprehensive software environment we found that provides us the means to accomplish this task without requiring a major investment in time, software development and support resources.

''It includes an easy-to-use and powerful fourth-generation language that incorporates a complete suite of development tools, computer-security functions, as well as an elegant and simple user interface to applications and operating software. With CUE-BIC we are able to easily integrate PC-like graphics and SAA-based pull-down menus into our applications.

''I am convinced that CUE-BIC will provide us a decided competitive advantage, increase customer productivity and reduce our development,

training and support costs.''

Apscore North America provides, in addition to its CUE-BIC operating environment, fourth-generation and development tools, a family of value-added software products including word processing, security, office automation, novice-user tools and batch processing.

#90205b0896 07/24/1990 ~Business Wire

HOUSTON (JULY 24) BUSINESS WIRE - Pogo Producing Co. (NYSE:PPP) reported Tuesday a net loss for the quarter ended June 30 of ($3,146,000), or (13 cents) per share, on revenues of $25,660,000.

This compares to a loss of ($1,067,000), or (5 cents) per share, on revenues of $30,139,000 for the second quarter of 1989.

William C. Liedtke Jr., chairman of the Houston-based oil and gas exploration and development company, commented that, ''We have had a good quarter despite lower oil and gas prices. During the second quarter we more than replaced reserves produced, significantly lowered debt and increased our cash flow.

''We also lowered interest charges and increased the company's daily delivery capacity. Unfortunately, lower prices resulted in the loss this quarter.''

Crude oil and condensate prices received by the company in the second quarter averaged $17.83 per barrel and natural gas prices received averaged $1.67 per Mcf (thousand cubic feet) compared to average prices of $20.03 and $1.87 for these products, respectively, for the 1989 second quarter.

Pogo's interest charges were reduced significantly from the $9,875,000 incurred during the second quarter of 1989 to $8,088,000 for the quarter just ended. The company's total debt and production payment obligations have now been reduced to approximately $286 million, down sizably from the peak of $515 million the company's total debt reached in 1986.

The company reported total liquids production for the second quarter of 1990 was at an average of 6,511 barrels per day. Last year's second quarter average daily liquids production was 7,263 barrels per day. Natural gas production for the company for the company for the quarter just ended averaged 100 million cubic feet per day compared to 105 million cubic feet per day for the 1989 quarter.

The operator is now preparing to install the production equipment on the platform and we anticipate having this field on stream in August of this year. The operator plans to initially produce the field at approximately 70 million cubic feet of gas per day plus attendant crude oil and condensate. Pogo holds a 25 percent working interest in South Timbalier 198.

In addition to the successful operations at South Timbalier 198, other operations offshore and in several South Texas and West Texas areas met favorable results.

The company and its joint venturers drilled and set casing in another successful step-out well at the Neff Prospect in Eddy County, N.M., and is now completing the ninth well on this prospect. These two new wells are testing at approximately 100 barrels of oil per day from the Brushy Canyon formation.

Pogo has 25 percent to 100 percent working interest in this area and additional drilling is being planned for the company's extensive offsetting acreage. In the Northeast Loving Prospect, also in Eddy County, two additional wells have proven to be productive. The Siebert No. 1 and the Caviness-Payne No. 1 have tested at 295 and 180 barrels of oil per day, respectively.

A new well should be spud this week. Pogo has between nine percent and 98 percent working interests in the Northeast Loving leases and its overall interest in the prospect averages approximately 33 percent.

The Ramirez No. 2 well at Lopeno Field (Pogo 50 percent) in Zapata County, Texas, has been drilled this quarter and has logged 50 feet of pay in three sands which are now being tested. The Pogo chairman reported that a new well at Lopeno Field, the Ramirez No. 3, is now drillling ahead to test deeper Wilcox and Roleta sands.

Liedtke also reported that the programs previously announced for developing proven and probable reserves and increasing production from existing offshore fields are already showing excellent results. Pogo and its joint venturers drilled the ''C'' 19 development well at Eugene Island Block 330 where Pogo has a 35 percent working interest. This well logged 145 feet of oil sand and 13 feet of gas sand.

The No. 11 step-out wildcat well was also drilled at Eugene Island 330 and has logged 46 feet of oil sand and 103 feet of gas sand. Both of these wells should be completed for production soon.

At West Cameron Block 202 the company has increased daily gas production and found additional gas reserves. The A-4 was drilled this quarter as an exploratory well into an untested fault block at West Cameron 202. It has tested 2.6 million cubic feet of gas per day in one zone and more is expected as testing continues. Pogo holds 37.5 percent working interest in the A-4 well and 25 percent interest in the remainder of West Cameron 202.

The Pogo chairman also mentioned that the company's budget was increased this year to $50 million from last year's actual figure of $29.1 million and that becuase of its significant debt reduction efforts, the company is applying to drilling the increased cash flow resulting from lower interest charges.

WINDSOR, CT (JULY 24) BUSINESS WIRE - ADVO-System Inc. (NASDAQ:ADVO) reported net income for its fiscal year 1990 third quarter (ending June 30 1990) of $5.9 million, or 34 cents per share, on record revenues of $166.6 million.

For the comparable quarter of fiscal 1989, the company earned net income of $5.4 million, or 32 cents per share, on revenues of $157.8 million.

Operating income for the third quarter was $8.4 million, a 48.2 percent increase over that reported for the comparable period in 1989. This was achieved on increased revenues of $8.8 million, 5.6 percent higher than the third quarter of 1989.

The provision for income taxes during the third quarter represented a 34 percent effective rate, vs. a 7.8 percent rate during the comparable period of 1989, which included tax benefits resulting from the prior quarters' operating losses.

Robert ''Kam'' Kamerschen, ADVO's chairman and chief executive officer, said ''Our third quarter operating income of $8.4 million is particularly encouraging as it represents a significant increase over the comparable period in 1989. These results were achieved in spite of a sluggish retail advertising environment and overall soft economic conditions.

The company also stated that the average of 6.85 pieces of shared mail per package mailed represented a 4.6 percent increase over the prior year. Average shared mail revenue per thousand packages was $237.44, 3 percent above that for the third quarter of 1989. In addition, during the third quarter, 675.1 million packages were mailed, up 3.4 percent over the prior year.

ADVO is the nation's largest company specializing in Direct Mail and Direct Mail Marketing services. The company's brand of shared mail,

Marriage Mail and Mailbox Values, are distributed nationally to over 52 million households weekly. ADVO also processes Solo mailings and offers limited printing and transportation services. It has 20 production facilities and 69 sales offices nationwide. ADVO's Corporate headquarters are located at One Univac Lane, Windsor, Conn., 06095.

MAYAGUEZ, Puerto Rico (JULY 24) BUSINESS WIRE - Miguel A. Garcia-Mendez, Esq., president of Western Federal Savings Bank, (NASDAQ:WFPR) reported that the bank's net earnings after taxes for the quarter ended June 30, 1990 amounted to $1,202,449, or 79 cents per share.

This is a 26 percent increase on the Bank's operational income as compared to the same quarter last year, which amounted to $1,509,336 or 97 cents per share. Such earnings include principally operational income, as no sales of securities has been made during 1990. For the comparable period in 1989 net income included a non recurring gain of $554,541 on sale of securities.

For the six months ended June 30, 1990, the bank's net income was $2,415,191 or $1.58 per share, as compared with net income of $3,518,800 or $2.27 per share, for the similar period in 1989; however, during that period there were non-recurring gains on sale of securities, amounting to $1,186,541.

Reserve for possible loan losses were increased to 1.90 percent of all consumer, commercial and credit card loans.

Western with total assets amounting to $531,420,000 operates from 23 full service branches, mainly located on the Western, Southern and Northeastern regions of Puerto Rico.

LOUISVILLE, KY (JULY 24) BUSINESS WIRE - The Churchill Tax-Free Fund of Kentucky, named by Business Week as the nation's best performing tax-free municipal bond mutual fund during 1989, has surpassed $50 million in size.

The open-end mutual fund, composed entirely of municipal bonds issued by state and local governments in Kentucky, was founded three years ago. It currently has more than $54 million in assets, and is growing at the rate of approximately $2.5 million per month.

More than 1,700 Kentuckians are shareholders in the mutual fund.

The Fund has provided capital to about 250 separate projects in Kentucky, including the initial funding for the Toyota manufacturing plant in Georgetown, the Greater Cincinnati Airport expansion in northern Kentucky,

and construction at the University of Louisville and the University of Kentucky.

Citizens Fidelity Bank and Trust Co. of Louisville manages the investment portfolio of the Churchill Tax-Free Fund, while Aquila Management Corp. serves as the sponsor and administrator of the Fund.

SAN MATEO, Calif. (JULY 24) BUSINESS WIRE) - San Mateo County National Bank has announced the acquisition of Peninsula Federal Savings, a south San Francisco-based savings and loan association.

The transaction, completed on June 25, 1990, involved the acquisition of approximately $35 million in assets from the Resolution Trust Corp. (RTC) - federal agency charged with managing unsuccessful savings institutions.

The two offices of Peninsula Federal, including a Santa Rosa location, were converted to banking offices of San Mateo County National Bank.

Bank president, Leo Taylor, sees the bank's new acquisition ''as an opportunity to acquire significant deposits for future growth with a small investment - all at a minimum risk to the bank.''

''We are optimistic about the potential of this transaction,'' said Taylor ''it will take time for us to fully digest this acquisition but we are excited about the broadened customer base. While our earnings will be impactd in the shortrun, we anticipate the expanded deposit base will generate continued loan growth and greater future earnings,'' he said.

After the June 25 acquisition, the combined assets of San Mateo County National Bank stood at $60 million. Headquartered in San Mateo, the 4-year-old bank also has a branch office in San Carlos.

Taylor also noted that recent reports from three independent bank rating services placed San Mateo County National among the safest performing banks in the United States.

MANHASSET, NY (JULY 24) BUSINESS WIRE - Macintosh News, the newspaper for Mac resellers, integrators and developers, will be merged back into its sister publication, Computer Reseller News (CRN), on August 6th publisher CMP Publications Inc., announced Tuesday.

CMP, which recently announced the introduction of Network Computing, the first magazine devoted execlusively to the use of networked computers to solve business problems also reported that the company's first half sales results for the period ending June 30 were up by 18 percent over the same period in 1989.

A company spokesperson said the majority of Macintosh News' 22 member staff will be placed elsewhere in the CMP publishing organization, primarily within CRN.

According to Ken Cron, vice president and group publisher, the decision to integrate the two publications is based on important changes in the Macintosh market.

''In recent months, we've seen a covergence of Mac technology into mainstream PC environments. This resulted in an overlap of their respective distribution strategies, which caused us to rethink how we can best serve the important reseller market.''

Jeffrey Strief, publisher of both Computer Reseller News and Macintosh News, said ''Since its first issue in Spetember 1988, Macintosh News created a very strong identity in the market and we expect to transfer that strength into CRN, which will significantly enhance its Mac coverage and commitment to the Macintosh industry.''

CMP Publications Inc., with 1989 sales of $157 million, is a leading business-to-business publisher. The company publishes 14 newspapers and magazines covering the high technolgoy, travel and health markets.

ROCHESTER, NY (JULY 24) BUSINESS WIRE - Gleason Corporation (NYSE: GLE) Tuesday reported income from continuing operations for the second quarter ended June 30, 1990, of $1,042,000, or $.18 per share, on sales of $48,470,000, compared with $3,666,000, or $.64 per share, on sales of

$42,699,000 for the 1989 second quarter.

Net income for the second quarter was $1,756,000, or $.30 per share, compared with $10,450,000, or $1.83 per share, for the 1989 second quarter. Net income for the 1989 second quarter included a gain of $7,725,000, or $1.35 per share, on the sale of the company's Power Systems Division (Torsenr).

For the six months ended June 30, 1990, the company reported income from continuing operations of $1,631,000, or $.28 per share, on sales of $83,258,000, compared with $3,009,000, or $.53 per share, on sales of $74,479,000, in 1989. Net income for the six months was $21,772,000, or $.48 per share, compared with $8,926,000, or $1.56 per share, in 1989.

The company ended the second quarter with a backlog of $140.6 million compared with $112.9 million at the end of the 1989 second quarter and $137 million at year-end.

Second-quarter results for continuing operations were lower compared with 1989 due to lower margins on products shipped and increased selling expenses. Sales overall increased due to higher shipments of gear production machines.

Sales of tooling were down from last year principally due to lower U.S. automotive production. Selling expenses increased because a large percentage of second-quarter shipments were made to overseas customers where dealer commissions are paid.

The company's Components Group operations for which the company is currently seeking buyers, showed better operating results for the quarter compared with a year ago. Its largest division, Pennsylvania Pressed Metals, accounted for most of the improvement, as both sales and operating profit for that division increased significantly over 1989 levels.

James S. Gleason, chairman and president, said he expects operating results for continuing operations to be substantially higher in the second half of 1990 compared with the first half, but that income from continuing operations for the full year would be less than in 1989.

The company's board of directors today declared a quarterly dividend of $.05 per share, payable on Aug. 24, 1990, to stockholders of record on Aug. 10.

Gleason Corporation is a world leader in gear production equipment.

#90205b0924 07/24/1990 ~Business Wire

SKOKIE, Ill. (JULY 24) BUSINESS WIRE - Bell & Howell Company's 1990 second quarter sales from ongoing operations increased 13 percent to $147.2 million compared to $130.1 million in 1989, while the net loss was $4.4 million versus a loss of $10.1 million for the similar period last year.

1990 year-to-date sales from ongoing operations of $294.7 million represents a 14 percent increase over the prior year, with a net loss of $10.1 million, which represents a significant improvement over 1989 which showed a loss of $29.3 million.

William J. White, Chairman and Chief Executive Officer, said the 1990 earnings improvement resulted from sales growth in all business segments, improved operating expense leverage, as well as lower interest expense as proceeds of asset sales have been used to reduce debt.

BURLINGTON, MA (JULY 24) BUSINESS WIRE - John F. Reno, executive vice president and chief operating officer of Dynatech Corp. (NASDAQ:DYTC), Tuesday announced the appointment of William W. Welsh Jr. to the newly created position of corporate vice president for international business

development.

A 28-year veteran of Dynatech, Welsh most recently served as group vice president of the Medical and Diagnostic Products Group. Welsh began his career with Dynatech as a marketing manager, and later served as president of Cooke Engineering Co., a subsidiary now known as Dynatech Laboratories Inc.

Reno commented: ''Given the recent and ongoing developments in Europe and elsewhare around the world, Dynatech is seeking to expand its international presence. Bill Welsh's experience in building Dynatech's medical business, both in the U.S. and in Europe, make him extremely qualified to spearhead our strategic activities in the international marketplace.''

With fiscal 1990 sales of $433 million, Dynatech Corp. is a diversified supplier of high-technology products and systems used in the collection, processing, analysis and display of information. Headquartered in Burlington, Dynatech sells its products worldwide through subsidiaries located throughout North America, Europe and Asia.

BURLINGTON, Mass. (JULY 24) BUSINESS WIRE - John F. Reno, executive vice president and chief operating officer of Dynatech Corp. (NASDAQ symbol:DYTC), announced the appointment of John R. South to the position of Division Executive in charge of Dynatech's Medical and Diagnostic Products Division.

South succeeds William W. Welsh Jr., who was recently named corporate vice president for International Business Development for Dynatech.

Prior to joining Dynatech, South served as vice president and regional general manager with Smith Kline Beecham Clinical Laboratories. Previously, he was vice president and general manager of the Fluid Handling Division at GRACO Inc., where he also served as general manager - Europe and as U.S. marketing manager. Earlier in his career, South held sales and marketing positions with Johnson & Johnson and Smith Kline.

South holds and M.B.A. from the Amos Tuck Graduate School of Business at Dartmouth College and a B.A. from Brown University.

Reno commented: ''I strongly believe John's background and experience is particularly well suited to the current and future opportunities facing

the medical and diagnostic area of Dynatech's business.''

With fiscal 1990 sales of $433 million, Dynatech Corp. is a diversified supplier of high-technology products and systems used in the collection, processing, analysis, and display of information. Headquartered in Burlington, Mass., Dynatech sells its products worldwide through subsidiaries located throughout North America, Europe and Asia.

NEW ORLEANS (JULY 24) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE: FRP), an affiliate of Freeport-McMoRan Inc. (NYSE: FTX), today reported second-quarter 1990 net income of $82,166,000 or $1.00 per unit on an average 82,337,000 units outstanding compared with second-quarter 1989 net income of $57,739,000 or 71 cents per unit on an average 80,914,000 units outstanding.

Second-quarter 1990 net income reflects a net gain from restructuring activities, including the sale of Korean assets, of $61,553,000 after Korean taxes.

Revenues during the second quarters of 1990 and 1989 totaled $203,579,000 and $317,419,000, respectively. For the first six months of 1990, net income was $191,123,000 or $2.33 per unit on an average 82,200,000 units outstanding compared with net income of $99,094,000 or $1.23 per unit on an average 80,709,000 units outstanding during the first six months of 1989.

Net income for the first six months of 1990 included gains totaling $162,483,000 from the sale of assets, net of related restructuring expenses and Korean taxes. Revenues for the six months ended June 30, 1990 and 1989, totaled $425,770,000 and $586,350,000, respectively.

Second-quarter 1990 cash to be distributed to unitholders totals approximately $50 million and includes cash flow from operations and certain proceeds from the sale of assets. On July 20, 1990, FRP declared a cash distribution for the second quarter of 1990 of 60 cents per unit, payable on August 15, 1990, to unitholders of record on July 31, 1990.

In April, Freeport-McMoRan Inc. extended for two years the period for priority quarterly cash distributions of 60 cents per unit on publicly held FRP units, or through the second quarter of 1993. That period was originally scheduled to conclude at the end of the second quarter of 1991.

NEW ORLEANS (JULY 25) BUSINESS WIRE - Freeport-McMoRan Oil & Gas Company (NYSE:FMP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), today reported second-quarter 1990 net income of $7,755,000 or 6 cents per share on an average 124,341,000 shares outstanding compared with second-quarter 1989 net income of $4,445,000 or 4 cents per share on an average 105,525,000 shares outstanding.

Second-quarter 1990 net income included other income of $10.4 million, before taxes, primarily from the settlement of a natural gas contract dispute. Pretax international exploration expenditures charged to earnings during the second quarters of 1990 and 1989 were $3,248,000 and $583,000, respectively. Second-quarter 1990 and 1989 revenues totaled $53,184,000 and $67,415,000, respectively.

For the first six months of 1990, net income was $8,857,000 or 7 cents per share on an average 120,947,000 shares outstanding compared with net income of $19,629,000 or 19 cents per share on an average 103,586,000 shares outstanding during the first six months of 1989.

Net income for the six months ended June 30, 1990 and 1989, included other income, before taxes, of $11.5 million and $9.5 million, respectively, primarily from natural gas contract settlements. Revenues during the six months ended June 30, 1990 and 1989, totaled $110,278,000 and $143,918,000 respectively.

On March 30, 1990, FMP succeeded to the business of Freeport-McMoRan Energy Partners, Ltd., and to the ownership of McMoRan International Inc., McMoRan Pipeline Company, and FMI Gas Corporation, which were previously affiliates of Freeport-McMoRan Inc. As a result of the restructuring, Freeport-McMoRan Energy Partners was liquidated, and its unitholders received an equivalent number of FMP common shares.

Financial results for all periods have been restated to reflect this restructuring of FMP from a master limited partnership into a corporation, which was designed to meet the demands of a changing marketplace and to maximize the company's underlying long-term oil and natural gas asset values.

ORANGE, Calif. (JULY 24) BUSINESS WIRE - Orange National Bancorp, parent company of its only subsidiary, Orange National Bank, completed the first six months of 1990 with total revenue of $8.1 million, a 1.5-percent increase over the $8 million posted in the comparative 1989 period.

Earnings for the first six months of 1990 were $218,000, a decrease of 70.1 percent from the previous year's first six-month figure of $728,000.

Wayne F. Miller, president and chief executive officer of Orange National Bancorp and Orange National Bank, stated that earnings for the first six months were impacted for three basic reasons:

-- On Jan. 1, 1990, the bank aggressively launched its new five-year plan, which called for the opening of its fourth office in the East Orange area, and the expansion of the bank's organizational structure by adding Branch and Office Administration Human Resources and Business Development and Quality Control groups. ''These decisions were necessary in order to position the bank to meet the competitive challenges within the industry and our marketplace in the 90s,'' stated Miller.

-- The margins between interest earned on loans and investments and interest paid on deposits narrowed during the first six months of 1990. In this respect, margins decreased by an average of 75 basis points from the first six months of 1989 versus the first six months of 1990. Miller noted, ''This phenomenon was basically caused by a lower prime rate and increased utilization of interest-bearing money-market accounts for businesses and individuals alike. The reduction in interest margins is a common trend that is affecting the banking industry.''

-- Management of the bank made a decision to charge-off a lease credit in the amount of $978,000 that has been a non-performing asset since February of 1989. ''This lease credit was a lingering problem and we wanted our balance sheet and earnings statement to be truly reflective and presented in a most conservative manner,'' Miller stated. ''Litigation and other courses of action are currently in process with a strong possibility of recovery at a later date,'' he said.

During the second quarter, Bancorp revenue was $4.1 million, a $14,000 increase from the comparative 1989 quarter. Because of the $567,627 allocated to loan-loss reserve, the company recorded a second- quarter loss of $28,604, compared with earnings of $339,937 reported in the second quarter of 1989.

Total shareholders' equity -- excluding loan-loss reserves -- for the

first six months increased 7 percent to $10.7 milion from $10 million for the first six months of 1989. As of June 30, 1990, the bank's capital-adequacy ratio was 7.5 percent, well in excess of the minimum regulatory requirement.

On June 30, 1990, total assets had increased to $168.5 million, or a 10.4 percent increase, from last year's figure of $152.6 million. Deposits grew to $152.7 million, an 11.3 percent increase, compared with $137.2 million in June 1989. Net loans increased slightly to $100.6 million from $99.6 million a year earlier. Non-performing loans were only $127,800, or 13 percent of total loans outstanding.

Orange National Bank is entering its eleventh year as an independent, full-service commercial bank with four offices located throughout the greater Orange area. The bank's corporate offices are located at 1201 E. Katella Ave.

STAMFORD, CT (JULY 24) COMTEX - A shareholder of Caterpillar Inc. has filed a purported class action suit against the Peoria, Ill., farm equipment manufacturer and several of its top officers, claiming they violated federal securities in financial disclosures.

The suit, filed July 18 in federal court in Chicago, claims that Caterpillar released false and misleading statements relating to Caterpillar Inc.'s Brazilian operations, its factory modernization program and the adequacy of management information systems.

The suit was detailed in a Securities and Exchange Commission filing.

The company said it believes the allegations are without merit and plans to defend itself against the suit.

This 8-k Filing was submitted to the Securities and Exchange Commission on JULY 23, 1990

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 24) COMTEX - Futures industry officials lobbying against the Bush administration's bill to transfer certain regulatory control from the Commodity Futures Trading Commission to the Securities and Exchange Commission received a boost from two senators today.

"The stock market did not decline yesterday because of stock index margin levels," said Sen. Alan Dixon (D-Ill.), referring to an early morning plunge of over 100 points in the Dow Jones Industrial Average, which partially recovered to close down 56 points. "Rather, it was because of news - poor corporate earnings, interest rate fears and the growing consensus the market is overvalued."

"No evidence has been presented that stock index futures have any impact on market volatility," said Sen. Phil Gramm (R-Texas), whose wife Wendy, is head of the CFTC.

Sens. Dixon and Gramm are outspoken opponents of the bill, which would transfer jurisdiction of stock index futures from the CFTC to the SEC, grant oversight of margins, the good faith money needed for trading, to the SEC and modify a clause in the Commodity Exchange Act to allow any product with futures and stock characteristics to trade in either market.

Treasury Secretary Nicholas Brady, along with SEC Chairman Richard Breeden are leading the administration's fight for passage, arguing the legislation is needed to prevent market volatility, restore individual investor confidence in the market, and prevent manipulation and fraud in transactions between the stock and futures markets.

Wall Street officials testified before the Senate Banking Committee two weeks ago to support the measure and today their counterparts from Chicago's LaSalle Street appeared before the panel to argue against its

enactment.

"The administration's bill would do severe injustice to the regulatory structure for futures markets," said Leo Melamed, chairman of the Chicago Mercantile Exchange. "Rather than cause minimum disruption to the markets as the Treasury asserts, this bill is likely to cause untold regulatory and trading problems."

"We think since futures margins are not broken, there is no need to fix them," said William Seale, president of the National Association of Futures Trading Advisors.

SEC Chairman Breeden, testifying before the Senate Banking Committee last week, complained about the low margin levels of the stock index markets and said, "You can't treat the system. You go to the source of the disease -- 98 percent leverage in the stock index market."

Stock index futures allow investors to bet on the movement of a basket of stocks without buying the actual securities. Through computerized trading strategies, investors attempt to profit from the differences in the price of futures contracts on stock indexes and the corresponding stocks.

Twenty four agricultural groups recently sent a letter to the Senate Banking Committee opposing the bill, fearing the legislation would create "regulatory chaos" and endanger commercial market liquidity by requiring federal regulators to set margins.

"We view changing oversight of stock index futures to have grave implications for all futures contracts," said Dean Kleckner, president of the American Farm Bureau Federation. "Any attempt to lessen CFTC authority and credibility will diminish the CFTC's ability to regulate the futures markets."

"The Treasury-SEC bill is bad for agriculture and we believe bad for America," added Robert Petersen, president of the National Grain Trade Council.

LONDON (JULY 24) - The dollar gave ground Tuesday on foreign exchanges despite reports of troop movements along the border between Iraq and Kuwait.

The fall in share prices on Wall Street also helped to weaken the dollar as dealers waited to hear what words of wisdom Federal Reserve chairman Alan Greenspan had to offer congress later in the day.

The pound also gave ground following statements by Chancellor of the Exchequer John Major that inflation in Britain would fall only slowly.

The dollar closed at 1.6190 Deutsche marks against 1.6275 Monday, 1.3725 Swiss francs (1.3865), 5.4330 French francs (5.4575) and 148.35 yen (148.40).

The pound closed at 1.8250 dollars against 1.8215 Monday, 270.73 yen (270.31), 2.9547 Deutsche marks (2.9645), 2.5048 Swiss francs (2.5255), and 9,9152 French francs (9.9408).

Gold rose to 369 dollars an ounce from 368.25.

The three-month Eurodollar rate was unchanged at 8.062 percent while the British interbank rate was 14.9375 percent.

In Frankfurt the dollar closed at 1.622030 Deutsche marks against 1.624050 at the opening.

In Zurich the dollar closed at 1.3830-1.3840 Swiss francs against 1.3895-1.3905 at Monday's close. Gold was unchanged at 367-370 dollar an ounce.

Moscow (JULY 24) - The Soviet Union is to shift its plan-guided barter-style trading arrangements with Comecon nations onto a cash basis at world prices from the start of next year, according to a Tuesday evening decree from Soviet President Mikhail Gorbachev.

The shift to trade in convertible currencies practically means the abolition of Comecon in its existing form. The Soviet Union is bigger than all the other members combined and is believed to have effectively subsidised Comecon's operations since it was set up.

The decree, reported by the Soviet news agency Tass, instructs the Soviet government to prepare the conversion to the new trading mechanisms. The Supreme Soviet, the country's parliament, is to pass the appropriate laws.

The basis of the changes will be the ''transition to a market economy, a course towards openness and wider participation in world economic relations and a real assessment of the social-economic and political changes that have taken place in the Comecon states and in the entire world'', the Tass report said.

The Council for Mutual Economic Assistance was founded in 1949 and groups Bulgaria, Cuba, Czechoslovakia, East Germany, Hungary, Mongolia, Poland, Romania, the Soviet Union and Vietnam in a cashless trading system where the value of trade is laid down in advance.

Tuesday's decree also lays down an alteration in Moscow's economic links with the Third World, saying they are to be based in future on mutual advantage and common interests. Development aid for developing nations in future is to be oriented to the Soviet Union's capacities.

NAIROBI (JULY 24) - Kenya has asked Scotland Yard detectives to return here to pursue investigations into the 1988 murder of British tourist Julie Ward in a Kenyan game park, Kenyan Attorney-General Matthew Muli said Tuesday.

The charred body of Miss Ward, 28, was found in the Masai Mara game park in south-western Kenya in September 1988.

Kenyan police said she had been killed by wild animals, but her father John Ward fought for an inquest, which in October last year ruled that she was murdered.

Detective-Superintendent Graham Searle and Detective-Inspector David Shipperlee of Scotland Yard's International and Organised Crime Branch came here in February to assist Kenyan police. In March two rangers were held for questioning but released for lack of evidence.

The two detectives gathered substantial forensic evidence in Kenya, which they took back to London and wrote a report submitted to Kenyan authorities about two months ago.

NAIROBI (JULY 24) - Ethiopian rebels have refused to allow a U.N-chartered boat into the northern port of Massawa, which fell to the rebels in February, a World Food Programme (WFP) official said Tuesday.

The secessionist Eritrean People's Liberation Front (EPLF) had failed to authorise a boat carrying four U.N. experts to enter Massawa, which has been closed to relief efforts since the rebels captured it, said the official, contacted at the WFP's Rome headquarters by telephone from here.

The experts were to have assessed the condition of the port in a bid to reopen it for food shipments to victims of famine and civil war.

Ethiopian government forces have repeatedly bombed the Red Sea port, but according to Western diplomats in Addis Ababa it is still useable.

The government and the rebels had both said they would allow Massawa to be used for humanitarian relief in the north-eastern province of Eritrea, which has suffered 29 years of civil war and repeated famine in recent years.

"The boat left the Red Sea port of Djibouti on July 14 and sailed to a point north-east of Massawa to wait for permission to enter Massawa," the WFP official said. "Permission was never given."

The WFP will continue efforts to reach agreement with rebels and the Ethiopian government to reopen Massawa to food aid, the official said.

WASHINGTON (JULY 24) - The Vietnamese-U.S. talks on Cambodia announced by Secretary of State James Baker last week as part of a revised U.S. policy will begin in New York on August 6, the State Department said Tuesday.

Department spokeswoman Margaret Tutwiler said U.S. Deputy Assistant Secretary of State for East Asian and Pacific Affairs Kenneth Quinn would meet with Vietnam's chief United Nations representative at Hanoi's mission in New York, Trinh Xuan Lang.

She added that there would be no broadening of the agenda, which is to focus on ways to bring about a U.N.-mediated settlement between the Hanoi-backed Phnom Penh Government and the tripartite resistance coalition led by Prince Norodom Sihanouk.

Several members of Congress have urged President George Bush's administration to use the talks with Hanoi to discuss normalizing bilateral relations and steps to stop Vietnam's refugee exodus.

Miss Tutwiler said the New York meeting had been scheduled so that it would take place after Mr. Baker meets his counterparts from the Association of Southeast Asian Nations (ASEAN) in Jakarta later this week. Washington wants to get the views of the ASEAN six -- Brunei, Indonesia, Malaysia, the Philippines,

Singapore and Thailand -- ahead of the talks with the Vietnamese, she noted.

In Jakarta, Mr. Baker is expected to face criticism of the new U.S. policy on Cambodia under which Washington also decided to withdraw its diplomatic recognition of the tripartite Cambodian resistance.

Washington said the shift was aimed at preventing the Khmer Rouge, the dominant military force in the U.N.-recognized Cambodian resistance coalition,
from returning to power.

ASEAN is the main backer of the coalition which links the communist Khmer Rouge, accused of genocide during their 1975-1979 rule, with two

non-communist groups.

LAGOS (JULY 24) - Three Nigerian naval vessels left here Tuesday to evacuate Nigerians from Liberia where rebels of the Liberian National Patriotic Front are fighting to oust President Samuel Doe, the official News Agency of Nigeria (NAN) reported.

The evacuation is in keeping with government pledge that it would evacuate its citizens from Liberia if the need arose, observers noted.

The announced departure of the ships follows intensified fighting near the capital Monrovia and reports of refugees streaming across the border into neighbouring Sierra Leone.

The ships, which are expected to reach Liberia in about 24 hours, could also give assistance to nationals of some other friendly countries, a naval spokesman said.

TOKYO (JULY 23) - All Nippon Airways Co. Ltd. (ANA), Japan's second largest airline, hopes to start flying twice a week between Tokyo and Japan on October 4.

ANA has applied to the transport ministry, and expects to obtain official approval soon, following an agreement reached last November between the French and Japanese civil aviation authorities.

Paris will be ANA's second European destination, after a Tokyo-London link opened in July 1989.

Flights will leave Tokyo and Paris every Thursday and Sunday.

Japan and France agreed last November to introduce four extra weekly links between the two countries, increasing passenger capacity by 20 per cent.

The Japanese authorities decided to award the new routes to ANA rather than Japan Airlines (JAL), which had previously held a monopoly on flights from Japan to France.

#90205d6580 07/24/1990 ~French/German News Agency

TOKYO (JULY 24) - Japan has offered to cut tariffs on between 70 and 80 tropical products ranging from rubber goods to rattan furniture by around 34 per cent, an International Trade and Industry Ministry official said Tuesday.

The proposal was put to the tropical products negotiating commitee of the General Agreement on Tariffs and Trade (GATT) last week and follows last year's move to cut tarrifs on 180 tropical items, the official said.

Some of those items are subject to further cuts but most of the products on the latest list were not affected by the previous cuts, he added.

The new cuts are aimed at developing nations, particularly the Association of Southeast Asian Nations (ASEAN) which has close trading ties with Japan.

Tropical products are one of the 14 areas under review in the so-called Uruguay Round of talks between GATT members to liberalise global trade. Others include agriculture, textiles and services.

The GATT's trade negotiations committee is currently holding a week-lomg meeting in Geneva to iron out various differences between members, especially over agriculture, before the four-year Uruguay Round expires in December.

#90205d6610 07/24/1990 ~French/German News Agency
MOSCOW (JULY 24) - Authorities in the southwest Soviet city of Bryansk have ordered water to be rationed after several tons of toxic chemicals escaped into the river Desna.

''The city of 500,000 inhabitants is supplied by underground wells and water from these sources is being rationed,'' the Soviet Tass news agency reported Tuesday.

The situation was unlikely to change ''for at least a week'', added the report.

All facilities for drawing water at the banks of the Desna were shut down Monday after leaks developed in two metal flasks containing liquid phenol-formaldehyde at the Ivotski glassworks.

Around 40 tons of the substance used in making plastics escaped and an undetermined amount was washed by rainfall into the Desna.

''Two hours after the accident the concentration of formaldehyde in the water reached 400 times the permitted level and that of phenol rose to 2,200 times the permitted level,'' reported Tass.

Police and state prosecutors have been called in to investigate the incident, said the agency.

#90205d7020 07/24/1990 ~French/German News Agency
AUCKLAND, NEW ZEALAND (JULY 24) - A New Zealand dairy plant claimed Tuesday it has produced butter with cholesterol content reduced by 97

percent.

Barry McLaggan, chairman of the Waikato Valley Cooperative which developed the process, said reducing the cholesterol level in anhydrous milkfat (pure butter fat) was believed to be a world first.

Cholesterol is blamed for heart attacks by building up in the arteries.

Mr. McLaggan said the process, which retains the taste of ordinary butter, was still being tested and he could not say when the new product would reach markets.

He said the company may use the process to reduce the cholesterol levels in other dairy products, as well as in meat fat.

"We are looking at such things as milkshakes, cheeses and milk powders, Mr. McLaggan said. "We expect to announce plans for a large scale development before the end of the year."

"We are also developing the meat extraction process. The next stage of that development will be in place early next year."

#90205d7200 07/24/1990 ~French/German News Agency

TOKYO (JULY 24) - Japan plans to set up a top-level basic science research institute called the ''Center of Excellence'' (Coe) at Tsukuba Science City, north of Tokyo, a report said Tuesday.

The Japanese Coe will create high-level basic science research capabilities, comparable to West Germany's Max Planck Institute, by inviting top-class brains from around the globe, according to Yomiuri Shimbun newspaper.

Yomiuri said the plan being considered by the Ministry of International Trade and Industry (Miti) was also aimed at appeasing criticism from foreign countries that Japan was only taking business profits without doing creative basic science research.

The scheme calls for establishing the Coe by reforming the existing institutes, including those of chemical technology, micro-organism industrial technology, high-polymer fibre material and product science.

Yomiuri said Miti intended to invite a scientist of Nobel Prize winner status to become head of the Coe and employ general institute researchers from abroad.

Housing and education facilities for foreign researchers and their family

members are to be constructed at the Science City, the paper said.

#90205d7330 07/24/1990 ~French/German News Agency

PRETORIA (JULY 24) - South Africa's official inflation rate, as measured by the Consumer Price Index (CPI), continued its slow retreat in June when for the second month running it fell below 14 percent.

The government's Central Statistical Services (CSS) said the year-on-year inflation rate was 13.6 percent in June, down from the 13.9 percent recorded in May.

Prior to May, South Africa's inflation rate had topped 14 percent for more than a year.

Economists ascribed the downward trend to the economic slowdown in response to strict policies, as well as the stable dollarrand exchange rate. They predicted that by December the inflation rate would drop to about 13 per cent.

Food prices remained the major contributor to the inflation rate. In the year to June, these prices rose by a far greater percentage than the inflation rate at 15.3 percent, CSS said.

#90205d7350 07/24/1990 ~French/German News Agency

BRISBANE, Australia (JULY 24) - An Australian firm said Tuesday it had won the contract to plan an eight billion dollar (6.3 billion U.S.) city of the future in Tokyo Bay.

Charles Aherne, business development manager at Sinclair Knight and Partners, said the firm beat European and U.S. contenders for the right to plan a city for 20,000 people complete with a golf course and fishing port on reclaimed land.

The Crescent Marina Islands project was being developed by a consortium led by Tokyu Construction Ltd. which would include the Japanese government.

"It's a vast project. It will probably be a 10-year construction period spending about eight billion Australian dollars on it," Mr. Aherne said.

"The initial planning study will be completed by the end of August this year and would involve detailing several design concepts, and identifying the environment constraints of the project."

About 25 million cubic metres (875 million cubic feet) of earth fill would

be needed to reclaim the ocean area for the project's 300 hectare (740 acre) site, Mr. Aherne said.

KUALA LUMPUR (JULY 24) - Malaysia produced 12,978 tons of tin-in-concentrates in the first five months of the year, up marginally from 12,939 tons in the same period last year, the statistics department said Tuesday.

Production in May rose to 2,556 tons from 2,509 tons in April but fell from 2,800 tons in May last year, the department said.

Malaysia imported 8,924 tons of tin-in-concentrates in the first five months compared with 9,162 tons in the same period last year.

The imports came mainly from Australia (3,692 tons), Canada (1,630 tons) and China (1,194 tons).

Exports of tin metal during the period rose to 21,661 tons from 21,231 tons previously.

The major buyers were the Netherlands (6,249 tons), Japan (4,315 tons),

the United States (3,220 tons), South Korea (1,648 tons) and Taiwan (1,087 tons).

Total tin stocks at the end of May stood at 18,602 tons compared with 18,333 tons at the end of April and 19,594 tons tons a year earlier.

#90205d7400 07/24/1990 ~French/German News Agency

LONDON (JULY 24) - Alan Bond's stake in the new British television network British Satellite Broadcasting was permanently diluted from 28 percent to 7.5 percent here Tuesday, after the troubled Australian tycoon failed to meet a deadline to find a buyer for it, a statement by BSB's four major shareholders said.

The stake had already been effectively diluted by a 450 million pound (810 million dollar) rights issue completed by the other major shareholders at the beginning of June to refinance the company.

But Bond Corporation, under threat of liquidation and in no position to take up new shares, was given an extension during which to look for a buyer.

During the period, the buyer would have had an option to take up Bond Corp's original rights, thereby recovering the 28 percent originally held by the Australian concern.

That deadline has now expired, the shareholders said, and no further extension has been granted.

BSB was given its franchise to operate in 1986, and had a start up capital of 435 million pounds (783 million dollars).

But a series of technical problems delayed the launch of the five-channel service until April this year, and created the need for a 900 million (1,620 million) package of extra finance including the June rights issue.

Satellite television is new to Britain, but BSB's rival network, Sky Television, has a one-year head start and is backed by Rupert Murdoch's powerful media empire.

BSB's four main shareholders, Granada Group, Pearson, Reed International (Britain) and Chargeurs (France) now hold 92 percent of BSB in roughly equal proportions.

The fate of Bond Corporation's 150 million pound (270 million dollar) investment in BSB represents just part of the huge problems facing the Bond Empire.

Last week in London Mr. Bond offered his resignation as chairman of his flagship company in return for bond holders' acceptance of a restructuring of the group and a moratorium on interest payments for one year, moves which Bond Corp say are vital if it is to avoid going into liquidation. Bond holders will decide its fate on August 9.

#90205d7430 07/24/1990 ~French/German News Agency

SYDNEY (JULY 24) - Australia's largest bank, Westpac Banking Corp., on Tuesday announced it would cut its prime interest rate, but economists warned rates would stay high until after the August budget.

Westpac said it would cut its main corporate interest rate by 0.5 percent to 18.25 percent, still above the 18 percent charged by Australia's three other major banks which announced cuts earlier.

Economists said that corporate interest rates were only falling in line with the Reserve (central) Bank's easing of monetary policy earlier this year.

There was little scope for more cuts, they said.

Phil O'Sullivan, economist at Barclays de Zoete Wedd Australia, said: "We had a three percent easing in cash rates and you only had prime rates down by about two percent."

Canberra, which jacked up interest rates last year to slow down economic growth, was awaiting further evidence that the policy was working before it clipped rates again.

"The next policy move of the Reserve Bank will be to ease rates. When is the question, and how much as well," Mr. O'Sullivan said.

Jeff Schubert, economist at HongkongBank Australia, said the monetary policy would not be eased until after the budget.

"Given the strength of the dollar the government would like interest rates down," he said.

"I don't think this will occur until sometime after the budget. There are still pockets of resistance in the economy."

The Australian dollar recently reached a 15-month high against the greenback of 81.10 U.S. cents. It closed Tuesday at 78.45 U.S. cents.

"The cut in prime rates we have seen are all we will get unless cash rates come down," Mr. Schubert said.

On Friday the ANZ Banking Group and the National Australia Bank said they would cut their prime rates by 0.5 and 0.25 percent respectively to 18 percent effective Monday.

The Commonwealth Bank of Australia said Monday it would cut its prime rate 0.5 percentage points to 18 percent.

#90205d7680 07/24/1990 ~French/German News Agency

MOSCOW (JULY 24) - The Soviet Union will find it harder this year to turn in an exceptionally good harvest, partly due to fuel shortages but also because of farmers' reluctance to sell to the state, press reports said here Tuesday.

Yield has been exceptionally high, well up on last year's levels in the Caucasus, the Russian Federation and Kazakhstan, the Communist Party newspaper Pravda said.

But harvesting is behind hand because of a fuel shortage, with a shortfall of 700,000 tons of fuel to operate farm machinery in various regions, it

quoted an official as saying.

These shortages "could mean the loss of 25 million tons of grain, almost as much as the Soviet Union imports," Pravda said. Moscow imported 44 million tons of grain last year.

In addition, the amount of grain sold to the state so far this season is a third below that during the same period last year, food official Alexandre Yukiche said on television Tuesday.

He gave no figure for the amount of grain bought by the state so far this year. The state had planned to buy 85.3 million tons of grain from Soviet farmers.

But Mr. Yukiche said that the level of deliveries had risen by 2.2 million tons in the space of a week.

#90205d8000 07/24/1990 ~French/German News Agency

DHAKA (JULY 24) - Hundreds of thousands of Bangladeshis who have lost their homes in monsoon floods, are being robbed of their remaining possessions by armed bandits, the authorities said Tuesday.

Local officials in the worst-hit districts of Sirajganju and Bogra said bandits armed with daggers and pistols had already made off with the tin sheeting that roofed most of the temporary shacks in the area.

The bandits, or dacoits, move around in motorboats and force villagers to hand over cattle and personal belongings, residents reached by telephone said.

Meanwhile the flood situation in the districts worsened as river water levels continued to rise, causing massive erosion in almost all the affected areas, Bangladesh Water Development Board sources said Tuesday.

Almost all the nine sub-districts of Sirajganj were flooded for the third

time this monsoon season, and speedboats were being used to ferry food and water supplies to stranded homes, officials said.

Officials continued to deny a statement by a ruling Jatiya Party MP published Monday that some 600,000 people in the area were "starving".

Shahidul Islam Khan, an MP from Sirajganj has called on the government to declare six of the nine sub-districts a "distressed area" and demanded that armed forces be deployed to tackle the situation.

Residents in Sirajganj said food was running short and that if government help did not arrive soon, local stockpiles would run out.

At least 25 people have so far died in the flooding this year across Bangladesh, and a Water Development Board (WDB) expert said the situation would worsen during the next three days.

On press reports that the floods were due to India opening its Farakka Dam on the Ganges to prevent erosion above the dam site, the expert said ''India normally keeps the gate of the dam open from May, and this is nothing unusual."

He agreed however that flood waters from India were affecting river levels.

In Bogra district where 25,000 people are affected by the flooding, the Jamuna river, now flowing 16 inches (40 centimeters) above the danger mark, continued to rise Tuesday. The rising waters threatened to paralyse operations at the two important ferry terminals of Aricha and Dauladia which connect Dhaka with north and northwestern Bangladesh, officials said.

In Jamalpur district, also in the northwest, rising waters submerged fresh areas Tuesday affecting several thousand people, officials said, but could not give immediate details.

Two new areas, western Rajshahi and central Manikganj, were hit by floods overnight, inundating low lying areas, residents said.

Bangladesh, criss-crossed by some 230 rivers, is hit by floods annually during the monsoon season, but experts have ruled out possibilities of a repeat of the 1988 deluge that killed more than 2,200 people.

Government ministers and concerned officials here were not available for comment as most were mourning the death of their colleague, Ports and Shipping Minister Korban Ali, who died Monday of an intestinal haemorrhage.

BANGKOK (JULY 24) - The Khmer Rouge has called on the international community to support the Cambodian resistance following the U.S. decision to stop recognizing the seat it holds at the United Nations.

In a statement carried by its clandestine radio station Tuesday, the Khmer Rouge called on the Association of Southeast Asian Nations (ASEAN) and other countries "to continue providing steadfast assistance and support until the Vietnamese war of aggression against Cambodia is comprehensively settled in conformity with the spirit and the principle of the U.N. charter."

The special mention to ASEAN was apparently aimed at the association's annual ministerial meeting which opened Tuesday in Jakarta.

The statement from Khmer Rouge nominal leader Khieu Samphan did not mention Washington's decision announced last week but was clearly a reaction to it.

The faction, a radical Marxist group that dominates the tripartite resistance, ruled Cambodia for nearly four years and was responsible for the deaths of hundreds of thousands of civilians.

The Khmer Rouge kept its U.N. seat although it lost power in January 1979 after Vietnam invaded the Southeast Asian country and set up a client government in Phnom Penh.

The seat was transferred in 1982 to the current resistance alliance, which also includes two non-communist groups.

Mr. Khieu Samphan said the resistance guerrillas had "achieved continuous victories in fighting against the Vietnamese aggressors for nearly 12 years to liberate the nation."

This proved the resistance was "supported by the people," he said.

The United States, which backs the non-communist guerrilla factions, said last week it was withdrawing recognition of the U.N. seat and would seek talks with Vietnam to try to prevent the return to power of the Khmer Rouge, which was making advances on the ground.

The U.S. policy shift was expected to dominate the ASEAN discussions, which are to be followed with talks with the group's "dialogue partners," among them the United States.

"Every year for 11 years, the U.N. General Assembly strongly denounces the Vietnamese Hanoi aggressors," Mr. Khieu Samphan said.

"However, the Vietnamese aggressors stubbornly continue to occupy Cambodia and to slaughter the Cambodian people every day," he added, underscoring

resistance skepticism of Hanoi's announcement in September that it had withdrawn all its forces from Cambodia.

Mr. Khieu Samphan reiterated a Khmer Rouge demand that all the Cambodian warring factions "jointly take part in the settlement (of the conflict) and jointly implement all agreements in the solution."

The Khmer Rouge rejected an agreement signed last month in Tokyo by Prince Sihanouk and Phnom Penh Prime Minister Hun Sen on the grounds that it was bilateral.

"Only with the participation of all four parties can there be a genuine national reconciliation," he said.

MOSCOW (JULY 24) - Some 400 workers at the Soviet Pacific port of Vanino, opposite Sakhalin island, held a warning strike Monday to demand the withdrawal of nuclear submarines from the bay, Interfax, a semi-independent news agency reported here Tuesday.

The employees have threatened to hold a 24-hour strike on August 23 if the submarines, on which work is being carried out, are not withdrawn, Interfax said.

Meanwhile, some 250 people demonstrated Monday outside the Balakovo nuclear power station in the Saratov region of central Russia to protest the construction of two more reactors -- the fifth and sixth -- at the plant, Interfax said.

AMSTERDAM (JULY 24) - The Netherlands national airline KLM said Tuesday its after-tax profit fell 9.09 percent in the year to March from the previous year's level, to 340 million guilder (170 million dollars).

Consolidated turnover was up eight percent at 6.46 billion guilder (3.49 billion dollars) from 5.97 billion (3.22 billion dollars).

The airline said expenditure rose 10 percent to 6.15 billion guilder (3.32 billion dollars), largely due to a 16 percent rise in higher fuel costs,

delays in delivery of new Boeing 740-400 aircraft, exchange rate variations and extra costs linked to delays caused by air traffic congestion.

The company's wages bill rose eight percent to 1.99 billion guilder, with the payroll swelling by 1,600 people or seven percent.

KLM's ancilliary activities, freight, postal services, maintenance programmes and on board sales, rose faster than its transport operations - up 14 percent against seven percent.

In July last year KLM took an 11.1 percent stake in Wings Holdings, giving it an indirect stake in Northwest Airlines, the fourth-ranked U.S. airline.

KLM increased its stake to 20 percent in March this year for a total investment of 400 million dollars.

KLM also took a 20 percent stake in the Belgian airline Sabena on January 1 this year.

KLM has on order nine Boeing 747-400 aircraft, 10 McDonnell-Douglas MD-11s, 10 Boeing 737s, Nine Saab 340Bs and 10 Fokker 50s, for a total investment of 1.6 billion dollars.

JOHANNESBURG (JULY 24) - An African National Congress (Anc) guerrilla surrendered to South African police Tuesday, leaving the United States consulate in Durban where he had appealed one day earlier for political asylum.

Police said the man, Bhekumusa Jabulani Ximba of the Anc military wing Umkhonto weSizwe (Spear of the Nation), had agreed to surrender in return for facing trial for illegally possessing weapons.

Ximba, 38, made the deal to avoid being arrested under the internal security law, which allows police to detain people for up to six months without pressing charges.

Around 40 Umkhonto fighters were arrested last week under the security act after allegedly being found with arms caches.

HONG KONG (JULY 24) - Hong Kong's high inflation persisted in June as prices were 9.1 percent higher that in the same month last year, figu released here showed Tuesday.

However, the figure was lower than the corresponding rates of increase of 9.4 percent in April and 9.3 percent in May, the Census and Statistics

Department said.

The June hike was mainly due to higher costs of tobacco, alcoholic drinks and fuel as well as more expensive transportation fares.

The private-sector Hang Seng Consumer Price Index put the June rate of inflation at 11.3 percent over June 1989 and at 0.9 percent over May 1990.

Government officials have tagged inflation the top problem for the British colony, where prices rose 10.0 percent in 1989, its highest in seven years.

DAMASCUS (JULY 24) - A member of Britain's opposition Labor Party met Tuesday with Syrian Vice President Abdel Halim Khaddam on the second day of a visit to examine the fate of British hostages held in Lebanon.

But Syrian officials said discussions between Gerald Kauffman and Mr. Khaddam centered on the latest Arab-Israeli developments. They did not elaborate.

Mr. Kauffman, foreign affairs spokesman in the Labour Party's shadow government, arrived here Monday evening and was received within hours by Foreign Minister Farouk al-Shara.

The two men discussed the status of Britons Terry Waite, John McCarthy, Jack Mann and Brian Keenan as well as efforts by Syria to obtain the release of all of the 15 Westerners believed held in Lebanon, officials said. Most of the captives are thought to be in the hands of pro-Iranian Shiite groups.

Mr. Kauffman's visit follows the release in April of two American hostages and speculation earlier this month on the imminent liberation of Mr. Keenan, a teacher with dual Irish-British nationality.

The Labour Party has said that Mr. Kauffman, here on his second visit since July 1988, considered it "useful" to talk to Syria, "a major power in the region."

The British government, which severed ties with Damascus in 1986 after accusing Syria of involvement in a terrorist attempt to sabotage an Israeli El Al civilian plane, did not oppose the visit, the Labour Party said.

BANGKOK (JULY 24) - The Thai cabinet on Tuesday accepted plans to expand

air services between Thailand and Laos on Thai Airways International and Lao Aviation, officials said.

According to an agreement reached between the two countries in April, two extra routes will be opened between Chiang Mai and Vientiane and between Khon Kaen and Vientiane.

There are currently six return flights a week between Vientiane and Bangkok, the two capitals.

Seating capacity will be increased to 600 per week on the Vientiane-Bangkok route, and the two carriers expect 250 seats per week on the Vientiane-Chiang Mai and Vientiane-Khon Kaen routes.

TOKYO (JULY 24) - Japan's Mitsubishi Heavy Industries said Tuesday it planned to build the world's biggest combined-cycle power plant in Indonesia in a 100 billion yen (675 million dollar) project with West Germany's Siemens AG.

The 1,500-megawatt plant, fired by both natural gas and coal, was ordered by Indonesia's electricity authority Perusahaan Unum Listrik Negara for the Gresik power station near Surabaya, a company statement said.

The plant will have three blocks each generating 500 megawatts from three gas turbines, three boilers and one steam turbine, the company said, adding that the first turbine would be completed in within three years.

Mitsubishi Heavy - Japan's biggest manufacturer of power plants, ships, aircraft and arms - said it would provide major equipment to coordinate the project while Siemens would provide the generators.

"The plant will be the only combined-cycle power plant in Indonesia and the largest in the world," the statement said.

The Japanese company and its West German partner reportedly won the Indonesian order after bidding against Asea Brown Boveri Ltd. of Switzerland.

#90205d8520 07/24/1990 ~French/German News Agency

LONDON (JULY 24) - Oil company Shell UK said Tuesday that it would invest 185 million pounds (335 million dollars) in its Shell Haven refinery in eastern England to widen the refinery's capabilities.

The investment would enable Shell Haven to refine a wider range of crudes and increase production of lead-free petrol and other light products.

It would also include a liquid natural gas unit and a 25 megawatt power plant to provide the refinery with electricity and steam.

The project, the largest single investment ever in Shell Haven, will create 560 jobs during the construction phase.

Shell UK is the UK subsidiary of Royal DutchShell.

#90205d8560 07/24/1990 ~French/German News Agency

BRUSSELS (JULY 24) - The Belgian government is predicting a reduced budget deficit for 1991 with the only tax increase a slight rise in petrol prices.

Belgian has the highest per capital public debt in Europe, totalling 7,000 billion francs (205.8 billion dollars).

The budget deficit for this year is estimated at 6.6 percent of gross national product (GNP), the third highest in the European Economic Community after Greece at 20 percent and Italy at 9.8 percent.

Prime Minister Wilfried Martens said when he presented the 1991 budget to the press on Monday that with total spending set at 1,575 billion francs (46 billion dollars), the deficit would be 345 billion francs (10 billion dollars), or down to 5.8 percent of GNP.

Almost 40 percent of the national budget is absorbed by the cost of public debt, but the government said that by continuing to reduce its debt costs it hoped to economise 15 billion francs (440 million dollars) next year.

The finance ministry managed to reduce interest rates the government was being asked to pay in May by linking the franc to the German mark, a move which reassured foreign creditors as to the health of the Belgian currency.

The government is hoping to save more money by suppressing some tax breaks for companies and plugging some tax evasion, and by borrowing money from the social security system when it is in surplus.

The only budget measure which will directly affect individual consumers is a 50 centimes (1.5 U.S. cents) increase in the tax per liter on petrol.

On the spending side, the government is planning increased pension and unemployment payments.

#90205d8610 07/24/1990 ~French/German News Agency
LONDON (JULY 24) - Auction house Christie's International said here Tuesday that its turnover increased 40 percent in the year to July to 1.45 billion pounds (2.37 billion dollars.

Christie's chairman Lord Carrington said he was very satisfied with the result, which came after a record 63 percent rise in turnover the previous year.

Notable sales during the year included Van Gogh's Portrait of Dr. Gachet, which fetched an all-time record for a work of art at auction of 82.5 million dollars at Christie's in New York.

During the year, Christie's sold a total of 247 works of art at more than a million pounds (1.8 million dollars), up from 147 the previous year, and 41 pieces for more than five million pounds, up from 29.

Five pieces fetched more than 20 million pounds, up from three the previous year.

RIO DE JANEIRO (JULY 24) - Unemployment in Brazil's six major cities hit a five-year high of 5.27 percent in May, the Institute of Geography and Statistics reported Tuesday.

Recife, in the northeast, had the highest unemployment rate (seven per-cent), while southern Porto Alegre and Rio de Janeiro had the lowest (4.41 per cent each).

Other cities covered in the report were Belo Horizonte, Salvador de Bahia and Sao Paulo.

In Sao Paulo, the country's largest and most industrialized city, unemployment in May was put at 5.52 percent.

The institute said put the number of people out of work in the six cities at 919,973.

The International Monetary Fund (IMF) will send a technical group to Brazil August 1 to negotiate a 1.4-billion-dollar loan to the country, a senior official at the Economy Ministry said Monday.

Antonio Kandir, secretary for economic policy at the ministry, said the IMF team would gather data on Brazil's ecomomy and report to IMF Managing

Directoer Michel Camdessus.

He said the loan under consideration could "be as high as two billion dollars and could be signed next September."

Mr. Kandir made his statement on his return from Washington, where he began negotiating the new loan.

He said the economic stabilization program launched March 15 by President Fernando Collor de Mello, would lead to "a good negotiation with the IMF."

Brazil stopped servicing its external debt of 114.7 billion dollars in July of last year.

LONDON (JULY 24) - Britain appealed Tuesday for restraint in the border dispute between Iraq and Kuwait and said it would "deplore" any use of force amid reports that troops had massed on both sides of the Iraq-Kuwait border.

"We continue to believe that the dispute between Iraq and Kuwait should be settled by discussion and peaceful means. We would deplore any threat or use of force," a foreign office spokesman said.

The Ministry of Defence meanwhile said there had been no change in the status of British warships in the region and Royal Navy sources said the destroyer HMS York was patrolling in the Gulf but was not on a state of alert.

-30- 831

#90205d9000 07/24/1990 ~French/German News Agency

HELSINKI (JULY 24) - Finland on Tuesday rejected a Soviet hijacker's request for political asylum and ordered his extradition to the Soviet Union.

But Oleg Kozlov said he would appeal the decision before the Strasbourg-based European Commission of Human Rights.

Extradition agreements signed by Moscow and Helsinki in 1975 were inconsistent with European human rights standards, said Mr. Kozlov's lawyuer, Markku Fredman in a press statement.

Mr. Kozlov hijacked an Aeroflot airliner with 59 people on board to Helsinki on June 19 pretending to carry a bomb. The aircraft was on a flight between Riga, in the Soviet republic of Latvia, and Murmansk, in the far north of the Soviet Union.

Three Soviet airliners have been hijacked to Sweden and two to Finland in the last month. In addition there have been seven other abortive hijacks.

The Finnish justice ministry, which ordered Mr. Kozlov's extradition, said it expected the Soviet authorities to fetch him within 14 days.

#90205d9040 07/24/1990 ~French/German News Agency

DURBAN, SOUTH AFRICA (JULY 24) - Leading anti-apartheid activist Billy Nair has been arrested here amid a continuing crackdown on government opponents -- among them 40 African National Congress guerrillas, an ANC official said Tuesday.

Police would not confirm the arrest but referred to a weekend statement by Law and Order Minister Adriaan Vlok that investigations into the country's security situation were under way and that more arrests were expected.

Up to 10 people have been detained under security legislation in the past few weeks while some 40 cadres of the anti-apartheid African National Congress (ANC) have also been arrested after infiltrating the country.

Mr. Nair, who is vice president of the pro-ANC Natal Indian Congress (NIC), spent 20 years on South Africa's Robben Island prison for sabotage and was released in 1984.

ANC Southern Natal convenor Patrick "Terror" Lekota, said Mr. Nair was arrested in this eastern port city on Monday.

He said the action pointed to a hardening of attitude by the government which would make it very difficult to create the climate needed for

constitutional negotiations.

At least three of the other 10 people arrested under the Internal Security Act, which allows indefinite detention without trial, are also NIC members.

The crackdown comes amid warnings by President Frederik de Klerk that "disorder, anarchy and terrorism" will not be tolerated.

Speaking after revelations at the weekend of mass ANC infiltration, Mr. De Klerk warned that immunity granted to anti-apartheid activists and exiles returning to the country applied only in respect of past actions.

Under an accord between the government and the ANC at ground-breaking talks in May, temporary immunity was granted to certain ANC members who would otherwise have faced prosecution to enable them to engage in the peace talks.

The accord also bound both parties to finding a solution to intimidation and violence, Mr. De Klerk added.

Foreign Affairs Minister Pik Botha Tuesday held discussions with foreign ambassadors and heads of missions in Pretoria on the police crackdown against the background of government's ongoing negotiation process with the ANC, the South African Press Association (SAPA) reported, Tuesday.

No significant response from foreign missions was expected to the development, it was indicated, as they were adopting a wait-and-see attitide to the situation.

#90205d9070 07/24/1990 ~French/German News Agency
NEW DELHI (JULY 24) - The chief minister of India's Tamil Nadu state denied a charge Tuesday that his government was joining with Tamil guerrillas to form an independent homeland in Sri Lanka.

The Press Trust of India (PTI) quoted Muthuvel Karunanidhi as telling reporters in Tamil Nadu's capital Madras that the charge, made Monday by former premier and parliamentary oposition leaderRajiv Gandhi, was a "total lie."

Mr. Gandhi told a convention of his Congress (I) party in New Delhi that there was "a clear nexus" between the LTTE and Mr. Karunanidhi's ruling Dravida Munnetra Kazhagam (DMK) party.

The former premier added that New Delhi was not "restraining" the DMK because it was a partner in the five-party National Front which took power here in elections in November, dethroning the Congress (I).

Mr. Karunanidhi has been widely accused of allowing the LTTE to use Tamil Nadu, home to nearly 55 million Indian Tamils and separated from Sri Lanka by a narrow strip of sea, as a sanctuary.

The LTTE fought a bloody bush war against Indian troops deployed in Sri Lanka, killing nearly 1,200 soldiers, until the Indians returned home in March.

On June 11, it renewed its military campaign against Sri Lankan forces after 14 months of peace talks with Colombo.

#90205d9150 07/24/1990 ~French/German News Agency

BRUSSELS (JULY 24) - South Korean Prime Minister Kang Young-Hoon said here Tuesday that his country hoped to move towards Korean reunification by improving ties with the Soviet Union and other Eastern European countries.

South Korea and Moscow were undertaking moves towards normalisation of relations and Seoul hoped through this to facilitate Korean unification, a European Economic Community source quoted him as saying.

Mr. Kang had talks here Tuesday with European Commission president Jacques Delors and Commissioner for foreign releations Frans Andriessen.

Apart from Korean unification and Seoul's relations with Moscow, he also raised the issues of relations with other Eastern European countries and the situation in China, a Commission spokesman said.

South Korea is taking part in the East European Bank for Reconstruction and Development being set up to help reforming Eastern European countries.

Trade issues were largely left for talks between experts of the two sides, but Mr. Kang stressed that Seoul showed a trade deficit of 300 million dollars in the first four months of this year, against a surplus of 2.7

billion for the whole of last year.

The EEC has accused South Korea of raising trade barriers against its goods, and discriminating against it in Washington's favour.

Under a 1987 agreement, South Korea respects U.S. intellectual property rights but has refused to extend the same treatment to the EEC, which considers this unacceptable, an EEC source said.

Mr. Andriessen had complained in March that South Korean companies were copying foreign products without paying for the right to make these items, and then selling them at a low price.

The EEC sent Seoul an aide-memoire on the matter in February.

The EEC is also complaining about obstacles to European investment in South Korea. In some sectors, all investment is banned and in others tight restrictions apply.

The two sides are due to hold technical discussions on the matter later in the year, a Community source said.

Overall, the EEC, Seoul's third largest trading partner after the United States and Japan, considers that South Korea "is not opening up its economy as fast as it is developing."

Mr. Kang arrived in Belgium Monday and is due to leave Wednesday.

#90205d9340 07/24/1990 ~French/German News Agency

KAMPALA (JULY 24) - The U.N. World Food Programme (WFP) has agreed to resume food relief supplies to Uganda's northeastern region of Karamoja, suspended two weeks ago after an attack on a WFP convoy by armed bandits, state-run radio Uganda said Tuesday.

During the attack, the second such incident in four months, one truck driver was killed. A WFP driver was killed in a similar ambush in Karamoja in March.

The radio said that the decision to resume food relief operations followed a series of meetings between the government and WFP officials here.

It quoted Rehabilitation and Social Relief Minister Adoko Nekyon as saying that the defence ministry had agreed to provide a sufficient military escort to truck convoys delivering food to Karamoja.

The WFP intended to to supply the region with some 5,000 tons of maize and

800 tons of beans during the operation, scheduled to run until September, the radio said.

The WFP has also received fresh requests from the Ugandan government for food relief in the northern district of Kitgum.

WFP monitoring officer for Kitgum, Gulu, Soroti and Kumi districts, Nelson Kabwama, said Tuesday that the government had requested food assistance for more than 50,000 displaced people in Kitgum district alone.

Another request had come for food assistance for an unspecified number of people displaced in the neighbouring Gulu district.

Observers here noted that the government request for food for Kitgum appeared to suggest that there had been a new wave of insecurity in the district although rebels of the Uganda People's Democratic Movement (UPDM), whose forces had been operating in Kitgum, recently signed a peace accord with President Yoweri Museveni's government in the Ethiopian capital.

BERLIN (JULY 24) - The East German Liberals Tuesday quit Prime Minister Lothar de Maiziere's centre-left government coalition, party leader Rainer Ortleb announced.

"The Prime Minister and forces that back him inside and outside East Germany bear the responsibility for this coalition's failure", Mr. Ortleb said at a press conference after a Liberal parliamentary group meeting.

The move was announced after the tottering coalition government failed to reach agreement on a timetable for reunification and holding of all-German elections in December.

PORT ELIZABETH, South Africa (JULY 24) - Demand moved down Tuesday at the South African Mohair board's final Cape summer sale in this eastern Cape city, with 23 percent of the 6,225 bales sold.

The board said competition was restricted and generally irregular prices remained unchanged.

Approximate prices in South African cents per kilogram (261 cents to 1 U.S. dollar):

	Adults	Young goats	Kids
Strong	800 - 810	-	-
Average	820 - 830	1600 - 1800	2600 - 3000
Good-average	840 - 860	1950 - 2150	3700 - 3800
Fine	1050 - 1150	2350 - 2600	4000 - 4300

The first winter sale will be on September 4.

#90205d9610 07/24/1990 ~French/German News Agency

GENEVA (JULY 24) - OPEC ministers sought here Tuesday on the eve of a crucial conference to play down rising tensions in the Gulf between Iraq and fellow OPEC member Kuwait.

"We are here to solve oil problems," Saudi Oil Minister Hisham Mohiddin Nazer said as he arrived here for a meeting of the Organization of Petroleum Exporting Countries' monitoring committee on Tuesday and ministerial conference beginning Thursday.

"I think that if what is happening (in the Gulf) should affect the meeting I hope that it will affect it positively," said Gabonese Energy Minister Jean Ping.

The Washington Post reported Tuesday that Iraq had massed "30,000 elite troops" along its border with Kuwait.

The newspaper said that the move was an apparent attempt to intimidate Kuwait, which Baghdad has accused of stealing 2.4 billion dollars worth of Iraqi oil and encroaching on its territory.

Brent Sea crude for September delivery rose in London on Tuesday amid the tension in the Gulf and expectations that the OPEC ministers would reach agreement during their talks here on an output ceiling of 22.5 million barrels a day (mbd).

MOSCOW (JULY 24) - Somali rebels have seized a Soviet fishing trawler in Somali waters, according to a radio message sent to Riga, Latvia, by the trawler's captain, TASS news agency reported Tuesday.

Georgui Chipula said his vessel, the Kaff, was hijacked on July 18 by a Somali boat with ten armed men on board. They forced the vessel to sail to the island of Maydh, off the northern Somali coast where 16 of the Soviet crew were forced to disembark. Eleven others including the captain stayed on board.

The rebels seized the trawler because it had been granted a Somali government licence to fish in Somali waters, the captain said.

The message did not make it clear if the rebels belonged to the Somali National Movement (SNM) who are active in the area.

Last December SNM rebels looted an Italian coaster and stripped its crew of all their belongings in a 27-day ordeal.

The SNM has been fighting the government in northern Somalia since early 1988.

WARSAW (JULY 24) EFE - The Polish Army has destroyed reams of secret documents on counter-espionage activities carried out under communist rule between 1945 and 1988, the Polish daily Gazeta Wyborcza reported Tuesday.

Citing an unnamed officer, the paper said more than 40,000 files were ordered burned between October 1989 and February this year and that the

date of their destruction was falsified in record books to indicate that it occurred three years earlier.

It said Army intelligence authorities gave direct orders to destroy the records after Poland's recent transition from communism to democratic rule.

The report said the destroyed documents gave evidence of the activities of the internal security corps, counter-espionage services and border security forces, as well as information on the creation of a secret police force which recruited children aged between 12 and 14.

Correspondence between Polish security forces and their Soviet counterparts and documents on the communist government's efforts to quash the opposition Solidarity movement between 1980 and 1988 movement have also been lost.

The Gazeta Wyborcza said most of the material was destroyed in the town of Minsk Mazowiecki, east of Warsaw, where the Army archives are located.

It added that another some three tons of documents were taken to a nearby paper recycling plant.

The officer cited by the newspaper said that the documents showed that some 400 high-ranking military officers, about one third of the total, collaborated with the secret services.

The daily claimed that the destruction of official documents from the previous communist governments continued in Warsaw.

KARLSHRUHE, WEST GERMANY (JULY 24) EFE - East Germany Tuesday handed over another terrorist suspect to the West German authorities, bringing to five those facing trial in the Federal Republic for alleged crimes committed by the Red Army Faction (RAF).

Hennnig Beer, 31, was surrendered to a West German court with his permission, appearing before an examining magistrate Tuesday.

Beer is accused of membership of the RAF since 1979, and is suspected to have participated in the assassination of the head of the Deutsche Bank, Alfred Herrhausen in 1989.

There are still three other presumed RAF members in East Berlin, whose extradition to West Germany is expected shortly.

Mexico City (JULY 24) EFE - Baby traffickers in the Mexican capital have snatched 47 newborns from their mothers in the past two months, a police official said Tuesday.

In the latest incident, a woman disguised as a nurse last week lifted a five-day old infant from its mother's arms before disappearing with the child.

The official said cases of baby snatching for profit had been common since 1987 and the children are sold to wealthy couples in the United States and Europe.

Mexican police broke up a band of baby traffickers in March led by a Frenchwoman which stole or bought babies from poor mothers and sold them abroad.

#90205e0033 07/24/1990 ~Latin America New Agency

Vienna (JULY 24) EFE - Austria has proposed that countries belonging to the Organization for Cooperation and Economic Development (OCED) should develop a new +Marshall Plan+ to supply energy to cash-strapped Eastern European countries.

The proposal, which was presented Monday by Austrian Finance Minister Wolfgang Schuessel, is the first formal project put foward by a Western European nation on how to help Eastern Europe deal with expected energy shortages caused by a drop in Soviet energy exports.

The Marshall Plan was drawn up by the United States after World War II to help rebuild war-shattered Western Europe.

Shuessel said in an interview that he had proposed a new Marshall Plan because Austria could not take on the responsibilty of the power problems in Eastern European countries, despite Vienna's keeness to invest heavily in their energy industries.

A lack of energy has already created a crisis in Czeckoslovakia's nuclear industry and the Austrian government is concerned about possible security problems at a Czechoslovak nuclear plant situated near Vienna.

This week the Austrian government is expected to approve a temporary transfer of free electricity to its neighbor.

The project will cost between dlrs six million and 8.5 million a week but will only be in action during summer months, according to Electricity

Association officials, as Austria is forced to import part of its own power during the winter.

While Austria's hydroelectric plants in summer produce enough power to export supplies, in the winter the plants are not able to generate sufficient energy to meet all the country's needs.

#90205e0034 07/24/1990 ~Latin America New Agency

Buenos Aires (JULY 24) EFE - The Argentine government Tuesday pushed its wide-ranging privatization program a step further with the sale of 29 low-yield oil fields to foreign and domestic companies.

A total of dlrs 253 million was handed over to the state by 14 different consortiums for the right to drill in the so-called secondary oil fields which were previously managed by the state-run Yacimientos Petroliferos Fiscales (YPF).

British Gas and the Argentine company Cadispa jointly made the largest single bid, paying dlrs 104 million for four oil fields in various parts of the country.

As part of a scheme to end the state monopoly on oil production, the government will seek by the end of the year to involve private companies in joint ventures with YPF, exploiting four of the country's primary oil fields with a view to bolstering Argentine currency reserves by around dlrs one billion.

#90205e0039 07/24/1990 ~Latin America New Agency

UNITED NATIONS (JULY 24) EFE - United Nations Secretary General Javier Perez de Cuellar called for calm and reconciliation between Iraq and Kuwait Tuesday, following reports that Iraq had massed troops on its border with Kuwait in a dispute over oil quota-busting.

Speaking briefly to reporters as he entered the UN headquarters in New York, the secretary general also dismissed the possibility that Iraq would attack Kuwait or that U.S. warships would intervene.

The Washington Post reported Tuesday that the U.S. Navy had put seven warships in the Persian Gulf on alert after Iraq deployed some 30,000 troops on its border with Kuwait.

Perez de Cuellar said Kuwait's UN ambassador, Mohammad Abulhassan, had briefed him on the situtation but had not requested UN action.

The UN chief added that none of the countries involved had requested a meeting of the UN Security Council.

He noted that Egyptian President Hosni Mubarak was meeting with Iraqi and Kuwaiti officials in an attempt to defuse the conflict.

UN diplomats said that if Arab League efforts to end the dispute failed, an emergency session of the Security Council might be called.

Iraqi President Saddam Hussein last week threatened to use force against Kuwait and the United Arab Emirates if they continued to exceed their OPEC oil production quotas.

BEIRUT (JULY 24) XINHUA - REBELLIOUS CHRISTIAN LEADER GENERAL MICHEL AOUN HAS DEMANDED GUARANTEES FROM THE GOVERNMENT REGARDING HIS POLITICAL FUTURE AFTER JOINING THE LEBANESE GOVERNMENT, LOCAL RADIOS TODAY QUOTED SOURCES CLOSE TO AOUN AS SAYING.

AOUN MADE THIS DEMAND DURING A MEETING LATE LAST NIGHT WITH LAKHDAR IBRAHIMI, SPECIAL ENVOY OF THE ARAB LEAGUE TRIPARTITE COMMITTEE ON LEBANON WHO IS CURRENTLY VISITING BEIRUT TO PERSUADE AOUN TO ACCEPT THE NEW LEBANESE GOVERNMENT'S INITIATIVE FOR A SETTLEMENT OF THE LEBANESE CRISIS.

DURING THEIR MEETING, AOUN AND IBRAHIMI REVIEWED ALL ATTITUDES TOWARD THE GOVERNMENT'S RECENT STATEMENT WHICH CALLS UPON ALL LEBANESE FACTIONS TO HALT VIOLENCE AND RECOGNIZE THE TAIF ACCORD AS A FIRST STEP IN FINDING AN

OVERALL SOLUTION TO THE LEBANESE CRISIS.

THE TAIF ACCORD WAS ENDORSED BY LEBANON'S LEGISLATORS IN THE SAUDI RESORT TOWN OF TAIF LAST OCTOBER UNDER THE AUSPICES OF THE ARAB LEAGUE.

SO FAR, IBRAHIMI HAS GOT NO FINAL REPLY FROM AOUN CONCERNING THE ACCORD. AOUN HAS REJECTED THE PACT FOR ITS FAILURE TO SET A TIMETABLE FOR THE WITHDRAWAL OF SYRIAN TROOPS FROM LEBANON. HE HAS ALSO REFUSED TO RECOGNIZE THE LEBANESE GOVERNMENT SET UP LATE LAST YEAR IN ACCORDANCE WITH THE ACCORD.

SOURCES CLOSE TO THE LEBANESE GOVERNMENT SAID THEY EXPECTED IBRAHIMI TO MEET LATER TODAY WITH BOTH PRESIDENT ELIAS HRAWI AND PRIME MINISTER SALIM HOSS TO BRIEF THEM ON THE OUTCOME OF HIS MEETING WITH AOUN. MORE CONSULTATIONS WOULD BE MADE BETWEEN IBRAHIMI AND AOUN ON HOW TO REACH UNDERSTANDING BETWEEN THE LEGITIMATE GOVERNMENT AND AOUN, THE SOURCES SAID.

EARLIER REPORTS SAID THE VATICAN, SEEKING TO MEDIATE AN END TO THE LEBANESE CRISIS, HAS PROPOSED THAT THE LEBANESE GOVERNMENT INCLUDE AOUN IN EXCHANGE FOR HIS RECOGNITION OF THE TAIF ACCORD.

#90205k0049 07/24/1990 ~Japanese News Agency

TOKYO (JULY 24) KYODO - PROSECUTORS TUESDAY DEMANDED A TWO-YEAR PRISON TERM AND A 22.70 MILLION YEN FINE FOR HISASHI SHINTO, FORMER CHAIRMAN OF NIPPON TELEGRAPH AND TELEPHONE CORP. (NTT), CHARGED WITH BUYING 10,000 PRE-FLOTATION SHARES FROM FORMER RECRUIT CO. CHAIRMAN HIROMASA EZOE.

PROSECUTORS CHARGED THAT SHINTO BOUGHT SHARES OF RECRUIT COSMOS CO., THE INFORMATION GIANT'S REAL ESTATE SUBSIDIARY, IN EXCHANGE FOR HELPING ITS PARENT COMPANY EXPAND INTO THE FIELD OF TELECOMMUNICATIONS.

IN THE TRIAL, SHINTO, 80, ADMITTED HAVING BOUGHT THE SHARES AND HAVING FULL KNOWLEDGE THAT THEY WOULD GO UP IN VALUE ONCE THEY WERE LISTED ON THE OVER-THE-COUNTER MARKET. BUT HE DENIED ANY INVOLVEMENT IN BRIBERY.

THE STOCKS WERE BOUGHT AT 3,000 YEN PER SHARE IN THE NAME OF SHINTO'S SECRETARY, KOZO MURATA, IN SEPTEMBER 1986.

UNDER THE LAW WHEREBY NTT WAS PRIVATIZED IN 1984, ITS OFFICIALS ARE SUBJECT TO THE SAME LEGAL MEASURES AS GOVERNMENT EMPLOYEES REGARDING BRIBERY.

ACCORDING TO PROSECUTORS, SHINTO MET EZOE, 53, A KEY FIGURE IN THE RECRUIT INFLUENCE-PEDDLING SCANDAL, IN AUGUST 1985 AND PROMISED HIM HIS FULL SUPPORT IN RECRUIT'S BUSINESS OF RESELLING COMMUNICATIONS CIRCUITS LEASED FROM NTT.

THE FORMER NTT CHIEF WAS ALSO ASKED BY EZOE IN SEPTEMBER 1985 TO HAVE NTT BUY A U.S. SUPERCOMPUTER FOR RECRUIT. RECRUIT PURCHASED TWO CRAY SUPERCOMPUTERS THROUGH NTT BETWEEN DECEMBER 1986 AND JANUARY 1988.

PROSECUTORS CHARGED THAT SHINTO RECEIVED 10,000 RECRUIT COSMOS PRE-FLOTATION SHARES THROUGH HIS SECRETARY IN SEPTEMBER 1986 AS A BRIBE IN RETURN FOR USING HIS INFLUENCE ON BEHALF OF RECRUIT.

THE SHARES WERE BOUGHT FOR 30 MILLION YEN WITH LOANS FROM A RECRUIT-AFFILIATED FINANCE FIRM AND SOLD FOR 52 MILLION YEN SOON AFTER BEING LISTED ON THE MARKET OCTOBER 30 THE SAME YEAR.

RECRUIT PAID ABOUT 21 MILLION YEN AS A NET PROFIT ON THE STOCK TRANSACTION INTO THE SECRETARY'S BANK ACCOUNT NOVEMBER 5 AND 9 MILLION YEN OF THIS WAS TRANSFERRED TO SHINTO'S PERSONAL BANK ACCOUNT CONTROLLED BY THE NTT SECRETARIAL OFFICE, ACCORDING TO PROSECUTORS.

FALLS CHURCH, VA (JULY 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The Nikkei fell 192.33 to 31,702.46. ... The British trade deficit was $2.8 billion, in line with expectations, which has pushed the FT 100 up 15.4 to 2375.1. ... T-bonds and futures trade sharply lower in London. ... Oil prices are up sharply on a report of Mideast tension. deficit for June was $11.2 billion, pushing the nine-month total to $163.1 billion. ... FORD MOTOR says it has accepted a bid from LORAL CORP. for its FORD AEROSPACE unit. No terms were disclosed, but analysts estimate the price is between $1.2 billion and $1.5 billion. ... RJR NABISCO HOLDINGS says its second-quarter loss this year was $108 million, roughly a third what it lost in the same quarter last year. ... RESORTS INTERNATIONAL says its bondholders have approved a reorganization plan designed to take entertainer MERV GRIFFIN's casino company out of bankruptcy proceedings.

WHAT'S AHEAD:

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN delivers his Humphrey-Hawkins testimony to the House this morning at 10 a.m. EDT. ... PRESIDENT BUSH is scheduled to meet with Congressional budget negotiators for four consecutive mornings beginning today in an effort to bring the talks to resolution prior to the August Congressional break which begins in two weeks. ... The Senate Banking Committee will meet at 10 a.m. EDT to discuss SEC and CFTC jurisdiction issues. ... The FDIC and RTC Board will meet at 3 p.m. EDT. ... At 10 a.m. EDT, Attorney General DICK THORNBURG and FDIC Chairman WILLIAM SEIDMAN will both testify before a Senate

Judiciary panel on fraud in the thrift industry. ... MARTHA SEGER, the Fed's most consistent advocate of easier money, may resign her post as a Federal Reserve governor this year for personal reasons.

FROM THE BULLS:

SHEARSON LEHMAN HUTTON's director of quantitative analysis, ELAINE GARZARELLI says the worst of the selling may already be over and that buying opportunities already exist. She expects that earnings are bottoming rather than peaking and that sentiment will turn bearish, which is a positive contrary indicator. The drop, she says, partly reflected "some follow through from Friday" when expirations of July major market index contracts triggered a sell-off. Additionally, "four institutions started raising cash." However, she sees a recovery. "The market should be on an uptrend in the next four to eight weeks." (Reuters, and FNN "Marketwrap", 7/23)

GEORGE COHEN, president of COHEN, DAVIS & MARKS remains confident that the Dow will surpass the 3000 barrier and regards yesterday's decline as a buying opportunity for quality. "I'm optimistic because I believe the economy is going to continue to expand at a moderate rate, and it's also very hard for me to believe that that is not a majority view since the market, in general, has been moving higher. But it's clearly not the only view and that's why we have these periods of downward volatility." Cohen would take advantage of yesterday's sell-off to buy his favorite stocks: COCA COLA, PHILIP MORRIS and NIKE. (CNBC "Business View", 7/23)

FROM THE BEARS:

SURESH BHIRUD, head of investment policy at OPPENHEIMER & CO is bearish short-term and predicts that the Dow could fall another 400 points. "We are going to be in a very volatile period for the next two months. My strategy is to sell now, lock in your profits and try to buy the market back two months from now." (FNN "Marketwrap", 7/23)

MICHAEL MURPHY in his "California Technology Stock Letter" was bearish prior to Monday's mini-crash. He told "Money" magazine that the Dow "could drop about 25%, or 700 to 800 points, over the next year. I don't think a 2100 Dow would be out of line with current conditions based on historic levels of price/earnings ratios, dividends and other measures, all of which tell me that stocks are already overvalued." ("Money", August 1990)

MICHAEL METZ of OPPENHEIMER & CO. told FNN's RON INSANA that he was disappointed that high technology and other growth stocks failed to produce a parabolic rally, so the deterioration in those groups signaled a secondary correction that may bring the Dow as low as 2750 and leave it on the low end of that trading range for several months. "Wall Street is

manic depressive," says Metz to "The Wall Street Journal." He advises, "Try to capitalize on both sides. Sell when it's manic, and buy when it's depressed." (FNN "Marketwrap", 7/23 and WSJ, 7/24)

STOCK MARKET:

"This was the day the chickens came home to roost," says NEWTON ZINDER, a market analyst at SHEARSON LEHMAN HUTTON. "The so-called strength in the Dow was masking a lot of internal deterioration." ("The Washington Post", 7/24)

Monday morning's market drop was not an aberration, "unless you want to call heavy program trading an aberration. Unfortunately it happens too often to be called an aberration, I think," says TRUDE LATIMER of JESUP, JOSEPHTHAL & CO. She says this ends the market rally for "a very short while" because "we have had trouble getting through that 3000 [level] in any event and I think that discouraged a few traders. So it is very likely that a consolidation would have developed." She says the "four or five waves of program trading made it come all that much sooner." She says that the individual investor probably should not come into the market at this point, but should hold their long-term investments. She adds that some institutional traders have cash that they wish to invest and today's action may provide buying opportunities for them. (FNN "Marketwrap", 7/23)

"This is not something that's going to be over in a few days," says BYRON WIEN, U.S. investment strategist for MORGAN STANLEY. At the same time, however, he says this isn't "the beginning of a bear market. It's only a correction of 10% or less, and we are already at least one-third of the way through it." Wien says that he raised the cash portion of his portfolio to 15% from 12% with the rest of the allocation now being 45% bonds and 40% stocks. (WSJ, 7/24 and FNN "Marketwrap", 7/23)

There are some indications the market could bounce back quickly, according to "The New York Times." ROBERT FARRELL, chief market analyst at MERRILL LYNCH, says that it appeared more retail customers at his firm were inclined "to want to buy something" rather that to "panic and sell." (NYT 7/24)

"What I think really happened here today was sort of catch-up, with the Dow Jones Industrial Average attempting to catch-up with where the real market really is," says SHEARSON LEHMAN HUTTON's PETER GRENNAN. He says that if the Dow had really come down to a level of being representative of the broad market it would have been closer to the 2800 area, so the Dow is still outperforming the broader market. (FNN "Midday Market Report", 7/23)

"The first thing we've got to look at is the conditions," says HUGH JOHNSON, chief investment officer at FIRST ALBANY. "The market lately has not been responding to good news. It has been responding to bad news."

Johnson says Monday was a "crack in the ice," caused by higher Japanese interest rates, poor earnings from McDONALD'S and program trading. As long as the latter does not bring about further selling tomorrow, Johnson thinks the decline is over. "Actually, the market, for the greater part of the afternoon, stabilized, and that's good news." He says the next few days should be fairly stable, but will be followed by a further correction no lower than 2800. (CNBC "Market Wrap-Up", 7/23)

"The OTC market is getting its brain beat in," says WILLIAM SULYA, director of OTC trading at A.G. EDWARDS. Despite a "few signs of life" at the end of the day, Sulya says he isn't convinced that the selling spree has ended. "We hope it will bounce [today] so we can sweep up the debris, but that remains to be seen." (WSJ, 7/24)

"In the near-term we have suffered quite a bit of damage" to the market, says DENNIS JARRETT of KIDDER, PEABODY. "I don't think we are going to see an automatic bounce back. ... I suspect it may be a month or two before we really regroup and then head back to the higher side, but I would generally conclude that we are closer to the end of the decline than the beginning and I think that in the long run is going to be beneficial for higher prices." (FNN "Midday Market Report", 7/23)

"From past experience, I'm inclined to view this [market drop] as a psychological reaction to the resistance level of 3000. That kind of theory is suggested probably because there is no good reason for a lot of activity right now," says DR. ROBERT SHILLER, an economist at YALE UNIVERSITY and author of the book "Market Volatility." Dr. Shiller believes that market psychology has more effect on stock prices than efficient market theory and he promises to study the day's actions using survey research methods that he has used in other sharp declines. (CNBC "Money Wheel", 7/23)

Analysts blamed weak U.S. corporate earnings and technically motivated selling for the market's tailspin. "The market is having a violent reaction because of the realization that it got too high relative to the earnings outlook," says LADENBURG THALMANN'S JON GROVEMAN. "The euphoria bubble has basically burst." (Reuters, 7/23)

Wall Street watchers say so-called circuit breakers helped calm markets after the Dow plunged in early trading yesterday. CHUNG LEW, trader at KLEINWORT BENSON, says that without the restrictions "you could have seen a 130-point drop in the Dow. At that point, people get very emotional." ("USA Today", 7/24) 3

"I think the outlook for the economy is very, very weak," says JAMES WRIGHT, chief investment officer at BANC ONE ASSET MANAGEMENT CORP. "The environment has been much weaker than the Dow implied." Wright says investors may have gotten overly optimistic about a dramatic near-term

easing in interest rates following comments by FED CHAIRMAN ALAN GREENSPAN over a week ago that hinted at possible credit loosening. (Reuters, 7/23)

#90205m0004 07/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar fell to its lowest level against the mark in two and a half years. The last time the U.S. currency bought so few marks was Jan. 4, 1988, when the dollar ended at 1.5858 marks. "We are getting to levels that are very significant," says BERND BECKER, chief New York dealer for OESTERREICHISCHE LAENDERBANK. "We've been dealing for so long in this narrow range. This is the biggest move I've seen in a long time. No one wanted to miss the boat, so everyone jumped on." (WSJ, 7/24)

The dollars fall "was all sparked by the stock market," says LILIANA NEALON, vice president for foreign exchange sales at the UNION BANK OF SWITZERLAND in New York. She says that the fall against the mark was so sharp yesterday that it is possible the dollar could rebound against the mark today. But if the stock market slide continues, she says, the dollar could fall further. (NYT, 7/24)

"Today we'll look to the Dow very closely to trade the dollar," says BETSY REETZ of the UNION BANK OF SWITZERLAND. Reports of tension between Iraq and Kuwait led to some overnight "safe-haven" buying of the dollar, says Reetz, "But not enough [buying] to shake us out of this recent downtrend." Reetz says traders were looking for the dollar to test 149 against the yen and 1.63 against the mark, but it didn't happen. (FNN "World Business Update", 7/24)

The collapse on Wall Street caused a sharp decline in the value of the dollar yesterday, but there was no change in the fundamentals, according to TREVOR WOODLAND of HARRIS TRUST & CO. "It was kind of a psychological thing," says Woodland. "If you're a trader, you're not going to buy a currency when the equity market is faring poorly." ("Investor's Daily", 7/24)

"Interest rates in the United States are now on the low side when you compare them to [those of] other countries, and there is some concern that if interest rates move down here, particularly on the long-bond, that could put the dollar under some additional pressure," says ABBY COHEN of BARCLAYS de ZOETE WEDD SECURITIES. (FNN "Marketwatch A.M.", 7/23)

CHRISTIANE MANDELL, a currency analyst for SECURITY PACIFIC NATIONAL BANK, thinks "the Fed will stay on the easing side for awhile. This is dollar negative." ("Investor's Daily", 7/24)

Many Fed watchers feel that FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN has caved in to the Bush Administration, perhaps because he is eager for reappointment in little more than a year. "Alan has so overplayed his hand that control of monetary policy has been taken away from him," says H. ERICH HEINEMANN, chief economist for LADENBURG, THALMANN & CO. "The Administration has won." He says Greenspan may have been reacting to a thinly veiled threat from the Administration. "They're telling Greenspan, 'We can make you a lame duck tomorrow,'" says Heinemann. ("BusinessWeek", 7/30)

"I see the M-2 money supply growth slowing here and it raises very good probabilities that we are going to continue to see some further easing by the Fed, possibly next month or possibly a little further out," says RAY HINES of "The Wall Street Generalist." "I think the economy needs a little further stimulation, and I think they are going to address it." (FNN "Marketwatch A.M.", 7/23)

Long-term bonds closed slightly lower yesterday, but not because of the volatile action in stocks, according to MICHAEL STRAUSS, chief economist at UBS SECURITIES. He says the Fed's easing and remarks from FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN have changed the overall outlook. "People think the Fed is now willing to take more risks on inflation than on the economy," says Strauss. ("Investor's Daily", 7/24)

The flight to quality bonds and T-bills "is typically the reaction for when the stocks take such a sharp tumble" like they did Monday morning, says DOUG SCHINDEWOLF of SMITH BARNEY, HARRIS UPHAM & CO. He says this is particularly true when the reason behind that drop "is a perception that the economy is deteriorating and the following perception is that the Federal Reserve would take some action to offset that weakness in the economy by encouraging interest rates to go lower." This same type of chain reaction hurts the dollar in the currency market according to Schindewolf. (FNN "Marketwrap", 7/23)

Traders in the junk bond market say that prices of most issues dipped by about 1/2 point yesterday, but that trading was light. KINGMAN PENNIMAN, a specialist in the high-yield market at McCARTHY, CRISANTI & MAFFEI, explains, "Most market participants were sitting back, trying to find out why stock prices fell, and weren't finding any real reasons." (NYT, 7/24)

THE ECONOMY:

"The economy will weaken, but may still avoid a recession," writes MICHAEL SIVY, senior editor of "Money" magazine. ("Money", August 1990)

"Recession, Recession, Recession. That's what we're going to have," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." He says the economy is weak and "needs a tonic or something." There is "no bounce and no vigor anywhere," says Wolman. (CNBC "Market Wrap- Up", 7/23)

According to "Blue Chip Economic Indicators," a newsletter that regularly surveys some 50 economists, real GNP growth will trot along at 1.9% this year and pick up to 2.2% next year. Inflation, now running at 4.8%, will tick down to 4.2% in 1991. ("Money", August 1990)

IN WASHINGTON:

"I think it's the same old story" of programmed trading hurting the market says REPRESENTATIVE EDWARD MARKEY (D. - Mass.). Markey recommends stricter SEC control of programmed trading to protect the markets from swings like Monday's. "We have volatility which has now built itself into the marketplace and as a result, once again, I'm going to ask the SEC to do a complete analysis of what happened today so we can get to the bottom of the story and find out what role program trading played." ("Nightly Business Report", 7/23)

#90205p5216 07/24/1990 ~PR Newswire

NEW CANAAN, CT (JULY 24) PR NEWSWIRE - Smith Corona Corporation (NYSE: SCO) announced today that for the fourth quarter ended June 30, 1990, the company reported a net loss of $1.5 million, or 5 cents per share, compared to a net loss of $3.1 million, or 10 cents per share, for the comparable quarter ended June 30, 1989, on a pro forma basis to reflect the company's public offering. Sales for the quarter were $79.8 million, compared to $112.4 million for the fourth quarter in 1989.

For the fiscal year ended June 30, 1990, net income was $32.9 million, or $1.09 per share, on revenues of $471.4 million, compared to 1989 pro forma net income of $35.3 million, or $1.17 per share, on revenues of $493.1 million. Results for 1989 include charges of 48 cents and 63 cents for the three months and year, respectively, related to a now terminated supplemental performance plan.

G. Lee Thompson, chairman and chief executive officer of Smith Corona, stated, "The loss for the quarter is attributable to charges relating to inventory writedowns and non-recurring provisions for major overhead expense reduction programs partially offset by adjustments to the company's tax provision. Excluding these adjustments, operating income for the quarter ended June 30, 1990, would have been approximately $3.7 million and net income would have been approximately $1.3 million, or 4 cents per share."

The charges for inventory writedowns were primarily related to electronic reference products. The other non-recurring provisions were for severance related to expense reduction programs being implemented throughout the company in response to the current economic climate.

As of June 30, inventories declined slightly from the March 31 level and debt was reduced to a level of approximately $70 million.

Smith Corona, based in New Canaan, is the world's largest manufacturer of portable electronic typewriters and personal word processors. The company also manufactures and sells office supplies, forms and customized printing products.

#90205p5220 07/24/1990 ~PR Newswire

TALLAHASSEE, FL (JULY 24) PR NEWSWIRE - Killearn Properties Inc. (AMEX: KPI) today announced its audited financial information for the fiscal year ended April 30.

Revenues for the current year were $20,155,170 compared to $17,929,359 for the year ended April 30, 1989. The company reported net income of $2,355,267 ($1.64 per share) compared to $2,206,594 ($1.54 per share) for the prior year. Per-share amounts are based upon the average number of stock and stock equivalents (fully diluted) outstanding during each year, which was 1,438,231 for fiscal 1990 and 1,436,976 for fiscal 1989.

The company stated that it has received a notice and order from the state of Florida, Department of Community Affairs, stating that in the department's opinion, the company is in violation of its development permission with respect to certain sections of Killearn Lakes, including its Golden Eagle project, held for future development. The order requires the company to cease development in the affected areas until certain additional approvals are received and corrective measures are taken. It is the company's position that development of these areas, which has been done with approval of appropriate local government, does not materially deviate from the previous approvals granted to the company. Killearn is unable to predict the outcome of this matter; however, it cautioned that adverse determination could cause delays, require modification of its development plans and result in lower revenues and higher costs with respect to the affected areas.

#90205p5222 07/24/1990 ~PR Newswire
MADISON HEIGHTS, MI (JULY 24) PR NEWSWIRE - Rand Mueller, president and CEO of Code-Alarm, Inc. (NASDAQ: CODL), announced today the appointment of Richard Wierzbicki as vice president of finance for the company.

Wierzbicki joins Code-Alarm, Inc. after 3 1/2 years in the Corporate Finance Group of Deloitte & Touche, New York.

Wierzbicki's experience encompasses a variety of accounting and financial disciplines that will be immediately applied in the capacity of chief financial officer of Code-Alarm. As senior manager of Deloitte & Touche's National Office Corporate Finance Group, Wierzbicki advised and assisted clients' senior management, including that of Code-Alarm, on a wide variety of corporate financial matters, including formulation and execution of acquisition strategies, acquisition and divestiture studies, business valuations, preparation and analysis of financial projections and structure and negotiation of financing alternatives.

With substantial experience serving a variety of emerging growth companies such as Code-Alarm, in broad range of corporate financial and management matters, Wierzbicki was, for 3 1/2 years, assistant vice president of MSI Capital Corporation of Dallas, a private venture capital and management consulting firm. There he was involved in financial and cash-flow forecasts, strategic planning and business plan development. Previously, he was with Touche Ross & Co., Dallas, where he held a variety of regular audit, tax consulting and management consulting responsibilities.

Mueller stated, "Mr. Wierzbicki was identified after an intensive search for a qualified financial person to play a leading role in our growth plans including forward-looking acquisition activities. He will also focus his expertise on coordinating financial aspects for the four growing Code-Alarm divisions, i.e., Chapman, Inc., Tessco Group, ANES Security Inc., and the Code-Alarm Division itself."

Originally a native of Detroit, Wierzbicki is married and has one child. He graduated from Michigan State University, with a B.A. in accounting, with honors, and is presently a degree candidate for an M.B.A. from Fordham University in New York. He is a certified public accountant and a member of the American Institute of Certified Public Accountants, and the Texas Society of Certified Public Accountants.

CHICAGO (JULY 24) PR NEWSWIRE - GATX Terminals Corp. announced today it

has completed the acquisition of a 1.6 million barrel petroleum terminal at Paulsboro, N.J., from Exxon Corp. GATX had entered into an agreement with Exxon to purchase the terminal late last year. GATX had been leasing and operating a portion of the Paulsboro facility since the first of the year.

The Paulsboro Terminal is located on the east bank of the Delaware River across from Philadelphia. The terminal receives refined petroleum products via ocean going tankers, barges, and The Colonial Pipeline.

These commodities are then transferred into trucks and barges for local and regional distribution. The Paulsboro facility primarily serves southern New Jersey and the eastern Pennsylvania region.

The terminal also delivers commercial jet fuel to Philadelphia International Airport and has the capability to provide supplemental tank storage for nearby refineries.

Robert E. Claypoole, president of GATX Terminals, stated, "In addition to strategically positioning GATX in a market where in the past it had minimal customer exposure, the Paulsboro Terminal complements GATX's Northeastern presence provided by the Carteret, N.J., Staten Island, and Philadelphia terminals."

"We are attracted to Paulsboro because of the ultimate advantages we can now offer our East Coast customers. GATX plans call for a connection of the facility to the Laurel Pipeline, which serves western Pennsylvania and upstate New York, offering our customers more versatility," Claypoole added.

GATX Terminals Corp., a subsidiary of GATX Corp. (NYSE: GMT), Chicago, is the largest bulk liquid public storage company in the world with 48 facilities having a capacity of 64 million barrels.

GATX Terminals provides storage and handling of bulk liquid commodities such as petroleum, chemicals, petrochemicals, and vegetable oils; and serves as a vital interface among distribution and transportation modes including railroads, ships, barges, trucks and pipelines.

GATX Terminals are located near major distribution and transportation points in North America and the United Kingdom, as well as continental Europe and Asia. GATX's North American terminalling network includes the ownership of three pipelines.

GATX Corp. provides asset-based services to industry by providing railcar leasing, maintenance and management; capital equipment leasing, financial services, real estate financing; bulk liquid terminal storage; warehousing and distribution services; and Great Lakes shipping.

VALPARAISO, IN (JULY 24) PR NEWSWIRE - Indiana Federal Corp. (NASDAQ-NMS: IFSL), parent company of Indiana Federal Savings and Loan Association, today reported record earnings for the second quarter and the six months ended June 30, 1990. Net income for the quarter ended June 30, 1990 increased 26 percent to $920,000 or 34 cents a share, compared to $728,000 or 26 cents a share for the same period last year.

Earnings for the six months ended June 30, 1990 increased 25 percent to $2.0 million or 73 cents per share, compared to $1.6 million or 58 cents per share for the same period in 1989.

For the three months ended June 30, 1990, net interest income after provision for loan losses, the company's core business, was $3.9 million, compared to $3.5 million for the same period in 1989. The net interest margin for the quarter ended June 30, 1990 increased to 3.21 percent from 2.95 percent a year ago. Net interest income after provision for loan losses increased to $7.8 million for the six months ended June 30, 1990, from $7.0 million for the same period a year ago.

Non-performing assets increased to $11.2 million or 2.05 percent of total assets at June 30, 1990, from $10.4 million or 1.88 percent of total assets at Dec. 31, 1989.

Shareholders' equity increased to $55.3 million or $20.50 per share at June 30, 1990, compared to $19.79 per share at year-end 1989. At June 30, 1990 total assets were $546.8 million, down $6.0 million from $552.8 million at the end of 1989.

During the three-month period ended June 30, 1990, the corporation acquired 47,000 of its outstanding common shares. As announced earlier in the 1990 second quarter, the corporation intends to buy back 5 percent or 137,000 of its outstanding common shares.

Indiana Federal Savings and Loan Association, a wholly owned subsidiary of Indiana Federal Corp., maintains a network of eight full- service offices in northwest Indiana and loan production offices in Highland and Fort Wayne, Ind.

DENVER (JULY 24) PR NEWSWIRE - Royal Gold (NASDAQ: RGLD) today announced that it has signed an exploration agreement with Battle Mountain Exploration Co., a subsidiary of Battle Mountain Gold Co., on Royal Gold's Bob Creek gold prospect, located in Eureka County, Nev. Royal Gold, through its wholly owned subsidiary, Royal Kanaka Creek Corp., obtained the Bob Creek property from Transwestern Mining Co. in 1987. Under terms of this agreement, which is cancelable at any time, Battle Mountain will make annual escalating cash payments to Royal, will perform the assessment work requirements on the property, and will meet all obligations of the underlying lease with Aquarian Mining Exploration Inc. The agreement provides for a mining joint venture to be formed between Royal Gold and Battle Mountain should exploration result in discovery of significant gold mineralization. Royal would then hold a 20 percent stake in the venture,

and Battle Mountain would be the operator.

Edwin Peiker, president of Royal Gold, said "the agreement with Battle Mountain achieves several important objectives for Royal. First, it will further the exploration program on gold mineralization already identified at Bob Creek by Royal and it brings us a major industry partner with local operating experience. Simultaneously, Royal will have no further cash commitments to the property during the term of the agreement. We are looking forward to working with Battle Mountain on this project."

Royal Gold Inc. is a Denver-based, publicly held corporation. Royal Gold has a controlling interest in two mines in California, is developing another mine in California, and has three exploration properties: two located in Nevada and one in Arizona.

NEW YORK (JULY 24) PR NEWSWIRE - Oppenheimer Capital, L.P. (NYSE: OCC), declared a distribution of $.425 per unit payable Aug. 31, 1990, to holders of units of limited partnership interest at the close of business July 31, 1990. This distribution results in an increase of $.10 per unit in the annual distribution rate and $.025 per unit in the quarterly distribution rate. The distribution represents available cash flow of the partnership for the period from May 1, 1990 through and including July 31, 1990.

La Motta said, "As a result of the continuing strong financial results of the operating partnership, we are pleased to announce that the partnership will increase its regular quarterly distribution rate to $.425 per unit or $1.70 annually, effective with this distribution. We have increased the partnership's distribution rate twice since the inception of the partnership on July 9, 1987. Based on the July 23 closing price of $15 per unit the partnership offers investors a current return of 11.3 percent."

Oppenheimer Capital, L.P. owns a 32.8 percent general partnership interest in Oppenheimer Capital (the "operating partnership"), one of the leading independent investment management firms in the United States with total assets under management at June 30, 1990 of $20.9 billion.

NEW YORK (JULY 24) PR NEWSWIRE - Forest Laboratories, Inc. (AMEX: FRX), an international pharmaceutical manufacturer and marketer, today reported revenues and earnings for its first fiscal quarter ended June 30, 1990.

Income before taxes increased 62 percent to $11,948,000 from the $7,382,000 reported in last year's first quarter. After allowing for the $1,875,000 of non-recurring merger related costs reported in last year's quarter, income before taxes would have increased 29 percent. Net income for the quarter increased 48 percent to $8,270,000 or $.40 per share from the $5,571,000 or $.28 per share reported in the first quarter of the prior year.

For the quarter, net revenues increased 20 percent to $41,291,000 from $34,272,000.

Howard Solomon, president of Forest, said: "We are pleased with the strong operating results achieved in our first quarter. Our principal promoted branded products continued their excellent growth which more than offset the decline in our generic line caused by large initial stocking of two new generic products during last year's first quarter. With the detailing of additional Forest products by our UAD salesforce commencing in this quarter and this year's planned salesforce expansion, we look forward to continued growth both in revenues and income."

#90205p5236 07/24/1990 ~PR Newswire

CLEVELAND (JULY 24) PR NEWSWIRE - Directors of Pioneer-Standard Electronics, Inc. (NASDAQ: PIOS) today increased the regular quarterly dividend 14 percent from 3.5 cents per share to 4 cents per share. The dividend, at the new rate, is payable Nov. 1 to shareholders of record Oct. 10.

The dividend increase declared today was the company's 16th in the past 20 years. Pioneer-Standard also has split its stock five times in the 20-year period.

The company said the dividend increase reflected the company's current earnings progress. Last week, Pioneer reported record net income of $2,406,000, or 45 cents per primary share (40 cents fully diluted), for the first quarter ended June 30, an increase of 85 percent over the $1,298,000, or 24 cents per share (23 cents fully diluted) of the comparable period a year earlier.

At the company's annual meeting today, Chairman Preston Heller Jr. told

shareholders that earnings levels for the last half of fiscal 1990 and the first quarter of the current year were more a reflection of Pioneer's aggressive marketing and cost containment than robust demand for electronics components and computer systems products.

He said that the outlook was for continuing progress with the second quarter ending Sept. 30 very strong compared with the year earlier quarter.

"We believe that we have the programs which will provide highly respectable earnings in the present business environment," he said.

The increased dividend payout is identified as the third quarter dividend. The second quarter dividend, at the 3.5 cents per share old rate, will be paid Aug. 1 to shareholders of record July 11, 1990.

Pioneer and its 50 percent-owned affiliate, Pioneer/Technologies Group, Inc., market a broad range of electronic components and computer products through 41 locations and serve most of the nation's major markets.

NEW YORK (JULY 24) PR NEWSWIRE - Philip H. Geier, Jr., chairman of the board and chief executive officer, reported today that the Interpublic Group of Companies, Inc. (NYSE: IPG), had net income of $30,940,000 for the second quarter of 1990, an increase of almost ten percent from $28,300,000 during the same period in 1989.

Earnings per share also increased almost ten percent to $.92 from $.84 in 1989. Gross income increased approximately eight percent to $342,401,000 from $317,069,000 during the second quarter of 1989.

Net income for the six months ended June 30, 1990, increased nine percent to $39,576,000, as compared to $36,311,000 during the same period in 1989. Earnings per share increased almost ten percent to $1.18 from $1.08 in 1989. Gross income increased to $626,888,000 from $593,558,000 during the same period in 1989.

Gross income from operations outside the United States increased 22 percent in the second quarter of 1990 over the second quarter of 1989. The decrease in domestic gross income resulted from slower economic growth in the United States, and also reflected the exchange in July 1989 of Interpublic's interests in Lowe Marschalk for an increased ownership in Lowe plc. If this exchange had not taken place, the decrease in domestic gross revenue would only have been approximately seven percent.

Continuing cost containment efforts kept costs at appropriate levels in light of the general economic conditions. Geier noted that the company's financial condition continues to be excellent, with a strong balance sheet and a solid cash position.

He also noted that some domestic clients appear to have shifted advertising expenditures from the first half of the year to the second half of the year and therefore the results for the first half of the year do not necessarily indicate the results for the full year.

Interpublic's agency systems have achieved net new business during 1990 of approximately $273 million, which is an indication of solid growth. The Interpublic Group of Companies is comprised of McCann-Erickson Worldwide, Lintas:Worldwide, Dailey & Associates and a 35 percent interest in Lowe plc.

HOUSTON (JULY 24) PR NEWSWIRE - Global Marine Inc. (NYSE: GLM) today reported a net loss of $14.7 million, or $0.14 per share, on revenues of $68 million for the second quarter which ended June 30, 1990. For the corresponding quarter in 1989, the company reported a net loss of $21.6 million, or $0.22 per share, on revenues of $35 million.

For the six months ended June 30, 1990, the company reported a net loss of $25.8 million, or $0.26 per share, on revenues of $128 million. For the comparable six month period of 1989, the net loss was $35.9 million, or $0.36 per share, on revenues of $76 million.

Commenting on industry conditions, C. Russell Luigs, chairman, president and chief executive officer said, "We are encouraged by the recent increase in oil prices and the continuing strength of the key north sea

rig market. All seven of the company's north sea rigs are under contract, and dayrates continue to increase. In total, 23 of the company's 27 rigs are currently generating revenue, and two additional rigs are committed to contracts scheduled to begin within six weeks. Based on contracted backlog and improved market conditions, results for the second half of 1990 should be substantially better than for the first half. Accordingly, we continue to believe that the loss for full year 1990 will be approximately half of the $0.61 per share loss reported for 1989."

Global Marine is a major international offshore drilling contractor with interests in oil and gas exploration and production.

WARMINSTER, PA (JULY 24) PR NEWSWIRE - Fischer & Porter Co. (AMEX: FP) today reported earnings per share of 44 cents for the second quarter of 1990 on net income of $2,363,000 compared to 30 cents per share on net income of $1,657,000 for the same quarter in 1989.

Sales in the quarter of $63,876,000 represented an increase of 11.3 percent over the previous year's sales of $57,416,000. Approximately $3.9 million of the increase was due to changes in currency exchange rates. The increase in sales occurred in both the United States and International while the improved earnings was attributable to the United States. The effective tax rate in the current quarter was 35 percent, which reflects the impact of profitability in the United States and certain other countries which had losses in previous periods without tax benefits.

Earnings per share for the six months ended June 30, 1990, were 4 cents compared to a loss per share of 2 cents for the same period in 1989. Sales were $112,459,000 in the current year, an increase of 6.1 percent compared to the prior year, all of which occurred in International. Pretax income was slightly less than in 1989, primarily due to the results experienced in the first quarter of 1990. Per-share amounts in the prior year have been restated to reflect a 5 percent stock dividend paid in April 1990.

Orders received for the first half of 1990 were $132.5 million compared to $119 million for the same period in 1989. Essentially all of the increase occurred in International. The orders in the second quarter were $70 million compared to $60 million in the second quarter of 1989 and $62.5 million in the first quarter of 1990.

Fischer & Porter Co. is a world leader in measurement and control technologies. The company's products include flowmeters, transmitters, process controllers, microcomputers, distributed control systems, analytical instruments and various types of disinfection equipment. Throughout the world, Fischer & Porter instruments and systems are an integral part of such varied enterprises as chemical plants, pharmaceutical plants, food and beverage processing facilities, pulp and paper mills, mines, metal refineries and municipal and industrial water and wastewater treatment plants.

BOISE, ID (JULY 24) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced receipt of an approximately $36-million contract from the Port of Los Angeles for construction of a container terminal facility.

The contract calls for improvements and paving on 100 acres of port property. In addition to the earthwork, paving and underground utilities construction, MK will erect four buildings on the site. The largest of the structures will be a four-level, 61,000-square-foot administration building.

Work will begin immediately, with completion scheduled for early 1992. Morrison Knudsen has performed extensive work in the ports of Long Beach and Los Angeles in recent years, including a similar but smaller auto terminal, a terminal for shipping containers being transferred from ships to long-haul trucks, and several different transportation projects.

MK is a design, engineering, construction, environmental, rail systems and mining company.

NEW HAVEN, CT (JULY 24) PRNEWSWIRE - Amity Bancorp Inc., (NASDAQ: AMTY) holding company for Amity Bank and Amity Loans, Inc., reported a consolidated net loss for the three months ended June 30, 1990, of

$287,332 or $.31 per share as compared to consolidated net income of $434,000 or $.40 per share for the second quarter of 1989.

As a result of the loss for the second quarter of 1990, Amity Bancorp reported a consolidated net loss for the six months ended June 30, 1990, of $225,775 or $.28 per share. For the six months ended June 30, 1989, Amity Bancorp reported net income of $902,000 or $.85 per share.

Total assets decreased to $199,158,000 as of June 30, 1990, as compared to $206,161,000 at March 31, 1990.

The loss is primarily the result of Amity Bank's higher level of non-performing loans and the increase in the bank's provision for loan losses. On a consolidated basis, Amity Bancorp increased its allowance for loan losses to $2,417,237, representing 1.58 percent of total loans.

Amity Bank operates its main office in Woodbridge, with offices in New Haven, Branford, Norwalk and Stamford, and has received approval for an office in Greenwich. Amity Loans, Inc. maintains offices in the states of California, Colorado, Kansas, Kentucky, Louisiana, North Carolina and Texas.

WEIRTON, WV (JULY 24) PR NEWSWIRE -- Weirton Steel Corp. (NYSE: WS) today reported net income of $6.4 million or $.30 per share of common stock on shipments of 564,000 tons for 1990's second quarter.

These results compare with 1989's second quarter net income of $.4 million or $.02 per share, on shipments of 640,000 tons of flat rolled steel products. Income increased from $4.0 million in the first quarter while shipments decreased from 587,000 tons. This increase in income was primarily due to an improvement in operating costs associated with the newly installed equipment on the company's hot strip mill.

For the three-month period ended June 30, net sales were $302.3 million compared with $341.9 million in the prior year's second quarter. For the six months period ended June 30, Weirton reported income of $10.4 million or $.48 per share, on sales of $614.2 million and shipments of 1,151,000 tons vs. 1989's first half of income of $6.5 million or $.32 per share, on sales of $705.7 million and shipments of 1,343,000 tons.

Expenditures on capital projects for the 1990 calendar year are expected to exceed $200 million.

Weirton Steel is located in Weirton, W.Va.

ANNAPOLIS, MD (JULY 24) PR NEWSWIRE - UNC Incorporated (NYSE: UNC) announced today that it has completed the sale of two of its environmental service subsidiaries to Chem-Nuclear Environmental Services Inc., a subsidiary of Waste Management Inc. (NYSE: CHW) for $24 million in cash.

UNC said that the gain on the sale of the units will be offset by the expected write-down of its investment in UNC Reclamation. No losses are expected to be recorded.

The units sold were UNC Geotech and UNC Remediation, both located in Grand Junction, Colo. Each unit is involved in providing environmental restoration and waste management services to the federal government.

Dan A. Colussy, chairman and chief executive officer of UNC Incorporated, said, "This transaction represents another important step in accomplishing the strategic objectives of reducing our level of debt, lowering our exposure to reduce defense spending and becoming primarily oriented to the commercial aviation industry."

UNC Incorporated, listed on the New York Stock Exchange, is engaged in providing products and services to the aviation industry.

PRINCETON, N.J. (JULY 24) PR NEWSWIRE - A decision in the suit brought by Satellite Broadcast Networks, Inc., PrimeTime Relay Corp. and PrimeTime 24 Hour Joint Venture (SBN), against GE Americom was issued by Judge John E. Bachman of the Superior Court of New Jersey, Middlesex County, Chancery Division, on Friday, July 20. Judge Bachman found that under the option, GE Americom was entitled to specify protection level of the proposed service.

Judge Bachman gave SBN 30 days in which to decide whether it would accept the protected service proposed by GE Americom. If SBN declines to accept the protected service, the K-1 transponders will become available for other prospects.

"We are pleased with the results in this case since they are fully in accord with our business plans and vindicate our efforts to be responsive

to our customers' needs and the protection requirements of the marketplace " commented Neil Bauer, senior vice president of commercial operations at GE Americom.

GE Americom, located in Princeton, operates the SATCOM satellite fleet -- 5 C Band and 2 Ku-Band satellites that service cable television, broadcast radio and television as well as business information and government markets. GE Americom is a subsidiary of General Electric Company.

CANTON, MA (JULY 24) PR NEWSWIRE - Computer Identics Corporation (NASDAQ: CIDN) reported its unaudited results today for the second quarter 1990 and the six months ended June 30, 1990.

Second quarter sales were $4,793,000 as compared with $4,336,000 for the second quarter 1989, an increase of 11 percent. Revenue from sales of products and services increased to $9,103,000 for the six months ended June 30, 1990 as compared with $7,272,000 for the same period in 1989, a 25 percent increase. Total revenue for the first half of 1989 was $8,833,000 and included the non-recurring sale of a manufacturing license and related assets for $1,561,000.

The company reported net income of $62,000 for the second quarter of 1990 as compared with $225,000 for the same period in 1989. For the six months ended June 30, 1990 net income was $82,000 as compared with $474,000 for 1989. Without the gain on the sale of the manufacturing license, there would have been a loss of $266,000 for the first six months of 1989.

Frank Wezniak, president and chief executive officer, said "the second quarter of 1990 showed continued progress toward our goal of becoming a profitable and growing company. We continue to focus on providing standard hardware and software products that capture information for material handling and data collection applications in industrial situations. It is an expanding market driven by the need for improved efficiency through industrial automation. Bar code and other forms of automatic identification and data collection are critical tools for automation in industry.

"For the quarter pretax income is somewhat lower than last year because of our increased investment in product development, marketing, and sales. Our product development effort has already produced several key products that will be introduced later this year. These new products should further strengthen our competitive position in important product areas.

The investment in an expanded marketing and sales program also continued and resulted in this year's increased bookings, which are especially strong in Europe. Although results for the U.S. have been disappointing, they have recently shown signs of improvement. the proportion of our business in Europe and other export markets continues to expand, and the profit at our foreign subsidiaries has resulted in the increased provision for income taxes, since they are not covered by our United States tax loss carry forward credit.

"We are generally pleased with the progress and profitable performance of the quarter, but disappointed that past investments in the domestic sales effort are not yet producing the desired results. This problem is receiving increased management attention as we continue toward our goal of making Computer Identics an even more successful company."

#90205p5260 07/24/1990 ~PR Newswire

PITTSBURG, TX (JULY 24) PR NEWSWIRE - Pilgrim's Pride Corporation (NYSE: CHX), an East Texas-based chicken firm, today reported net sales of $188.6 million for the third quarter ended June 30, 1990, a seven percent increase over net sales of $176.1 million for the comparable period in fiscal 1989. Net income for the quarter totalled $7.0 million or $.31 per share, compared with net income of $13.6 million, or $.60 per share, for the third quarter of fiscal 1989.

For the nine months ended June 30, 1990 the company reported net sales of $529.2 million, a nine percent increase over net sales of $484.1 million for the comparable period in 1989. Pilgrim's net income for the nine months was $12.0 million or $.53 per share, compared with net income of $16.0 million or $.71 per share for the comparable nine months of fiscal 1989.

According to Lonnie A. "Bo" Pilgrim, chairman and chief executive officer, lower poultry product prices experienced in the third quarter of 1990 offset by continually improving results in the company's further processed and prepared foods operations and lower feed ingredient prices caused the decrease in operating results from 1989 record earnings levels.

Pilgrim's Pride Corporation is the fifth largest producer of poultry products and the 18th largest egg producer in the United States, producing more than 825 million pounds of dressed poultry and 41 million dozen table eggs annually. Pilgrim's Pride now employs more than 8,600 persons and operates processing plants, distribution centers, hatcheries and feed

mills in Texas, Arkansas, Oklahoma, Arizona and Mexico.

Products are sold under the "Pilgrim's Pride" label to supermarkets, fast food chains and food service customers. The company's primary distribution is through retailers and fast food outlets in the Central, Southwestern and Western United States and through the food service industry nationally.

#90205p5267 07/24/1990 ~PR Newswire

SHAWNEE, OK (JULY 24) PR NEWSWIRE - Barton Industries, Inc. (NASDAQ: BART), announced today profits of $2.8 million with accompanying revenues of $22.1 million the first three quarters of Fiscal Year 1990. These figures represent a 301 percent increase in income and a 103 percent increase in revenue over the same period last year. The continued improvement in the company's financial results were accomplished while increased expenses were incurred in the expansion and relocations of three units of the company's operation: the Valve Company Sales office to Houston; Barton's division office for the Integrated Technology Systems to Dallas; and Barton Telecommunications to Lafayette, La.

The comparative data between 1990 and 1989 are as follows. Net income for the nine months ended June 30, 1990 was $2,762,976 or $.20 per share, on revenues of $22,085,967, compared with a net loss of $1,377,987, or $.19 per share, on revenues of $10,885,770 for the nine months ended June 30, 1989. For the three months ended June 30, 1990, net income was $1,020,251 or $.07 per share, on revenues of $8,121,474, compared with a net loss $428,688, or $.06 per share, on revenues of $3,523,699 for the three months ended June 30, 1989.

C. W. Earl Johnson, chairman of the board and chief executive officer of Barton Industries, stated, "I am very encouraged by the operating results of our first three quarters. Both our revenues and income are significantly up over last year, and the steps taken in the third quarter to relocate several key operations will result in even better figures in

the future. Barton's backlog estimated at $36.0 million is at an all time high and our forecast for revenues of $32.0 million and income of $5.0 million for the 1990 fiscal year should be exceeded. Effective with this reporting period, because of the dynamic growth of the company, we will be reporting on a monthly basis the unaudited results of operations in order to keep our shareholders and investment community abreast with the growth of Barton."

BEDFORD, Mass. (JULY 24) PR NEWSWIRE - Millipore Corporation (NYSE: MIL) announced today that its earnings were 50 cents per share for the second quarter, up 4 percent from 1989 second quarter earnings of 48 cents per share. Net income rose from $13.5 million to $13.9 million. For the first six months of 1990, earnings per share have risen to 97 cents, a 4 percent increase over last year's 93 cents, and net income has risen to $26.9 million, up 4 percent over last year's $25.9 million.

Earlier in the month Millipore reported sales from its ongoing business grew 12 percent over the second quarter of 1989 and that sales for the first half were 11 percent higher than the same period last year. These growth rates exclude the8?9 results of Millipore's process water business, which was sold in November 1989. Including results from this business, sales growth was 4 percent for the quarter and 3 percent for the first half.

Had currency exchange rates remained constant in 1989 and 1990, Millipore noted, its growth rate, excluding 1989 results for the sold business, would have been 10 percent for the quarter and for the first half.

Millipore is a multinational, high technology growth company that leads the $3.5 billion separations industry. Millipore products are used for analysis, synthesis and purification in life science research, pharmaceutical production, environmental testing, beverage processing,

semiconductor manufacturing, health care, and other applications.

LOS ANGELES (JULY 24) PR NEWSWIRE - Calling it a major step toward improving the state's air quality, officials from three California energy utilities praised the GMC Truck Division of General Motors Corp. (NYSE: GM) for its commitment to begin producing natural gas trucks.

Representatives from Pacific Gas and Electric Co., San Diego Gas & Electric, Southern California Gas Co. and the California Air Resources Board joined GMC Truck at a news conference in Los Angeles as it announced plans to produce at least 1,000 natural gas trucks per year beginning in 1991.

"This is a significant milestone for the automotive and natural gas industries," said Norman Bryan, vice president in charge of clean air vehicle development at PG&E. "GMC's efforts are paving the way for natural gas vehicles to be a viable transportation alternative."

"GMC's plans to produce these initial 1,000 trucks is the first step toward a much broader program involving natural gas vehicles," said Roy Rawlings, vice president of marketing at SoCalGas. "Discussions are underway with GMC on a larger program to commercially develop a series of

pickup trucks, vans and other vehicles," he added.

Under a joint agreement between GMC Truck, a consortium of utilities from California, Texas, Colorado and the Texas General Land Office, the automaker will produce the natural gas trucks and sell them through selected GMC dealers with particular emphasis on the fleet buyer in California and Texas.

The consortium is providing $935,000 for the initial fleet which covers costs associated with design, engineering and development for the natural gas fuel system, engine emission and performance testing and the development and design of assembly processing to produce these vehicles. GMC Trucks will contribute engineering services and prototype vehicles.

The program will use 1991 GMC 3/4-ton pickup trucks equipped with a GM 5.7 liter engine and a throttle-body, manifolded injection system for the vehicle. PAS Incorporated of Troy, Mich., will develop and install the natural gas fuel system.

"GMC Truck is to be commended for its leadership role in the automotive industry and in helping to solve our serious air pollution problems," said Jennifer Mitchell, director of marketing for San Diego Gas & Electric, adding that natural gas vehicles produce 65 percent less ozone-forming pollutants, and 90 percent less carbon monoxide than gasoline and other fuels.

LOS ANGELES (JULY 24) PR NEWSWIRE - Frank D. Boren, an attorney, real estate developer and former president of the Nature Conservancy, has been elected to the ARCO (NYSE: ARC) board of directors, it was announced today by Lodwrick M. Cook, ARCO chairman and chief executive officer.

Boren, 56, served as Conservancy president from January 1987 to January 1990 when he retired to become a director and consultant to Sand County Ventures Inc., a conservation-oriented venture capital company in Palo Alto, Calif.

A native of California, Boren graduated from Stanford University with a bachelor of arts degree in economics. He went on to earn a law degree from Stanford and practiced law with the Los Angeles firm of Paul, Hastings, Janofsky & Walker, where he was a partner for 12 years. He was later a partner in McNeil Enterprises of Sherman Oaks, Calif., a real estate development company.

Boren joined The Nature Conservancy, a national conservation organization dedicated to the preservation of biological diversity in natural areas, in the late 1960s. He served as three-time Southern California chapter chairman, a member of the board of governors for nine years, and the board's chairman for two years prior to becoming president.

He has been honored with the Conservancy's Oak Leaf and California Achievement awards. Boren is currently a Conservation Fellow for the World Wildlife Fund/Conservation Foundation.

Boren and his wife Ann have three daughters.

ATLANTA (JULY 24) PR NEWSWIRE - John H. Harland Co. (NYSE: JH) today reported record quarterly sales of $93.8 million for the second quarter, up 5.1 percent over 1989.

Net income was $15.1 million for the second quarter, also a quarterly record, and was slightly higher than last year's $15.0 million. Net income per share was 40 cents for both periods. Return on equity was 21.2 percent in 1990 vs. 23.3 percent in 1989.

Sales for the six months ended June 30 were $184.3 million, representing an increase of 6.5 percent over 1989, while net income was $30.0 million vs. $29.2 million in 1989. Net income per share was 80 cents in 1990 vs. 77 cents in 1989.

"Our check unit orders continue their strong 1990 performance in the second quarter with a 5.8 percent increase over 1989," said Robert Woodson president and chief executive officer. "In addition, our conversion to offset and automation of our production process has resulted in a productivity increase of 3.6 percent. However, there have been higher costs associated with our conversion which had an impact on the quarter's results."

MasterPieces(TM), a secondary personal check line recently introduced by Harland, has showed steady gains in consumer acceptance. The 12 MasterPieces(TM) designs feature cute characters, colorful scenes and a check that provides a contribution to an environmental organization founded by entertainer John Denver.

"We are pleased by the reception of MasterPieces(TM) in the marketplace, especially for environmentally related designs such as Windstar checks," said Woodson. "Windstar's popularity demonstrates the ability of Harland to reflect current trends and issues through its checking products."

Harland is a major national participant in the financial and educational fields with production facilities across the United States and in Puerto Rico.

TULSA, OK (JULY 24) PR NEWSWIRE - Harry D. Jones, president of Kinark Corporation (AMEX: KIN) today announced the promotion of Mark F. Friedlein to the position of vice president and general manager of Kinpak, Incorporated. Kinpak, headquartered in Montgomery, Ala., packages automotive antifreeze and speciality chemicals.

Friedlein joined Kinark Corporation in 1985, as manager of special projects. In his five years with the company, he has served in several management positions, including sales manager at Lake River Corporation, manager of sales and marketing for Kinpak, Inc. and as general plant

manager of Kinpak for the past two and one-half years. Prior to joining the Kinark organization, his previous experience included various managerial position with Cargill, Incorporated. Friedlein is a 1977 graduate of Southeast Missouri State University and holds a B.S. degree with a double major in economics and agriculture.

Jones commented, "Mr. Friedlein's managerial direction as general plant manager of Kinpak has resulted in positive business trends for the company making it a continuing contributor to Kinark revenues and profits. We are always pleased and proud of internal management promotions. As vice president and general manager, Mark's leadership will guide the future growth and development of Kinpak." This position will continue to report to Jones.

Kinark Corporation, with corporate headquarters in Tulsa, operates chemical facilities in Chicago and Montgomery, Ala., and supports industrial/commercial construction and metals corrosion protection with galvanizing plants in Denver, Louisville, Nashville, St. Louis, Houston and Hurst, Texas.

#90205p5289 07/24/1990 ~PR Newswire

DENVER (JULY 24) PR NEWSWIRE - Key Production Co. Inc. (NASDAQ: KPCI) today reported second quarter 1990 net income of $344,000, or 3 cents per share. This compared to net income a year ago of $744,000, or 6 cents per share, including a one-time favorable settlement of a property dispute which added $234,000, or 2 cents per share, to net income.

For the six months ended June 30, 1990, earnings were $1.5 million, or 13 cents per share, on revenues of $15.1 million. This compared to earnings of $1.3 million, or 11 cents per share, on revenues of $16.8 million for the first half of 1989.

Excluding proceeds from the property ownership settlement during 1989's second quarter, cash from operations declined 19 percent to $3.4 million due primarily to production declines and lower oil prices. Cash from operations was allocated primarily to eliminating debt, which was reduced during the first half by one-quarter, or $7 million, to $21.6 million.

Declining production and lower oil prices were responsibleo?r the year-over-year decrease in the quarter's earnings. Production for the quarter totaled 2.8 billion cubic feet (Bcf) of natural gas and 118,000 barrels of oil, compared to 3.4 Bcf and 134,000 barrels, respectively, during the like period in 1989. The production decline is the result of natural depletion inherent in Key's stated policy to eliminate debt and

fund dividends rather than reinvest to replace reserves.

During a quarter in which spot market gas prices for the industry declined by approximately 10 cents per thousand cubic feet (Mcf), Key obtained an average $1.67 per Mcf, up 6 percent over the $1.57 per Mcf a year ago. The improvement is attributable to increased sales under long-term contracts offering premium pricing over that found in the current spot market. The higher gas price partially offset a 14 percent decline in the average price received for oil which was $15.62 per barrel compared to $18.23 a year ago.

Key Production is an independent oil and gas production company. Common stock shares of Key trade on the NASDAQ system (symbol KPCI).

#90205p7791 07/24/1990 ~PR Newswire

SALT LAKE CITY (JULY 24) PR NEWSWIRE - Smith's Food & Drug Centers Inc. (NYSE: SFD) today reported record sales and net income for the second quarter 1990.

Sales for the 13 weeks ended June 30, 1990, totaled $501 million compared to $422 million last year, an increase of 19 percent. Net income was $8.5 million, up 42 percent over $6.0 million reported for the like quarter last year. Net income per common share, diluted by additional shares issued in connection with last year's public offering, was 34 cents compared to 30 cents, an increase of 13 percent.

For the first 26 weeks of the year, sales totaled $989 million, up 20 percent from $821 million last year. Net income of $16.7 million was up 43 percent over last year's $11.6 million. Net income amounted to 66 cents per common share compared to 59 cents, an increase of 12 percent.

Sales in comparable stores opened at least a full year were up 8 percent.

Gross margins for the second quarter decreased slightly to 21.8 percent from 21.9 percent due primarily to the six new stores opened in the Phoenix market since late November 1989. Compression of gross margins is expected in new markets as the company promotes price competition to establish market share and build sufficient volume to effect economies of scale. The decrease in gross margins was offset by a reduction in the percentage of total expenses to net sales caused by higher sales volumes and increases in comparable store sales which spread fixed costs over a larger sales base. The decrease in interest expense is due to the reduction of debt from the proceeds of the company's initial public offering.

The second regular quarterly dividend in 1990 of 7 cents per common share was paid on June 15, 1990.

Smith's is a leading regional supermarket chain operating 94 stores in eight intermountain and southwestern states. The majority of these stores are large combination food and drug centers.

#90205p7806 07/24/1990 ~PR Newswire

SANTA BARBARA, CA (JULY 24) PR NEWSWIRE - Mentor Corp. (NASDAQ: MNTR) today reported record sales of $16.3 million for the quarter ended June 30 1990, a 35-percent increase over sales of $12.0 million in the first quarter last year. Operating income rose to a record $3.2 million, an increase of 20 percent over operating income in the first quarter last year. Net income was $2.2 million, 7 percent ahead of the prior year and earnings per share rose to $.20 per share compared with $.19 for the similar period last year.

The company attributed its growth in sales primarily to sales of the ophthalmic products of Mentor O&O, the subsidiary that Mentor acquired in April 1990. Sales of disposable health care products were strong for the quarter, rising over 20 percent, the company reported, while growth in sales of implantable products was somewhat slower, growing about 10 percent over last year.

The company reported that the significant increase in operating income was partially offset by the financing costs of the Mentor O&O acquisition. While the subsidiary was profitable, the financing costs of the acquisition reduced net earnings for the quarter. The company stated that

a positive overall contribution is expected from the subsidiary by the end of the current fiscal year.

Mentor Corp. produces surgically implantable devices, surgical and diagnostic instruments, and disposable medical products, primarily for the specialties of urology, plastic and reconstructive surgery, and ophthalmology.

#90205p7813 07/24/1990 ~PR Newswire

MIDLAND, Mich. (JULY 24) PR NEWSWIRE - The Dow Chemical Company (NYSE: DOW) today announced higher sales and lower earnings for the second quarter compared to a year ago. The company said weakening industry fundamentals and higher manufacturing costs negatively impacted earnings.

Sales for the quarter were $4.8 billion, up 4.5 percent from a year ago. Operating income was $714 million, down 39.6 percent from a year ago, and net income fell 50 percent to $364 million. Earnings per share were $1.34 down 50.3 percent from the second quarter of 1989.

Volume was flat with the first quarter, which was unexpected in what is Dow's seasonally strongest quarter. Anticipated price increases did not materialize and overall pricing levels slipped from first quarter and from a year ago.

Manufacturing costs were up 3 percent from first quarter, despite decreasing feedstock and energy costs, due to extended plant maintenance shutdowns and production outages in several major facilities. The operating rate for the quarter was 89 percent, and while still very strong slipped 3 percent from last quarter.

The Chemicals and Performance Products segment posted sales of $1.2 billion and operating income of $177 million, down 12 and 63 percent, respectively, due in part to the unexpected chlor-alkali plant outages in Canada and Brazil, as well as declining demand for chlorinated solvents.

Sales in the Plastics segment were $1.8 billion, down 3 percent from a year ago, while operating income dropped 40 percent to $279 million. Thermoplastics improved from first quarter, but pricing pressure in June limited the recovery. The thermosets business experienced a margin contraction due to higher costs and softening demand.

Sales in Consumer Specialties jumped 48 percent to $1.3 billion from a year ago. Operating income increased 46 percent to $268 million, or 20 percent of sales. These increases reflect the continued strong

performance of the pharmaceutical and agricultural businesses, including the consolidations of Marion Laboratories and Elanco. Pharmaceutical sales were highlighted by the Cardizem family of cardiovascular products, which increased 26 percent from a year ago, and Seldane non- sedating antihistamine, which was up 31 percent.

#90205p7815 07/24/1990 ~PR Newswire

FORT LAUDERDALE, FL (JULY 24) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX) announced today that revenues for the second quarter ended June 30, 1990 were $17,451,000, a 13 percent increase from revenues of $15,419,000 for the corresponding 1989 period. Net income for the quarter was $767,000, or $.05 per share. This compares to a net loss of ($4,448,000), or ($.27) per share for the comparable period in 1989 which included a $3,518,000 unusual charge related to the company's write-off of its minority equity investment in Globenet, Inc.

Income from operations amounted to $719,000 in the second quarter of 1990 as compared to a loss from operations of ($1,480,000) in the second quarter of 1989. Such improvement was due to higher sales, as well as decreased operating expenses of $1,115,000, primarily because of lower product development expenses and sales and marketing spending.

For the first six months of 1990, Telematics reported revenues of $32,672,000, up 23 percent from revenues of $26,666,000 for the corresponding 1989 period. The net loss for the first six months of 1990 was ($444,000), or ($.03) per share. This compares to a net loss of ($8,994,000), or ($.54) per share for the comparable 1989 period which included the $3,518,000 unusual charge related to the company's write-off of an equity investment and a loss from equity investments of $1,260,000.

John P. Pitt, chairman of the board, stated, "For the first six months of 1990, domestic and foreign sales both are up more than 20 percent, margins remain strong, the company's operating losses have been lowered by $5.3 million and net losses reduced by $8.6 million compared to the same period for 1989." He added, "Telematics' financial position has further strengthened since year-end 1989 through increased cash of $1.4 million up to $8.5 million, decreased debt of $1.1 million down to $5.9 million, and substantially improved cash flow."

The company stated that during the second quarter of 1990 it had established a lending relationship with Continental Bank N.A. that provides Telematics a secured credit facility of up to $15 million through June of 1992. This agreement replaces a line of credit from another bank which was due to mature in July of 1990.

Founded in 1982, Telematics designs, manufactures and markets computer systems and software products designed specifically for voice and data communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and switches, T1 multiplexers, and frame relay switches. Telematics has approximately 400 employees worldwide. Headquartered in Fort Lauderdale, Fla., Telematics also has facilities in Calabasas and San Mateo, Calif.; Herndon, Va.; Basingstoke, England; Paris; Frankfurt; and Tokyo.

#90205p7819 07/24/1990 ~PR Newswire

NEW BRUNSWICK, NJ (JULY 24) PR NEWSWIRE -- Johnson & Johnson (NYSE: JNJ) today announced that earnings per share for the second quarter of 1990 rose 19.1 percent to $1.06 compared with $.89 in the 1989 period. Consolidated net earnings for the second quarter of 1990 were $353 million compared with $297 million for the same period a year ago, an increase of 18.9 percent. Consolidated sales for the second quarter of 1990 were $2.82 billion, an increase of 18.2 percent over 1989 second quarter sales of $2.39 billion. The effect of a weaker U.S. dollar relative to foreign currencies increased second quarter sales by 3.0 percent. Excluding the

effect of currency exchange rates, sales would have increased 15.2 percent.

Johnson & Johnson's Professional business includes suture and mechanical wound closure products, diagnostic products, medical equipment and devices ophthalmic products, surgical instruments and medical supplies.

The company reported consolidated sales of $5.66 billion for its worldwide operations during the first six months of 1990, an increase of 17.1 percent. Consolidated sales for the worldwide manufacturer of health care products were $4.84 billion for the same period a year ago. The lower value of the dollar in the first six months of 1990 compared to last year resulted in an increase in sales of $93 million or 1.9 percent.

Domestic sales for the first six months of 1990 were $2.73 billion, an increase of 11.5 percent over 1989 domestic sales of $2.45 billion for the same period a year ago. Sales by international subsidiaries were $2.93 billion for the first six months of 1990 compared with $2.39 billion for the same period a year ago, an increase of 22.9 percent. Excluding the impact of the lower value of the dollar, international sales increased by 19.0 percent.

Average shares of common stock outstanding in the first half of 1990 were 333.1 million compared with 333.2 million in the 1989 period.

Johnson & Johnson, with over 83,000 employees, is the world's largest and most comprehensive manufacturer of health care products serving the consumer, pharmaceutical and professional markets. For the year 1989, sales were $9.78 billion and return on equity reached a record 28.3 percent.

#90205p7820 07/24/1990 ~PR Newswire

MORRIS TOWNSHIP, NJ (JULY 24) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) today reported 1990 second quarter net income of $121 million, or 88 cents per share, compared to $143 million, or 95 cents per share, in the 1989 second quarter after excluding a one-time gain for the earlier period.

The 1989 second quarter results included a one-time gain of $23 million, or 16 cents per share, as a result of an insurance settlement received by Union Texas Petroleum Holdings, Inc., in which Allied-Signal has a 40 percent equity interest. Including the one-time gain, second quarter 1989 net income was $166 million, or $1.11 per share.

Sales for the 1990 second quarter were $3.2 billion, about the same as for the 1989 quarter.

The lower earnings in the 1990 period were primarily in the company's automotive unit and included a substantial loss from its operations in Brazil. The company's engineered materials business improved from last year, while its aerospace earnings declined slightly.

Net income from the company's automotive business was $8 million, compared to $39 million in 1989. The temporary production slowdown in Brazil resulted in a loss of $18 million, or 13 cents per share. Continued weakness in the U.S. passenger car and light truck market, as well as lower aftermarket sales volumes and continued disappointing performance in the North American turbocharger business also affected automotive results. Automotive sales increased six percent, reflecting the impact of foreign exchange and new product sales for antilock braking systems and airbags.

Aerospace net income for the period was $59 million, compared to $62 million last year. Aerospace sales were about the same as in 1989. The engine division achieved higher sales and profits despite increased development costs. Avionics group profits were down compared to a particularly strong performance in 1989. The aerospace unit also increased its investment in new wheel and brake programs.

Engineered materials net income was $71 million, compared to $67 million in 1989. Sales were about the same as last year. Increased volumes of carpet fibers and higher volumes and margins for high density polyethylene were partially offset by lower earnings for the copper foil laminates and fluorine products businesses.

Six month net income was $250 million, or $1.78 per share, compared to $269 million, or $1.80 per share, in 1989, again after excluding the one-time gain from the 1989 period. Including the one-time gain, 1989 six month net income was $292 million, or $1.96 per share. First half sales were $6.2 billion, compared to $6.1 billion last year.

Allied-Signal is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

#90205p7821 07/24/1990 ~PR Newswire

MENLO PARK, CA (JULY 24) PR NEWSWIRE - The Board of Directors of Robert Half International Inc. (NYSE: RHI) today declared a dividend distribution of one Preferred Share Purchase Right on each outstanding share of its common stock. The rights are designed to assure that all stockholders

receive fair and equal treatment in the event of any proposed takeover of the company and to guard against partial tender offers, squeeze-outs, open market accumulations and other abusive tactics to gain control of the company without paying all stockholders a control premium.

The rights are intended to enable all stockholders to realize the long-term value of their investment in the company. The rights will not prevent a takeover, but should encourage anyone seeking to acquire the company to negotiate with the board prior to attempting a takeover.

The rights will be exercisable only if a person or group acquires 30 percent or more of the company's common stock or announces a tender offer the consummation of which would result in ownership by a person or group of 30 percent or more of the common stock. Each right will entitle stockholders to buy one one-hundredth of a share of a new series of junior participating preferred stock at an exercise price of $65 upon certain events.

If, after the rights become exercisable, Robert Half International is acquired in a merger or other business combination transaction, or sells 50 percent or more of its assets or earnings power, each right will entitle its holder to purchase, at the right's then-current price, a number of the acquiring company's common shares having a market value at the time of twice the right's exercise price.

The dividend distribution will be made on Aug. 8, 1990, payable to stockholders of record on that date. The rights will expire on Aug. 8, 2000. The initial distribution of rights is not taxable to stockholders.

Robert Half International Inc. is the world's first and largest personnel services firm specializing in the placement of accounting, financial, banking, tax, and information systems personnel. The company places permanent employees through its Robert Half(R) division and temporary employees through its Accountemps(R) division. These services are offered through 160 offices located in the United States, Canada, the United Kingdom and Belgium.

#90205p7822 07/24/1990 ~PR Newswire

FULLERTON, CA (JULY 24) PR NEWSWIRE - Wynn's International Inc. (NYSE: WN) reported today net income of $1,551,000 or $.40 per share in the 1990 second quarter as compared to $1,655,000 or $.43 per share in the second quarter of 1989.

Pretax income from operations was $3,101,000 in the quarter ended June 30,

1990, a 12 percent increase over $2,759,000 in the comparable 1989 quarter. The net income reflects an increase in the effective tax rate to 50 percent from 40 percent in the 1989 second quarter.

Net sales for the quarter ended June 30, 1990, were $68,521,000, compared to $70,451,000 a year ago, a decrease of 3 percent. The decline in revenues in the second quarter was caused by significantly lower sales at the Wynn's Climate Systems automotive air conditioning subsidiary, but this decline was partially offset by higher revenues at Wynn Oil Company, the international petrochemical specialties division.

Net income for the first half of this year was $3,303,000, or $.85 per share compared to $4,863,000 or $1.27 per share a year ago. As previously reported, the 1989 first quarter results included an aftertax gain of $1,375,000, or $.36 per share, from the sale of a joint venture interest.

Net sales for the first six months of 1990 were $141,065,000, compared to $143,627,000 for the first half of 1989, a decrease of 2 percent.

Wynn's Climate Systems Inc. (WCS), which designs and manufactures automotive air conditioning systems for sale to original equipment manufacturers (OEM) and through the aftermarket, experienced a 21 percent drop in revenues during the second quarter of 1990 compared to the 1989 second quarter. This reduction was due principally to lower aftermarket sales and reduced OEM sales to Isuzu and independent Hyundai dealers. Sales to Mazda increased in the second quarter of 1990 compared to the same period in 1989. Due to its previous efforts to downsize the business WCS was able to post a small profit in the most recent quarter, compared to an operating loss a year earlier.

Wynn's-Precision Inc. (Precision), a key supplier of sealing products for automobiles and other equipment, recorded an 11 percent decrease in pretax earnings in the second quarter compared to the second quarter of 1989 on a slight revenue increase. The lower earnings were due to an operating loss recorded by Precision Canada in the most recent quarter as a result of a 13 percent decline in revenues, principally in higher margin aerospace products. The results for U.S. operations were slightly better than the prior year, despite the general slowdown in the U.S. automotive industry.

Wynn's International Inc., founded in 1939, is a worldwide supplier of automotive air conditioners, O-rings, seals, molded rubber products, petrochemical specialties products and builders hardware. The company has 1,965 employees and is headquartered at 2600 E. Nutwood Avenue, Fullerton, Calif., 92631, telephone: 714-449-8900.

CAROL STREAM, IL (JULY 24) PR NEWSWIRE - Ben Franklin Crafts Inc., franchisor of the nation's largest chain of craft retail stores, has issued an exclusive area franchise to two Michigan businessmen who will develop up to five stores in northwest metropolitan Detroit, it was announced by John B. Menzer, president.

Owners of the exclusive franchise area are David and Thomas Johnston, longtime Ben Franklin franchise owners in Frankenmuth, Mich., where they operate a 53,000-square-foot variety and food store unit.

Ben Franklin Stores Inc., the 113-year-old variety store franchisor, formed the crafts firm in 1989. Ben Franklin Crafts is now selling exclusive regional franchise rights in addition to the single-store franchise offerings that have made the crafts firm the largest retail chain of its kind in the nation.

Ben Franklin Crafts expects the Detroit-area stores will be opened in Macomb and Oakland counties, according to Menzer.

"An areawide Ben Franklin Crafts franchise is an excellent opportunity for investors," said Menzer. "As the baby-boomers -- the dominant buying influence -- have grown up, they've shifted their priorities to home and family, and have created a craze for crafts. Ben Franklin Crafts has founded a profitable niche and has emerged as the leader in the field."

Combined annual retail sales by Ben Franklin's 1,300 variety and craft stores are estimated at $1 billion.

BALTIMORE (JULY 24) PR NEWSWIRE - MNC Financial Inc. (NYSE: MNC) today reported a net loss of $68.5 million, or $.85 per fully diluted share, for the six month period ended June 30, 1990 as a result of further increases in reserves for possible credit losses, principally relating to its commercial real estate portfolios.

MNC issued preliminary results for the quarter on July 12, 1990, and today released its final figures for the period.

On a fully diluted basis, the loss for the second quarter of 1990 amounted to a loss per share of $.90, compared with earnings of $.78 a year ago; the net loss for the second quarter was a loss of $74.7 million, vs. net

income of $66.6 million for the same period of 1989. For the first half of 1989, MNC reported net income of $124 million, or $1.44 per fully diluted share.

In announcing its financial results, the company stated: -- Nonperforming assets increased from $359 million at March 31, 1990, to $757 million as of June 30, 1990.

-- $277 million of the loans in this category were either contractually current or past due by fewer than 90 days as of June 30, 1990.

-- Other Assets Owned (including insubstance foreclosures) increased from $91 million at March 31 to $155 million at June 30, 1990.

-- Of the $757 million in total nonperforming assets, $522 million are commercial real estate-related.

-- A provision of $233 million was added to reserves for possible credit losses, bringing total reserves to $545 million.

-- Net loan chargeoffs during the second quarter (including $35 million of write-downs relating to assets reclassified as Other Assets Owned) totalled $96 million.

MNC Financial is a $27-plus billion-asset diversified financial services company which delivers a broad range of commercial and consumer banking products in the Baltimore/Washington common market, and in the mid-Atlantic states. In addition, MNC is the largest national marketer of endorsed affinity group credit cards, a pioneer in asset securitization and sales, and a leader in national consumer finance products. MNC manages one of the largest trust entities in the region.

PURCHASE, NY (JULY 24) PR NEWSWIRE - PepsiCo, Inc.'s (NYSE: PEP) second quarter sales rose 17 percent to $4.2 billion, and net income and earnings per share advanced 10 percent to $292.5 million and $1.10 per share, respectively. Earnings per share jumped a very strong 19 percent in the quarter, excluding the impact of a one-time $.06 net credit in 1989 and a $.02 per share charge in 1990 to write off receivables due from a major domestic customer which recently filed for bankruptcy. In addition, the current quarter included $.03 per share in dilution from the July 1989 acquisition of the Smiths and Walkers snack chip companies.

SNACK FOODS Snack foods operating profits jumped 18 percent to $226.2 million, while sales rose 24 percent to $1.2 billion. Excluding the impact of one-time items in both years and the 1989 acquisition of Smiths and Walkers, sales and operating profits both rose 12 percent.

SOFT DRINKS Soft drink sales rose 8 percent to $1.6 billion and operating profits rose 15 percent to $237.7 million, excluding the impact of one-time items in both years. Reported operating profits (including the one-time items) declined 3 percent to $233.2 million.

RESTAURANTS Worldwide restaurant sales grew 22 percent to $1.4 billion and operating profits advanced 25 percent to $137.6 million, excluding the impact of an $8 million reorganization charge at KFC in 1989.

PIZZA HUT Pizza Hut posted a very strong 25 percent advance in sales to $676 million and a 25 percent rise in operating profit to $64.8 million.

TACO BELL & KENTUCKY FRIED CHICKEN Taco Bell sales jumped 21 percent to $399 million, and operating profits rose 14 percent to $36.8 million. Kentucky Fried Chicken sales also were very strong, growing 18 percent to $358 million.

YEAR-TO-DATE For the first two quarters, revenues increased 20 percent to $7.9 billion and net income rose 10 percent to $474.4 million. Earnings per share grew 10 percent to $1.78. Excluding one-time items, year-to- date earnings per share grew 15 percent. The first two quarters also included $.15 per share in dilution from 1989 acquisitions.

#90205p7827 07/24/1990 ~PR Newswire

GREEN BAY, WI (JULY 24) PR NEWSWIRE - Terex Corporation (NASDAQ: TERX) today reported increased sales and earnings for the quarter and the six month period ended June 30, 1990.

Net income for the six months ended June 30, 1990, increased 13 percent to $10,122,000 from $8,928,000 last year. Earnings per share increased 12 percent to $1.02 from $0.91 recorded during the first six months of 1989. Net income for the quarter increased to $5,818,000, or $0.59 per share, compared with $5,342,000, or $0.54 per share, for the prior year period.

For the first six months, sales rose 145 percent to $553,469,000 from $225,686,000 for the comparable period in 1989. Sales for the second quarter rose 134 percent to $287,161,000, compared with $122,628,000 recorded during the second quarter last year.

Earnings per share figures for the three and six month periods reflect a five-for-four stock split on May 24, 1990.

Randolph W. Lenz, chairman of the board, said, "This was a solid quarter for Terex Corporation, in which each of our divisions, and Unit Rig, in particular, posted increased results as compared to those recorded last year. Our increase in earnings reflects the continued strength of our heavy equipment group, the impact of each division's cost control efforts and contributions from our Fruehauf Trailers division."

Lenz added, "We are seeing continuing improvement in operating efficiencies at our Fruehauf Trailers division. A new management team is in place, headed by Arthur E. Rowe, formerly president and managing director of Terex Equipment Limited in Scotland, and president of Terex Division in Hudson, Ohio. We expect greater contributions from Fruehauf as our programs currently underway continue to improve that division's profitability."

Lenz also noted that the refinancing of the senior secured increasing rate notes issued in connection with the Fruehauf Trailer acquisition is proceeding as anticipated, and the company expects that the refinancing will be completed prior to year end. The refinancing should substantially lower Fruehauf Trailer's interest costs and lead to improved future results.

Terex Corporation's Fruehauf Trailers division, acquired July 1989, is the world's leading manufacturer of truck trailers, making a wide range of van refrigerated, platform, tank, dump trailer and other models. Terex's heavy equipment group -- which includes Terex Equipment Limited, Koehring Cranes & Excavators, Unit Rig, and Northwest Engineering -- designs, manufactures and markets heavy-duty, off- highway, earthmoving, construction, and materials handling equipment for the mining, construction, logging and other industries.

ALBUQUERQUE, N.M. (JULY 24) PR NEWSWIRE - Summa Medical Corp. (NASDAQ:

SUMA) today announced that its subsidiary SummaCom Inc. has finalized its previously announced agreement with the Hughes Aircraft Co. for development of SummaCom's proprietary voice compression technology.

Under the agreement which was signed on July 19, Hughes will commit a significant amount of both funding and limited computer resources to assist in the completion of the voice compression development program.

The companies have established financial terms for a master licensing agreement, contingent upon a successful technology demonstration this year. These terms include a licensing fee of no less than $5 million and no more than $10 million. In addition a royalty fee of no more than 8 percent of gross sales and no less than 4 percent of gross sales would be paid to SummaCom by Hughes under this agreement.

Summa management indicated their assessment of the five-year market-place could be in the order of $500 million in gross revenues. Although there is no certainty that this market will develop, the technology is applicable to cellular telephone, satellite communication enhancements and a variety of government applications worldwide, a Summa spokesperson has stated.

#90205p7836 07/24/1990 ~PR Newswire

DENVER (JULY 24) PR NEWSWIRE - Apache Corp. (NYSE: APA) today reported record second quarter and first half results on increased natural gas production, despite lower prices for oil and spot market gas.

Net income increased 70 percent from the comparable 1989 quarter to $7.7 million while per share earnings advanced 21 percent to 17 cents on 12 million more shares outstanding. For the first six months of 1990, net income increased to $19.2 million, or 43 cents per share, versus $9.9 million, or 30 cents per share, for the first half of 1989.

Cash from operations of $33.9 million compared to last year's second quarter of $33.3 million, which included a one-time benefit of $4.9 million resulting from the favorable settlement of a property ownership dispute. For the first half, cash from operations increased 22 percent to $77.1 million from $63.2 million in the comparable 1989 period.

Cash costs, which include lease operating expenses, administrative and financing costs, were reduced 28 percent per equivalent thousand cubic feet (Mcf) produced from the second quarter of 1989 and are at a 10-year low.

Gas production increased 14 percent to 258 million cubic feet (MMcf) per

day versus 227 MMcf per day in 1989's second quarter. The largest regional gain came from the Gulf Coast Offshore where eight production platforms have been brought on stream since December of 1989, adding 32 MMcf of gas per day net to Apache. Oil production was virtually unchanged at 8,556 barrels per day.

Reserve additions more than replaced record production in the first half, principally the result of Apache's active drilling program. Based on internal, mid-year estimates, reserve replacement from all sources approximated 120 percent of production. During the first half, the company participated in the completion of 79 producers from the drilling of 107 wells, including 46 producers completed in 61 attempts in the second quarter.

In the face of declining spot market gas prices, which for the industry fel GENERAL PURPOSE PASS-ALL UP AND RUNNING ter average, Apache's realized gas price rose 6 cents to $1.61 per Mcf. The improvement is primarily the result of the company selling 10 MMcf more gas per day under premium-priced contracts at prices about $1 above current spot market levels. The increase in the price of Apache's principal product partially offset the impact of the company's lower average oil price, which dropped from last year's second quarter average of $18.17 per barrel to $15.71 per barrel.

Apache is an independent energy company engaged in exploration, development, production and marketing of natural gas and crude oil. The company's securities are traded on the New York and Midwest Stock Exchanges (symbol APA).

REDWOOD CITY, CA (JULY 24) PR NEWSWIRE - Genelabs today announced the election of James G. Andress to its board of directors. Andress is president and CEO of Information Resources Inc. (IRI). Prior to the merger with SmithKline Beckman, he served as chairman, Pharmaceuticals, Beecham Group, PLC, in London.

"Mr. Andress has had extensive experience in the pharmaceutical industry as well as in the international business arena," said Frank Kung, president and CEO of Genelabs. "His expertise and proven leadership will help guide Genelabs as we continue to pursue product development and commercialization."

While at Beecham, Andress led the group to its highest sales and earnings growth in 15 years, and he played a pivotal role in the merger creating

SmithKline Beecham.

Previously, Andress served as president and chief operating officer at Sterling Drug. He also held various positions with Abbott Laboratories, which included corporate planning, divisional operating and substantial international business responsibilities. Andress began his career at Booz Allen and Hamilton after receiving his master's degree form the Wharton Graduate School of Business.

IRI develops and maintains computerized proprietary data bases, decision support software and mathematical models for testing and evaluation of marketing plans, primarily in the consumer packaged goods industry.

Genelabs is a privately held company applying biotechnology to the development of new pharmaceutical products, focusing in the areas of virology and inflammation. The company is conducting Phase I clinical trials of GLQ223(TM), which is being evaluated for the treatment of AIDS. Founded in 1984, Genelabs has 120 employees and is located in Redwood City.

SAN FRANCISCO (JULY 24) PR NEWSWIRE - Centex Telemanagement Inc. (NASDAQ: CNTX) announced today that it has signed a $10 million revolving credit agreement with Union Bank. The one year agreement provides Centex with the option of borrowing at a variable interest rate for indeterminate periods or at a lower fixed rate for certain fixed periods.

Commenting on the agreement, Henry P. Huff, the chief financial officer of Centex, stated, "We are pleased with the terms of the agreement, particularly the option to borrow at a rate based upon the bank's cost of funds. While we have not actively used the credit facility in the past, the ability to borrow at very attractive rates gives Centex a unique opportunity." This is the fourth consecutive year Centex and Union have had a credit relationship. In each of the four years, Union has increased the credit available to the company. Huff added, "The $10 million credit represents a $3 million increase over last year's line with Union Bank. The line will be used to augment working capital and help fund Centex's growth during the coming year."

Centex Telemanagement Inc. is a pioneer in providing comprehensive telecommunications management services to small and medium-sized businesses. Centex provides a single point of contact for smaller businesses, which face increasing complexity and confusion resulting from the expanding number of local and long distance telecommunications options.

Centex analyzes the telecommunications needs of its clients and selects the best mix of services from various third-party providers to be shared by its clients under Centex management. In exchange for a management fee Centex provides both its basic management services and a broad range of sophisticated management services, such as call accounting and voice messaging. Centex clients generally receive these quality telecommunications services at a significant cost savings. Centex currently serves over 7,700 clients through 15 branch offices in six states.

LOWELL, MA (JULY 24) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today announced an agreement with Niakwa Management Services of America Inc. to distribute Niakwa's Basic-2C Development and RunTime software packages. The Niakwa software enables the more than 1,000 existing business software programs written in the Basic-2 language to run on Wang's suite of PCs and multiuser application servers hosting The Santa Cruz Operation (SCO) XENIX and UNIX operating systems.

The agreement means Wang can offer users and value-added resellers (VARs) an optional migration path from proprietary Wang systems to industry-standard platforms, allowing them to protect past investments in Basic-2 software. Programs that run on Wang's 2200 computers -- of which there have been more than 70,000 installed world-wide since the product line was introduced in 1972 -- may now be ported easily and inexpensively to operate on Wang's DYNAMIX line of multiuser UNIX servers, and industry-standard PCs and PC local area networks (LANs) with SCO XENIX or SCO UNIX System V/386 Release 3.2.

Basic-2C is an enhanced implementation of the Basic-2 language used on Wang's 2200 and CS/386 computers. The Niakwa product has been designed to preserve the best points of Basic-2, while offering access to the facilities of a modern portable operating system, UNIX.

Basic-2C is divided into two software modules: the Development Package and the RunTime Package.

The Basic-2C Development Package contains the Basic-2C compiler, a language reference manual, Basic-2C utilities, and a Basic-2C supplement for the product type, e.g., SCO UNIX. Available in August for Wang's DYNAMIX line, the Development Package license fees range from $695 to $995.

The Basic-2C RunTime Package contains two runtime programs, one with

interpretive capabilities and one without. Programs compiled under the development package require the runtime package to operate. Also available in August, the runtime package is licensed by product group and number of users, with fees ranging from $395 for a single-user system to $9,160 for systems supporting more than 64 users.

Niakwa Management Services of America, Inc., a leading language publisher based in Mundelein, Ill., is the author of the highly portable Basic-2C language. Basic-2C has been installed at 40,000 end-user sites through a world-wide network of over 400 resellers.

MEMPHIS, TN (JULY 24) PR NEWSWIRE - Perkins Family Restaurants, L.P. (NYSE: PFR) today reported that net income for the second quarter of 1990 increased 22 percent to $3,802,000 or $.37 per unit, as compared with $3,116,000 or $.31 per unit for the second quarter last year. Net income for the six months ended June 30, 1990 increased 22.0 percent over the six months ended June 30, 1989. Net income for the first half of 1990 was $6,334,000 or $.62 per unit, as compared with $5,191,000 or $.51 per unit for the comparable period last year.

Total revenues for the quarter increased to $44,404,000 from $42,479,000 in the comparable period last year, a 4.5 percent increase. Total revenues for the first six months of 1990 were $85,969,000, a 6.0 percent increase over the $81,089,000 reported in the first half of 1989.

Same store sales for company-operated restaurants were up 3.9 percent for the second quarter and 4.8 percent for the first six months of 1990.

"We're extremely pleased with our continuing sales and profit growth. Comparable store sales growth of almost 4 percent over a strong 1989 second quarter growth rate of 8 percent proves once again that our strategic direction and management focus are on target," said Donald N. Smith, Chairman and Chief Executive Officer.

As of June 30, 1990, Perkins Family Restaurants, L.P., a Delaware limited partnership, owned and operated 115 Perkins Family Restaurants and franchised an additional 271 restaurants in 28 states and Canada.

#90205p7845 07/24/1990 ~PR Newswire

FAIRFAX, VA (JULY 24) PR NEWSWIRE - ERC Environmental and Energy Services Co., Inc. (NASDAQ: ERCE) today announced revenues and earnings for the second quarter and six-month period ended June 30, 1990.

Second quarter revenues rose by 21 percent to $20.8 million from $17.2 million in the second quarter last year. Likewise, earnings from continuing operations showed similar growth of 21 percent from $901,000 to $1.1 million, while earnings per share (EPS) from continuing operations grew by 18 percent from 17 cents to 20 cents per share (fully diluted). As previously announced, the company discontinued its Digital Conversion Division and has reported a $729,000 charge, net of tax benefits, or a negative 13 cents per share (fully diluted) during the quarter.

First six-month revenues grew by 18 percent to $39.7 million from $33.7 million during the comparable period of the prior year. Similarly, earnings and EPS from continuing operations showed growth from $1.8 million to $2.1 million and from 33 cents to 38 cents per share (fully diluted). As discussed above, discontinued operations reflected $868,000 in charges, net of tax benefits, or a negative 15 cents per share (fully diluted) during the period.

Revenues in the ERCE's Environmental and Infrastructure operations, which constitute 77 percent of total revenues, were up 34 percent with the operating profits increasing by 51 percent in the second quarter due to a continuing strong demand for the company's consulting, engineering, and testing services from commercial and government clients. Energy operations consulting revenues declined somewhat due to the lower-than-expected funding levels on several key contracts.

ERCE is a professional and technical services firm providing a comprehensive range of environmental, infrastructure, and energy consulting, engineering, and analytical services to industrial and commercial companies and governmental agencies. The company has principal operating offices in Fairfax; Nashville, Tenn.; and San Diego.

PITTSBURGH (JULY 24) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) today announced the reorganization of certain information and processing

businesses into two departments, reflecting the corporation's strategic emphasis on its growing fee-based service products businesses.

The Technology Products Department, headed by Executive Vice President David L. Johns, will include the corporation's cash management, mortgage processing, and international funds transfer businesses.

The Financial Institution Services Department, to be headed by Senior Vice President Allan P. Woods, will include a wide range of services provided to banks, S&Ls, credit unions and other financial institutions, such as financial data processing, electronic funds transfer processing, merchant card processing, securities transfer, and trust accounting services.

"This move underscores the expansion and strategic importance of our service products businesses," said W. Keith Smith, vice chairman of Mellon Bank Corp. "The reorganization will allow us to build on our leadership position in these businesses. We'll be better able to meet the growing needs of financial institutions for sophisticated processing and information services, while sharpening our focus and bringing increased management attention to the technology-based services we provide to corporations."

The Technology Products Department includes three major areas:

- Global Cash Management, which offers a comprehensive group of services to meet a broad array of specialized treasury needs for government agencies, nonprofit organizations and firms ranging from small middle market companies to large multinational corporations;

- Data-Link Systems, Inc., based in South Bend, Ind., which is a major supplier of an on-line, real-time mortgage banking system that automates all aspects of mortgage processing, tracking and servicing; and

- Mellon Bank International, Mellon's Edge Act bank, based in New York City, which provides funds transfer services for financial institutions and corporations worldwide.

The Financial Institution Services Department includes the following business units:

- Datacenter, which provides data processing to financial institutions nationwide through service bureau, remote job entry and facilities management arrangements;

- Network Services, which each month processes more than 13 million ATM and merchant card transactions under the brand name Mellon Ally;

- Backroom Systems Group, a Monroe, N.C.-based subsidiary which installs

and supports micro-based software systems that automate "backroom" operations; and

- Mellon Fiduciary Services, which includes Mellon's Securities Transfer Services, the nation's largest wholesale provider of stock and bond transfer services, and Trust Accounting Services, which markets InFiServ, a state-of-the-art trust information processing system developed by Mellon.

NEW BRITAIN, CT (JULY 24) PR NEWSWIRE - Burritt InterFinancial Bancorporation (NASDAQ: BANQ) today reported a 10 percent increase in net income for the second quarter as well as for the first six months of 1990. For the three months ended June 30, 1990, income was $1,432,000 as compared to $1,302,000 for the second quarter a year ago. Comparable earnings on a per-share basis were 42 cents per share vs. 37 cents, respectively. For the six months ended June 30, 1990, net income was $2,737,000, or 81 cents per share, compared to $2,477,000, or 71 cents, a year ago.

John C. Jaynes, president and chief executive officer, commenting on Burritt's earnings, said: "We have again extended our pattern of steadily improving financial results by reporting the 22nd consecutive quarter in which the company has reported record earnings comparisons. We are particularly pleased about our performance in an increasingly difficult environment for financial services. Burritt's ratio of non-performing loans as a percent of assets is approximately 1.07 percent as of June 30 -- an extremely low ratio in comparison to other banks and thrifts in Connecticut."

HOLMDEL, NJ (JULY 24) PR NEWSWIRE - Alan Huang, head of the Optical Computing Research department at AT&T Bell Laboratories, was granted a U.S. patent today for a technique he calls "computational origami," which reformats computations and then folds them to fit into various computers.

Named after the ancient Asian art of paper folding, the technique -- granted patent number 4943909 -- is expected to have applications in electronics and in photonics.

Huang demonstrated the world's first optical digital processor at Bell Labs in January. His new invention may be described by reference to a sheet of paper, which may be folded in many ways.

One might fold it in half, then in half again, as many times as desired. Alternatively, one might fold the paper like an accordion, in one direction and then in another. With these simple foldings, the resulting visible surface of the paper is typically a small rectangle.

With computational origami, just as the visible small rectangle can be unfolded to return the paper to its flat, unfolded size, so can a small arrangement of processors that is organized like the small rectangle be "unfolded" and made to emulate an arrangement of many more processors that are organized like the unfolded paper.

Additionally, just as a paper airplane, which may look complex and intricate, can be unfolded into the sheet of paper from which it was formed (origami), so can most complex computing tasks be "unfolded" to form a regula?rray of interconnected processors.

Putting the two concepts together, with computational origami, complex computations (the folded paper airplane) can be "mapped" to a large, regular array of interconnected processors (the unfolded piece of paper), and the large regular array can in turn be "mapped" to a small array of interconnected processors (the paper folded into small squares).

"Computational origami lets us break a problem into various pieces and

tells us the most efficient order in which to handle the pieces," said Huang.

"This relates to the old adage 'too many cooks spoil the broth.' The problem with too many cooks is that nobody knows what to do at what time. Computational origami would organize a kitchen full of cooks like a roomful of jugglers, with each cook tossing and receiving recipe ingredients at just the right time," he said.

The technique addresses the problem of parallel computation in which many computers work independently but the effort spent organizing each one -- like coordinating the food-juggling cooks -- can be greater than doing the problem itself. Computational origami does the organizing.

"Researchers have been struggling with how to exploit parallelism in problems to make computers more powerful," said Huang. "We have been like the blind men trying to describe an elephant. Computational origami provides an intellectual framework to put these efforts in perspective."

#90205p7859 07/24/1990 ~PR Newswire

OAK BROOK, IL (JULY 24) PR NEWSWIRE - Spiegel, Inc. today reported record sales and earnings for the second quarter and year- to-date 1990.

For the second quarter ended June 30, 1990, net sales and other revenues rose 23 percent to $403.7 million compared to $327.6 for the same period last year. Earnings before income taxes were $12.8 million, up 18 percent from $10.8 million in second quarter 1989. Net earnings for the quarter increased to $7.7 million or $0.15 per share, from $6.7 million or $0.13 per share, for the same quarter last year. Pretax earnings increased at a greater rate than net earnings because of a higher tax provision in second quarter 1990 versus 1989.

For the six months ended June 30, 1990, net sales and other revenues were $793.6 million, a 22 percent increase from $652.8 million in the same period last year. Net earnings year to date were $15.4 million or $0.30 per share, compared to $13.0 million or $0.25 per share, a 19 percent increase.

John J. Shea, vice chairman, president and chief executive officer of Spiegel said, "We are very pleased with our continuing revenues and earnings growth. Despite a highly competitive retail environment we improved our gross margin for the first six months of 1990 to 33.7 percent of net sales compared to 33.3 percent for the same period in 1989." Mr.

Shea added, "While the retail environment is expected to remain extremely competitive for the remainder of 1990, we continue to see significant opportunities for growth."

Spiegel, Inc. is the nation's largest direct marketer and leading specialty retailer. The company markets wearing apparel, household furnishings and other merchandise through semi-annual and specialty catalogs distributed to more than 30 million U.S. households. Wholly-owned specialty retail subsidiaries of Spiegel include Eddie Bauer, Inc. and Honeybee, Inc. Spiegel's class A non-voting common stock trades on the NASDAQ National Market System under the ticker symbol: SPGLA.

#90205p7860 07/24/1990 ~PR Newswire

DEARBORN, MI (JULY 24) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) today announced net income of $63.0 million or 77 cents per share in the second quarter of 1990 compared with $63.3 million or 77 cents per share in the second quarter of 1989.

Net income for the first six months of 1990 was $166.4 million or $2.04 per share compared with $169.6 million or $2.06 per share for the first half of 1989.

Net income for the second quarter was flat because of decreased gas deliveries due to warmer weather and reduced gas rates, offset by increased electric sales and the company's ongoing capital refinancing program. Net income for the first six months of 1990 was down slightly due to the impact milder weather had on electric sales and gas deliveries.

Operating revenue for the second quarter totaled $641.7 million compared with $608.9 million for the second quarter of 1989 and totals for the first six months of 1990 were $1.51 billion compared with $1.53 billion in the same period in 1989. The decrease for the six months is due to reduced natural gas sales.

Electric sales were 7.2 billion kWh, up 1.3 percent for the second quarter of 1990 compared with 1989. Electric sales for the first half of 1990 were a record 14.5 billion kWh, up 0.1 percent compared with 1989.

Natural gas deliveries were 46.3 bcf, down 3.3 percent in the second quarter and 158.9 bcf, down 6.5 percent for the first half of 1990 compared with 1989 totals because of the warm weather. On a six-month weather-adjusted basis, deliveries would have increased 1.2 percent over 1989 totals.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

Oper. profit bef. interest	151.6	263.7	20.0	126.2	219.7	265.4	461.7
Profit before taxation	167.1	290.7	22.9	135.9	236.5	283.1	492.5
Taxation on profit	58.5	101.8	16.3	50.3	87.5	101.9	177.3
Profit attrib. to ordinary shareholders	108.0	187.8	26.6	85.3	148.4	180.6	314.3
Earnings per ordinary shr.	25.9p		25.5	20.6p		43.6p	
Earns. per ADS		$1.35	25.5		$1.08		$2.28
Dividend per ordinary shr.: Interim			4.4p		22.2	3.6p	

Note: This summary is taken from and should be read with the following full statement and notes. The dividend is payable on Sept. 17 to shareholders on the register at Aug. 17, 1990. For convenience the U.S. dollar equivalents have been converted at US$1.74 to 1 pound sterling, a rate prevailing on June 30, 1990. The above figures have been stated in accordance with UK GAAP.

Reuters pre-tax profit rose to 167.1 million pounds ($290.7 million) in the first half of 1990, an improvement of 22.9 percent on the first half of last year. Revenue increased by 25.5 percent to 688.3 million pounds ($1,197.7 million) and earnings per ordinary share by 25.5 percent to

25.9p ($1.35 per American Depositary Share, each ADS representing three ordinary shares). The interim dividend, at 4.4p, is 22.2 percent above last year's.

Copies of the interim report will be sent to shareholders on or about Aug. 6.

#90205p7865 07/24/1990 ~PR Newswire

GRAND RAPIDS, MI (JULY 24) PR NEWSWIRE - Second quarter produced a 14-percent increase in corporate net income and favorable written premium results for Foremost Corporation of America (OTC: FCOA).

In the second quarter, net income per share was $.41 compared with $.36 last year. Mobile home written premium increased 18 percent over 1989, bolstered by a $6.2 million premium assumption from a former competitor in California.

Excluding second-quarter catastrophe losses, the combined loss and expense ratio for the property casualty insurance group was 94.5 percent compared to 93.1 percent last year. Catastrophes, which included tornados, wind storms, hail storms and the severe spring floods in Texas, added 10.5 points to the combined ratio. That compares with 12.4 points in the second quarter last year. For the second year, catastrophe losses were higher than average.

Foremost's life insurance company reported a 99.9 percent combined ratio in the second quarter, compared to 100.0 percent in second quarter 1989.

Recreational vehicle (RV) written premium dropped from 1989. In second quarter 1989, a renewal billing change artificially raised the written premium results for that quarter.

In commercial and other lines, written premium was down according to a plan to lessen exposure in these business segments. Automobile written premium rose through a rate increase, while the number of policies in force dropped.

After-tax investment income decreased 7 percent from second quarter 1989 and was down 3 percent for the year. The decrease is due to a smaller investment base.

Foremost Corporation of America and its subsidiaries primarily provide manufactured home and recreational vehicle insurance.

NEW YORK (JULY 24) PR NEWSWIRE - William G. McGorry, VP/group publisher of the Cable Publishing Group, today announced the appointment of Marianne Paskowski as editor, Multichannel News.

Paskowski was New York bureau chief for Electronic Media, a Crain Communications publication, for the past three years.

Prior to that, she was senior editor-broadcast, at Marketing & Media Decisions, an Act III publication. Earlier, Paskowski had been editor of Broadcast Week and an associate editor at Adweek in Chicago.

She is a graduate of the University of Illinois with a bachelor's degree in psychology. She is married and resides in White Plains, N.Y.

While at Electronic Media, she covered syndication and international as well as supervising the cable programming beat out of New York.

"Marianne's breadth of experience in all aspects of television media suits her well in her new role at Multichannel News, the leading newsweekly serving the cable television industry," said McGorry.

The Cable Publishing Group is a newly formed cluster of cable- dedicated trade publications including Cablevision, CED and Cablefile Research arising from the acquisition of these properties by Capital Cities/ABC

(NYSE: CCB) earlier this year.

The group is part of the CNC Company, a unit of the Diversified Publishing Group headed by Robert Burton, president, and is located at 825 Seventh Ave., New York, N.Y. 10003.

BEAVERTON, OR (JULY 24) PR NEWSWIRE - Epitope Inc. (AMEX: EPT) announced today that it has appointed Theresa S. Long as Controller, replacing Cynthia Cook who resigned recently. Long will be responsible for internal accounting and management financial reporting, SEC reporting, risk management, banking relations, inventory control and materials requirements planning.

Long comes to Epitope from Interactive Training Technologies of Hillsboro, Ore., where she served as Controller. A certified public accountant, she received an MBA from University of California, Berkeley, and a BS degree from University of California, Davis. Prior to entering private industry, Long was a manager in the audit and financial services division of Arthur Andersen & Co. in Portland, Ore., where she served a variety of manufacturing and healthcare clients.

"Epitope is facing a period of growth for which Theresa is well-prepared. Her strong educational background, private industry experience and public accounting training makes her an excellent addition to our management team " said Gilbert N. Miller, executive vice president and chief financial officer.

MT. HOLLY, NJ (JULY 24) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) announced today the execution of an agreement with Little, Brown and Co. for the exclusive rights to publish the 16th edition of "Bartlett's Familiar Quotations" in hand-held electronic form.

The renowned Bartlett's was first printed in 1855 as a catalogue of quotations from authors, playwrights, poets, political leaders, celebrities, musicians, philosophers and others from around the world.

The 16th edition of "Bartlett's Familiar Quotations" is currently being edited and updated with a strong emphasis on contemporary material. In its new edition, "Bartlett's" will provide some 25,000 quotations and will expand in print to 1,600 printed pages.

"We are delighted to join efforts with Little, Brown for the electronic publication of America's oldest and best-known book of quotations," said Peter N. Yianilos, president of Franklin Electronic Publishers. "Franklin's search and retrieval technology will bring a new dimension to this complex work. Our ability to cross-reference and search for any word phrase, or quote within the text will facilitate the use and enjoyment of this marvelous work," he added.

"A hand-held electronic version of 'Bartlett's' is a fascinating new concept," said William D. Phillips, editor-in-chief, Little, Brown and Co. "and we are pleased to have Franklin developing it."

Franklin said it is proud to add "Bartlett's Familiar Quotations" from Little, Brown and Co. to its library of the world's most authoritative and scholarly reference works, which includes Merriam- Webster's dictionaries, "The Concise Columbia Encyclopedia" by Columbia University Press, "The Advanced Learner's Dictionary" by Oxford University Press, and a series of bilingual dictionaries from William Collins Sons & Co. Ltd.

Franklin Electronic Publishers Inc., is the creator and leader of the Electronic Reference Product category. Franklin publishes a library of electronic dictionaries, thesauruses, phonetic spelling correctors, spelling and language tutorial products and electronic bibles, including the popular Spelling Ace(R), Wordmaster(TM), Language Master(TM), Electronic Holy Bible and Spanish Master/Maestro Ingles, bilingual Spanish dictionary.

NEW YORK, NY (JULY 24) PR NEWSWIRE - Sutton Holding Corp. announced today that it has terminated its $50 per share cash tender offer for DeSoto, Inc. (NYSE: DSO) without the purchase of any DeSoto shares. Sutton has instructed the depositary for its offer to return all shares tendered to Sutton and not previously withdrawn.

Sutton stated, "We have terminated our offer in light of the company's recent announcements regarding sales of certain of its businesses. We are disappointed that the company has decided not to pursue our offer. We will continue to review the situation and determine what actions, if any, are appropriate."

Sutton also announced that three of its designees, William Spier, Giorgio Arra and David Tobey, have been elected to the board of directors of DeSoto in accordance with an April 5, 1990 agreement between Sutton and DeSoto. As part of this agreement, certain litigation between Sutton and DeSoto pending in the Delaware courts has also been dismissed.

NEW YORK (JULY 24) PR NEWSWIRE - The Chubb Corporation (NYSE: CB) today reported the following results:

Net income for the six months ended June 30, 1990 was $221.9 million or $2.57 per share compared with $212.0 million or $2.51 per share for the like period of 1989. These amounts include realized investment gains after taxes of $8.4 million or $.10 per share in 1990 and $11.8 million or $.14 per share in 1989. Net income also includes tax benefits of $5.4 million or $.06 per share in 1990 and $9.6 million or $.11 per share in 1989 relating to the "fresh start" adjustment as a result of the Tax Reform Act of 1986. Net income for the second quarter of 1990 was $110.8 million or $1.29 per share compared with $107.1 million or $1.27 per share for the second quarter of 1989. Net income for the quarter includes realized investment gains after taxes of $3.2 million or $.04 per share in 1990 and $8.7 million or $.10 per share in 1989. These quarterly amounts also include "fresh start" tax benefits of $2.7 million or $.03 per share in 1990 and $4.8 million or $.05 per share in 1989. Per share amounts have been retroactively adjusted to reflect the two-for-one stock split effective May 7, 1990.

Property and casualty underwriting loss after taxes amounted to $14.3 million for the first six months of 1990 compared with income of $0.2 million in 1989. These underwriting results include the "fresh start" tax benefits. Net premiums written were $1.4 billion, an increase of 5.8 percent compared with 1989. The combined loss and expense ratio, after dividends to policyholders, was 101.7 percent for the first six months of 1990 compared with 99.8 percent for 1989. The second quarter combined loss and expense ratio, after dividends to policyholders, was 101.4 percent in 1990 compared with 99.9 percent in 1989. Catastrophe losses

for the first six months of 1990 amounted to $17.8 million or 1.3 percentage points of the combined loss and expense ratio compared with $16.0 million or 1.2 percentage points in 1989.

Investment income after taxes, exclusive of life and health insurance operations, was $186.6 million for the first six months of 1990 compared with $162.0 million in 1989, an increase of 15.2 percent.

Life and health insurance operations resulted in income after taxes of $23.7 million for the first six months of 1990 compared with $20.7 million in 1989.

Real estate operations contributed income after taxes of $23.8 million for the first six months of 1990 compared with $23.0 million in 1989.

#90205p7876 07/24/1990 ~PR Newswire

MINNEAPOLIS (JULY 24) PR NEWSWIRE -- Control Data Corporation (NYSE: CDA) today reported second quarter 1990 net earnings of $11.2 million, or $.26 per share, on revenues of $405.6 million. For the first six months of 1990, the company reported net earnings of $18.0 million, or $.42 per share, on revenues of $827.2 million.

In the second quarter of 1989, Control Data reported a net loss of $497.3 million, or $11.79 per share, on revenues of $804.3 million. Results in that period included a pre-tax net restructuring charge of $476.0 million, primarily due to the closing of the company's supercomputer operation and the downsizing of its computer products operations and its corporate staff.

The decline in quarterly revenues from 1989 is mainly the result of the sale or discontinuance of several operating units, most notably the Imprimis disk drive subsidiary and the third-party maintenance business. Second quarter 1990 results benefited from a pre-tax gain of $4.3 million on the sale of Silicon Graphics stock.

In the second quarter and first half of 1990, each of Control Data's businesses was profitable before interest expense and taxes, except for Micrognosis and Empros.

Control Data is a provider of data solutions that integrate hardware, software and services to meet customers' complex data collection, processing and communications needs. Its businesses include the Arbitron Company, Automated Wagering, Business Management Services, Computer Products, Data Services, Empros Systems International, Government Systems

and Micrognosis.

#90205p7878 07/24/1990 ~PR Newswire

MINNEAPOLIS (JULY 24) PR NEWSWIRE - Golden Valley Microwave Foods, Inc. (NYSE: GVF) today reported that net income for the second quarter ended June 30, 1990 increased 33.3 percent to $5.78 million, or $.47 per share, from $4.34 million, or $.36 per share, in the comparable period a year ago, according to James D. Watkins, chairman and chief executive officer. Net sales for the period were $40.5 million, an increase of 13.3 percent over the $35.7 million recorded in 1989.

Net income for the six months ended June 30, 1990 rose 46.8 percent to $12.10 million, or $.99 per share, from $8.24 million, or $.68 per share in the year ago period. Net sales were $84.2 million for the first half of 1990 an increase of 9.3 percent compared to the same period of 1989.

Earnings per share figures do not reflect the 3-for-2 stock split that is to be paid July 27, 1990.

In the microwave popcorn category, domestic sales showed strong increases over the comparable period of 1989, while profitibility was in line with that achieved in the first quarter of this year.

Golden Valley Microwave Foods, Inc. is a leader in the development and marketing of foods produced specifically for preparation in microwave ovens. The company's products use proprietary product formulations, manufacturing processes, and packaging technology. The products are distributed through the vending industry, mass-merchandising outlets, and grocery stores. Lamb-Weston, a 50/50 joint venture with ConAgra, is a leading participant in the frozen potato products industry, supplying most of the major restaurant chains and food service distributors in the United States.

#90205p7879 07/24/1990 ~PR Newswire

LAKE SUCCESS, NY (JULY 24) PR NEWSWIRE - Tambrands Inc. (NYSE: TMB) reported today that second-quarter sales and earnings reached record levels for any second quarter.

Net sales for the quarter ended June 30, 1990 were $169,276,000, an increase of 2 percent from second-quarter 1989 sales of $166,107,000. Net earnings were $31,772,000, an increase of 21 percent over earnings of $26,162,000 in the second quarter of 1989. Earnings per share increased to $1.49 in the second quarter of 1990, up 27 percent from earnings per share of $1.17 in the same period of 1989.

The percentage increase in earnings per share exceeded the percentage increase in net earnings because there were fewer shares outstanding than in the second quarter of 1989. Increased sales in the second quarter of 1990, due primarily to the introduction of Tampax Compak tampons in the United States and increased shipments in Europe, more than offset 1989 sales attributable to the home diagnostics and cosmetics businesses, which Tambrands divested earlier this year. Net earnings increased at a greater rate than net sales due to improved operating margins, workforce reductions and the divestitures of the home diagnostics and cosmetics businesses.

For the first six months of 1990, revenues increased to $328,532,000 from $296,043,000 for the comparable period of 1989. Net earnings increased to $53,837,000 or $2.50 per share from $44,184,000 or $1.98 per share in the first half of last year.

Tambrands is a multinational manufacturer and marketer of personal care products, including Tampax tampons and Maxithins sanitary pads.

A summary of consolidated operating results for the three months and six months ended June 30, 1990 is follows.

CONTACT: Paul E. Konney, senior vice president of Tambrands, 516-358-8774.

WASHINGTON (JULY 24) PR NEWSWIRE - The Board of Directors of James Madison Limited (NASDAQ-NMS: JMLC), a registered bank holding company, announced the election of Michael J. Powers to the position of senior vice president and chief credit administrator for the holding company.

In this position, Powers will assume the primary responsibility for the lending policies and procedures for all bank subsidiaries as well as manage the centralized functions of Loan Operations, Credit Services, and Retail Credit.

Powers served from 1986 to the present as director of the Farm Credit Administration's office of Financial Analysis, where he was responsible for designing and implementing policies and programs that analyze economic financial and competitive factors impacting Farm Credit institutions.

Prior to joining the Farm Credit Administration in 1986, Powers had worked for the Office of the Comptroller of the Currency, U.S. Treasury Department, as director for administration for the Northeastern District. During his career with the OCC, which began in 1970, Powers held a number of important posts in the national bank examination field including work in the enforcement area with the Investment Securities and Special Projects Divisions.

Powers received his B.B.A. in finance from Iona College in New Rochelle, N.Y. He also is a graduate of the University of Wisconsin's Graduate School of Banking, Harvard University's Senior Bank Officers Program, and the Indiana University's Indiana Executive Program. He resides in Alexandria, Va. with his wife Susan, and their son, Patrick.

Headquartered in Washington, the James Madison Limited financial family of banking subsidiaries includes: Madison National Bank located in Washington; Madison National Bank of Virginia; Madison Bank of Maryland, and United National Bank of Washington. Non-bank subsidiaries include: James Madison Mortgage Company; James Madison Financial Corporation; and JML Systems Management, Inc. James Madison Limited's Class A Common Stock is listed on the American Stock Exchange (JML), and its Common Stock is traded on the NASDAQ National Market System (JMLC).

#90205p7884 07/24/1990 ~PR Newswire

ATLANTA (JULY 24) PR NEWSWIRE - BellSouth Enterprises today applied to the Federal Communications Commission for an experimental radio service license to conduct a two-phase Personal Communications Network (PCN) trial.

The proposed trial will be held in Atlanta over a two-year period. It will include up to 12 base stations and as many as 300 handsets. The company has requested permission to conduct experiments in three frequency ranges: 866-868 MHz, 902-928 MHz, and 1850-1990 MHz.

"As leading providers of both mobile cellular and land line telecommunications services, BellSouth is interested in the potential of all new wireless services including Personal Communications Networks," said Eric Ensor, director of Worldwide Wireless Strategy for BellSouth Enterprises. "We are dedicated to exploring emerging wireless communications services in order to continue to provide the best total communications solutions to our customers."

In Phase One of the proposed trial, BellSouth Enterprises will evaluate radio wave propagation and building penetration in order to further

understand the characteristics of radio in an environment of urban structures. Laboratory equipment will be used for this phase.

An operating testbed system will be constructed for the second phase of the experiment. This part of the study will focus on the way that potential business customers would use a PCN system.

BellSouth will look at how the availability of a PCN network changes traditional telecommunications engineering measurements such as the number of call attempts and call duration. The testbed will also be used to evaluate various coding and access schemes being proposed by different manufacturers of PCN-like equipment.

Available technology will be used wherever possible, and existing technology will be modified to meet the experimental needs when necessary. The later part of Phase Two will use spread spectrum equipment where available.

"Our proposed experiment focuses on BellSouth's customer approach to new wireless technologies," said Ensor. "We are interested in how these new services meet our customers' needs, and how they change the communications patterns of our customers.

BellSouth is currently conducting a nationwide study of broad-based marketing opportunities for personal communications systems. This PCN trial is intended to build on the results of that study."

BellSouth Enterprises is a wholly owned subsidiary of BellSouth Corp. (NYSE: BLS) which is an Atlanta-based international telecommunications holding company.

#90205p7887 07/24/1990 ~PR Newswire

KALAMAZOO, MICH. (JULY 24) PR NEWSWIRE - A more concentrated, better-tasting formulation of The Upjohn Company's (NYSE: UPJ) Kaopectate Liquid helped spur an impressive jump in sales of the antidiarrheal line through the first six months of 1990.

Combined U.S. sales of all Kaopectate products through the first six months of 1990 reached a level 29 percent ahead of the same period one year ago. The company did not disclose specific sales figures.

Upjohn began shipping Advanced Formula Kaopectate, which contains attapulgite as its active ingredient, in December 1988; the six-month comparison is based on the company's estimate that the product reached

full retail distribution by the end of second quarter 1989.

"Obviously, we're extremely pleased with the line's sales growth," said Dave Hurwitz, the Upjohn marketing manager for Kaopectate. "The brand had been a consistent performer for us for more than 50 years, but we were confident that reformulating the liquid would strengthen the entire Kaopectate brand while providing the best product to the consumer."

The product's liquid version, in regular (vanilla) and peppermint flavors, has long been the flagship of the Kaopectate line. Introducing attapulgite made the product more concentrated than before, lowering the recommended dose to two tablespoons from as many as eight of the old formulation. Attapulgite is classified by the U.S. Food and Drug Administration as a Category I (safe and effective) treatment for diarrhea and associated cramping.

"We also used the occasion of the reformulation to improve the taste of both the vanilla and peppermint products," said Hurwitz. "Consumer tests verified our success."

The brand was also strengthened by the September 1989 introduction of Kaopectate Chewable Tablets; the new liquid and chewable tablet versions joined an existing nonchewable tablet formulation to round out Upjohn's Kaopectate line.

The Upjohn Company is a worldwide, research-based provider of human health-care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

#90205p7889 07/24/1990 ~PR Newswire

ROGERS, ARK. (JULY 24) PR NEWSWIRE - Hudson Foods, Inc. (NYSE:HFI), an integrated poultry producer headquartered in Rogers, Ark., today announced results for the period ending June 30, 1990.

Net income for the third quarter was $4.4 million, or 30 cents in primary earnings per share (29 cents fully diluted). This compares with last year's record third-quarter net income of $13.6 million, or $1.01 in primary earnings per share (85 cents fully diluted).

Sales for the quarter increased 3.7 percent to a record $184.1 million from $177.5 million one year ago.

For nine months, net income was $6.7 million, or 47 cents in primary earnings per share, compared with the year-earlier $19.2 million, or $1.45 in primary earnings per share ($1.31 fully diluted).

Sales rose to a record $479.5 million from $455.7 million one year ago, a gain of 5.2 percent.

Total poultry volume decreased in the quarter to 174.2 million dressed pounds, representing 66.4 percent of sales. This compares with 1989's third-quarter total 177.7 million dressed pounds, which was 77.7 percent of sales.

During the quarter, broiler and turkey finished product prices remained substantially below year-ago levels as high industry production continued. Broilers, however, continued to operate at profitable margins and the company had strong contributions from the luncheon meats and egg products divisions.

James T. Hudson, chairman and chief executive officer, said: "The luncheon meats division was strengthened with the acquisition of the Texas-based Roegelein product lines and brand names early in the quarter. Adding the Roegelein name to the existing Ohse and Schweigert brands gives our luncheon meats division a presence in markets from the Canadian to Mexican borders."

Hudson Foods, Inc., one of the nation's largest poultry producers, sells a variety of chicken and turkey products under the "Hudson," "Flavor Fresh" and "Hudson Deli-Meister" brand names, as well as poultry, beef and pork products under the "Ohse," "Schweigert," "Pierre," and "Roegelein" brand names.

GREENSBURG, PA (JULY 24) PR NEWSWIRE - Southwest National Corp., (NASDAQ: SWPA) parent company of Southwest Bank, reported net income of $1,361,000, or $.49 per share for the second quarter ending June 30, 1990, it was announced today.

This represents an increase of $54,000, or 4.1 percent, from the $1,307,000, or $.47 per share earned in the second quarter of 1989.

Net income for the first six months of 1990 was $2,578,000 representing an increase of $80,000 or 3.2 percent from the $2,498,000 reported for the same period in 1989.

Southwest also reports that total assets as of June 30, 1990, were $586,895,000, a 4.7 percent increase from the $560,643,000 held a year ago. Loans increased 4.6 percent and deposits increased 5.2 percent over the same period.

Joseph L. Bair, president and chief executive officer, stated, "Earnings for the second quarter and first six months were very satisfactory and continue to be in line with projections."

On July 17 the corporation's board of directors declared a quarterly dividend of $.21 per share, payable Sept. 10, 1990, to shareholders of record Aug. 10, 1990.

#90205p7897 07/24/1990 ~PR Newswire

KING OF PRUSSIA, PA (JULY 24) PR NEWSWIRE - The Nuclear Regulatory Commission staff proposed to fine Northeast Nuclear Energy Company of Berlin, CT, $50,000 for not meeting the requirements for dewatering a cask containing contaminated solid waste sent from the Millstone Nuclear Power Station Unit 1 at Waterford, Conn., to Barnwell, S.C., for disposal.

The cask contained parts and pieces of equipment formerly used in the Millstone 1 reactor, such as control blades and the sensors of neutron monitors, made radioactive by their irradiation in the reactor when it was running. The shipment contained about 16,000 curies of radioactivity.

On May 9, 1990, at Barnwell, as the cask was being prepared for lifting it off the truck that had carried it from Connecticut, about 75 gallons of slightly contaminated water spilled out. When the cask was dewatered at the waste burial facility, about 120 additional gallons were drained from the cask.

In a letter informing the company of this enforcement action, Thomas T. Martin, Regional Administrator of NRC Region I said, "The NRC is concerned that prior to the release of the shipping cask to the carrier for offsite shipment, adequate management and procedural controls were not in place to ensure that the cask was properly dewatered and dried."

Mr. Martin said, "The NRC is particularly concerned that this incident represents another example of a recent trend at Millstone involving management's failure to ensure that adequate oversight and controls are provided during the handling of radioactive material (including the preparation of packages containing radioactive material for offsite shipment and disposal) so that these activities are performed safely and in accordance with regulatory requirements." Mr. Martin then described three instances of violations (of transportation requirements) issued since August 1989, two of which resulted in a $25,000 and $3,750 civil penalty respectively, and then stated that, "neither your corrective actions for these incidents nor your previous programmatic enhancements in the radio-active materials handling area were sufficiently comprehensive to prevent this most recent violation."

The NRC considered increasing the civil penalty in light of the licensee's recent poor performance in the area of transportation, but did not do so because of the licensee's corrective actions subsequent to the event.

The company has been given 30 days to either pay the proposed fine or to request in writing that part or all of it be withdrawn, giving its reasons for any such request. The company also has been given 30 days to admit or deny the alleged violations, to give reasons for them if admitted, to describe the actions it has taken or plans to take to prevent their happening in the future, and to give the date by which it expects to be in full compliance with NRC requirements.

The State of Connecticut has been informed of this enforcement action.

#90205p7898 07/24/1990 ~PR Newswire

KANSAS CITY, MO (JULY 24) PR NEWSWIRE - Marion Merrell Dow Inc. (NYSE: MKC) today announced net income of $130 million, or $.47 per share, on sales of $629 million for the second quarter ended June 30, 1990.

Because the transaction combining Marion Laboratories, Inc. with Merrell Dow Pharmaceuticals Inc. to create Marion Merrell Dow was not completed until December 1989, standard accounting practices require that the company compare its performance for the quarter just ended and for the first half of the current business year with that reported by Marion

Laboratories for the comparable periods a year ago. On that basis, the company's second-quarter results compare with year-earlier sales of $261 million, and net income of $71 million, or $.45 per share.

Similarly, for the first six months of the current year, the Kansas City-based global pharmaceutical company generated sales of $1.2 billion and net income of $241 million, or $.87 per share. This compares with sales of $504 million and net income of $126 million, or $.80 per share, reported by Marion Laboratories in the comparable prior-year period.

In making the announcement, the company also provided a comparison of what its second-quarter and six-months results would have been had Marion Merrell Dow existed during the comparable periods in 1989.

Viewed that way, Marion Merrell Dow would have posted a seven percent increase in sales, from $588 million to $629 million, and a 16 percent rise in net income in the second-quarter, from $112 million to $130 million, while earnings per share would have increased seven cents to $.47 per share, up 18 percent. For the first six months of the current year, sales would have climbed nine percent, $1.2 billion versus $1.1 billion, and net income would have increased 18 percent, $241 million versus $204 million. Earnings per share for the six months would have grown 19 percent from $.73 to $.87.

ROCKFORD, IL (JULY 24) PR NEWSWIRE - In a Schedule 13-D amendment filed today with the Securities and Exchange Commission, Sundstrand Corporation (NYSE: SNS) reported that it has notified Milton Roy Company (NYSE: MRC) of St. Petersburg, Fla., that, subject to the approval of Milton Roy's board of directors, Sundstrand would be prepared to acquire all of the outstanding shares of common stock of Milton Roy for $28 in cash per share. Sundstrand's proposal is conditioned upon various events, including the negotiation and execution of a definitive merger agreement between the parties.

Milton Roy, with 1989 net earnings of $8.6 million on sales of $125 million, is a leading manufacturer of instruments and systems for metering analyzing, controlling and testing of liquids and gases, process control products and automated analytical instruments.

Sundstrand Corporation, with 1989 net earnings of $120.8 million on sales of $1,595 million, is a Fortune 500 company and a market leader in the design, manufacture and sale of a variety of proprietary, technology-based

components and subsystems requiring significant research, development engineering, and processing expertise. The company's mechanical, hydrochemical, electromechanical, and electronic products serve diversified aerospace and industrial markets.

#90205p7908 07/24/1990 ~PR Newswire

CHICAGO (JULY 24) PR NEWSWIRE - Tribune Company (NYSE: TRB) net income for the second quarter was down 25 percent to $56.1 million from $75.3 million primarily due to operating losses at the New York Daily News and a decline in newsprint operating profit. Primary net income per share declined 20 percent to $.78 compared to $.98 for the 1989 second quarter.

For the first half, net income was $89.6 million, down 20 percent from $112.1 million last year. Primary net income per share totaled $1.21, an 18 percent decline from $1.47 reported for the 1989 first half.

Revenues rose 2 percent for the quarter and 4 percent for the first half to $656 million and $1.2 billion, respectively. Operating profit was down 24 percent for the quarter to $101.1 million from $133.8 million and down 20 percent for the first half to $164.0 million from $205.7 million.

Newspaper Publishing Newspaper publishing operating profit was down 33 percent in the quarter to $54.6 million from $81.7 million, primarily due to operating losses at the Daily News. These losses reflect weak economic conditions in the New York-area market as well as costs associated with labor negotiations with the paper's ten labor unions whose contracts expired March 30, 1990. Although results from the Chicago Tribune improved, those from the company's other daily newspapers were flat or down slightly because of softness in retail and classified advertising. Operating profit was also reduced by a write-down of the company's minority investment in a British newspaper launched last fall.

Revenues for the group were down 2 percent to $401 million for the quarter. Advertising revenues declined 4 percent to $302 million, reflecting declines of 3 percent in retail and 7 percent in classified advertising. General advertising revenues were basically unchanged and circulation revenues rose 2 percent for the quarter. Most of the decline in advertising revenues was in New York.

Broadcasting and Entertainment Broadcasting and entertainment operating profit for the second quarter rose 22 percent to $49.4 million from $40.5 million. The 1989 quarter included a $10 million pre-tax write-down of television broadcast rights.

In television, operating results improved at five of the company's six stations, with an especially strong contribution from KTLA in Los Angeles.

Radio and entertainment combined reported slightly lower operating profit.

For the quarter, broadcasting and entertainment revenues rose 11 percent to $191 million. Television revenues rose 8 percent, radio was flat and entertainment was up 23 percent. The higher entertainment revenues were offset by increased expenses for program development and production.

Newsprint Operations Operating profit for the newsprint group declined 83 percent to $3.1 million from $17.6 million caused by lower newsprint selling prices and the adverse impact of a stronger Canadian dollar. There were also non-recurring costs at the Quebec mill associated with the start-up of a new pulping facility and from cost-reduction programs.

Revenues declined 7 percent for the second quarter to $114 million. Newsprint shipments were down 2 percent.

Other Expenses and Preferred Dividends Net interest expense for the quarter increased 67 percent to $8.4 million due to a decline in interest income. The effective income tax rate for the quarter was 39.5 percent versus 41.5 percent in the same period last year.

Dividends on preferred stock net of related tax benefits were $4.3 million versus $3.9 million in 1989. The preferred stock was issued to the company's Employee Stock Ownership Plan in April 1989. After deducting these preferred dividends, net income attributable to common shares was $51.8 million, down 27 percent from $71.4 million last year.

Tribune Company is a diversified media company engaged in newspaper publishing, broadcasting and entertainment production and newsprint operations.

UTICA, NY (JULY 24) PR NEWSWIRE - Conmed Corporation (NASDAQ: CNMD) announced a 145 percent increase in quarterly income for its second quarter of 1990 as compared to the second quarter of 1989. Net income for the quarter ended June 1990 was $633,000 compared to $257,000 for the same period in 1989. Sales increased $3,711,000 or 87 percent to $7,955,000, for the second quarter of 1990 as compared to the second quarter of 1989. Earnings per share were $.21, an increase of 133 percent as compared with $.09 reported for the second quarter of 1989.

Similar growth occurred when comparing the first six months of 1990 with the first six months of 1989. Net income was $1,217,000 compared with $478,000 for the respective six month periods, an increase in earnings of 155 percent. Sales increased 100 percent to $15,958,000 compared to $7,977,000 and earnings per share increased to $.41 compared to $.16, an increase of 156 percent.

Eugene Corasanti, president and chairman of the board said, "The second quarter results have confirmed our expectations for Conmed. Our growth and earnings strength is a tribute to our Utica and Denver employees who have worked hard to maintain the manufacturing efficiencies and cost controls established earlier in the year.

We continue to enjoy sales growth as a result of the Aspen Laboratories acquisition as well as increases in the traditional Conmed product lines. But, we are ever mindful of the need to keep the expense side of this business within close reins in order to remain financially strong and, at the same time, competitive."

Conmed is a manufacturer of medical devices used primarily in hospital operating rooms and critical care areas. The company distributes its products worldwide from manufacturing and warehousing facilities in Denver and Utica.

SANFORD, NC (JULY 24) PR NEWSWIRE - TRION, INC. (NASDAQ: TRON) announced second quarter and first half results as follows:

	Three Months Ended June 30		Six Months Ended June 30	
	1990	1989	1990	1989
Sales	$7,953,000	$9,077,000	$20,706,000	$21,975,000
Net Income (Loss)	$(638,000)	$ 472,000	$ (406,000)	$ 1,244,000
Net Income (Loss) Per Share	$ (.10)	$ .08	$ (.06)	$ .20

The net loss in the second quarter was increased by $350,000, $.06 per share, as a result of inventory adjustments at Trion Limited. An interim physical inventory as of June 30 revealed that recent corrective actions were inadequate; therefore, additional controls will be established immediately.

A regular quarterly common cash dividend of $.0225 has been declared payable November 1 to shareholders of record October 1.

Trion specializes in the design, manufacture and sale of electronic air cleaners.

BOULDER, CO (JULY 24) PR NEWSWIRE - Synergen Inc. (NASDAQ: SYGN) today reported a net loss of $1,296,900, or 12 cents per share, for the second quarter of 1990 compared to net earnings of $599,500, or seven cents per share, for the like period in 1989. Revenues for the quarter were $3,118,400 compared to $4,300,200 for the second quarter of 1989.

The net loss for the six months ended June 30, 1990 was $2,601,400, or 26 cents per share, on revenues of $5,837,000 compared to a net loss of $1,204,400, or 14 cents per share, on revenues of $5,930,500 for the first half of 1989.

"During the second quarter, Synergen continued to make impressive progress toward commercialization of our therapeutic products," said Jon Saxe, president and chief executive officer. "Patient enrollment for our clinical trials to test bFGF for the treatment of chronic skin ulcers is ahead of schedule. We also continue to expect our IL-1ra and SLPI products to enter clinical trials on schedule this year."

Synergen expects that its operating results will fluctuate significantly from quarter to quarter primarily due to the timing of payments made by joint venture partners.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders, and neurological conditions using recombinant DNA technology and the latest advances in molecular and cellular biology.

#90205p7920 07/24/1990 ~PR Newswire

WOODCLIFF LAKE, N.J. (JULY 24) PR NEWSWIRE - Ingersoll-Rand Company (NYSE: IR) today reported improved second-quarter earnings on increased sales over 1989.

Net earnings for the quarter were $53.9 million, or $1.03 per share, as compared to net earnings in the second quarter of 1989 of $52.4 million, or 98 cents per share.

Sales for the quarter were $932 million versus $907.4 million for the three months ended June 30, 1989. Operating income for the quarter totaled $97.4 million, which is $1 million higher than in the 1989 second quarter.

Incoming orders totaled $923 million, 7 percent higher than in last year's comparable quarter.

For the first half of the year, the New Jersey-based manufacturer posted net earnings of $99.5 million, or $1.89 per share, on sales of $1.8 billion. This compares to last year's six-month net income from operations of $93.1 million, or $1.74 per share, on sales of $1.7 billion.

In discussing the second quarter, Theodore H. Black, chairman and chief executive officer of the company, stated that the record earnings for the second quarter were achieved despite a sluggish automotive market, softness in domestic construction, and an eight-week strike at the engineered pump division in Phillipsburg, N.J.

Sales in the standard machinery segment represented a modest increase over the 1989 second quarter, reflecting a strong international market that more than offset some second-quarter weakness in domestic construction, particularly in the Northeast. Operating margins, although below last year's second quarter, showed improvement over the first three months of this year.

For the second quarter, the engineered equipment segment reported sales and operating income decreases resulting from a strike at the company's engineered pump division. The strike was settled in mid-June, shortly before the quarter ended.

#90205p7921 07/24/1990 ~PR Newswire

BOULDER, CO (JULY 24) PR NEWSWIRE - Synergen Inc. (NASDAQ: SYGN) announced today the addition of Dr. Arthur Hull Hayes, Jr., M.D., to its board of directors.

Hayes is president and chief executive officer of EM Pharmaceuticals Inc. in Hawthorne, N.Y., an affiliate of E. Merck AG of West Germany. He is also a professor of medicine and pharmacology at New York Medical College.

Hayes served as Commissioner of the Food and Drug Administration from 1981 to 1983. He is immediate past president and member of the board of the United States Pharmacopeial Convention, the national pharmaceutical standards-setting organization, and he is a member and former president of the American Society for Clinical Pharmacology and Therapeutics. He is also vice chairman of Medic Alert Foundation International, chairman elect of the Council on Family Health, a governor of the American Board of Clinical Pharmacology and a member of the board of the Food and Drug Law Institute.

"Dr. Hayes brings a wealth of pharmaceutical experience to Synergen from his extensive involvement in the academic, business and regulatory aspects of the industry," said Jon Saxe, president and chief executive officer of Synergen. "His knowledgeable advice will greatly benefit Synergen as we move our products through clinical trials and seek FDA approval."

The appointment of Hayes increases Synergen's board of directors from seven to eight members. "The decision to expand the board was made after considering Dr. Hayes' expertise and potential contribution to the company " Saxe explained

Hayes earned his M.D. at Cornell University Medical College of New York. He also received degrees from Santa Clara and Oxford Universities. He has served as professor of medicine and pharmacology at Pennsylvania State University College of Medicine and as Provost and Dean, and Director of the Institute for Human Values in Medical Ethics at New York Medical College.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders and neurological conditions using recombinant DNA technology and the latest advances in molecular and cellular biology.

#90205p7923 07/24/1990 ~PR Newswire

MELVILLE, NY (JULY 24) PR NEWSWIRE - Arrow Electronics, Inc. (NYSE: ARW) said that its second quarter earnings advanced sharply over year-earlier results, providing the company's third consecutive quarterly earnings increase.

Net income for the three months ended June 30 rose to $2.8 million ($.13

per common share), compared with net income of $243,000 (for a loss of $.09 per common share after deducting preferred stock dividends) in last year's second quarter. Second quarter sales advanced to $242 million, compared with year-earlier sales of $226 million.

For the six months ended June 30, net income more than doubled, climbing to $5.5 million ($.24 per common share) on sales of $489 million, compared with net income of $2.4 million (for a loss of $.03 per common share after deducting preferred stock dividends) on sales of $463 million for the first half of 1989.

"Sales advances and expense controls were the key elements in our second quarter earnings gains," said Stephen P. Kaufman, president and chief executive officer of Arrow. "In the face of extremely competitive market conditions, we were able to maintain our gross profit margins at first quarter levels while driving down operating expenses as a percentage of sales to the lowest level in two years," Kaufman added. "Arrow's focused market strategy, adopted at the beginning of the year, coupled with our more efficient cost structure, enabled us to achieve a 31 percent increase in operating income over last year's second quarter."

The company noted that its reduced provision for preferred stock dividends reflects Arrow's open market repurchase, early in the second quarter, of approximately 11 percent of the outstanding shares of its convertible exchangeable preferred stock.

Arrow Electronics is one of the world's two largest distributors of electronic components, systems, and related products.

#90205p7924 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced that earnings for the second quarter of 1990 are anticipated to be 36 cents per share. This would be a 20 percent increase over 1989's second- quarter results of 30 cents per share, as well as an improvement over 1990's first-quarter results of 35 cents per share.

In announcing the second-quarter earnings, Alfred T. McNeill, chairman of The Turner Corporation, expressed optimism in the outlook for the rest of the year. "We are looking for a significant improvement over 1989's earnings of 54 cents per share and 1988's earnings of 82 cents per share. Our current earnings goal for the entire year of 1990 is in a range between $1.40 and $1.65 per share. The preliminary figures for the second

quarter of 1990 confirm that we are well on our way toward achieving that goal. The improvement reflects the successful refocus on our core construction business while making slow but steady progress on the reduction of our current real estate portfolio."

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest builder of commercial, industrial, hospital and health care, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects under way throughout the United States and abroad.

During 1989, The Turner Corporation completed $3.6 billion of construction.

#90205p7925 07/24/1990 ~PR Newswire

LONDON (JULY 24) PR NEWSWIRE - Rolls-Royce plc has placed a three- year contract worth $35 million with TI Reynolds Rings Ltd for jet engine rings it was announced today by TI Group plc. The rings will be used across the range of Rolls-Royce's aero-engines and first deliveries are due this month.

TI Reynolds Rings, one of TI Group's aerospace companies, is located at Tyseley, Birmingham. This order, the largest yet received from Rolls-Royce, arises from a close commercial and technological relationship built over many years.

Some 20 percent of the order is for rings shaped by TI's Tru-Form process.

Norman Askew, president of TI Aerospace, commented: "Our order books, on both sides of the Atlantic, have grown strongly in 1989 and during 1990. This reflects the strong growth of the commercial sector which is more than offsetting the slowing of military demand."

TI Group plc ADRs began trading on July 12, 1990, in the over-the- counter market in the United States.

#90205p7928 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - Morgan Stanley Group Inc. (NYSE: MS) today announced earnings of $58.0 million, or $1.44 per share, for the

quarter ended June 30, 1990, compared to $112.1 million, or $2.83 per share, in the same quarter of 1989. Net revenues (gross revenues less interest expense) for the period were $504.2 million vs. second-quarter 1989 net revenues of $631.6 million.

Second-quarter 1989 revenues include a pre-tax gain of $51.5 million, principally from the restructuring of the firm's investments in Essex Group Inc. and the Silgan Corporation.

Consolidated net income for the six months ended June 30, 1990, was $140.2 million, or $3.51 per share. Net revenues for the six-month period were $1,082.5 million. Comparable 1989 first-half results were net income of $193.3 million, earnings per share of $4.86 and net revenues of $1,165.7 million.

The company also announced the declaration by its board of directors of a regular quarterly dividend of 37-1/2 cents per share. The dividend is payable Aug. 21, 1990, to holders of record Aug. 3, 1990.

S. Parker Gilbert, chairman, Richard B. Fisher, president and Robert F. Greenhill, vice chairman, said in a joint statement:

"Morgan Stanley Group's operating performance in the second quarter was affected by the continuing decline in overall volume of investment banking business. In addition, trading revenues declined, largely due to decreased volatility in the foreign exchange market. Partially offsetting these factors were gains in asset management revenues and equity commissions."

Total capital (stockholders' equity and long-term debt) at June 30, 1990, was $3.0 billion, including $1.8 billion of common stockholders' equity. The book value per share at June 30, based on quarter-end shares and share equivalents of 37,235,524, was $48.58.

Morgan Stanley is a major international securities firm.

HOUSTON (JULY 24) PR NEWSWIRE -- Vallen Corporation (NASDAQ: VALN) today reported record sales and net earnings for the fiscal year and fourth quarter ended May 31, 1990.

For the year, net sales increased 27.9 percent to $125,031,000, up from $97,739,000 recorded last year. Net earnings increased 39.5 percent to

$6,260,000, or $1.43 per share, compared with $4,487,000 or $1.03 per share reported a year ago.

Net sales for the fourth quarter rose to $37,662,000, up 36.8 percent from $27,535,000 recorded in the fourth quarter of 1989. Net earnings increased 39.1 percent to $1,977,000, or $.45 per share, compared with $1,421,000 or $.33 per share, recorded for the same period a year earlier.

The company's acquisition of the business and assets of four distribution locations in Tennessee and a manufacturing location in Houston contributed 25.5 percent of the increase in sales for the fiscal period ended May 31, 1990.

Vallen Safety Supply Company, the distribution subsidiary, sells a wide variety of industrial safety and health products designed for the protection of the individual worker, his work place and the environment. A new branch was opened in Anchorage, Alaska, during the quarter ended May 31, 1990. Vallen Safety now operates from 32 locations throughout the United States.

Encon Safety Products, Inc., the manufacturing subsidiary headquartered in Houston, is the leading producer of emergency showers and eye wash fountains for industrial use. Also in Houston, Encon molds and vacuum-forms products on a contract basis for various customers. Encon also molds optical quality protective eyewear at a plant in Coudersport, Pa.

BATTLE CREEK, MI (JULY 24) PR NEWSWIRE - Kellogg Company (NYSE: K) announced today that Carlos M. Gutierrez has been promoted to the position of vice president, Kellogg Company; executive vice president - sales and marketing, U.S. Food Products Division.

Gutierrez replaces William H. Weintraub, who has been appointed vice president and assistant to the chairman.

Gutierrez, who served most recently as vice president - product development, joined the company in 1975 in the Kellogg de Mexico division. Following assignments in sales and marketing in Mexico, he moved to corporate headquarters in Battle Creek in 1982 as Latin American marketing supervisor. He was promoted to international marketing services manager in 1983, to general manager of Kellogg de Mexico in 1984, to president of Kellogg Canada Inc. in 1989, and to vice president - product development in January of 1990.

Weintraub, who joined Kellogg in 1982, has held many executive positions in sales and marketing. He has been a corporate vice president since 1988 and was named executive vice president - sales and marketing of the U.S. Food Products Division in September of 1989.

ARLINGTON, VA (JULY 24) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced a $30 million agreement with Prime Motor Inns, the nation's largest hotel management company.

The exclusive three-year contract is the largest ever awarded MCI by the hospitality industry. Under the agreement, MCI will provide "0 plus" and "1 plus" services to Prime Motor Inns' 133 locations.

MCI's services will include "0 plus" long-distance services to individuals making collect third-party, person-to-person collect, and calling card calls from all guest rooms and pay phones located at the Prime Motor Inns' sites.

MCI's "1 plus" service will support Prime's day-to-day business activities, and will include: direct dialing, long-distance service; Prism Plus; and a customized MCI Card, which allows customers to place long-distance calls away from their offices/homes and charge them to their MCI accounts.

David Barsky, executive vice president for Prime Motor Inns, said: "This agreement with MCI is a step forward in our commitment to provide our properties with quality service. MCI will enable us to be more responsive to the needs of our business, while at the same time achieve significant cost savings."

Douglas Holloway, vice president of technical services, added, "MCI's unique package will enhance our telecommunications capabilities which will

translate into exceptional service for our customers."

According to Bert C. Roberts Jr., MCI president and chief operating officer, the agreement with Prime Motor Inns is another example of MCI's ability to combine customized service and creativity in delivering an exceptional package based on the clients' needs.

"MCI has identified the hospitality industry as a key strategic growth market based on its need for superior telecommunications capabilities and superior customer service, two areas where MCI historically delivers," said Roberts.

"Our new relationship with Prime Motor Inns provides us with a clear opportunity to demonstrate the depth and sophistication of the services we provide, not only to our new partner but to the rest of the hospitality industry as well."

Prime Motor Inns, headquartered in Fairfield, N.J., owns, operates or manages 133 hotel properties with approximately 20,100 rooms under the AmeriSuites, Wellesley Inn, Howard Johnson, Holiday Inn, Sheraton, Hilton, Marriott, and Days Inn names.

BETHESDA, MD (JULY 24) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) reported l990 second quarter net income of $94,52l,000, or $l.85 per share, compared with $86,92l,000, or $l.64 per share, a year ago.

Sales for the second quarter increased to $l,657,l53,000 from $l,433,448,000 last year.

Six months net earnings were $l6l,6l4,000, or $3.l7 per share, versus $l46 l33,000, or $2.76 per share, for the first half of l989. Backlog at the end of the second quarter was $ll.3 billion compared with $l2.0 billion at the same time a year ago.

Norman R. Augustine, chairman and chief executive officer said: "Sales in the quarter were buoyed by rising volume on several major programs -- primarily the Titan IV space launch system and LANTIRN night vision and targeting system. The advance in second quarter net income moves us a step closer to achieving our l990 objective -- maintaining our upward trend of earnings per share."

ATLANTA (JULY 24) PR NEWSWIRE - BellSouth Corp. (NYSE: BLS) announced that the trustee of two employee savings plans will begin purchasing on the open market or in privately negotiated transactions approximately 3.8 million BellSouth shares as part of a one-time change in investment funds offered by the plans. The purchases are expected to occur over the next two to three months.

These purchases will overlap the conclusion of an acquisition of $850 million, representing approximately 16 million shares, of BellSouth common stock to fund employee stock ownership plans for BellSouth employees. At the close of business July 20, the company had purchased about 13.4 million of those shares. As of June 30, BellSouth had about 482 million common shares outstanding.

BellSouth is an Atlanta-based international telecommunications holding company. Its subsidiaries offer local telephone service in nine southeastern states and mobile communications service worldwide, provide advertising and publishing services, and market and maintain stand-alone and fully integrated communications systems.

#90205p7938 07/24/1990 ~PR Newswire

EAST RUTHERFORD, NJ (JULY 24) PR NEWSWIRE - Cambrex Corporation (NASDAQ: CBAM), a manufacturer of specialty chemicals, today reported net income of $0.9 million for the second quarter ended June 30, 1990, compared with $1.9 million reported in the second quarter of 1989.

Net revenues for the second quarter were $34.8 million, an increase of 5.6 percent over the $33.0 million reported in the second quarter of 1989.

On a per share basis (fully diluted) the company reported net income equal to 19 cents compared with 33 cents in the second quarter of 1989.

Revenues in all product groups, with the exception of coatings, exceeded the prior year quarter. Coatings revenues were reduced, due to the sale of the company's organic biocides, driers and flocculant business in February of this year.

Operating profit in the second quarter of 1990 was $2.2 million, an increase of $400,000 over the first quarter of 1990 but a decrease from the $3.4 million reported in the same quarter last year. The second quarter operating profit improvement of 21.5 percent over the $1.8 million recorded in the 1990 first quarter, continued the increasing profit trend from the depressed level of the second half of 1989. This improvement was largely attributable to lower material costs which are proceeding in pace with the company's expectations and the effect of personnel and other cost reduction programs implemented.

Compared with the second quarter last year, operating results were affected by lower prices of pyridine derivatives in the specialty and fine chemicals sold in the international market and reduced profits from coatings due to the asset sale in February.

Operating results from the company's Heico subsidiary, acquired in June 1989, have been disappointing. Since the acquisition date, Cambrex has been working closely with a large agricultural chemical company to commercialize a promising new herbicide. To date several changes in technology, the resulting re-engineering, and extensive pilot plant operations have demonstrated that, while the product can be produced on a commercial scale by Heico, the economics are not as attractive as alternative projects the company is developing. These other opportunities will be emphasized in the future.

Although business conditions in the overall economy have not been favorable, the company's sales levels are continuing at a moderately favorable pace. Price softness in exports and lower sales volume of coatings products have been offset by improved sales in the company's agricultural, urethane and health and beauty aids product groups. As a result, the near term outlook is favorable when compared with results so far this year.

The previously publicized investigation by the Federal Bureau of Investigation and the Environmental Protection Agency of operations at the company's Bayonne facility remain inconclusive. The company has received no additional inquiries form the government agencies since the

investigation began four months ago, and has no indication of whether any further action will be taken. Operations at the site are unaffected.

For the six months ended June 30, net revenues were $71.4 million, compared with $65.8 million reported for the first half of 1989. Operating profit was $4.1 million in the 1990 first half compared with $6.4 million last year.

Net income for the six month period was $3.5 million compared with $3.8 million in the first half of 1989. The 1990 period included a gain of $1.8 million, net of taxes, on the sale of the company's organic biocides, driers,and flocculant products in February.

On a per share basis (fully diluted) net income equalled 69 cents compared to 66 cents in the 1989 six month period. Per share data is based on an average of 5,236,000 shares outstanding in the first half of 1990 and 5,903,000 shares in the first half of 1989. The shares outstanding declined principally because of the company's stock buyback program. Between mid-February and early April the company repurchased one million shares in line with its announced program.

Cambrex Corporation manufactures a broad line of specialty chemicals, fine chemicals and commodity chemical intermediates. The chemical families of castor oil, pyridine, organometallics, succinic anhydrides, organobromines and ammonia reaction chemistry are used by the company to produce compounds for its five product categories: Urethane Systems and Additives, Coatings, Health and Cosmetic Products, Agricultural Chemical Intermediates and Specialty and Fine Chemicals.

#90205p7939 07/24/1990 ~PR Newswire

ANN ARBOR, MI (JULY 24) PR NEWSWIRE - Interface Systems, Inc. (NASDAQ-NMS: INTF) reported increased revenue and reduced earnings for the third quarter of fiscal 1990, announced Carl L. Bixby, the company's president and chairman of the board, today.

According to Bixby, revenue for the quarter, which ended on June 30 for the company, was $9,862,659, an increase of 13 percent from last year's third-quarter revenue of $8,729,607.

Third-quarter earnings, said Bixby, were $692,390, or $.16 per share, compared to $882,861, or $.20 per share, for the same period in fiscal 1989.

Bixby characterized third-quarter earnings as "lower than hoped for," but said that comparisons to fiscal 1989 were misleading since last year's third-quarter earnings included $369,480 in tax savings resulting from writing off deferred taxes against the NOL (net operating loss). "Our pre-tax third-quarter earnings were much higher than last year's," he said. Interface Systems obtained the NOL with its December 1986 acquisition of Winterhalter, Inc., which has since become part of the company's CLEO Communications division.

Third-quarter results put year-to-date revenue at $28,616,353 -- up 18.2 percent from $24,202,471 for the first nine months of fiscal 1989. Year-to-date earnings, he said, were $1,708,838, or $.40 per share, vs. $2,431,951, or $.56 per share, at the same point last year.

Ann Arbor-based Interface Systems is a diversified manufacturer of high-technology products. The company and its subsidiaries manufacture industrial-grade computers and terminals, called industrial workstations; plug-compatible printers for IBM mainframe and midrange computers; high-speed PC-to-mainframe data communications systems; and custom-printed circuit boards.

Bixby attributed much of Interface Systems' projected third-quarter

revenue growth to improved sales of its IBM plug-compatible printers and data communications products. The latter are manufactured and marketed by the company's CLEO Communications division.

Sales of the company's industrial workstations -- manufactured and marketed by its wholly owned Nematron subsidiary -- increased only slightly during the third quarter, falling short of expectations. "This continued slowdown in Nematron's market," said Bixby, "is the main reason our overall performance wasn't stronger."

#90205p7941 07/24/1990 ~PR Newswire

COSTA MESA, CA (JULY 24) PR NEWSWIRE - FileNet Corp. (NASDAQ: FILE) today reported record revenues and higher earnings for the second quarter ended June 30, 1990.

For the second quarter, revenues were $27.3 million, up 34 percent from $20.4 million reported for the second quarter of 1989. Net income increased 35 percent to $2.15 million, or 20 cents per share on 10.6 million shares outstanding, compared with $1.6 million, or 15 cents per

share on 10.3 million shares outstanding for the second quarter of last year.

FileNet shipped 29 systems to 25 customers during the quarter. Final results for the quarter are essentially the same as the estimated results reported previously.

"As I indicated in our July 5, 1990 release, we are pleased with FileNet's continued progress," stated Ted Smith, president and CEO. "I am particularly pleased with the addition of 18 new customers, including major organizations in the banking, financial services, transportation, and insurance industries as well as several governmental organizations. Our customer base continues to expand as a broader acceptance of image processing develops worldwide.

"We are increasingly confident about the long-term potential in this market. International Data Corp., a leading industry consulting group, recently forecast that the image processing market will reach $3.2 billion worldwide by 1993."

Revenues for the six months ended June 30, 1990 were $51.1 million, a 35 percent increase from $37.9 million reported for the first half of 1989. Net income for the six months was $3.4 million, or 33 cents per share, compared to $2.0 million, of 20 cents per share for the same period last year.

FileNet's financial position remains strong with cash and marketable securities of approximately $23 million. With $46 million in working capital, a current ratio of 3.4 to 1, total stockholders' equity of $67 million, and minimal long-term debt, FileNet is well positioned to fund significant growth.

FileNet Corp. is the worldwide leader in manufacturing and marketing image processing systems used in paper-intensive business applications. A pioneer in its field, FileNet today has more than 350 systems installed worldwide.

The company, which is headquartered in Costa Mesa, has sales offices in the United States, Canada, France, and Germany. FileNet systems are also sold in 24 other countries by Ing. C. Olivetti and Co., S.p.A., and other distributors.

CONTACT: Mark St. Clare of FileNet, (714) 966-3577, or Lise Needham of the Financial Relations Board, (415) 986-1591, for FileNet.

#90205p7943 07/24/1990 ~PR Newswire

PARSIPPANY, NJ (JULY 24) PR NEWSWIRE - Armco Inc. (NYSE: AS) today reported a net loss of $85.1 million for the second quarter of 1990, or $.98 per share of common stock. The results included a number of net unusual items totaling $79.4 million, which if excluded would have resulted in a net loss of $5.7 million for the second quarter. Sales for the period totaled $457.2 million.

In the second quarter of 1989, Armco had net income of $75.6 million, or $.84 per share on sales of $665.6 million. The 1989 second quarter included a number of unusual items which, if excluded, would have resulted in net income of $33.7 million. Included in sales was $204.3 million from the former Eastern Steel division, now Armco Steel Company, L.P., a joint venture with Kawasaki Steel Corporation. ASC sales are not reported with Armco Inc. results which accounts for the substantial difference in sales between the two quarters.

For the second quarter of 1990, the unusual items included charges of $30 million for Armco's finance and insurance runoff companies and $15 million for federal tax assessments for prior years. In addition, other unusual charges totaling $56 million resulted from a breach-of- contract suit against Armco in Houston, Texas; a judgment against Armco on July 9, 1990, in Minnesota; and other litigation and claims. The July 9 ruling stemmed from an action filed in 1986 by the Minnesota Power & Light Company which sought damages for the breach of a long-term electrical power contract by Reserve Mining Company, a joint venture between subsidiaries of Armco and LTV Corporation that produced iron ore pellets. Armco said the adverse decision was not expected and an appeal will be filed.

#90205p7946 07/24/1990 ~PR Newswire

MINNEAPOLIS (JULY 24) PR NEWSWIRE - Astrocom Corporation (NASDAQ: ACOM) today reported net income of $43,000 or $.01 per share for its second quarter ended June 30, 1990. Revenues were $1,575,000 in the second quarter, up 18 percent from revenues of $1,337,000 in the second quarter of 1989. The company had a net loss in the second quarter of 1989 of $455,000 or $.17 per share.

For the first six months, Astrocom had net income of $65,000 or $.02 per share on revenues of $3,070,000. This compares with a net loss of $620,000 or $.23 per share on revenues of $2,776,000 in the first half of last year.

Stephen C. O'Hara, president and chief executive officer, commented: "Our business is healthy. Order rates for our new product lines are strong and steady. With the sale of our circuit board subsidiary finalized, our

balance sheet is significantly stronger. We expect business to continue to improve in the second half."

In its second quarter, Astrocom finalized the sale of its Circuit Board One subsidiary and applied the cash of the sale -- $900,000 -- to reducing bank debt and other current liabilities.

Astrocom Corporation designs, manufacturers and markets advanced digital communications equipment for the data transmission needs of corporations and other large organizations. Astrocom multiplexers and data sets provide cost-effective long-distance communications via digital public data networks. In a local environment, Astrocom fiber optic and coaxial multiplexers support a broad range of different manufacturers' networks.

MINNEAPOLIS (JULY 24) PR NEWSWIRE - Cherne Medical, Inc. (NASDAQ: CHNE), a manufacturer of cardiac diagnostic equipment, today announced that David L. Printy, 44, has been elected chairman of the board. Printy has been a Cherne director since 1987.

Lloyd G. Cherne, former chairman of the board and founder of the company, becomes chairman emeritus.

"David Printy brings valuable expertise in finance and strategic planning to our operations," said Cherne in making the announcement. "David will be working with our president and CEO, Charles F. Cuddihy, Jr., to make Cherne Medical a stronger company. He will have major responsibility for Cherne Medical's finances, including raising capital, and strategic direction."

Printy was president and chief executive officer of Morison Asset Management, Inc., a Minneapolis-based investment advisory firm he founded in 1980, until 1989, when he resigned to run for governor of Minnesota. After the firm was sold to Michigan National Corporation in 1986, Printy also served as president of Independence One Investment Services, Michigan National's investment advisory and trust services subsidiary, and senior vice president of Michigan National Bank.

In addition to founding Morison Asset Management, Printy also founded Medical Innovation Capital, Inc., Minneapolis, in 1982. The company

helped fund a number of successful medical start-up companies. He served as chairman and president of Medical Innovation Capital until 1986, when he sold controlling interest in his advisory firm to Michigan National Bank.

Printy has a B.A. degree from William Penn College in Iowa and took post-graduate studies in systems management at the Institute of Aerospace Safety and Management at the University of Southern California.

Cherne Medical, Inc., has developed the Cherne System, a new non- invasive non-stress test designed to aid physicians in the early detection of heart disease.

#90205p7950 07/24/1990 ~PR Newswire

PEAPACK, NJ (JULY 24) PR NEWSWIRE - NYCOR, Inc. (NASDAQ: NYCO) today reported that revenues for the second quarter of 1990 ended June 30 increased to $1.5 million compared to $1.2 million from continuing operations a year ago. Income from continuing operations totaled $1.2 million, or 5 cents per share, in the period versus $638,000, or 1 cent per share, in the second quarter of 1989.

Net income totaled $2.3 million, or 13 cents per share, in the second quarter of 1990 and included $1.2 million, or 8 cents per share, of income from discontinued operations that reflected the previously announced sale of NYCOR's automotive components division. In the 1989 second quarter, net income was $53.3 million, or $3.78 cents per share, and included the sale of the company's major operating business.

For the six months ended June 30, 1990, revenues from continuing operations totaled $3.1 million versus $2.3 million in the year-ago period. Income from continuing operations in the first six months of 1990 was $2.3 million, or 10 cents per share, compared with $1.2 million, or 2 cents per share, in the first six months of 1989. Including income from discontinued operations in both years, net income totaled $3.5 million, or 18 cents per share, in the first six months of 1990 versus $54.0 million, or $3.80 per share, in the 1989 period.

NYCOR revenues from continuing operations currently are comprised primarily of interest income, as the company sold or discontinued its manufacturing operations as of the second quarter of 1989.

The company's objective is to make a substantial acquisition of underperforming manufacturing assets based on NYCOR's balance sheet strength, which includes cash of $73.7 million and no debt. Stockholders'

equity per share at June 30, 1990, totaled $3.83 on a fully diluted basis.

LANSING, MICH. (JULY 24) PR NEWSWIRE - Concerned about the environment and what the world will hold for future generations, Oldsmobile has offered a helping stroke and joined the Grand River Expedition '90.

"The expedition has come at a time when we're all concerned about environmental issues," said J. Michael Losh, Oldsmobile general manager. "And in order to assist the canoe team of experts and specialists, six innovative Oldsmobile Silhouette mini-vans will accompany the crew to make their 12-day excursion a little more comfortable."

The water team, led by renown canoeists Verlen and Valerie Kruger, will conduct a series of studies and tasks, make presentations, and demonstrate their findings to various communities along the route. Their 260-mile excursion begins in Jackson and ends in Grand Haven at Lake Michigan. The expedition's goals are to learn about the values, problems and

opportunities of the Grand River.

"As a Michigan-based automotive company, we're delighted to join such an array of experts and specialists as they conduct research that will affect many communities along the Grand River," Losh said. "We wish them well and look forward to hearing about their findings during Lansing's Riverfest."

SAN FRANCISCO (JULY 24) PR NEWSWIRE - The Visa International ATM Network has expanded coverage to Belgium, the 40th country to join the program. Already the world's largest international network, Visa's is now the first to top 50,000 automated teller machines around the globe.

Visa said that the Belgian ATM networks, Bancontact and Mister Cash, have added a total of 500 cash dispensing locations to the Visa worldwide network, which now has 52,187 machines in operation, up 43 percent from a year ago.

"This is great news for Visa cardholders who can now get cash 24 hours a day at over 50,000 locations around the world," said Jean-Jacques Desbons, Visa International Executive Vice President for consumer products. "And in Belgium, cardholders now have 500 Visa locations to choose from," said Desbons, noting that Visa expects to add an additional 350 ATMs in Belgium by the end of this year.

In Visa's Europe, Middle East, Africa Region, the Visa ATM Network has a total of 20,016 electronic ATMs in 21 countries.

A Visa cardholder can withdraw local currency from any Visa ATM Network machine by using a Visa card and a personal identification number. The transaction amount is drawn automatically from the cardholder's account. When converted to a foreign currency, the cash advance transaction is priced at rates that are generally more favorable than retail exchange rates charged elsewhere.

In June, Visa cardholders used the network to obtain $145 million in cash, up more than 101 percent from the same month in 1989.

Visa, with more than 220 million cards in circulation, is the world's largest consumer payments system.

ROCKFORD, IL (JULY 24) PR NEWSWIRE - The board of directors of Sundstrand Corporation (NYSE: SNS) has approved the sale of Sundstrand's Heat Transfer business to Modine Manufacturing Company (NASDAQ: MODI) of Racine Wis., at a purchase price of approximately $40 million.

As previously announced, the purchase is subject to the execution of a definitive agreement and other customary conditions. At the present time, the company expects to realize a gain on the sale when the transaction is completed.

Harry C. Stonecipher, president and chief executive officer of Sundstrand, has stated, "Sundstrand is in the process of restructuring its businesses in order to provide for significant future growth. We have been divesting businesses which do not fit our strategy and we are interested in acquiring businesses that are in attractive markets with appropriate technology."

Sundstrand Corporation is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace and industrial markets. Sundstrand's common stock is listed on the New York, Midwest, and Pacific stock exchanges under the symbol SNS.

ATLANTA (JULY 24) PR NEWSWIRE - Crawford & Co. (NYSE: CFD) announced today that at a special meeting held this morning its shareholders approved an amendment to the company's Restated Articles of Incorporation effecting a recapitalization of the company.

The amendment, which becomes effective today, authorizes two classes of

common stock: Class A Common Stock and Class B Common Stock. The two classes of stock have substantially identical rights, except that shares of Class A Common Stock generally do not have any voting rights. In addition, the amendment permits the company's board of directors to pay higher (but not lower) cash dividends on the nonvoting Class A Common Stock than on the voting Class B Common Stock. At its regular quarterly meeting held today following the special meeting of shareholders, the board of directors of the company declared quarterly dividends of $0.095 per share on the Class A Common Stock and $0.08 per share on the Class B Common Stock payable on Aug. 16 to shareholders of record as of the close of business on Aug. 9.

In connection with the amendment, the company's outstanding common stock has been redesignated as Class B Common Stock. Shareholders of record of Class B Common Stock as of today's date are entitled to receive a stock dividend of one new share of Class A Common Stock for each share of Class B Common Stock outstanding.

Beginning July 25, the company's Class B Common Stock will be listed for trading on the New York Stock Exchange (the "NYSE") under the symbol "CRDB" and the Class A Common Stock will be listed for trading on the NYSE on a when issued basis, under the symbol "CRDA." With the payment of a dividend premium on the Class A Common Stock and the inclusion in the amendment of a provision designed to ensure that holders of Class A Common Stock receive consideration equal to that offered to holders of Class B Common Stock in the event of certain extraordinary transactions (unless such transactions are approved by the holders of at least 75 percent of the Class A Common Stock), the company expects that the Class A Common Stock will trade at or near parity with the Class B Common Stock.

MIAMI (JULY 24) PR NEWSWIRE - Knight-Ridder, Inc. (NYSE: KRI), earned $44,609,000 or $.88 a share from continuing operations in the second quarter of 1990. This represented a 14.3 percent increase from last year's $.77 a share from ongoing operations. This comparison excluded last year's gain of $.58 a share from the sale of the Pasedena Star-News and a gain of $1.09 a share from the sale of discontinued television operations. Excluding both the gain on the sale of the Pasedena newspaper and its operations from 1989, net income from continuing operations on a comparable basis was up 12.2 percent.

Operating profit for the quarter of $88,226,000 was 2.3 percent below the $90,287,000 a year ago. Total operating revenue rose 2.3 percent to $591,739,000. The average number of shares outstanding during the quarter

was 50,874,000 vs. 51,956,000 a year earlier.

NEWSPAPER DIVISION Knight-Ridder's Newspaper Division revenue rose 0.5 percent to $513,174,000 from $510,617,000 and operating profit of $95,721,000 was up 0.5 percent over the $95,213,000 earned in the second quarter of 1989. Excluding Pasedena's operations from 1989 results, the division's operating profit increased 1.4 percent.

BUSINESS INFORMATION SERVICES DIVISION The Business Information Services Division had an operating profit of $3,563,000, a gain of 28.7 percent over the profit of $2,769,000 recorded in the second quarter a year ago. Revenue was up 15.4 percent to $78,565,000 from $68,083,000 in 1989.

DALLAS (JULY 24) PR NEWSWIRE - The following statement was released today by American Airlines:

American Airlines has withdrawn the facilities surcharges it had planned to begin Aug. 1 at five airports: LaGuardia, Newark, New Orleans, West Palm Beach, and Fort Myers.

While the charges are still justified due to excessive and unreasonable costs at the airports, American has been unable to implement the surcharges due to competition. American's goal is to remain competitive on price at all times.

American regrets that there is now no alternative other than to have all customers pay for facilities and services benefitting a few.

BARRE, VT (JULY 24) PR NEWSWIRE - Green Mountain Power Corporation (NYSE: GMP), Highgate Non-Profit, Inc., Housing Vermont, Vermont Housing Finance Agency, and the Highgate Residents Association today signed a landmark agreement to launch a fuel-conversion project at the Highgate apartment complex in Barre.

Under the plan, GMP will pay for the conversion of the present electric heating system at the 120-unit Highgate apartment complex to a propane-fired hydronic heating system that will also provide hot water for

residents. By converting the heating system from electric to propane, the residents' overall energy costs will be significantly reduced.

"This is a win-win situation," said Gov. Madeleine M. Kunin. "Good for the environment, good for tenants, and good for the corporation. I'm delighted with this creative approach to energy savings and sound environmental management."

GMP plans to invest $785,000 for the installation, engineering, and architects' and general contractors' fees for the work. The Vermont Public Service Board has already approved the plan.

Work will begin in spring 1991 with the fuel-conversion work scheduled to be complete by December 1991. The deal is contingent upon approval by the Department of Housing and Urban Development (HUD) of the sale of the property to a limited partnership to consist of Highgate Non-Profit, Housing Vermont, Highgate Residents Association and the Vermont Equity Fund. Highgate, built in 1971, is currently owned by Fairfield Associates.

"We got here by working together," Douglas G. Hyde, executive vice president and chief operating officer at GMP said at the ceremony held at Highgate. "Tenant groups and non-profit owners, community leaders and state officials, state regulators and of course, an investor-owned electric utility have worked together to develop a large scale fuel-conversion project."

"We have worked hard. And, together, we have blazed a new trail," Hyde said. "I want you to know that I am not aware of any other investor-owned utility in the United States that has cooperatively developed and supported, with a significant contribution of funds, a large scale project of this type."

Highgate Non-Profit is working toward acquiring the apartment complex to preserve the apartments as affordable housing for low-and-moderate income families. The group is planning to conduct rehabilitation work at the complex with state, federal and private funds. GMP's proposal to pay for the heating conversion was a key piece to the funding package for the rehabilitation project.

HAUPPAUGE, NY (JULY 24) PR NEWSWIRE - The Displays division of Applied Digital Data Systems (ADDS) yesterday announced the signing of an agreement with Tandem Computers Incorporated (NYSE: TDM) under which ADDS will supply Tandem with private-labeled versions of its Model 4000 video display terminal. The three-year contract has an estimated value of $25 million.

Tandem, under its own label, will distribute the ADDS ASCII/ANSI 4000 terminals as part of Tandem systems or networks.

In choosing ADDS as an original equipment manufacturer (OEM) supplier, Tandem cited ADDS's U.S.-based flexible manufacturing, the company's willingness to custom tailor its products, and the emphasis it places on managing quality/reliability processes as key factors.

"We are delighted that our Model 4000 was recognized as meeting the rigorous standards of so quality-conscious a company as Tandem," said David G. Laws, ADDS's president and chief executive officer. "Tandem chose ADDS as a display terminal supplier because it has a sound strategic direction, its products are highly reliable, and -- of utmost importance -- its products are quality-one," said Lawrence W. McGraw, vice president and general manager of the Tandem Source Co., the division responsible for purchasing and distributing workstations and terminal products for sale to Tandem customers.

Laws also commented that his company's domestic assembly facility and flexible manufacturing strategy uniquely position ADDS to provide just-in-time delivery to Tandem's main markets. "We are also able to provide Tandem with a variety of monitors, multiple language configurations, shorter manufacturing lead times, and the capability to do in-house keyboard legending for international languages," he said.

ADDS has been shipping its new Model 4000 terminal to distribution channels worldwide, as well as to OEMs, system manufacturers, and integrators since early April 1990.

Tandem Computers manufactures and markets fault-tolerant computer systems and networks for on-line transaction processing, large data base, and UNIX system applications. Company headquarters are located at 19333 Vallco Parkway, Cupertino, Calif., 95014.

For further information, contact Vincent P. Luciano, director of marketing ADDS Display Products Division, 100 Marcus Blvd., Hauppauge, N.Y., 11788; 516-231-5400 or 800-388-ADDS.

ADDS, a subsidiary of NCR Corporation (NYSE: NCR), has been a leading manufacturer of general-purpose display terminals since 1969.

#90205p7983 07/24/1990 ~PR Newswire

HOUSTON (JULY 24) PR NEWSWIRE - Plans to begin production of a minimum of 1,000 natural gas-powered, light-duty trucks were jointly announced by the Texas General Land Office, the GMC Truck Division of General Motors Corporation (NYSE: GM), and a consortium of utilities from Texas, California, and Colorado. The natural gas trucks will be for utility and private fleet use in California and Texas.

"We are pleased to add compressed natural gas (CNG) to the growing list of alternative fuel test programs, either sponsored by GM or using GM vehicles," GM officials said. "This real-world program will evaluate the performance of CNG truck fleets and help resolve the health, safety, cost and consumer acceptance issues with respect to alternative fuels."

At one of two press briefings, Texas Land Commissioner Garry Mauro said the GMC Truck light-duty, natural gas program would begin in early 1991 and is one of several projects using natural gas as a vehicle fuel that are under consideration.

"This will be the first time natural gas-powered vehicles will be commercially available in the U.S.," Mauro said. "GMC Truck is to be commended for this major step toward meeting the alternative fuel demands of the 1990s."

At the Los Angeles briefing, representatives of California's three major

natural gas utilities said the initial fleet is being partly funded by a $935,000 engineering and manufacturing grant.

The three-phase grant will cover initial design, engineering and development of a natural gas fuel system, engine and emission testing, and design of assembly processing required to produce these vehicles.

The program will use the 1991 GMC Truck, 3/4-ton pickup models, equipped with a 5.7-liter engine, and a throttle-body, manifolded fuel-injection system. PAS Inc., a Troy, Mich. engineering and development firm, will develop and install the natural gas fuel system.

The completed vehicle will be sold and serviced through selected GMC Truck dealerships in Texas and California. GMC Truck will be responsible for warranty and service on the natural gas-powered trucks. Tecogen, Inc., of Waltam, Mass, has been contracted by the utilities to provide technical input.

California participants include: Pacific Gas and Electric Company, San Francisco; SDG&E, San Diego;, and SoCalGas, Los Angeles. Texas utility participants are: El Paso Natural Gas, El Paso; Energas Company, Midland; Enron, and Entex, both of Houston; Lone Star Gas, Dallas; and Southern Union Gas, Austin.

#90205p7984 07/24/1990 ~PR Newswire

TAMPA, FL (JULY 24) PR NEWSWIRE - Florida's first "rural service area" (RSA) was activated today with cellular telephone service, according to GTE Mobilnet General Manager Jim La Belle.

Cellular service is currently offered in an around the state's larger cities, but gaps in cellular coverage exist in rural areas (RSAs). RSAs are mostly rural areas not covered in metropolitan service areas (MSAs) as defined by the Federal Communications Commission (FCC).

With the activation of the Hardee RSA - comprised of DeSoto, Hardee and Charlotte counties - GTE Mobilnet is the first cellular carrier to begin filling in the remainder of the state.

"We're delighted to be the first cellular carrier in Florida to provide service to customers outside of large metropolitan cities," said La Belle. "The Agriculture industry is one of this industry's largest customer groups. From the farmer in the field to the produce broker at the market,

there's a definite need for mobile communications. In fact, we have approximately 500 customers in these areas who already have phones and who've been waiting for this day."

"In addition, our current customers will now be able to travel important roads through these areas, such as I75, Highway 17 and State Roads 64 and 70, with uninterrupted service," said La Belle.

The addition of the Hardee RSA brings GTE Mobilnet's total service area in Florida to nearly 8500 square miles of toll-free coverage within a ten-county area.

When all of Florida's RSAs are brought on line, it will be possible to drive from Key West to Pensacola and enjoy uninterrupted service. Construction of celluar systems in other Florida RSAs is expected to continue over the next five years.

GTE Mobilnet owns and operates the largest cellular network on Florida's gulf coast. The company was the first cellular carrier to enter the Florida market (November 1984) and currently handles some 140,000 calls daily for mobile and portable cellular subscribers. By year-end 1992, the Florida region expects to provide service to more than 100,000 subscribers.

GTE Mobilnet operates cellular networks in 34 metropolitan areas and six rural service areas in nine states, serving a population of approximately 23 million. GTE Mobilnet is a divison of GTE Mobile Communications Group, the first cellular provider offering nationwide service. GTE Mobile Communications Group is a wholly-owned subisidary of the GTE Corporation.

#90205p7985 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - Capital Cities/ABC, Inc. (NYSE: CCB) reported earnings for the second quarter of 1990, it was announced today by Daniel B. Burke, president and chief executive officer. Consolidated net income for the second quarter of 1990 was $142,311,000, compared with $140,153,000 earned in 1989. Earnings per share for the second quarter of 1990 were $8.19, a gain of 5 percent over the $7.83 reported in 1989.

Net revenues for the second quarter of 1990 were $1,357,284,000, an increase of 11 percent over 1989, with the broadcasting operations increasing 12 percent. The ABC Television Network reported significant increases in revenues as a result of strong advertising demand, particularly for prime-time and news programming. Video operations also

reported very significant revenue increases, which were primarily related to ESPN's telecasts of Major League Baseball. Television station and radio operations reported only modest revenue gains, reflecting generally weak levels of advertising demand. Publishing revenues increased 7 percent, with most of the increase resulting from recent acquisitions.

Operating income for the second quarter of 1990 was $270,335,000, an increase of 2 percent from 1989, with the broadcasting operations also improving 2 percent. The ABC Television Network reported a significant profit improvement in the second quarter (excluding the effect of purchase price adjustments in both years).

As anticipated, operating earnings for the video operations declined sharply as a result of approximately $20 million in second-quarter losses incurred at ESPN in its first year of coverage of Major League Baseball. Television stations earnings improved moderately for the quarter, while radio operations declined slightly. Publishing group earnings improved 10 percent in the second quarter of 1990, with all major segments reporting gains.

For the first six months of 1990, net income was $248,614,000, an increase of 12 percent over the $222,926,000 reported in 1989. Earnings per share were $14.27, a gain of 15 percent over the $12.40 reported in the same period in 1989. Average shares outstanding for 1990 were 17,425,000, compared with 17,980,000 in 1989, the decrease reflecting repurchases of the company's common stock in 1989 and 1990.

Capital Cities/ABC operates the ABC Television Network and eight television stations, the ABC Radio Networks and 21 radio stations, and provides programming for cable television. The company publishes daily and weekly newspapers, shopping guides, various specialty and business periodicals, and books.

CONTACT: Joseph M. Fitzgerald, vice president-investor relations of Capital Cities/ABC, 212-456-7008.

#90205p7988 07/24/1990 ~PR Newswire

MILWAUKEE (JULY 24) PR NEWSWIRE - Harley-Davidson Inc. (NYSE: HDI) today reported record sales and earnings from continuing operations for its fifth consecutive second quarter and six-month period ended July 1, 1990.

Net sales for the quarter totaled $249.7 million, an increase of $30.5 million or 13.9 percent over the comparable year-ago quarter. Income from continuing operations and related earnings per share totaled $16.1 million and $.90 respectively, on 17.8 million weighted average shares outstanding compared to $10.6 million and $.61 on 17.3 million shares in the year-ago

quarter. This represents a $5.5 million increase in income, or 52.0 percent over the year-ago quarter. Net income and related earnings per share totaled $15.4 million and $.87 versus $9.8 million and $.57 in the year-ago quarter.

Extraordinary expense reflects the write-off of $.6 million of deferred financing and premium costs (net of tax) associated with the repurchase of $14.6 million of Holiday Rambler Corp. subordinated debt during the current year's second quarter.

The second quarter net sales increase is primarily attributable to a 23.4 percent sales increase in the company's motorcycle and related products segment. Worldwide unit shipments of motorcycles exceeded the comparable year-ago quarter by 1,708 units.

Demand for Harley-Davidson motorcycles continues to outweigh supply, Teerlink said, and the company continues to hold its commanding market share lead, with the most current statistics showing Harley-Davidson with a 64.9 percent share of the U.S. superheavyweight (850 CC+) motorcycle market, an increase of 5.3 points.

Harley-Davidson's parts and accessories division reported a 21.3 percent sales increase during the quarter, reflecting strong consumer acceptance of new product lines, including the exclusive MotorClothes line of motorcycle fashions, Teerlink said.

Harley-Davidson Inc., the only American motorcycle manufacturer, produces heavyweight motorcycles and a complete line of motorcycle parts and accessories. Its Holiday Rambler subsidiary is a leading manufacturer of premium recreational vehicles, specialized commercial vehicles, and a diverse range of related products. Harley-Davidson Inc. is also a manufacturing contractor for a variety of industries, industries, including the U.S. Department of Defense.

#90205p7990 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - ITT Corporation (NYSE: ITT) announced today that net income for the second quarter and first half of 1990 increased over 1989 levels.

Net income for the second quarter ended June 30, 1990 rose to $397 million or $2.80 per share on a fully diluted basis, over the $244 million, or $1.65 per share, in the 1989 second quarter. This represents a 70 percent increase on a per share basis.

On a primary basis, net income per share for the quarter was $3.00, a 76 percent increase over the $1.70 in the 1989 quarter.

Net income for the 1990 second quarter included an after-tax gain of $139 million, or 99 cents per fully diluted share, on the sale of 7 percent of Alcatel N.V. to Compagnie Generale d'Electricite (CGE) in June. ITT retains a 30 percent ownership in Alcatel N.V., today the largest telecommunications equipment company in the world.

Net income for the 1989 quarter also included a gain of $18 million, or 12 cents per share, on the sale of ITT's European headquarters facility and a write-down of $28 million, or 19 cents per share for ITT Hartford's investment in Thompson McKinnon Inc. Excluding these items and the Alcatel gain, net income per fully diluted share rose 5 percent.

Consolidated sales and revenues for both the 1990 and 1989 second quarters were $5.2 billion. The quarterly sales comparison was impacted by $119 million due to divestitures during 1989 as well as by flat revenues at ITT Hartford and depressed sales in the North American automotive industry.

"Despite the difficult economic environment in the United States, ITT's overall results for the second quarter were well ahead of earlier expectations," Rand V. Araskog, chairman and chief executive said. "These results continue to reflect the strength of our operations," Araskog said. "We are pleased that our stronger financial condition was cited by Standard and Poor's when it upgraded our bond rating to A+ in the second quarter," Araskog said.

Net income for the first half of 1990 was $650 million, or $4.57 per share on a fully diluted basis, a 50 percent increase over the $444 million, or $3.05 reported for the comparable 1989 period.

On a primary basis, net income per share was $4.88 for the first half of 1990 compared to $3.10 in the 1989 first half.

"With half of 1990 behind us and despite the economic outlook, we are bolstered by our balanced operations and stronger financial condition. We continue to be confident that we will meet our expectations for the full year," Araskog said.

NEW YORK (JULY 24) PR NEWSWIRE - Sterling Bancorp (NYSE: STL), parent holding company of Sterling National Bank & Trust Company of New York, today reported consolidated net income of $462,927, or 7 cents per share,

for the second quarter ended June 30, 1990, vs. a net loss of $1,230,806, or 19 cents per share, for the like period 1989.

Theodore H. Silbert, chairman, stated, "The increase in earnings was principally attributable to greater net interest income."

For the six months ended June 30, 1990, consolidated net income was $1,034,462, or 16 cents per share, vs. a net loss of $1,991,729, or 31 cents per share, for the like period 1989, an improvement of $3,025,000. The six-month increased earnings also principally arose from greater net interest income.

WILKES-BARRE, PA (JULY 24) PR NEWSWIRE - Franklin First Financial Corp. (NASDAQ-NMS: FFFC) parent company of Franklin First Federal Savings Bank, today announced the financial results for the period ended June 30, 1990.

Net income for the second quarter was $1.6 million or $.33 per share compared to $1.3 million or $.28 per share for the same period last year, an increase of 20.4 percent. For the six months ended June 30, 1990, net income totaled $3.4 million or $.70 per share compared to $2.7 million or $.57 per share for the six months ended June 30, 1989, an increase of 22.6 percent.

Commenting on the results, Elmer J. Klimchak, chairman and chief executive officer, said, "We are very pleased with the substantial increase in earnings due in part to continued favorable interest rate spreads along with a 24.0 percent increase in fee income and a modest 3.2 percent increase in expenses over the same six-month period last year."

On June 30, 1990, assets stood at $840.9 million, deposits totaled $641.2 million and shareholders' equity increased to $98.7 million, a book value of $20.71 per share. With goodwill of only $3 million, tangible capital was $20.08 per share.

During the second quarter of 1990, Franklin improved its asset quality ratios. Non-performing loans at June 30, 1990, totaled $7.8 million or 1.5 percent of total gross loans compared to $8.8 million or 1.8 percent of total gross loans at the end of the first quarter of 1990. The allowance for loan losses totaled $4 million or 50.4 percent of non-performing loans at June 30, 1990, compared to $3.6 million or 40.7 percent at the end of the first quarter.

Klimchak also announced that the board of directors declared on July 19, 1990, a quarterly dividend of 13 cents a share payable Sept. 1, 1990, to shareholders of record Aug. 15.

Franklin First Financial Corp.'s common stock is listed on the NASDAQ National Market under the symbol "FFFC." The price of its stock at the close of business on July 23, 1990, was $9.625. Franklin First Financial Corp. is headquartered in Wilkes-Barre. Its sole subsidiary, Franklin First Federal Savings Bank, is a federally chartered, federally insured savings bank which conducts operations throughout northeastern Pennsylvania through 19 full-service offices and two lending centers.

#90205p7996 07/24/1990 ~PR Newswire

INGLEWOOD, CA (JULY 24) PR NEWSWIRE - International Teletrac Systems announced today that it has the solution needed to combat the increasing problem of vehicle auto theft: its Stolen Vehicle Locator Service.

Teletrac says that its Stolen Vehicle Locator Service makes LoJack look like "yesterday's news." Teletrac technology gives law enforcement agencies the ability to locate and track a vehicle as a theft is in progress, not minutes or hours later when an agency has been notified by the consumer, the company said.

With Teletrac, consumers don't have to know if their cars have been stolen. (LoJack works only after the user has called the police to report the car stolen.) Teletrac will know it instantly and begin following

stolen cars as they move, the company said.

Law enforcement agencies are notified immediately and can pinpoint the location of the stolen vehicle to within 100 feet of its exact location. That contrasts to LoJack, which requires patrol units to hunt a stolen vehicle based on the tone and pitch of an RF (radio frequency) signal, Teletrac said.

Teletrac does not require law enforcement agencies to install expensive tracking equipment in patrol units, the company said. A Teletrac spokesperson said that the company's technology is so promising that the world's largest consumer electronics companies -- Mitsubishi International Corp., Kenwood Corp., Samsung Electronics and Matsushita Electric Works Ltd. -- are manufacturing radiolocation units for exclusive use on the Teletrac network. Units will be available for purchase in Los Angeles by November 1990.

Teletrac's Stolen Vehicle Locator Service will be introduced first to the people of Los Angeles, the company said. The Los Angeles network is in place, and Stolen Vehicle Locator Service will be available to consumers in January 1991.

#90205p7999 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ: BFSI), the holding company for Bankers Federal Savings FSB, today reported that net income for the quarter ended June 30, 1990, was $777,000 or $.55 per share compared with $783,000 or $.54 per share for the same quarter last year. This is the eighth consecutive quarter since going public that BFS earnings have exceeded $.50 per share.

Interest rate spread improved to 2.46 percent from 2.37 percent, net interest margin increased to 2.94 percent from 2.88 percent, and deposit growth remained on target to meet the company's 10 percent annual objective.

During the first nine months of this fiscal year, $2.00 has been added to the book value per share, reflecting the $1.62 of earnings per share and the anti-dilutive effect of repurchasing approximately 60,000 shares of BFS Bankorp stock in the open market. These results continue the company's recurring pattern of solid performance.

Commenting on the results James A. Randall, president and chief executive

officer, noted: "The litany of problems, both real and perceived, which face the savings and loan industry seem to continue unabated. Unfortunately, the executive and legislative branches of government seem more intent on fixing blame for the past, rather than helping to create a healthier economic environment for the future. Now that the president's son finds himself under intense scrutiny by both the regulators and, indeed, the entire nation, I do not foresee the negative press receding any time soon. This, of course, makes our job more difficult to do and severely impacts the performance of our stock.

"However, as I have stated on more than a few occasions, this picture does not tell the whole story. The majority of thrifts are relatively healthy, and many of them are performing well. We at Bankers Federal are among the very best performing. We, along with the industry, have our problems, chief of which is an increase in mortgage delinquencies over the past two years. But while mortgage delinquencies have put some pressure on our earnings, they do not threaten our existence. As of June 30, 1990, Bankers Federal continued to maintain 'tangible capital,' 'core capital' and 'risk-based capital' in excess of the levels required by FIRREA.

"Of course, this message is not newsworthy in the eyes of the press. So, while we aren't making news, we are making money. And I believe that is the kind of news our shareholders appreciate and have come to expect.

"As you can see from the financial operating ratios, our mortgage delinquencies over 90 days continue to be above that of the same quarter last year. During this year, we responded by accelerating our collection and foreclosure procedures and even further tightening our already conservative underwriting standards. In addition, you will recall that BFS added over $300,000 to loan loss reserves last quarter and continues to add $60,000 per quarter on a regular basis. This reflects prudent judgment based upon continued analysis of our present and future situation.

"We are encouraged by the trends which show that growth in our delinquency rate percentage has been flattening for 2-3 quarters. We are encouraged by the results of our collection efforts. We are encouraged by the underlying value of the delinquent loans. We are encouraged by recent interest rate trends. While I am in no way prepared to say that the worst is behind us, I do feel there are reasons to believe that our efforts will ultimately be rewarded.

"Recently, BFS completed the installation of Automatic Teller Machines (ATMs) in all branch locations, and we are already planning further additions. Our ATM program has been more successful than even our most optimistic projections. Over 50 percent of our eligible customers have requested Personal Identification Numbers (PIN). Our level of 2,500 total transactions per day dramatically exceeds all published averages.

"We expect ATM income after expenses to be at least $50,000 per quarter. We have gained access to a large number of potential customers and have a number of activities and promotions planned to turn them into customers for all our banking services. And, most importantly, we have demonstrated to our customers that we should be their bank today and into the future. Simply stated, we made a careful investment in ATMs and, due to good management, good promotion, and good locations, we are reaping considerable benefits."

BFS Bankorp, Inc. is the holding company of Bankers Federal Savings FSB, an SAIF-insured savings bank headquartered in New York City. The bank is a community-oriented financial institution serving Manhattan, Queens, and Brooklyn through five branch offices.

As of June 30, 1990, the bank had total assets of $468,459,000, deposits of $339,406,000, and stockholders' equity of $25,256,000. The Bank had an abbreviated examination completed by the FDIC in early 1990 and is scheduled for its regular OTS examination in August 1990.

VANCOUVER, BRITISH COLUMBIA (JULY 24) PR NEWSWIRE - North American Metals Corp. (''NAM'') (Vancouver: NAM), announced today that the company and Chevron Minerals Ltd. (''Chevron''), its 50 percent joint venture partner at the Golden Bear Mine, have commenced a diamond drilling exploration program on the Golden Bear Mine Property. Golden Bear Operating Company Limited, Operator of the mine, is also managing the mine-site exploration program. Drilling was initiated on July 7, 1990.

The company is participating in another 50/50 joint venture explortion program with Chevron on jointly owned properties acquired along the Golden Bear Access Road in 1989. NAM is operator of this joint venture and has contracted with Homestake Mineral Development Company to manage the program. To date, work in progress includes prospecting, soil sampling and some trenching.

The company is also pleased to announce that it has entered into an option agreement with Chevron whereby the company can earn a 50 percent joint venture interest in Chevron's 100 percent owned Bandit, Slam, and Misty-Nie properties in the Golden Bear area by assuming $1,000,000 of Chevron's share of joint venture expenditures on the Golden Bear Road JV.

Chevron's recent announcement of its intent to sell its interests in all of its Canadian mineral assets will not affect these programs.

#90205p8012 07/24/1990 ~PR Newswire

BRIDGEPORT, Conn. (JULY 24) PR NEWSWIRE - The Hydraulic Company (NYSE: THC) today reported net income for the three months ended June 30, 1990 of $1,062,000, or 22 cents per share, compared with $1,690,000, or 36 cents

per share, in the 1989 second quarter.

Revenues were $18,117,000 and $16,562,000 in the 1990 and 1989 second quarters, respectively.

For the first six months of 1990, THC had net income of $2,439,000, or 51 cents per share, compared with $3,269,000, or 69 cents per share, in the comparable 1989 period.

Six-month revenues in the 1990 and 1989 periods were $35,715,000 and $32,225,000, respectively.

Jack E. McGregor, THC president and chief executive officer, said THC's second-quarter and year-to-date decline in net income is primarily attributable to the continued erosion of earnings from THC's water utility segment.

McGregor noted that THC's public water supply subsidiary, Bridgeport Hydraulic Company (BHC), on June 29 filed an application with the Connecticut Department of Public Utility Control (DPUC) for a $9.8 million 22 percent increase in annual revenues.

On that date, McGregor, who also is president and chief executive officer of BHC, observed that "the inadequacy of our earnings is the major reason" for BHC's request for rate relief.

"BHC's 1989, 7.75 percent rate increase represented less than half of the amount requested, yet has been the only rate relief granted the company since September 1986," McGregor said. He observed that inflation during the same period totaled 17 percent.

Last year's increase "has not even come close to producing the earnings intended by the DPUC," he added.

McGregor said THC's second-quarter and year-to-date earnings decline also is partially attributable to expenditures associated with expansion by Industrial & Environmental Analysts, Inc. (IEA), which was acquired by THC's nonutility subsidiary, Hydrocorp, Inc., in the second half of 1989. IEA, which has multidisciplinary analytical laboratory operations in Cary, N.C., and in Essex Junction, Vt., recently added air sampling to its water- and soil-analysis capabilities and in May also formed an engineering consulting division specializing in ultra-high-purity water systems for semiconductor manufacturers and other customers.

McGregor also noted that another THC nonutility subsidiary, Timco, Inc., which has forest products and electricity cogeneration operations in New Hampshire, benefited from a legal settlement in the first half of 1989.

A New York Stock Exchange-listed company, THC provides public water supply to a population of some 500,000 in 18 Connecticut communities through BHC and through BHC's Stamford Water Company subsidiary. In addition to its Hydrocorp and Timco operations, THC is engaged in the nonutility real estate field through Main Street South Corporation.

#90205p8013 07/24/1990 ~PR Newswire

GREENSBORO, NC (JULY 24) PR NEWSWIRE - Oakwood Homes Corporation (NYSE: OH) today reported sales and earnings for the third quarter of fiscal 1990 and for the nine months ended June 30, 1990.

Sales for the third quarter were a record $29,492,000, compared with $22,005,000, for the same quarter of last year, an increase of 34 percent. Net income for the quarter was $1,673,000, compared with last year's $1,250,000, an increase of 34 percent. Net earnings per share were 32 cents on a primary basis and 29 cents fully diluted compared with last year's 24 cents on both a primary and fully diluted basis. The year-earlier quarter included a gain, net of taxes, of approximately $832,000, or 16 cents per share, related to the sale of one of the company's manufactured housing communities.

Sales for the nine months ended June 30, 1990, were a record $74,912,000, compared with $53,454,000, for the comparable period last year, an increase of 40 percent. Net income for the nine months was $3,606,000, compared with $1,517,000, for the same period last year, an increase of 138 percent. Net earnings per share were 69 cents on both a primary and fully diluted basis compared with 29 cents per share on both a primary and fully diluted basis for the comparable period last year.

Nicholas J. St. George, Oakwood's president and chief executive officer, said, "We are pleased with this additional quarter of improved operating results -- it clearly demonstrates a continuation of our recovery trend."

Oakwood Homes Corporation and its subsidiaries are engaged primarily in the production and sale of manufactured housing in North and South Carolina, Virginia, West Virginia, Tennessee, Georgia, Delaware and Kentucky.

SAN FRANCISCO (JULY 24) PR NEWSWIRE - Chevron Corporation (NYSE: CHV) today reported second quarter earnings of $648 million, an increase of 60 percent from the $404 million earned in the second quarter of 1989. Earnings per share increased to $1.83 from $1.18. The second quarter benefited $58 million from special items, while such items in last year's period reduced earnings by $11 million.

Net income for the first six months of 1990 was $1.121 billion, up 56 percent from the $717 million earned during the first half of 1989. Earnings per share of $3.16 advanced 51 percent from $2.09 in the same period last year. Special items increased earnings $64 million in the 1990 first half, but reduced earnings $11 million in the 1989 period. On an annualized basis, return on stockholders' equity for the first six months of 1990 increased to 15.9 percent from 9.6 percent for 1989's first six months.

Total revenues were $8.9 billion for the quarter, compared with $8.2 billion in last year's second quarter. The increase was due mainly to higher sales volumes of crude oil. Total revenues for the six months were $18.3 billion, up from $15.9 billion last year, reflecting both higher sales volumes and prices for crude oil, natural gas and petroleum products particularly in the first quarter.

U.S. exploration and production operations earned $91 million for the quarter, compared with $106 million in the corresponding period last year. Second quarter results included a net benefit of $48 million from special items, composed mainly of property dispositions. Operating earnings declined from last year's quarter on lower average crude oil prices, down

over $3.00 per barrel to about $14.50, and lower liquids production, off about 4 percent. Natural gas prices advanced over 6 percent, reflecting the expiration in late 1989 of a large low-price contract; production volumes increased 8 percent.

U.S. refining and marketing operations reported record earnings of $370 million, up significantly from last year's $103 million, which included a net reduction of $11 million from special items. While average prices for refined products were down slightly between periods, sales margins improved significantly due to lower crude oil acquisition costs. Sales volumes were up marginally over last year's second quarter.

Petroleum operations outside the U.S. earned $167 million for the quarter, compared with $136 million last year. Exploration and production earnings of $89 million increased from last year's $73 million, mainly because of favorable foreign exchange effects. Although crude oil prices were lower, liquids production increased about 7 percent and natural gas production was up 46 percent. The improvement in liquids production included an increase from Indonesian operations and output that began last November from the Saladin field in Australia. The natural gas volume improvement was primarily from Canadian operations and Australia's North West Shelf project. Refining and marketing earnings benefited from higher sales margins, but the improvement was offset partially by foreign exchange losses.

Chemical operations earned $65 million, compared with $108 million in the 1989 second quarter. The earnings decline reflected sharply lower prices for aromatics and olefins commodity chemicals.

Minerals operations incurred losses of $17 million, compared with earnings of $13 million in last year's quarter. As announced yesterday, the 1990 quarter included a provision of $30 million for costs anticipated in connection with the restructuring of the company's non-coal minerals business. Absent this special charge, operations were about even with last year's quarter.

Corporate and other charges for the quarter were $28 million, compared with $62 million in the 1989 second quarter. The current period included a $40 million benefit from the resolution of certain issues related to prior years' activities.

Foreign exchange gains included in net income for the quarter were $11 million, compared with $1 million in last year's second quarter. First half foreign exchange losses were $4 million, versus gains of $23 million for the prior year.

Worldwide capital and exploratory expenditures, including the company's share of affiliates' expenditures, were $956 million in the quarter, an

increase of 18 percent from the 1989 quarter. Higher expenditures in the U.S. downstream sector were primarily for refinery modernizations. Chemicals expenditures included increases for industrial chemical plant expansions. Total expenditures for the first six months of 1990 were approximately $1.8 billion, up 7 percent over last year's period.

NEEDHAM, MA (JULY 24) PR NEWSWIRE - LoJack Corp. (NASDAQ: LOJN; BSE: LOJ.N) reported today that the LoJack System has been accepted by a committee representing the joint law enforcement agencies of the city of Los Angeles, the county of Los Angeles and the California Highway Patrol and the cities and towns in Los Angeles County. As a result of the committee's action, LoJack of California has formally launched its marketing of LoJack units to the public.

In announcing the start-up of operations in Los Angeles County, C. Michael Daley, president, said, "Approval by the joint law enforcement committee for a three-year pilot program came after rigorous testing of the LoJack technology, and we are delighted to begin sales and installations in Los Angeles County.

"The Los Angeles area is an important market for LoJack because 82 percent of the buying power in the state of California is located there, and 50 percent of new car sales in the state occur there. Unfortunately, the majority of vehicle thefts in California occur in Los Angeles County -- approximately 128,000, or about 353 vehicles a day, in 1989. The network established will blanket the county with over 440 police vehicles equipped with police tracking computers.

"The effects of becoming operational in this market will begin to be reflected in revenues for the second quarter and then throughout the fiscal year."

SALEM, NH (JULY 24) PR NEWSWIRE - Hadco (NASDAQ: HDCO) today announced the appointment of Patrick Sweeney to the newly created position of chief operating officer. He will retain his position as chief financial

officer pending the appointment of a successor. Sweeney joined Hadco in 1986 as vice president, was named vice president of operations in 1988, and chief financial officer in 1989.

Jon F. Kropper, chief executive officer of Hadco Corporation, stated, "I am proud and pleased to be able to continue my 15-year association with Pat. His leadership of Hadco's operations will permit me to spend more time on developing the growth strategy of the company. His experience and knowledge of the electronics industry will position us well as the new growth cycle begins in our industry."

Before coming to Hadco, Sweeney was vice president of international manufacturing for Wang Laboratories. Sweeney also served as business manager for Digital Equipment Corporation's Galway Ireland manufacturing group and later as plant manager of DEC-Ireland. He was also employed by Waterford Crystal for 17 years in various financial positions.

Hadco is a leading independent manufacturer of dense double-sided and multilayer printed circuits, serving customers in the computer, telecommunications, industrial automation and instrumentation industries. The company also manufactures backplanes. It operates six facilities in the United States.

DENVER (JULY 24) PR NEWSWIRE - Newmont Mining Corp. (NYSE: NEM) today announced second quarter net income of $31.6 million, or 47 cents a share, compared with $7.2 million, or 11 cents a share, in the second quarter of 1989. Net income from continuing operations was $20.6 million, or 31 cents per share, in the 1990 second quarter compared with $3.9 million, or 6 cents per share, in last year's second quarter. Net income from continuing operations in the 1990 quarter included an estimated after-tax charge of

$6.1 million, or 9 cents a share, and the 1989 quarter included an after-tax charge of $5 million, or 7 cents a share, both for unusual items.

For the first six months of the year, net income was $89 million, or $1.31 a share, compared with $16.6 million, or 25 cents a share in the first half of 1989. Net income from continuing operations for the first six months of the year was $63.3 million, or 93 cents per share, compared with $1.3 million, or 2 cents per share for the like period in 1989.

Newmont Mining's consolidated sales for the second quarter and first six months of 1990 were $184.7 million and $350.2 million, respectively, compared with $151.2 million and $262.6 million, respectively, for the like periods in 1989. The average consolidated sales prices received for gold during the second quarter and first six months of 1990, including the effects of Newmont's hedging program and its gold loan payments, were $394 per ounce and $403 per ounce, respectively, compared with $404 per ounce for the quarter and first six months of 1989. Nemont Mining's equity in gold production, including Newmont Australia Ltd. which is accounted for by the equity method, was 450,000 ounces and 840,000 ounces in the second quarter and first six months of 1990, respectively, compared with 380,000 ounces and 665,000 ounces in the second quarter and first six months of 1989.

Newmont Mining's 90.1 percent interest in Newmont Gold Co. (NYSE: NGC) contributed $44.9 million in pretax income during the quarter compared with $33.3 million in the second quarter of 1989. For the first half of 1990, pretax income from the Newmont Gold interest was $91.7 million compared to $55 million for the first half of 1989. Newmont Gold's production increased in the second quarter and first half of 1990 to 461,000 ounces and 856,700 ounces, respectively, from 371,500 ounces and 643,100 ounces in the comparable 1989 periods. Newmont Gold's price received for gold averaged $367 per ounce and $385 per ounce in the second quarter and first six months of 1990 compared with $375 and $385 per ounce received in the second quarter and first six months of 1989.

#90205p8040 07/24/1990 ~PR Newswire

DALLAS (JULY 24) PR NEWSWIRE - Frozen Food Express Industries Inc. (AMEX: JIT) reported the highest quarterly revenue and net income in the company's 44-year history.

For the second quarter ended June 30, the company's revenue was $38,619,000 and net income was $1,514,000 (35 cents a share). Second-quarter revenue for 1990 was 26 percent higher than the $30,572,000 reported in the same period of 1989 and net income was 16 percent more than 1989's $1,303,000 (30 cents a share) second-quarter net income.

President Stoney M. (Mit) Stubbs Jr. said the year-to-year improvement in the company's operations was even more substantial if gains from sale of used equipment, which were unusually high during 1989, were to be excluded from operating results. For the second quarter of 1989, gain from sale of used equiment was $237,000, compared to $152,000 in 1990's second quarter. Excluding these gains from both years' second quarters, the company's second-quarter 1990 operating income (before interest and income tax) was $2,674,000, 36 percent higher than 1989's comparable $1,960,000 operating income.

Stubbs estimated that gains from sale of used equipment amounted to 2 cents a share of 1990's second quarter net income and 4 cents a share in the same period of 1989.

For the first half of 1990 and 1989, gains from the sale of used equipment had an even more significant impact on year-to-year comparisons. In 1989's first half, these gains totaled $693,000, or more than three times the $211,000 reported for the first half of 1990. Stubbs said gains from sale of used equipment amounted to approximately 3 cents a share in 1990's first half, compared to about 11 cents a share in 1989's first half.

First half 1990 revenue was $73,823,000, compared to $57,481,000 in 1989. 1990 net income was $2,110,000 (49 cents a share), compared to $2,188,000 (50 cents a share) for the same period of 1989.

Stubbs attributed the record second-quarter results to a continuing increase in demand for the company's full-service approach in transporting perishable goods (primarily prepared foods and meats), its substantially larger company-operated, full-truckload fleet, the early impact of rate increases implemented during the second quarter and more stable fuel costs

for much of the quarter.

Frozen Food Express Industries, Inc. is the nation's only full-service trucker of perishable goods (primarily prepared foods and meats) that provides both full-truckload and less-than-truckload transportation of refrigerated and frozen products. The company is the largest publicly owned perishables trucker and its less-than-truckload perishables operation is the largest in the nation.

#90205p8042 07/24/1990 ~PR Newswire

WASHINGTON (JULY 24) PR NEWSWIRE - The Washington Post Company (AMEX: WPO) today reported net income of $55.9 million for the second quarter of 1990, down 7.5 percent from net income of $60.5 million in the second quarter of 1989.

Earnings per share declined 2.5 percent to $4.60, from $4.72 in the second quarter of 1989, with a smaller number of shares outstanding this year.

Revenue for the second quarter of 1990 was $379.6 million, up 1 percent from $374.5 million in the second quarter of last year.

For the first six months of 1990, the company's net income was $95.0 million ($7.76 per share), compared with net income was $102.0 million ($7.94 per share) in the first half of 1989. Net income and earnings per share for the first half of 1990 declined 7 percent and 2 percent, respectively, from the comparable period last year.

Revenue for the first half of 1990 was $720.5 million, a slight gain over revenue of $716.3 million in the first six months of 1989.

The company's results continue to reflect a weak advertising climate. Newspaper division revenue decreased 2 percent in the second quarter of

1990 (1 percent in the first half) from the comparable period last year. Advertising volume at The Washington Post totaled 1,112,600 inches in the second quarter of 1990, down 9 percent from 1,226,400 in the second quarter of 1989. Post advertising volume declined 8 percent in the first six months of 1990 to 2,181,500 inches, from 2,367,300 inches in the first half of 1989.

Revenue at the broadcast division was down 4 percent from the second quarter and down 6 percent from the first six months of 1989.

Newsweek revenue increased 6 percent in the second quarter of 1990, with one additional issue published in the second quarter this year compared to the same period in 1989. Revenues for the first six months of 1990 were essentially even with the prior year, with 27 issues this year versus 26 in 1989.

Cable division revenue increased 11 percent in both the second quarter and the first half of 1990.

Revenue from other businesses (Stanley H. Kaplan Educational Center and Legi-Slate) rose 13 percent in the second quarter and 15.5 percent in the first half.

The company's equity in earnings of affiliates in the second quarter was $1.3 million ($5.6 million in the first half), compared with $4.1 million in the second quarter ($5.5 million in the first half) last year. Lower earnings from the company's newsprint affiliates were the major factor contributing to the second quarter decrease. Higher earnings at Cowles Media Company, which included gains on the sales of two small newspapers, contributed to the increase in the first half of 1990.

The company said it repurchased 201,200 shares of its Class B common stock during the quarter. During this period it completed the repurchase of shares under a 700,000 share buyback program begun in 1987 and commenced buying stock under a new program approved in May 1990, authorizing the repurchase of 1 million shares. The repurchases have had no significant effect on the calculation of earnings per share in the current period.

#90205p8044 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - PPG Industries (NYSE: PPG) should achieve by 1994 its major performance goals, with at least 40 percent of $8 billion-$9 billion in sales and $800 million in net earnings from outside the United States rather than the earlier target of one-third, Board Chairman and CEO Vincent A. Sarni said today.

Speaking at the New York Society of Security Analysts, he said PPG, which earned $465 million on sales of $5.7 billion in 1989, has "executed a profound change in the way we manage our business...our strategies have reformed our company into a resilient global competitor."

Sarni also told analysts the Pittsburgh-based maker of glass, fiber glass, coatings and chemicals, after divesting businesses with $430 million in sales, is "much more optimistic about the growth prospects of our basic portfolio" responsible for PPG's 3 percent average annual real sales gain since 1985. "We believe we will meet our goal of 4 percent real growth a year as international markets continue to expand and we work to develop growth opportunities in our existing businesses," he said.

Noting the importance of geographic diversification to a strategy of reduced dependence on the domestic economy, Sarni said success in Europe and a growing Far East presence "indicate to us that we are on the right track."

PPG last week reported second quarter net earnings of $141 million, or $1.31 a share, on sales of $1.57 billion, and first half net of $266 million, or $2.47 a share, on $3 billion in sales. Sarni emphasized these all-time highs were achieved although domestic auto production and construction declined substantially, and expressed optimism about full-year results.

The chairman said PPG will complete Wednesday "the most important acquisition we have made in the past several years," obtaining 100 percent of Netherlands fiber glass maker Silenka B.V., and is pursuing a fiber glass joint venture in Japan. He said Europe will soon be the world's largest market for fiber glass reinforcements and textiles.

THOUSAND OAKS, CA (JULY 24) PR NEWSWIRE - Amgen's (NASDAQ: AMGN) board of directors today elected Amgen Chief Executive Officer Gordon M. Binder, 54 to the position of chairman of the board. Dr. George B. Rathmann was re-elected to the board and will serve as chairman emeritus.

In announcing the decision, Dr. Rathmann stated, "This selection completes the transition in management that began two years ago. The management team under the direction of Gordon Binder and Harry Hixson, Amgen's president and chief operating officer, began the 1990's on a strong positive note. I am sure that with everyone's support and commitment, the company will continue to grow and achieve its fullest potential." Rathmann concluded by saying, "I have cherished this past decade and the friendships I have made. I am honored by my past and continuing association with this company and its employees."

Amgen is a major biotechnology firm developing pharmaceutical products based on advances in recombinant DNA and molecular biology. The company, headquartered in Thousand Oaks with European headquarters in Lucerne, Switzerland, was founded in April of 1980. The company's common stock (AMGN) is traded on the NASDAQ National Market System.

#90205p8053 07/24/1990 ~PR Newswire
ANNANDALE, VA (JULY 24) PR NEWSWIRE - Ameribanc Investors Group (NASDAQ-NMS: AINVS) today reported net income for the quarter ended June 30, 1990, of $203,000, or 3 cents per share, as compared to the year-earlier quarter results of $2.1 million, or 32 cents per share.

The 1989 results included an after-tax gain of $2.4 million from sales of securities. The second quarter results compare favorably to the first quarter of 1990 when Ameribanc reported a loss of $3.1 million resulting from the recognition of losses on non-performing assets.

John J. Houseman noted: "Ameribanc continued its portfolio restructuring efforts during the quarter. The balance of foreclosed property decreased by $6.6 million between March 31 and June 30, 1990, resulting from the disposition of three major properties. We are continuing efforts to dispose of additional amounts of foreclosed property and non-earning assets."

The production of core earnings remains a primary goal of management.

Substantial improvements have been made in the net interest spread resulting in gains in net interest income (before the provision for losses) of 6.5 percent over the second quarter of 1989. Service charge income increased 23 percent over the same quarter of 1989. Ameribanc continued to benefit from its extensive mortgage banking operation, realizing a before-tax gain of approximately $900,000 from the sale of mortgage-servicing rights. Houseman noted that operating expenses declined by 7.8 percent as compared to the year-earlier quarter as a result of management's cost-cutting initiatives.

Due to the continued deterioration of the commercial real estate markets in the mid-Atlantic region, the level of non-performing assets increased to $86.1 million from $70.5 million as of March 31, 1990. In response to this increase, approximately $600,000 of write-downs were recognized in the second quarter to cushion against potential losses. Largely as a result of the increase in non-performing assets, the bank's risk-based capital ratio was 6.35 percent as of June 30, 1990, as compared to the required level of 6.4 percent. Ameribanc significantly exceeds the remaining two federally mandated capital requirements, with a tangible capital ratio of 3.1 percent compared to the requirement of 1.5 percent, and a core capital ratio of 4.5 percent compared to the requirement of 3 percent. Management expects the continuing restructuring efforts will result in full compliance with all capital requirements by year end.

Ameribanc Investors Group is the holding company for Ameribanc Savings Bank, a $1.4 billion bank headquartered in Annandale operating 36 branch offices in Northern Virginia, Hampton Roads and Charlottesville.

TWINSBURG, OHIO (JULY 24) PR NEWSWIRE - Revco D.S., Inc., today announced that the U.S. Bankruptcy Court in Akron, Ohio has granted a further extension, to Aug. 31, 1990, of the exclusive period within which only Revco can file a plan of reorganization.

The court also extended until Nov. 30, 1990, the time during which Revco has exclusive right to obtain acceptance of any plan it files.

Revco has been operating under Chapter 11 protection of the U.S. Bankruptcy Code since July 28, 1988.

"We believe today's action by the court reinforces the progress Revco is making toward gaining consensus for a reorganization plan," said Gregory K. Raven, chief financial officer. "We expect Revco to emerge from Chapter 11 as a strong, competitive, financially healthy company."

Revco, one of the nation's foremost drugstore chains, is a privately held company based in Twinsburg, Ohio.

#90205p8055 07/24/1990 ~PR Newswire

OAK BROOK, ILL. (JULY 24) PR NEWSWIRE - The L.E. Myers Co. Group (NYSE: MYR) today reported net income of $1,053,000 or $.41 per share for the three month period ended June 30, 1990. This compares with net income from continuing operations of $400,000 or $.15 per share for the comparable period of 1989.

Net income for the six months ended June 30, 1990 was $1,074,000 or $.42

per share versus $647,000 or $.24 per share from continuing operations last year.

Revenues for the quarter were $17,385,000 compared with $15,162,000 for 1989. Revenues for the six months were $31,118,000 compared to $29,343,000 for the prior year.

The company had net income from discontinued operations of $85,000 or $.03 per share for the quarter ended June 30, 1989.

The company's backlog at June 30, 1990 increased 17 percent to $26.0 million from $22.2 million at June 30, 1989. Substantially all of the current backlog will be completed within 12 months.

Commenting on the results, Charles M. Brennan, chairman and chief executive officer, said, "Revenues were up nicely in the quarter, resulting in good profits. Our backlog also improved. We continue to be optimistic on the outlook for our business over the foreseeable future."

Myers specializes in overhead and underground outdoor electrical construction. This includes construction and maintenance of transmission lines, distribution systems, substations, outdoor lighting and signal control systems for public investor owned electrical utilities, heavy industry and government facilities.

HANOVER, MD (JULY 24) PR NEWSWIRE - Crop Genetics International Corp. (NASDAQ: CROP) announced today the offering of 2.5 million shares of $0.95 convertible exchangeable preferred stock.

In addition, the company has granted the underwriters an option to purchase up to an additional 375,000 shares to cover over allotments, if any. The preferred stock is convertible into common stock of Crop Genetics at the option of the holder at any time at an initial conversion price of

$7.80, and is redeemable by the company after June 1993. The shares will be traded on the NASDAQ National Market System under the symbol CROPP. Lehman Brothers, a division of Shearson Lehman Hutton Inc. and Piper, Jaffray & Hopwood Inc. are managing the group of underwriters for the offering.

Proceeds of the offering will be used to finance continued research and development and commercialization of the company's InCide and X-tend crop protection systems. The InCide vaccine systems are designed to provide consistent, season-long protection from targeted insects or fungi without the need to spray chemical pesticides. Crop's first InCide product, currently under development, is a corn plant vaccine to protect against the European corn borer, the cause of approximately $500 million of damage annually to corn crops in the United States. The company's X-tend weed control systems are being designed to reduce significantly the use of chemical herbicides, a major cause of environmental hazards including groundwater contamination.

This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such state.

CINCINNATI (JULY 24) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) today reported 1990 second quarter net income of $26.1 million, or $.40 per share, compared with 1989 second quarter net income of $26.9 million, or $.38 per share. The increase in earnings per share occurred despite a slight reduction in net income, as a result of fewer average shares outstanding during the 1990 second quarter. Net revenues for the 1990 second quarter increased to $554.5 million from $444.2 million in the 1989 second quarter.

Penn Central's net income is computed after a deduction in lieu of current Federal income tax, because income that would otherwise be taxable is offset by pre-reorganization loss carryforwards. This deduction is not accruable or payable. The company's second quarter 1990 income before this deduction was $38.8 million, or $.60 per share.

Net income for the first six months of 1990 was $51.1 million, or $.79 per

share. For the 1989 first half, income before a gain on the disposition of foreign wire and cable manufacturing operations was also $51.1 million, and earnings per share before the gain was $.73. Including this gain, net income for the first half of 1989 totaled $119.6 million, or $1.69 per share.

Penn Central ended the second quarter of 1990 with shareholders' equity of $1.8 billion, or $28.70 per share.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services, insurance and energy.

#90205p8069 07/24/1990 ~PR Newswire

DENVER (JULY 24) PR NEWSWIRE - An aggressive waste minimization program at Martin Marietta Astronautics Group has resulted in a 55 percent reduction in toxic chemical releases from its Waterton manufacturing facilities in Jefferson County.

The reductions, as reported to the Environmental Protection Agency this month, occurred over a period from 1987 through 1989. The company continues to look for substitutes for the remaining toxic chemicals it uses, with a goal of reducing total releases by 95 percent by 1992, company officials said.

"Our releases are down as a direct result of an active waste reduction program and efforts to teach employees to properly handle and manage toxic chemicals," said Robert McMullen, director of environmental management. "By increasing employees' understanding of the negative impact these chemicals can have on our environment, we have been able to implement a waste management program that works because it has the support of the employees."

The group has implemented, or plans to implement, 30 different waste minimization projects ranging from process modification to material substitution and recycle and reuse. One important project was to substitute a water-based degreaser for trichloroethane.

The greatest reductions have been in the emission of sodium hydroxide, or caustic soda, according to Kevin Dykema, staff environmental engineer. "We have reduced releases of sodium hydroxide by more than 326 tons by changing the processes in our chemical milling operations that generate the waste," Dykema said.

Sodium hydroxide, which is used for etching aluminum in the manufacture of

Titan launch vehicles, was the first chemical targeted for reduction by Martin Marietta because it was the largest component of the company's waste in the base year of 1987. It is chemically comparable to drain cleaner used in the home.

Martin Marietta recently announced that it has joined several other Colorado companies, regulatory agencies, and public interest groups in a consortium called Pollution Prevention Partnership whose purpose is to reduce pollution in Colorado. The group will provide technical information exchange for both large and small businesses.

RIDGEFIELD, NJ (JULY 24) PR NEWSWIRE - Sentex Sensing Technology, Inc. (NASDAQ: SENS) a manufacturer of automated devices which detect hazardous and explosive vapors announced today the unaudited results of operation for the fiscal six months ended May 31, 1990.

Revenues rose 40 percent to $1,046,375 from $740,789 for the comparative period in the prior fiscal year. This increase was attributable to a significant increase in product sales to $961,040 as of May 31, 1990 as compared to $653,931 for the prior fiscal year.

Net income also increased significantly to $229,365 from $53,979 for the comparative period one year earlier. With 74,527,081 shares outstanding, per share income is insignificant.

Total company assets stand at $3,253,653 with approximately $2,500,000 in cash or short-term investments. Current liabilities, as of May 31, 1990, were $260,136 with no long term debt.

DAYTONA BEACH, FL (JULY 24) PR NEWSWIRE - Pan Am Express is expanding its services in Florida Sept. 1, with the inauguration of three daily flights from Miami to Daytona Beach Regional Airport, William R. Lange, president of Pan Am Express, announced today.

"Pan Am Express is pleased to be expanding its route network to Daytona Beach," Lange said in a news conference at Daytona Beach Regional Airport today. "Anyone in the Daytona Beach area now has one-stop service to 32 destinations in Europe, South America and the Caribbean, and 13 destinations in the United States. In turn, travelers from overseas will be able to make convenient connections in Miami to Daytona Beach."

In addition, the inauguration of Daytona Beach service opens up "a vital air link between north and south Florida," Lange pointed out. Pan Am Express has tentatively scheduled three daily departures from Daytona Beach to Miami, with the first flight at 9:15 a.m. and subsequent flights at 2:45 p.m. and 7:30 p.m. Miami to Daytona Beach flights begin at 7 a.m., with two more departures at 12:30 p.m. and 5:15 p.m.

Pan Am Express, a subsidiary of Pan Am Corporation (NYSE: PN), began its Florida service only ten weeks ago with service between Miami and Key West Ft. Myers, Sarasota/Bradenton, Melbourne and West Palm Beach. The airline is expected to announce further additions to its Florida schedule in the near future, Lange noted.

With the addition of the three daily departures from Daytona Beach Regional Airport, Pan Am Express will operate 28 departures in Florida, including six from Key West, five from Sarasota/Bradenton, five from Ft. Myers, six from West Palm Beach and three from Melbourne.

#90205p8076 07/24/1990 ~PR Newswire

NEW YORK (JULY 24) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today reported estimated earnings for the second quarter of 1990 of $498 million. This was $97 million, or 24 percent higher than the $401 million earned in the second quarter of 1989. The second quarter of 1990

included benefits of $182 million from the previously announced sale of a 5 percent interest in the North Sea U.K. Beryl field and the sale of Mobil's refining and fuels marketing business in Italy. Partially offsetting these benefits was a provision of $112 million for future environmental cleanup costs at certain U.S. locations. The second quarter of 1989 included a $140 million loss on the sale of business operations in Southern Africa. Estimated earnings per common share were $1.19, compared with the 98 cents earned in the second quarter of 1989. Second-quarter 1990 revenues were $13.8 billion, vs. $14 billion for the same period last year.

For the first half of 1990, Mobil's estimated earnings were $898 million. This was $68 million, or 8 percent, higher than the $830 million earned in the first half of 1989. In addition to the special items noted above for the second quarter, the first half of 1990 included a prior-period tax charge in international marketing and refining of $28 million. Excluding the effects of special items in both period, first-half earnings of $856 million were down $114 million from the level reported in the first half of 1989. The decrease reflected lower chemical earnings due to the worldwide decline in petrochemical prices, partially offset by improvements in petroleum operations mainly due to higher margins in international marketing and refining. Estimated earnings per common share were $2.13 compared with the $2.02 earned in the first half of 1989. First-half revenues were $28.9 billion, vs. $28.1 billion for the same period last year.

In commenting on the second-quarter results, Chairman Allen E. Murray said that, excluding the effects of the special items noted above, petroleum operations at $475 million were slightly lower than the year before; stronger refining margins, which improved the downstream results, were not sufficient to offset the sharply lower crude oil prices which depressed exploration and producing results. Chemical continued to report lower earnings as a result of lower petrochemical margins vs. the exceptionally high level in the year-earlier period.

Murray further noted that in the important area of the environment, the financial provision reflected Mobil's continuing review and commitment to safeguard the environment in which it operates. In meeting that commitment Mobil has provided for costs associated with environmental remediation programs in the United States, principally at marketing and refining facilities, where a cleanup requirement has been established and where the future costs can be reasonably estimated.

Comparison of Second-Quarter Earnings with 1989 Addressing the performance of each of the major business segments during the second quarter, Murray made the following points:

-- Exploration and producing earnings of $270 million were $4 million

lower than in the second quarter of 1989.

In the United States, results were lower by $124 million reflecting lower crude oil and natural gas prices, down 16 percent and 3 percent, respectively, from those that prevailed last year. Lower gas volumes reflected the continued sale of less attractive properties as well as anticipated improvement in market conditions in the future. The effect of the lower prices and volumes was partially offset by operating expense savings due to restructuring and downsizing. The second quarter of 1990 included a provision of $22 million for future environmental cleanup costs at Mobil-operated producing locations.

International income of $320 million was $120 million higher than last year. The increase primarily reflected the $138 million gain on the sale of a 5 percent interest in the Beryl field and higher gas volumes in Indonesia and Germany. These benefits were partially offset by a $2.22 per barrel lower crude oil price, and increased new venture exploration activity.

-- Marketing and refining earnings of $278 million were $199 million higher than last year.

In the United States, income of $58 million was down $44 million from the $102 million earned in the second quarter of 1989. Excluding an $87 million provision for future environmental cleanup costs, principally at service stations, earnings improved $43 million mainly due to higher refining margins, somewhat offset by a higher level of scheduled refinery turnarounds.

International earnings of $220 million were up $243 million. The second quarter of 1990 benefited from a $44 million gain on the sale of Mobil's refining and fuels marketing business in Italy. The second quarter of 1989 included a $140 million loss on the sale of its business operations in Southern Africa. Excluding these items, earnings increased $59 million, primarily in Europe and the Pacific Rim countries. This reflected higher refining margins, improved refinery utilization, better market conditions in Australia, and the benefit of cost containment/restructuring programs.

JENKINTOWN, PA (JULY 24) PR NEWSWIRE - Flagship Financial Corp.'s (NASDAQ-NMS: FLGF) board of directors announced today that it had voted to opt-out of the control share provision of Act 36 of 1990, the recently enacted amendment to Pennsylvania's Business Corporation Law.

Act 36, which was passed in April, strengthens and broadens existing anti-takeover legislation for Pennsylvania corporations. Under the law, each Pennsylvania corporation has the right to opt-out of certain of the provisions, provided that it does so by July 26, 1990.

Flagship Financial's board voted to opt-out of the control share acquisition provision, which, if adopted, would have limited the voting rights of stockholders who purchase or acquire the voting power of at least 20 percent of the company's common stock, under certain conditions.

Commenting on the decision, Frank P. Felton 3rd, chairman and chief executive officer of Flagship, said, "Serving stockholders remains our highest priority. We believe that the control share provision of Act 36 is unnecessary and clearly not in the interest of our stockholders."

The board of directors voted to retain two provisions relating to directors' fiduciary responsibilities toward stockholders and the

disgorgement of trading profits for an acquirer of 20 percent or more of the company's common stock.

"These provisions merely confirm and support the board's existing philosophy regarding their fiduciary responsibilities to the company's stakeholders and our opposition to investors who would attempt to leverage their positions through 'greenmail' tactics. By retaining these legal protections, we believe that all stockholders' interests will be better served," said Felton.

Flagship Financial, which ranks among the 10 largest publicly traded thrift institutions in Pennsylvania, conducts business through its wholly owned subsidiaries, First American Savings and Brandywine Savings Bank. First American operates 12 full-service and six "convenience" branches in Pennsylvania and New Jersey. Brandywine Savings operates nine full-service branches in Chester County, Pa. The common stock of Flagship Financial is traded on the NASDAQ National Market System under the symbol FLGF.

NEWTOWN, PA (JULY 24) PR NEWSWIRE - SPS Technologies (NYSE: ST) today announced that its board of directors has acted to opt out of the Control Share Acquisition provisions and the Disgorgement provisions of the new Pennsylvania Anti-Takeover Law.

The company stated that its by-laws contain what is known as a "supermajority" business combination provision. Under the by-laws, the affirmative vote of at least 80 percent of the outstanding shares is required to approve transactions regarding the merger of the company or the sale of substantially all of its assets. The company also has a Shareholders Rights Plan. SPS Technologies said it believes that these deterrent provisions, already in place, adequately protect it against unfriendly takeovers.

SPS Technologies is a global manufacturer and marketer of aerospace and industrial fasteners and precision components, tightening equipment and special materials for industry.

STILLWATER, Minn. (JULY 24) PR NEWSWIRE - INCSTAR Corp. (AMEX: ISR) reported today that strong sales from its core product line and new products added by a recent merger have generated sharp increases in revenues and earnings. For the second quarter ended June 30, net earnings increased to $693,000, compared with a loss of $92,000, for the same period last year. Sales rose 39 percent to $6,585,000 from $4,738,000.

On a per-share basis, net income increased to 5 cents versus a loss of 3 cents last year. The weighted average number of shares outstanding at

June 30 increased to 14.6 million from 3.1 million a year ago as a result of the merger with Clinical Sciences Inc. in December 1989.

"As we combine our product lines, sales are continuing at an excellent pace, both domestically and internationally," said Orwin L. Carter, Ph.D., president and chief executive officer. "At the same time, our profitability has been very strong. Income before extraordinary items increased nearly fivefold during the quarter."

Income before extraordinary items was $467,000, compared with $96,000 last year. INCSTAR realized a tax benefit of $226,000 from the utilization of net operating loss carryforwards, primarily related to the Clincial Sciences' merger. The comparable quarterly period in 1989 included an extraordinary charge of $188,000 for early retirement of debt.

For the six months, INCSTAR reported net income of $1,252,000, or 9 cents per share, versus a loss of $149,000, or 5 cents per share, in the comparable period last year. Sales increased 35 percent to $13,025,000 from $9,646,000.

INCSTAR realized a tax benefit of $411,000 for the six months for the utilization of net operating loss carryforwards, while in the comparable 1989 period, the company had an extraordinary charge of $509,000 for early retirement of debt.

Leading the sales gains were INCSTAR's therapeutic drug monitoring kits -- CYCLO-trac and EPO-trac -- hepatitis kits, test kits assessing bone and mineral metabolism, and Clinical Sciences' line of enzyme-based assays.

"The transition period of combining our two sales forces in the United States has gone very well; in fact, even better than we had hoped," Carter said. "We have been able to deepen our penetration by selling more products to existing customers and by reaching new customers."

Carter noted that second-quarter domestic core line product sales were up 27 percent over the same period last year, and sales of Clinical Sciences' products -- which were not reflected in last year's totals -- were up 35 percent for the quarter.

In Europe, which during the 1989 fiscal period accounted for 40 percent of INCSTAR's sales, distribution is still in a transition phase. INCSTAR, a 51 percent owned subsidiary of Bioengineering International, B.V., an affiliate of the FIAT Group, entered into distribution and technology agreements last December with Sorin Biomedica S.p.A. another FIAT company. Under the agreements, Sorin, a European leader in immunodiagnostics, is distributing INCSTAR products in Italy, Spain, Portugal, West Germany and the Benelux countries.

"Sorin is now distributing products for us in all of those countries, with Italy being the last to change over in May," Carter said. "Despite that transition period, our European sales were up approximately 30 percent for the six months, compared with the same period last year."

Carter also noted that INCSTAR has now completed the expansion and renovation of its manufacturing facility in Stillwater, and by June, all Clinical Sciences' production had been transferred there from New Jersey. Last summer, production from INCSTAR's Atlantic Antibodies subsidiary was transferred from Maine to Minnesota. Reflecting a better utilization of the expanded facility, gross margin for the second quarter was 66 percent, continuing a steady improvement from recent quarters.

INCSTAR, and its affiliate Sorin Biomedica, announce last week that they had signed a letter of intent with Baxter Healthcare Corporation to form a strategic alliance involving the manufacture and distribution of radioimmunoassay (RIA) diagnostic test kits and related products. Beginning in the first quarter of 1991, INCSTAR would manufacture the Clinical Assays (TM) products currently manufactured by Baxter, with exclusive sales and marketing rights in the United States, Canada and the United Kingdom. The alliance would expand INCSTAR's worldwide distribution and technology base with a leadership in major RIA markets.

INCSTAR Corp., based in Stillwater, Minn., a suburb of St. Paul, manufactures and markets immunodiagnostic test kits, reagents for the detection of metabolic diseases, infectious diseases, sexually transmitted diseases, and diseases of the immune system; and related products used by major hospitals, clinical reference laboratories and researchers. INCSTAR is a 51 percent-owned subsidiary of Bioengineering International B.V., an affiliate of the FIAT Group of companies (NYSE: FIA). INCSTAR's common stock is traded on the American Stock Exchange under the symbol: ISR.

ATLANTA (JULY 24) PR NEWSWIRE - Flakt Inc. announced that its ABB Environmental Systems unit in Norwalk, Conn., has signed a $115 million contract to provide a complete turnkey wet flue gas desulfurization (FGD) system for Taiwan Power Co.'s Lin Kou station near Taipei, Taiwan.

The contract calls for the retrofit of two 350 mw generating units and includes design and installation of the FGD system, plus auxiliary systems for material handling, water treatment and production of commercial-grade gypsum by-product for building material use. The contract also calls for Flakt to handle site preparation, demolition of existing structures, relocation of equipment, foundations, controls and fans.

Upon completion, the Lin Kou station will achieve a 90 percent reduction in SO2 emissions and provide secondary particulate cleanup to supplement the plant's existing precipitators.

Working closely with Flakt Inc. in winning the contract was Flakt Gadelius' Taiwan office, which will continue to provide services and support the project. Flakt's Norwalk, Conn., office will handle design, engineering and construction management through a branch office in Taipei.

Atlanta-based Flakt Inc. is the U.S. operation of the $2.8 billion Flakt Group, and through seven divisions serves the textile, pulp and paper, surface finishing, electric utility, furniture and tobacco industries.

Flakt is a member of the Asea Brown Boveri Group.

HOUSTON (JULY 24) PR NEWSWIRE - Galveston-Houston Co. (NYSE: GHX) announced today that it has signed a letter of intent for the acquisition of Erichsen Industries Ltd. of Edmonton, Alberta, Canada.

Erichsen Industries Ltd. is a leading manufacturer of gas over oil linear and quarter turn valve actuators and related control systems, principally used on oil, gas or product pipelines. Galveston-Houston Co., through its GH-Bettis subsidiary, is a worldwide market leader in the manufacture of pneumatic and hydraulic valve actuators for the energy and other industrial markets.

Galveston-Houston Co. Chairman, Nathan M. Avery, stated, "Erichsen has developed a strong reputation for performance, and their products perfectly complement our GH-Bettis line of actuators. We anticipate significant growth in sales to the pipeline market worldwide as we offer the Erichsen product through Bettis' well developed distribution network."

Galveston-Houston Co., through its operating subsidiaries, manufactures and markets products for the energy industries, including oil and gas production, and pipeline and processing operations, for construction and mining, and for numerous industrial applications.

HOUSTON (JULY 24) PR NEWSWIRE - Gamma Biologicals Inc. (AMEX: GBL), today reported net income of $401,000, or nine cents per share, on sales of $3,802,000 for the quarter ended June 30, 1990. These results compare with net income of $359,000, or eight cents per share, on sales of $4,768,000 for the same period last fiscal year.

"This was Gamma's first quarter after the sale of our Italian subsidiaries " said Chairman David E. Hatcher, "and we are pleased to report that earnings remained strong, as anticipated.

"Increased domestic reagent and paternity testing product sales, the elimination of subsidiary operating expenses, and lower net interest expense more than offset the earnings effect of losing the Italian subsidiaries' markup. Income taxes for the period were reduced by utilizing a net operating loss carryforward and eliminating foreign taxes."

Gamma Biologicals manufactures and markets a wide range of highly refined and specialized testing products, known as diagnostic reagents, as well as specialized instrument systems. Gamma markets to hospitals, blood banks, medical laboratories, physicians' offices and research institutions. The company's common stock began trading on the American Stock Exchange on June 8, 1990.

MANCHESTER, NH (JULY 24) PR NEWSWIRE - BankEast Corporation (NASDAQ: BENH) today reported a loss for the second quarter of $5,551,000, equal to a loss of 47 cents per share. This compares to a loss of $12,297,000 or a loss of $1.03 per share for the second quarter of 1989. The 1990 second quarter loss resulted primarily from a provision for potential loan losses totaling $5,770,000.

For the six months ended June 30, BankEast reported a loss of $8,614,000, equal to a loss of 72 cents per share. The loss for the first half of 1989 was $11,365,000 or 96 cents per share.

At June 30, 1990, non-performing loans (excluding restructured loans) totaled $52.6 million, down from $61.8 million at the end of the first quarter. However, non-performing assets, including non-performing loans, other real estate owned or in process of foreclosure, and restructured loans) totaled $81.5 million or 11.38 percent of total loans and other real estate owned, up from $78.9 million or 10.73 percent at the end of the first quarter. The company's current allowance for loan losses is $20,060,000, representing 2.88 percent of net loans and 31.8 percent of non-performing loans, including restructured loans. Net charge-offs for the quarter totaled $6.6 million and $10.6 million for the first six months.

"While major improvement in our bottom line depends to a significant degree on improvement in local real estate markets and other factors outside BankEast's control, we're properly focused on those areas we can directly impact," said W.N. DeWitt, chairman and chief executive officer of BankEast. "Top priorities involve expense control programs, continuing to achieve consolidations where appropriate, and paying close attention to working with customers to resolve their problem loans."

Despite increased costs associated with managing problem loans and other areas, non-interest expenses were 2 percent lower in the second quarter than for the same quarter in 1989. "This improvement reflects continuing progress in reducing staff levels through our efforts in consolidating some activities while eliminating others," said DeWitt. During the past year, staffing levels have been reduced by 12 percent, from 826 full-time associates in June 1989 to 727 at the end of June 1990. "Operating results have also been adversely affected by reduced net interest income resulting from higher levels of non-performing assets," DeWitt added.

Equity capital totaled 4.54 percent of total assets on June 30, compared to 5.05 percent at the end of the first quarter and 5.09 percent at the end of 1989. Primary capital at the end of the second quarter totaled 6.53 percent of total assets, compared to 7.08 percent on March 31, 1990 and 7.04 percent on Dec. 31, 1989.

BankEast Corporation is a New Hampshire-based holding company with $1 billion in assets.

NEW YORK, (JULY 24) PR NEWSWIRE - Dean Witter Reynolds Inc., Merrill Lynch Capital Markets and Raymond James & Associates, Inc., announced

today the initial public offering of 8,500,000 common shares of beneficial interest of Patriot Select Dividend Trust at a price of $15 per share. The trust has granted the underwriters an option to purchase up to an additional 1,275,000 shares to cover over-allotments, if any.

The net proceeds will be invested in accordance with the trust's investment objective and policies during a period estimated not to exceed 90 days from the completion of the offering. Pending such investment, the proceeds will be invested in short-term interest bearing and dividend-paying securities.

Patriot Select Dividend Trust, headquartered in Boston, is a newly organized closed-end diversified management investment company. The trust's investment objective is to provide high current income, consistent with modest growth of capital for holders of its common shares of beneficial interest.

LOS ANGELES (JULY 24) PR NEWSWIRE - The board of directors of Neutrogena Corp. (NASDAQ: NGNA) today adopted a Shareholder Rights Agreement aimed at protecting shareholders' interests and encouraging potential acquirors to negotiate with Neutrogena's board of directors. In conjunction with the agreement, the board declared a dividend distribution of one preferred share purchase right on each outstanding share of Neutrogena common stock.

The dividend distribution of the rights, which will initially be part of and not traded separately from the certificates representing the common stock, will be made on Aug. 6, 1990, to stockholders of record on that date.

Lloyd E. Cotsen, Neutrogena's chief executive officer, said, "The adoption of this rights agreement constitutes the most effective means currently available to protect the interests of our stockholders."

The rights, which are exercisable at the discretion of the board, can be triggered by certain levels of stock acquisition, tender offer or exchange offer situations. Each right entitles the holder (other than the acquiring person) to purchase one one-hundredth of a share of the new series of preferred stock at an exercise price of $80.00. In certain

circumstances, each right would entitle its holder (other than the acquiring person) to purchase Neutrogena common stock having a market value of twice the right's exercise price. Also, the rights could entitle a holder to purchase an acquiring company's common shares having a market value of twice the right's exercise price.

The board of directors may redeem all outstanding rights at a price of $.01 per right, except under certain circumstances. The rights expire, unless redeemed sooner, on July 23, 2000, and are not taxable to stockholders.

Neutrogena Corp., headquartered in Los Angeles, manufactures and sells high quality, premium priced specialty skin care and hair care products.

CHICAGO (JULY 24) PR NEWSWIRE - Edward L. Moyers, president and chief executive officer of Illinois Central Corporation, has been elected to the additional position of chairman of the board of directors, succeeding W. Wallace McDowell, Jr.

The board of directors also elected two new members, George D. Gould and John V. Tunney, to succeed McDowell and John J. McAtee, Jr., who also resigned. McDowell and John J. McAtee, Jr., who also resigned. McDowell is the former chairman of The Prospect Group, Inc., the company that acquired Illinois Central in 1989, and McAtee, formerly a partner of the Davis Polk & Wardwell law firm which represented Prospect in the Illinois Central transaction, has joined Smith Barney, Harris Upham & Co. as vice chairman in charge of investment banking.

In addition, the board elected Gilbert H. Lamphere chairman of the newly created executive committee. Lamphere, a director of the company, is chairman, president and chief executive officer of Prospect Group.

Gould, former undersecretary for finance in the Treasury Department during the Reagan administration, is vice chairman of Klingenstein, Fields & Co., L.P. Tunney, a former U.S. senator from California, is chairman of Cloverleaf Group, Inc.

Moyers, commenting on the service of McDowell, said, "Wally McDowell has provided exceptional leadership for Illinois Central in the past 16 months and has played a major role in the company's success. I am personally grateful for the opportunity to work with him at Illinois Central and previously at MidSouth Corporation."

Moyers, who is 61, began this railroad career 45 years ago as a section foreman and track inspector for the Illinois Central. He rose through the superintendency ranks until he moved to the Peoria and Pekin Railroad as vice president for operations and marketing in 1977. In 1986 he became president and chief executive officer of the newly formed MidSouth Corporation, the railroad company with headquarters in Jackson, Miss., that was financed by The Prospect Group. In March 1989, he resigned his position with MidSouth to become the chief executive of Illinois Central.

Illinois Central Corporation is the holding company for a 2,900-mile freight railroad serving the central part of the nation between the Great Lakes and the Gulf of Mexico.

#90205p8118 07/24/1990 ~PR Newswire

MILWAUKEE (JULY 24) PR NEWSWIRE - The Board of Directors of WICOR, Inc. (NYSE: WIC) voted today to increase the quarterly dividend on common stock from 35 cents to 36 cents per share. The new annual rate is $1.44.

"The increase reflects the long-term strength of the company and our commitment to providing a steady return to our shareholders," said Stuart W. Tisdale, WICOR's president and chief executive officer. WICOR is the parent company of Wisconsin Gas Company and Sta-Rite Industries, Inc. Dividends at the new rate are payable Aug. 31, 1990, to shareholders of record Aug. 10, 1990.

Tisdale said that although the overall outlook and financial position of both Wisconsin Gas and Sta-Rite Industries remain strong, results for the second quarter were off from last year's performance. He said weather and economic factors had prevented WICOR from meeting second-quarter expectations this year.

Earnings for the quarter were $0.8 million, compared with $2.2 million for the same period last year. Per-share earnings for the quarter were 6 cents vs. 16 cents a year ago. Operating revenues were $151.4 million this quarter; in the second quarter of 1989, they were $152.7 million.

A combination of factors dampened results at Sta-Rate Industries, WICOR's international manufacturing subsidiary. Tisdale said key markets had performed well during the first quarter but then softened. He cited a nationwide decline in housing starts, weakened consumer spending, water restrictions in California and the Southwest that hurt the pool business, and tight economic conditions in Australia and Canada. In addition, Tisdale said Sta-Rite is continuing a planned reduction in inventories,

which improved cash flow but lowered earnings. As a result, Sta-Rite posted second-quarter earnings of $2.2 million, compared with $3.3 million for the same period last year. Sta-Rite's operating revenues were $70.9 million this quarter vs. $73.5 million in the second quarter of 1989.

WICOR is a Milwaukee-based holding company. Its primary subsidiaries are Wisconsin Gas Company, the state's largest natural gas distributor, and Sta-Rite Industries, a manufacturer of pumps and other fluids-handling equipment and controls.

MIAMI (JULY 24) PR NEWSWIRE - Ryder System, Inc. (NYSE: R) recorded essentially flat revenue and earnings in the second quarter of 1990 compared with the same period a year ago, it was announced today by Chairman, President and Chief Executive Officer M. Anthony Burns.

Revenue in the second quarter was $1.3 billion, the same as 1989's second quarter. Net earnings were $32.2 million, compared with $32.5 million in 1989's second quarter. Earnings per share were $0.39, compared with $0.40 a year ago.

For the six months ended June 30, 1990, revenue was $2.6 billion, compared with $2.5 billion in the corresponding period last year. Net earnings were $39.4 million, compared with $58.7 million in last year's first half. Earnings per share were $0.45, compared with $0.70 in the first six months of 1989.

OPERATIONS In the Vehicle Leasing & Services Division, increased sales and new accounts helped strengthen the performance of full-service truck leasing and dedicated contract carriage.

Consumer truck rental recorded more transactions and higher revenue than in last year's second quarter. The reduction in the commercial truck rental fleet has resulted in better utilization, but the product line remains weak, reflecting the nation's stagnant economy.

The Automotive Carrier Division exceeded expectations in the quarter, showing reasonably good performance despite reduced automotive production and transporting vehicles shorter distances. Both revenue and earnings were somewhat lower than a year ago. However, rate relief recently obtained from several manufacturers to recover increased costs will benefit the division when automotive production increases.

In the company's aviation businesses, engine overhaul activities in both the Airline Services Division and the General Aviation Services Division recorded major gains. Prestwick, Scotland-based Caledonian Airmotive experienced record profits during the quarter. However, these gains were partially offset by poor results in the Aviation Leasing & Services Division, which were impaired by a number of aircraft being off lease and continued softness in rotable aircraft parts sales. The company has announced its intention to substantially curtail its investment in aircraft leasing.

LOS ANGELES (JULY 24) PR NEWSWIRE - Irving Azoff, owner of the Azoff Entertainment Co., and Robert Geddes, chairman of Eric/Chandler Ltd. and one of the original principals of Irvine Meadows, have announced that they have acquired a substantial interest in the Irvine Meadows Amphitheatre for an undisclosed amount. Original owner and developer Donald Koll will continue ownership in the venue. Azoff and Geddes will jointly oversee management and operations of the facility while Avalon Attractions and its principal, Brian Murphy, will continue to book and promote the venue's attractions.

The Irvine Amphitheatre opened in 1981, and has featured concerts and events from such superstars as Michael Jackson, George Michael, Bon Jovi, Anita Baker, Whitney Houston, Frank Sinatra and Bill Cosby. The Amphitheatre has a capacity of 15,000 seats including 10,400 reserved and 4,600 in a lawn area.

In a joint statement, Azoff and Geddes commented, "We're extremely excited to be involved with this showcase facility of the Southland and to work with Donald Koll. We look forward to continuing the tradition of the Irvine Meadows Amphitheatre by providing the area with top names in entertainment and maintaining its state-of-the art status for the '90s."

Koll stated, "With Irving and Bob at the helm, I anticipate many more years of successful operation at Irvine and look forward to working with both of them. I'm certain their contributions to the amphitheatre will be unparalleled."

Azoff was previously the chairman of the MCA Music Entertainment Group and founded Front Line Management whose clients included the Eagles, Dan Fogelberg, Steely Dan, Chicago, Boz Scaggs, Stevie Nicks and Jimmy Buffett.

PRINCETON, NJ (JULY 24) PR NEWSWIRE - Dr. William F. Miller, chairman of the board of directors of the David Sarnoff Research Center and president and chief executive officer of SRI International, today announced Dr. James E. Carnes as president elect of the David Sarnoff Research Center, a subsidiary of SRI International, effective Dec. 1, 1990. He was previously vice president-consumer electronics and information sciences at the center.

Carnes will replace Dr. James J. Tietjen, who has been named president and chief executive officer of SRI International, effective Dec. 1, 1990. Simultaneously, George Keller, chairman of the board of the parent organization, also announced that Carnes will become a senior vice president of SRI International.

"Dr. Carnes has been a critical factor," said Miller, "in helping the David Sarnoff Research Center make the transition from being a corporate laboratory into a world class contract research organization."

Tietjen, who has headed the David Sarnoff Research Center since its acquisition by SRI in 1987, said, "Jim Carnes, in addition to being a first class scientist, is a skilled manager and leader. The board feels that Dr. Carnes will assure the quality of technology and service to clients that is mandatory in the global high technology competition that will occur in the 1990s."

Carnes joined RCA Laboratories in 1969 as a member of the technical staff at the David Sarnoff Research Center, where he worked in the area of MOS device structure, particularly CCD technology and applications.

In 1977 he transferred to RCA's consumer electronics division in Indianapolis, where he held a variety of management positions in integrated circuit design and development and TV advanced development. In 1982, he was appointed division vice president-engineering at the consumer electronics division.

Carnes holds nine U.S. patents and is the author of numerous technical papers. In 1981 he was a recipient of the David Sarnoff Award for Outstanding Technical Achievement "for the development and implementation of a CCD comb filter integrated circuit in color television receivers."

A native of Hagerstown, Md., Carnes received a B.S. degree in engineering science from the Pennsylvania State University in 1961. In 1970, after serving four years in the U.S. Navy, he earned a Ph.D. degree in electron device physics from Princeton University.

A Fellow of the Institute of Electrical and Electronics Engineers, he received the IEEE Centennial Medal in 1984. He is listed in "American Men and Women in Science and Engineering" and "Who's Who in America."

Carnes will be located at the David Sarnoff Research Center in Princeton.

LONDON (JULY 24) PR NEWSWIRE - BTR plc today announced an agreement between its wholly owned U.S. subsidiary, BTR Inc., and Canada-based Ivaco Inc. for the purchase of Niagara Lockport Industries Quebec Inc. and Niagara Lockport Industries Inc. ("Niagara Lockport"), two wholly owned subsidiaries of Ivaco, for a cash consideration of approximately $130 million Canadian (US $112 million). Niagara Lockport's net assets amount to approximately $110 million Canadian (US $94 million).

Niagara Lockport, which will join the BTR Paper Group, is a leading manufacturer in North America of paper machine clothing. Paper machine clothing is a custom-engineered forming, pressing and drying medium that transforms pulp slurry into finished paper.

Bob Faircloth, executive director of BTR plc, stated, "This acquisition furthers BTR's goal of building the technological and marketing capabilities of our core businesses. We continue to view the North American marketplace as providing BTR with attractive long-term opportunities for investment and growth."

John Thompson, group chief executive of the BTR Paper Group, based in Wellesley, Mass., stated, "Niagara Lockport's equipment, technology and people are world class and will complement and strengthen our paper group operations."

Niagara Lockport has five manufacturing plants in the United States and Canada, producing wet felt and forming fabrics in Starkville, Miss. and Quincy, Fla.; and wet felt, forming fabrics and dryer fabrics in three locations in Quebec: Lachute, Warwick and Trois Rivieres.

The agreement is subject to the completion of definitive stock purchase agreements, as well as approval from Investment Canada, which examines foreign investment in Canada, and the Canadian and U.S. competition and antitrust authorities.

Ivaco Inc. is a Canada-based manufacturer. The BTR Paper Group has 24

operating companies, with manufacturing facilities in 15 countries. BTR plc is a London-based global corporation that comprises more than 500 companies operating in five major business sectors: industrial, control systems and electrical, construction, transportation and consumer-related.

CONTACT: Contact: Bob Faircloth, 011-44-734-773122, or John Thompson, 617-237-1980, both of BTR, or Richard Cendo of Kekst and Company, 212-593-2655, for BTR.

MIAMI (JULY 24) PR NEWSWIRE - Ryder System, Inc. (NYSE: R) recorded essentially flat revenue and earnings in the second quarter of 1990 compared with the same period a year ago, it was announced today by Chairman, President and Chief Executive Officer M. Anthony Burns.

"Lower gains on the sale of vehicles in the Vehicle Leasing & Services Division and a less favorable income tax rate adversely affected the quarter's performance," Burns said, "but we are bending a four-quarter trend of earnings decreases. Our improved earnings comparisons relative to previous quarters indicate that our profit improvement plan is producing results. In fact, our pretax earnings in the second quarter were higher than in the 1989 quarter -- $54.6 million compared with $53.2 million."

Revenue in the second quarter was $1.3 billion, the same as 1989's second quarter. Net earnings were $32.2 million, compared with $32.5 million in 1989's second quarter. Earnings per share were $0.39, compared with $0.40 a year ago.

For the six months ended June 30, 1990, revenue was $2.6 billion, compared with $2.5 billion in the corresponding period last year. Net earnings were $39.4 million, compared with $58.7 million in last year's first half. Earnings per share were $0.45, compared with $0.70 in the first six months of 1989.

"During the remainder of the year," said Burns, "we will continue to focus on our seven-point profit improvement plan which includes reviewing all of our businesses for strategic fit and profitability; reviewing assets and improving asset utilization; reducing the cost of capital; reducing overhead costs; reducing capital expenditures and allocating capital first to our most profitable businesses; tightening our acquisition policy; and continuing to market and sell aggressively."

OPERATIONS In the Vehicle Leasing & Services Division, increased sales and new accounts helped strengthen the performance of full-service truck leasing and dedicated contract carriage.

Consumer truck rental recorded more transactions and higher revenue than in last year's second quarter. The reduction in the commercial truck rental fleet has resulted in better utilization, but the product line remains weak, reflecting the nation's stagnant economy.

The Automotive Carrier Division exceeded expectations in the quarter, showing reasonably good performance despite reduced automotive production and transporting vehicles shorter distances. Both revenue and earnings were somewhat lower than a year ago. However, rate relief recently obtained from several manufacturers to recover increased costs will benefit the division when automotive production increases.

In the company's aviation businesses, engine overhaul activities in both the Airline Services Division and the General Aviation Services Division recorded major gains. Prestwick, Scotland-based Caledonian Airmotive experienced record profits during the quarter. However, these gains were partially offset by poor results in the Aviation Leasing & Services Division, which were impaired by a number of aircraft being off lease and continued softness in rotable aircraft parts sales. The company has announced its intention to substantially curtail its investment in aircraft leasing.

WOODBURY, NY (JULY 24) PR NEWSWIRE - Millfeld Trading Company, Inc. (NASDAQ: SHOE SHOEU SHOEW) announced that holders of the company's warrants may begin exercise of their warrants immediately. Upon exercise of the warrant and the payment of the $6.00 exercise price, warrant holders will receive one share of the company's common stock. In addition, warrantholders who exercise their warrants prior to Aug. 31, 1990 will also receive an additional warrant to purchase one share of its common stock at a price of $12.50 for a period of two years ending July 22, 1992. The new warrants are redeemable by the company at a price of ten cents per warrant on thirty days prior notice to warrantholders. Whale Securities Co., L.P. acts as the company's warrant solicitation agent.

Barry Feldstein, president of Millfeld, said he believes that expansion of the company will be greatly enhanced by the additional capital expected to be received by the company as a result of the exercise of the warrants.

Millfeld and its wholly owned subsidiary, Bright Star Footwear Products, markets men's women's and children's footwear to more than 14,000 outlets of major retailers and mass merchandisers. The company also distributes the "No Excuses" shoe line and Team Sports Footwear featuring 128 logos of NFL, NHL and NCAA college teams.

WASHINGTON (JULY 24) PR NEWSWIRE - British Aerospace has expanded its presence in Latin America with an order for two BAe 146-200 regional jetliners from a Mexican airline, Aviacion de Chiapas (AVIACSA).

Delivery of the aircraft, scheduled for August and December of this year, will constitute the carrier's first jet aircraft. The aircraft will operate in a (five-abreast) layout capable of accommodating (90) passengers.

Based in Tustla Gutierrez, the state capital of Chiapas, the 146 fleet will serve Mexico City, Tapachula, Minantlan and Oaxaca. Operating from the city's downtown airport, Francisco Sarabia, the route network takes

advantage of the 146's ability to serve communities in remote or confined areas with excellent short field performance capabilities.

The order from AVIACSA marks BAe's second 146 customer in Latin America, following an order for three of the aircraft from LanChile over the past year.

"The order from AVIACSA endorses our growing emphasis and confidence in the Latin American market," said Brian Thomas, president of BAe, Inc. "This order further demonstrates the versatility of the 146 in diverse and demanding environments."

"For AVIACSA, the selection of the BAe 146 has been a very important decision, since it represents the first jet equipment in the airline," said Capts. Luis de Pau and Francisco Espejel, president and director general, respectively, of the airline. "The BAe 146 will make it possible to provide the service demanded by the south and southeast of Mexico with jet equipment for the first time, besides enabling operation from Aeropuerto Francisco Sarabia of Tustla Gutierrez, which will result in the noticeable improvement in the service and comfort of our passengers " they added.

Powered by Textron Lycoming ALF502 turbofan engines, the 146 is renowned as the world's quietest jetliner. To date, there have been over 186 orders for the aircraft from 35 customers worldwide.

#90205p8137 07/24/1990 ~PR Newswire

CHICAGO (JULY 24) PR NEWSWIRE - Federal District Court Judge Charles R. Norgle in Chicago today ordered Amoco Corporation to pay $160 million to the victims of the massive Amoco Cadiz oil spill, which flooded the shores of Brittany, on the northwest coast of France, with more than 68 million gallons of oil in March of 1978.

The multinational oil company, owner of the 220,000-ton Amoco Cadiz, which broke up off the Brittany coast, was found guilty of gross negligence in the maintenance of the supertanker.

"This is the first conviction of a leading oil company in connection with a major oil spill, and it is a victory for the people of Brittany," said J.-B. Henry, spokesman for the so-called Cote du Nord parties, the local governments and businesses of Brittany that are plaintiffs in the suit.

"Unlike Exxon, which has already spent over $2 billion toward the clean-up of 11 million gallons spilled in Alaska last year, Amoco has not yet paid

its first dollar to those who suffered from the six-times- larger 'black tide' that resulted from its negligence," Henry said.

Instead of offering to pay the award promptly in order to end 12 years of litigation, Amoco announced on June 18, at the time of the judgment, that it intended to appeal, Henry said. The case has already been reviewed by two District Court judges -- the first, Judge Frank McGarr, who presided over the case and the liability decision in April 1984 and the initial ruling on damages in January 1988, and the second, Judge Norgle, who reviewed Judge McGarr's decision and issued the judgment on June 18 and today's order.

CONTACT: Peter Verrengia or Oscar Lee of Fleishman Hillard, 212-265-9150; or Jean-Baptiste Henry, in France, 011-33-96-92-2850, all for Cote du Nord parties

LAKEWOOD, CO (JULY 24) PR NEWSWIRE - Plains Petroleum Co. (NYSE: PLP) announced today that it has acquired properties located in the Permian Basin of West Texas for $9,250,000 from Michael L. Cass of Dallas. The properties have estimated proved developed reserves of 1.4 million barrels of oil and 2 billion cubic feet of gas represented by 38 producing Spraberry wells. Plains also acquired a 75 percent working interest in a significant number of proved undeveloped properties.

The acquired properties add over 550 barrels of oil to Plains' daily net production, an increase of more than 50 percent over the company's current oil production rate. Operation and development of the newly acquired properties will be conducted by the Midland district office of Plains Petroleum Operating Co.

Plains, a Colorado-based company, produces, develops and explores for oil and gas in the Midcontinent, Permian Basin, Gulf Coast and Rocky Mountain regions of the United States. The company maintains district offices in Lakin, Kan., and Midland, Texas.

CHICAGO (JULY 24) PR NEWSWIRE - Ameritech (NYSE: AIT) and Bell Atlantic (NYSE: BEL) today announced the appointment of Thomas C. Burns, president and CEO of Bell Atlantic's Chesapeake and Potomac Telephone Co. of West Virginia, as their senior executive and representative in New Zealand, effective Aug. 1.

Burns' principal responsibilities in New Zealand will be to oversee Ameritech's and Bell Atlantic's investment in New Zealand Telecom and to represent both American companies to government, business and other key groups and organizations. He also will assist with the development and transfer of programs to improve technology and operational systems for Telecom.

In a joint statement announcing Burns' selection, Ameritech Chairman and CEO William L. Weiss and Bell Atlantic Chairman and CEO Raymond W. Smith said: "We are delighted to have Tom Burns as our senior executive and

representative in New Zealand. Mr. Burns is not only a skilled and innovative telephone company manager but also a dedicated community servant.

"From his several visits to New Zealand, he also has a deep appreciation of the history, traditions and accomplishments of New Zealand and New Zealand Telecom.

"We believe his commitment to understanding and serving the needs of telephone company customers will be both recognized and appreciated in New Zealand, as they have in West Virginia and in other communities he has served."

Ameritech is the Chicago-based parent of Bell companies in Illinois, Indiana, Michigan, Ohio and Wisconsin that serve more than 16 million customer lines. Other Ameritech companies provide cellular communications, directory publishing, lease financing, voice messaging and audiotex services.

Bell Atlantic Corp. is the Philadelphia-based parent of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone serving Delaware, and the Chesapeake and Potomac Telephone companies serving West Virginia, Maryland Virginia and Washington, D.C., with a combined total of 17 million access lines. The corporation is also the parent company of businesses that provide cellular communications, computer maintenance and financial and leasing services in the U.S. and international markets.

NEW YORK (JULY 24) PR NEWSWIRE - Bio-Technology General Corp. (NASDAQ: BTGC) announced today that it has closed its previously announced $5.0 million private placement of units of common stock and warrants at an aggregate purchase price of $3.00 per unit. Each of the 1,666,662 units sold consists of one share of common stock and a warrant to purchase half a share of common stock at $6.00 per share. Warrants will expire on Feb. 21, 1994. Under the terms of the agreement, the purchasers have agreed not to dispose of their shares or warrants prior to Jan. 20, 1991, and the company has agreed to register the shares and warrants as soon as practicable.

"This transaction, coupled with recent voluntary conversions of Bio-Technology General Corp.'s debt securities, has increased the company's net worth by approximately $8.0 million," stated Sim Fass, president and chief executive officer. "It represents another important step in rebuilding the company's balance sheet and cash position so we can

aggressively pursue our exciting research programs."

Proceeds from the placement will be used to support research and development activities, upgrade pilot plant equipment, and fund pre-clinical and clinical studies.

Bio-Technology General Corp. is principally engaged in the research, development, and manufacture of genetically engineered products for human and animal health care.

NEW YORK (JULY 24) PR NEWSWIRE - Net earnings of Alleghany Corporation (NYSE: Y) were $4.07 per share of common stock in the second quarter of 1990, which ended June 30, compared with $2.72 per share in the second quarter of 1989, F.M. Kirby, chairman of Alleghany, announced today. For the six-month periods ended June 30, Alleghany's net earnings were $5.79 per share in 1990 compared with $3.83 per share in 1989.

The foregoing second quarter figures include the gain from the sale of Alleghany's holdings of 4.4 million common shares of the St. Paul Companies, Inc. for $260.7 million.

#90205p8165 07/24/1990 ~PR Newswire

ARLINGTON, VA (JULY 24) PR NEWSWIRE - Ameritech (NYSE: AIT) and Bell Atlantic (NYSE: BEL) announced today the appointment of Thomas C. Burns, president and chief executive officer of Bell Atlantic's Chesapeake and Potomac Telephone Company of West Virginia, as their senior executive and representative in New Zealand. His appointment is effective Aug. 1.

Burns will be succeeded by David E. Berry, who was elected president and CEO of the Chesapeake and Potomac Telephone Company of West Virginia. Berry is currently vice president of human resources for C&P's parent company, Bell Atlantic, in Arlington.

Charles W. Crist Jr., was elected to succeed Berry. Crist is currently vice president-operations for the Chesapeake and Potomac Telephone Company of Virginia.

Burns' principal responsibilities in New Zealand will be to oversee Ameritech's and Bell Atlantic's investment in New Zealand Telecom and to represent both American companies to government, business and other key groups and organizations. He also will assist with the development and transfer of programs to improve technology and operational systems for New Zealand Telecom.

Last month, a consortium of Ameritech and Bell Atlantic and two major New Zealand firms, Fay, Richwhite Holdings, Ltd, and Freightways Holdings Ltd, submitted the winning bid to purchase New Zealand Telecom from the government. New Zealand Telecom, which has undertaken a sweeping modernization program in recent years, operates one of world's most technologically advanced telephone networks. It serves 1.4 million access lines and has approximately 16,500 employees.

In a joint statement announcing Burns' selection, Ameritech Chairman and CEO William L. Weiss and Bell Atlantic Chairman and CEO Raymond W. Smith said:

"We are delighted to have Tom Burns as our senior executive and representative in New Zealand. Mr. Burns is not only a skilled and innovative telephone company manager but also a dedicated community servant.

"From his several visits to New Zealand, he also has a deep appreciation of the history, traditions and accomplishments of New Zealand and New Zealand Telecom.

"We believe his commitment to understanding and serving the needs of telephone company customers will be both recognized and appreciated in New Zealand, as they have in West Virginia and in other communities he has served."

In West Virginia, Burns devoted his volunteer efforts to promoting economic development in the state. He is a founder and chairman of the West Virginia Roundtable, a board member of the Software Valley Foundation and Software Valley Development Board, the West Virginia Foundation for Independent Colleges, the West Virginia Symphony Orchestra, the Sarah & Pauline Maier Foundation, Inc., One Valley Bancorp of West Virginia, Inc., and One Valley Bank, N.A., Charleston, W.Va.

Burns began his career in telecommunications after graduating from Virginia Polytechnic Institute in Blacksburg, Va. He held positions in C&P's comptrollers, network services and customer services organizations in Virginia and Maryland. Before coming to West Virginia in 1983, he was an assistant vice president for AT&T's Eastern Regions.

Berry attended the College of William and Mary and is a graduate of the University of Tennessee. After joining C&P of Virginia in 1957, he worked in customer services, operator services and revenue requirements and directed the external affairs department in C&P of Maryland. He became vice president of federal regulatory affairs for Bell Atlantic in 1986, was appointed vice president of personnel in 1989 and vice president of human resources in 1990.

A native of Norfolk, Va., Berry has been active in a number of civic organizations, including the United Way. He is a fellow of the Council on Economic Regulation and has served on the board of directors of the Maryland-District of Columbia Utilities Association, South Baltimore General Hospital and the Maryland Art Place.

Crist began his telephone career with C&P of Virginia in 1966 and served in a number of positions prior to becoming general manager-personnel for C&P's group headquarters in 1987, assistant vice president-product line management for Bell Atlantic in 1988 and general manager-directory sales, also in 1988. Crist was a member of the Bell Atlantic Contract bargaining team in 1989 and was appointed to his current position earlier this year.

Crist holds a bachelor of science degree in economics from Hampden-Sydney College and a master of business administration degree from the University of Richmond.

Ameritech is the Chicago-based parent of Bell companies serving 12 million customers in Illinois, Indiana, Michigan, Ohio and Wisconsin. Other Ameritech companies provide cellular communications, directory publishing, voice messaging and audiotex services.

Bell Atlantic Corporation is the Philadelphia-based parent of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone serving Delaware, and

the Chesapeake and Potomac Telephone Companies serving West Virginia, Maryland, Virginia and Washington, with a combined total of 17 million access lines. The corporation is also the parent company of businesses that provide cellular communications, computer maintenance and financial and leasing services in the U.S. and international markets.

#90205p8166 07/24/1990 ~PR Newswire

LOS ANGELES (JULY 24) PR NEWSWIRE - CalMat Co. (NYSE: CZM) today reported earnings for the second quarter and announced a special $.10 per share dividend.

Earnings for the second quarter of 1990 were $11,802,000, or $.40 per share, on revenues of $162,429,000, compared with 1989's record second quarter earnings of $17,111,000, or $.55 per share, on revenues of $176,554,000.

Earnings for both the 1990 and 1989 second quarters reflect a $.09 per share net gain from operating results of, and the disposal of, real estate assets held for sale.

Earnings for the six-month period ending June 30, 1990, were $22,200,000, or $.74 per share, on revenues of $310,559,000, compared with 1989's six-month earnings of $30,331,000, or $.98 per share, on revenues of $329,172,000.

Included in earnings for 1990 is a $7,774,000, or $.26 per share, net gain from the disposal of real estate assets held for sale. Earnings for the comparable 1989 period include a $3,213,000, or $.10 per share, net gain from the disposal of real estate assets held for sale.

A. Frederick Gerstell, president and chief executive officer of CalMat, stated that the lower income in the second quarter of 1990, compared with the second quarter of 1989, reflects a decline in construction activity in several of CalMat's market areas, and specifically a significant reduction in demand for cement and ready-mixed concrete in Southern California.

Although prices are higher than last year for most products, these increases have not offset the reduction in product volumes and the increases in operating costs.

More than one-third of the year-to-date decline in income from operations is attributable to the lower level of gains from recurring land sales. Severe drought conditions and limited funds being made available by lending

institutions for construction spending caused significant declines in unit volume in our important California markets of Ventura and San Diego Counties.

The Cement Division continued to incur higher operating costs in the second quarter of 1990, compared with the same period in 1989. In addition the division experienced a quarterly volume decline of approximately 18 percent, when compared with the second quarter of 1989.

#90205p8169 07/24/1990 ~PR Newswire
WHITE PLAINS, NY (JULY 24) PR NEWSWIRE - IBM today announced IBM Medical RecordsPlus/400, an image-based patient medical records system that allows the medical-records staff of a hospital or clinic to store images of patient records and thereby enhance users' ability to retrieve critical information.

The average patient hospital record may include from 75 to 125 paper documents, including diagnostic and operative reports, progress notes, laboratory results, physicians' orders, etc.

IBM Medical RecordsPlus/400 is based on Application System/400 (AS/400) ImagePlus, IBM's document management system. Hospitals will be able to electronically capture, store, process and retrieve signed documents.

IBM Medical RecordsPlus/400 provides efficiencies that can ultimately mean improved patient care and increased productivity for hospital staffs. The product allows for:

-- Quick processing, filing and retrieval of patient records.
In an emergency, a doctor can pull an electronic file showing a patient's history; -- Simultaneous shared usage of records by various hospital
departments. No longer can a record be monopolized by a single department within the hospital; -- Security by diminishing the possibility of records being lost.
Paper records are often misplaced or incorrectly refiled; -- Cost efficiencies. Hospitals must store records for many years, in some cases for up to 35 years after a patient has been released from the hospital. Online records lessen the need for storage facilities to store paper records. IBM Medical RecordsPlus/400 is a set of extensions to the base ImagePlus AS/400 integrated hardware and software solution that helps automate the input, processing, storage, retrieval and distribution of records. The base

solution consists of:

-- An independent departmental AS/400 host running the Workfolder Application Facility (WAF) folder management software; -- Intelligent PS/2 workstations for viewing, scanning and printing of documents; -- Optical storage system for long-term storage data.
IBM Medical RecordsPlus/400 will be available on a limited basis as of September as a specially designed extension of ImagePlus. It is priced from $31,408 to $56,196 depending on the size of a hospital's AS/400 processor.

IBM Medical RecordsPlus/400 resulted from studies done in conjunction with eight hospitals to determine the kind of online imaging system that would best meet the needs of today's hospitals.

#90205p8171 07/24/1990 ~PR Newswire
READING, PA (JULY 24) PR NEWSWIRE - Meridian Bancorp Inc. (NASDAQ: MRDN) today reported earnings for the quarter ended June 30, 1990, of $21,154,000 compared to $21,907,000 for the same quarter of last year, a decrease of 3 percent.

On a fully diluted basis, earnings per share for the second quarter of 1990 were $.52 compared to $.55 for the second quarter of 1989, a decrease of 5 percent.

Meridian also announced that its board of directors declared the company's regular quarterly cash dividend of $.30 per share on Meridian's common stock. The dividend is payable on Oct. 1, 1990, to common stockholders of record on Sept. 15.

The returns on average assets and on average common stockholders' equity for the second quarter of 1990 were .73 percent and 11.63 percent, respectively, compared to .91 percent and 13.01 percent, respectively, a year ago.

"The decrease in earnings reflects a continued weakening in the economy, particularly in the real estate sector, which affects our primary business lines," said Samuel A. McCullough, Meridian chairman and chief executive officer. "This economic weakness continues to impact the quality of our loan portfolio and, accordingly, we believe it prudent to increase the provision for loan losses. Weakness in the real estate sector has also directly impacted title revenues and the level of claims in our title insurance business, which reported a loss of $2.1 million in the current quarter, compared to a loss of $5.2 million in the first quarter of 1990

and to a loss of $244,000 in the second quarter of 1989," he said.

The provision for possible loan losses was $15,054,000 for the three months ended June 30, 1990, compared to $6,670,000 for the same period of the prior year. Net loans charged off for the second quarter of 1990 and 1989 were $9,739,000 and $4,835,000, respectively.

The reserve for possible loan losses was $98,712,000 at June 30, 1990, compared to $88,401,000 at June 30, 1989. The ratio of the reserve for possible loan losses to loans was 1.18 percent at June 30, 1990, compared to 1.29 percent at June 30, 1989, and 1.12 percent at Dec. 31, 1989. Approximately .09 percent of the decrease in the ratio between June 30, 1989, and June 30, 1990, is attributable to the addition of approximately $550 million in Hill Financial performing mortgage loans purchased from the Resolution Trust Corp. (RTC). Non- performing assets were $107,655,000 at June 30, 1990, or 1.29 percent of loans, compared to $68,235,000 at June 30, 1989, or .99 percent of loans and $80,939,000 at Dec. 31, 1989, or 1.02 percent of loans.

Management said it believes that the reserve for possible loan losses is adequate at June 30, 1990. However, if the economic downturn continues without substantial improvement throughout the remainder of 1990, non-performing loans may continue to increase in the third and fourth quarters. Management said it continues to review Meridian's loan portfolio with particular emphasis on the real estate sector, in light of the possibility of a continuing protracted downturn, as well as changes in the regulatory environment.

For the quarter, net interest income was up by 16 percent to $105,311,000 compared to $91,113,000 for the same period of 1989. The increase is primarily attributable to the strong growth in commercial and mortgage loans and the acquisition of Hill Financial mortgage loans from the RTC. Net interest yield decreased for the second quarter of 1990 to 4.26 percent compared to the second quarter 1989 yield of 4.53 percent primarily because of a reduction in the benefits from interest- free funding sources. However, the net interest yield increased from 4.11 percent in the first quarter of 1990.

Meridian Bancorp's earnings for the first six months of 1990 were $42,386,000 compared to $45,833,000 for 1989, a decrease of 8 percent. On a fully diluted per share basis, Meridian's net income for the year-to-date period was $1.05 compared to $1.14 in 1989, also a decrease of 8 percent. The returns on average assets and on average common stockholders' equity were .74 percent and 11.80 percent, respectively, compared to .96 percent and 13.85 percent, respectively, for the first six months of 1989.

The decrease in earnings for the six-month period in 1990 reflects an

increase in provision for possible loan losses of $19,659,000 and an increase in provision for title losses of $8,318,000, compared to the same period of last year. The increases in the loss provisions were offset in part by the recognition of the remaining $16,150,000 topping fee earned in connection with Meridian's attempt to acquire First Pennsylvania Corp.

Total assets at June 30, 1990, were $11,771,471,000, an increase of 19 percent from assets of $9,905,773,000 at June 30, 1989. Total loans increased 22 percent to $8,339,749,000 and total deposits were up 30 percent to $9,488,498,000. The increase in deposits is primarily attributable to the assumption of approximately $2 billion of deposits of the former Hill Financial Savings Association. Total consolidated stockholders' equity increased 6 percent to $733,017,000 or 6.23 percent of total assets at the end of the second quarter of 1990.

#90205p8172 07/24/1990 ~PR Newswire
READING, PA (JULY 24) PR NEWSWIRE - The board of directors of Meridian Bancorp Inc. (NASDAQ: MRDN) today adopted bylaw amendments to exempt Meridian from coverage by the disgorgement provisions and the control-share acquisition provisions of the Pennsylvania anti-takeover law passed on April 27.

The disgorgement provisions of the law generally permit a Pennsylvania corporation to recover any profit realized by a person or group from sales of the corporation's shares purchased and sold within a specified period of becoming a 20 percent owner or of announcing an intent to seek control of the corporation. The control-share acquisition provisions limit voting rights of shares acquired in excess of 20 percent of outstanding shares unless other shareholders vote to restore those voting rights at a meeting of shareholders. Pennsylvania corporations covered by these statutes are permitted to opt out of coverage by bylaw amendment adopted on or before July 26, 1990.

In commenting on the board's decision to opt out of coverage of these provisions, Samuel A. McCullough, chairman and chief executive officer of Meridian, said, "Meridian believes that the disgorgement and control share statutes may detract from director accountability to stockholders through the proxy process." He also said, "Meridian's existing charter taken together with its shareholder rights plan should adequately protect Meridian and its shareholders from most abusive takeover tactics."

Meridian's board of directors did not opt out of coverage of the provisions of the new law relating to duties of directors. McCullough said "The board views these provisions as clarifying Pennsylvania law to provide directors some certainty and guidance particularly in a change of control setting" and that they "are not inconsistent with Meridian's continuing commitment to shareholders and shareholder value."

Meridian Bancorp Inc., nearly a $12 billion multi-bank holding company, is based in Reading. Meridian, through banking and non-banking subsidiaries, operates nationally with its banking focus in 19 Pennsylvania counties and the state of Delaware. The company's banking subsidiaries are Meridian Bank, the First National Bank of Pike County and Delaware Trust Co.

#90205p8176 07/24/1990 ~PR Newswire

HOUSTON (JULY 24) PR NEWSWIRE - Pogo Producing Co. (NYSE: PPP) reported today a net loss for the quarter ended June 30, 1990, of ($3,146,000) or (13 cents) per share on revenues of $25,660,000. This compares to a loss of ($1,067,000) or (5 cents) per share on revenues of $30,139,000 for the second quarter of 1989.

William C. Liedtke Jr., chairman of the Houston-based oil and gas exploration and development company, commented, "We have had a good quarter despite lower oil and gas prices. During the second quarter we more than replaced reserves produced, significantly lowered debt and increased our cash flow. We also lowered interest charges and increased the company's daily delivery capacity. Unfortunately, lower prices resulted in the loss this quarter." Crude oil and condensate prices received by the company in the second quarter averaged $17.83 per barrel and natural gas prices received averaged $1.67 per Mcf (thousand cubic feet) compared to average prices of $20.03 and $1.87 for these products, respectively, for the 1989 second quarter.

Pogo's interest charges were reduced significantly from the $9,875,000 incurred during the second quarter of 1989 to $8,088,000 for the quarter just ended. The company's total debt and production payment obligations have now been reduced to approximately $286 million, down sizably from the peak of $515 million the company's total debt reached in 1986.

The company reported total liquids production for the second quarter of 1990 was at an average of 6,511 barrels per day. Last year's second quarter average daily liquids production was 7,263 barrels per day. Natural gas production for the company for the quarter just ended averaged 100 million cubic feet per day compared to 105 million cubic feet per day for the 1989 quarter.

Liedtke also commented that the company's drilling and completion operations at South Timbalier 198 have been extremely successful. The gross deliverability tested from South Timbalier 198 now totals 83 million cubic feet of gas per day and 416 barrels of crude and condensate. The operator is now preparing to install the production equipment on the platform and it is anticipated that this field will be on stream in August

of this year. The operator plans to initially produce the field at approximately 70 million cubic feet of gas per day plus attendant crude oil and condensate. Pogo holds a 25 percent working interest in South Timbalier 198.

In addition to the successful operations at South Timbalier 198, other operations offshore and in several South Texas and West Texas areas met favorable results.

#90205p8179 07/24/1990 ~PR Newswire

CLEVELAND (JULY 24) PR NEWSWIRE - Centerior Energy Corporation (NYSE: CX) today reported second quarter earnings of $.40 per share, down 27 percent from $.55 per share in the second quarter of 1989. Net income of $54,921,000 was down 29 percent from $77,807,000 in the year- earlier quarter. Implementation of the second step of the company's phase-in plan resulted in a 7 percent rate increase effective Feb. 1, 1990 and a related reduction in the amount of nuclear operating costs and carrying charges being deferred for future recovery. Thus, weaker sales resulted

in lower earnings than in the year-ago quarter. However, cash flow continued to improve significantly. The percentage drop in net income was greater than the percentage decline in per share earnings because there were fewer shares outstanding in the 1990 second quarter.

Second quarter adjustments related to federal income taxes had the net effect of contributing $.17 to per share earnings. The company recorded previously deferred investment tax credits relating to the write-off associated with the Perry 1 and Beaver Valley 2 nuclear power units in the second quarter; that accounted for $.26 of the second quarter earnings. This was offset somewhat by other tax provisions that resulted in a $.09 decrease in earnings per share.

For the 12 months ended June 30, 1990, earnings per share were $1.62 and net income was $266,819,000 compared to per share earnings of $1.97 and net income of $277,658,000 for the period ended June 30, 1989 before the write-off of nuclear plant investments. The fourth quarter 1988 write-off caused a reported loss of $71,216,000, or $.51 per share, for the 12 months ended June 30, 1989.

As to earnings for the balance of 1990, second half results will be aided by workforce reductions. Over 600 employees elected early retirement effective July 1. The accounting for this, along with the implementation of other cost reduction measures resulting from a year- long management audit, should have a continuing positive effect on future earnings.

Second quarter revenues of $577,505,000 were virtually level with $577,303,000 in the year-ago period. The 7 percent rate increase was offset by a 5 percent decline in kilowatt-hour sales.

Kilowatt-hour sales to retail customers in the second quarter were down 4 percent from the second quarter of 1989 due largely to a broad- based slump in the industrial and commercial sectors. Production remained sluggish in the closely related automobile and steel industries, while chemical and petroleum production dropped sharply. Residential sales remained unchanged from the comparable quarter last year.

For the 12 months ended June 30, 1990, revenues of $2,308,002,000 were up 6 percent from $2,180,328,000.

For the 12 months ended June 30, 1990, retail sales were down 2 percent from the year-earlier period and total sales were down 4 percent.

#90205p8181 07/24/1990 ~PR Newswire

ORANGE, CALIF. (JULY 24) PR NEWSWIRE - Varco International Inc. (NYSE: VRC) today reported results of operations for the second quarter and first six months of 1990.

For the second quarter ended June 30, net income was $1.784 million, $.07 per share, on net sales and other income of $27.6 million. These results compare to net income of $784,000, $.03 per share, on revenue of $23.8 million for the second quarter of 1989.

For the first six months of 1990 net income was $3.2 million, $.12 per share, on revenue of $51.0 million. For the comparable period of 1989 net income was $904,000, $.04 per share, and revenue equaled $43.5 million.

Incoming orders totaled $41.9 million for the second quarter, and $86.9 million for the first six months, reflecting a continued improvement in the outlook for drilling activity. As previously reported, during the second quarter Varco received an order having a value in excess of $7 million. Placed by Far-East Levingston Shipbuilding Ltd. of Singapore on behalf of its customer, A.P. Moller/Maersk Drilling, it represents the largest single order in the company's history. Included in the second quarter total were orders for 15 Top Drive Drilling Systems, bringing to 43 the number of such systems ordered during the first six months of 1990. Also favorably affecting the second quarter order figure were orders for four automated Pipe Handling Machines. Backlog at June 30 was $57.8 million.

In commenting on the second quarter results, Varco President G. I. Boyadjieff stated, "Our industry is beginning to see increased investment in drilling rigs, as reflected in both the upgrading of existing rigs and in the construction of new offshore rigs. This activity is resulting in a number of large orders for Varco equipment."

Varco International is a leading manufacturer of tools and equipment used in the petroleum industry throughout the world.

MOUNTAIN VIEW, Calif. (JULY 24) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today reported revenues totaling $120.3 million for the fourth quarter ending June 30, 1990, a 41 percent increase over the comparable quarter a year earlier. Net income was $11.2 million for the three month period ending June 30, 1990, or $.51 per share, compared with net income of $4.8 million, or $.28 per share, in the like period for the prior fiscal year.

Net revenues for the fiscal year ended June 30, 1990 were $419.8 million, an increase of 59 percent over the $263.8 million reported in the prior fiscal year. Net income was $32.3 million, or $1.59 per share, as compared to $11.5 million, or $.67 per share, for the prior fiscal year.

Edward R. McCracken, Silicon Graphics' president and CEO commented, "Our strong fiscal 1990 financial performance is the result of our continued leadership position in the rapidly growing visual processing marketplace. The Personal IRIS(TM) and IRIS POWER Series(TM) products have established themselves as the leading hardware solutions for this market, and as such contributed to the strong revenue growth during the year. In addition, late in the quarter we began shipping our new state-of-the-art high performance POWERVISION(TM) graphics product."

Additionally, the company's focus on financial execution strengthened its income statement and balance sheet during fiscal 1990. "Substantial improvements in our operating performance resulted in a year-over-year earnings per share increase of 137 percent on revenue growth of 59 percent. This improvement was based primarily on the strength of our products' gross margins," McCracken noted. New product introductions, manufacturing efficiencies and a decline in component costs boosted the company's fiscal year 1990 gross margin to 55 percent, up from 49 percent a year earlier. The company invested a portion of the increase in the marketing and sales areas, increasing selling, general & administrative expenses as a percent of revenue to 33 percent in fiscal year 1990 up from 32 percent in fiscal 1989. "We were able to initiate programs to increase our visibility in the marketplace and at the same time increase our operating profit as a percentage of revenue by five percentage points for the year," McCracken concluded.

During fiscal 1990 the company significantly restructured its capital base. Long term debt was reduced by $51 million, primarily through the conversion to common stock of its Euro convertible debentures. The company also repurchased $53 million of common stock from Control Data Corp. in October and sold $35 million of convertible preferred stock to NKK Corp. in April. In total, stockholders' equity was increased by $88 million for the year. The company's cash and short term investment balance at June 30, 1990 was $86 million.

Silicon Graphics Inc. is a leading manufacturer of visual processing workstations that combine high-performance computing with real-time 3D graphics capabilities. Its workstations and servers are used primarily by firms in the engineering, scientific, creative design, animation, and visual simulation markets. The company's stock trades on the New York Stock Exchange under the symbol SGI.

#90205p8187 07/24/1990 ~PR Newswire

CHICAGO (JULY 24) PR NEWSWIRE - USG Corporation (NYSE: USG) today reported an operating profit of $72 million for the second quarter of 1990 down 10 percent from operating profit of $80 million for the same period in 1989. Operating profit is the most realistic basis for year- to-year financial performance comparisons since it excludes non- recurring items such as last year's second-quarter pre-tax gain of $11 million on the sale of the construction metal business.

The operating profit decline was primarily the result of lower gypsum wallboard prices, reflecting reduced construction activity. Gypsum wallboard prices were down 7 percent compared to last year's second quarter.

Net earnings of $1 million, or $0.02 per share, was recorded for the second quarter of 1990 vs. net earnings of $9 million, or $0.17 per share, in 1989's second quarter. Second-quarter 1990 net sales were $533 million a decline of 6.5 percent from $570 million for the same period a year ago. This decline reflects the absence in 1990 of the construction metal

sales, as well as lower gypsum wallboard prices.

For the first six months of 1990, USG reported an operating profit of $131 million, a decrease of 9 percent from operating profit of $144 million for the same period last year.

Six-months 1990 net sales were $1.063 billion, down 4.1 percent from sales of $1.108 billion for the same period a year ago. Net earnings for the first six months of 1990 were $9 million, a decline of 25 percent from net earnings of $12 million for the same period last year. Six-months 1990 earnings per common share were $0.16 vs. $0.22 for the same period in 1989. Six-months 1990 net earnings benefited from a $34 million pre-tax gain on the sale of USG's corporate headquarters building, while results for six months 1989 included the previously- mentioned gain on the sale of the construction metals business and a $16 million pre-tax gain on an insurance settlement.

USG is a Fortune 500 corporation with operating subsidiaries that are leading manufacturers and distributors of building materials such as gypsum wallboard and related products, home improvement products and ceiling, wall and floor systems. Its subsidiaries include United States Gypsum Company, USG Interiors, Inc., DAP Inc., L&W Supply Corporation, and CGC Inc.

#90205p8191 07/24/1990 ~PR Newswire

DUBLIN, OH (JULY 24) PR NEWSWIRE - Cardinal Distribution, Inc. (NASDAQ: CDIC) today announced significantly higher sales and earnings for its first quarter ended June 30, 1990.

For the first quarter of fiscal 1991, net sales increased by 19 percent to $242.1 million from $203.3 million in the comparable prior period. Net earnings increased by 40 percent to $3.3 million in 1991, from $2.4 million in 1990. Fully diluted earnings per share increased by 24 percent to $.31 per share from $.25 per share a year earlier. The results included less than two weeks' revenues from the aquisition of Ohio Valley-Clarksburg, Inc., which was completed on June 18, 1990.

Cardinal also announced the completion of its offering of $75 million, 7-1/4 percent convertible subordinated debentures, due 2015, including a $5 million overallotment amount. The proceeds will be used to pay down existing short-term debt and for general corporate purposes.

Robert D. Walter, chairman and chief executive officer, said the results

indicate that strong sales and earnings trends are continuing. He noted that the sales gains were broad-based and that margins were stable. He added that the successful completion of the Ohio Valley acquisition, and the recent debenture offering, place Cardinal in an excellent position for future growth opportunities.

Cardinal Distribution, Inc. supplies pharmaceuticals, medical and surgical supplies, and related health products to drug stores, hospital pharmacies, and other customers located primarily in the midwestern and northeastern United States.

#90205p8194 07/24/1990 ~PR Newswire

NASHVILLE, TN (JULY 24) PR NEWSWIRE - Volunteer Capital Corporation (NYSE: VCC) today reported operating results for the second quarter and first half of 1990.

President Lonnie J. Stout II said the Company posted net income of $695,000, or $.17 per share, in the quarter ended July 1, 1990, as compared to a loss of $13,033,000, or $3.23 per share, in the quarter ended July 2, 1989. Sales for the second quarter of 1990 were $10,095,000 as compared to $17,213,000 in the second quarter of 1989.

Volunteer Capital Corporation recorded net income of $1,044,000, or $.26 per share, for the six month period ended July 1, 1990, as compared to a net loss of $15,346,000, or $3.81 per share, recorded in the first half of 1989. Sales for the first half of 1990 were $18,692,000, as compared to $41,160,000 in 1989.

Net income for the second quarter and six months ended July 1, 1990 included extraordinary gains of $58,000 and $371,000 (net of taxes), respectively, from repurchases of the Company's 8-1/4 percent convertible debentures and $208,000 and $399,000 respectively, resulting from utilization of net operating loss carryforwards.

The results for the second quarter and first half of 1989 include loss provisions of $11,750,000 and $12,130,000, respectively, relating to the disposition of the Company's Mrs. Winner's restaurant operations.

The Company's Wendy's operations reported operating income of $1,174,000 during the second quarter of 1990, as compared to $788,000 reported for the second quarter of 1989. Average store sales for the division were $202,000 for the second quarter of 1990, up 9.8 percent from $184,000 in

the second quarter of 1989.

The Wendy's division reported operating income of $1,714,000 for the first half of 1990, as compared to $1,002,000 reported during the first half of 1989. Average store sales for the division were $377,000 for the first half of 1990, up 9.6 percent from $344,000 for the first half of 1989.

Volunteer Capital Corporation operates 50 Wendy's Old Fashioned Hamburgers restaurants in four states. The Company's common stock is traded on the New York Stock Exchange (NYSE: VCC).

MINNEAPOLIS, (JULY 24) PR NEWSWIRE - Minntech Corp. (NASDAQ: MNTX) reported today net earnings of $648,000 or $0.23 per common share for the quarter ended June 30, up 60 percent compared to net earnings of $405,000 or $0.15 per common share for the first quarter of 1989. Revenues for the quarter ended June 30 were $6,346,000, up 20 percent from revenues of $5,292,000 for the same period last year. Earnings for the first quarter of 1989 included a credit of $110,000 or $.04 per common share related to a change in accounting for patent application costs.

Dr. Louis C. Cosentino, president, reported, "We were pleased with the first quarter's profit margin -- the $648,000 in net earnings represented a 10.2 percent return on sales. Gross margin also improved to 39.9 percent of sales. We are off to an excellent start for the fiscal year and anticipate rising revenues throughout the remainder of the year."

Minntech Corporation is a leading medical device manufacturer with advanced technology in electronics, solutions, fibers and plastics. The company's core technologies are being applied to the businesses of dialysis, reprocessing/sterilants, cardiosurgery and water purification. Minntech Corporation's common stock is traded on the national over-the-counter market under the NASDAQ symbol: MNTX.

#90205p8202 07/24/1990 ~PR Newswire
DUBLIN, OH (JULY 24) PR NEWSWIRE - Pickett Suite Hotel Master L.P. I (NASDAQ: PSHPZ) announced a cash distribution for the second quarter of 1990 of $.275 per unit, payable Aug. 14, 1990, to unitholders of record on July 31, 1990. The general partner has guaranteed an annual payment of $1.10 per unit through 1990.

During the second fiscal quarter ended June 14, 1990, the partnership generated $305,643 in cash from operations (income before depreciation and amortization expense), or $.10 per partnership unit, compared to $321,668, or $.10 per unit, in the second quarter of 1989. Cash from operations in the first half of 1990 increased 72 percent to $676,225, or $.22 per unit, from $393,274, or $.13 per unit, in 1989. Operating revenues in the current quarter increased 10 percent to $5,493,124 from $4,993,615 in the same quarter of 1989. Year-to-date revenues improved 10.2 percent from 1989, increasing to $10,814,445 from $9,811,197.

The net loss in the second quarter of 1990 of ($499,316), or ($.16) per partnership unit, after depreciation and amortization expense, compares to a net loss of ($495,604), or ($.16) per unit, during the same period of

1989. Results in the second quarter were negatively impacted by one-time expenses associated with the conversion to Guest Quarters. Year-to-date, the net loss declined 24 percent to ($946,283), or ($.30) per partnership unit, from ($1,247,163), or ($.40) per unit, in 1989. Combined occupancy during the second half of 1990 increased to 73.4 percent from 68.8 percent in the first half of 1989, reflecting increased volume at each of the hotels, while the overall average suite rate increased 2 percent.

The partnership issued $31.1 million of units of limited partnership interest in July, 1987 to finance the $69 million acquisition of three hotels located in Walt Disney World(R), Tampa and the Research Triangle near Raleigh/Durham, N.C. Originally managed as Pickett Suite Hotels, the properties began operations as Guest Quarters Suite Hotels in December, 1989.

#90205p8204 07/24/1990 ~PR Newswire

ATLANTA (JULY 24) PR NEWSWIRE - Robert J. Ratliff, president and CEO of Deutz-Allis Corp., has announced the introduction of a new orange-colored

tractor in the popular Deutz-Allis 9100 Series high horsepower farm tractors.

The announcement comes just one month after Ratliff and four other top-level executives of Deutz-Allis formed Allis-Gleaner Co. (ACGO) to purchase the stock of Deutz-Allis.

The new color reflects the important North American heritage of Deutz-Allis, a subsidiary of AGCO, which has its agricultural equipment roots in the famous industrial giant, Allis-Chalmers Corp., according to Ratliff. One of the trademarks of the old Allis-Chalmers tractors and farm equipment was the bright colored orange paint.

Allis-Chalmers had begun marketing orange tractors in 1929 after its Tractor Department Manager Harry C. Merritt went to California and saw acres of brilliant orange poppies. He brought some of the poppies back to Milwaukee and asked experts at the Pittsburgh Plate Glass Co. to duplicate the color for use on Allis-Chalmers tractors and other farm equipment.

Orange continued to be the Allis-Chalmers color until 1985 when Klockner-Humboldt-Deutz (KHD) AG, Cologne, West Germany, purchased certain agricultural equipment lines from Allis-Chalmers.

At that time, KHD formed the Deutz-Allis Corp., combining the Allis-Chalmers line with it popular Deutz-Fahr line. The Allis-Chalmers and Deutz-Fahr dealer organizations also were joined and became Deutz-Allis dealers to market the Deutz-Allis spring-green-colored products in North America.

Although the color of Deutz-Allis products has been spring-green, Allis-Chalmers orange has remained a visible part of the Deutz-Allis Corp. Ratliff comments.

Deutz-Allis dealers, for example, have continued to use the color in their signs, and an orange sign greets visitors to the Deutz-Allis Corp. and ACGO headquarters in Norcross, Ga., he says.

The color change is another step forward by Deutz-Allis in the North American farm machinery market, concludes Ratliff.

#90205p8214 07/24/1990 ~PR Newswire

GASTONIA, NC (JULY 24) PR NEWSWIRE - Public Service Company of North

Carolina, Inc. (NASDAQ-NMS: PSNC), a natural gas utility, today reported operating results for the quarter ended June 30, 1990, its third quarter of fiscal 1990. Operating revenues for the quarter were $35,947,000, down $7,053,000, or 16 percent as compared to $43,000,000 for the quarter ended June 30, 1989. The decrease in operating revenues for the quarter was more than offset by a 29 percent or $7,600,000 decrease in the cost of gas as compared to the same quarter in fiscal 1989. This resulted in gross margin of $17,593,000 for the quarter ended June 30, 1990, a 3 percent increase over $17,046,000 for the third quarter in 1989. Other operating expenses and taxes for the quarter ended June 30, 1990 were $14,427,000, a 6 percent increase over $13,638,000 for the same quarter in 1989. Net income for the third quarter in fiscal 1990 was $523,000 as compared to $878,000 for the prior year quarter. Quarterly earnings per average common share, based on 9,709,000 average common shares outstanding were $.05, as compared to $.09 for the quarter ended June 30, 1989, based on 9,439,000 average common shares then outstanding.

The decrease in quarterly operating revenues was due mainly to a large reduction in quantities of natural gas sold for heating requirements to its higher-margin residential and commercial customers. Quantities of gas sold to residential and commercial customers decreased 9 percent and 18 percent, respectively, as compared to the same quarter last year. The decrease in quantities sold was due to weather during the quarter which was 38 percent warmer as compared to the same quarter in 1989. Quantities of gas sold to its large volume industrial customers decreased 27 percent as compared to the prior year quarter. This was mostly offset by a 23 percent increase in transportation gas to this class of customers. The quarter's revenues also reflected gas rate increases from the Company's lastest general rate case in November, 1989, which were netted against refunds from the Company's interstate pipeline supplier and passed on to the Company's customers through lower gas rates.

The increasing deregulation of the natural gas industry and the Company's interstate pipeline supplier's conversion to an open-access carrier increased the Company's transportation of gas purchased by end-users from other suppliers during fiscal 1990. The commodity value of such transportation gas is not included in operating revenues, whereas it is included if gas is purchased and sold by the Company. Quantities of transportation gas for the quarter ended June 30, 1990 was 3,757,000 as compared to 3,044,000 for the same quarter in the prior year. Importantly, the Company's rate tariffs enable it to earn an equivalent operating margin selling or transporting a given volume of gas.

Operating revenues for the twelve months ended June 30, 1990 were $201,995,000 compared to $215,174,000 for the twelve months ended June 30, 1989. Net income for the twelve months ended June 30, 1990 decreased 16 percent to $11,858,000, as compared to $14,150,000 for the same period last year. Earnings per average common share for the twelve months ended

June 30, 1990 were $1.22, based on 9,601,000 average common shares outstanding. This represented a 19 percent decrease from $1.50 for the prior twelve-month period, based on 9,334,000 average common shares then outstanding.

Public Service Company distributes natural gas to over 225,000 customers in 87 cities, towns and communities in 26 counties ranging from the Raleigh, Durham and Chapel Hill areas in the northeast; the Concord, Statesville, Gastonia and Forest City areas in the Piedmont; to the Asheville, Hendersonville and Brevard areas in the western part of the state.

LOS ANGELES (JULY 24) PR NEWSWIRE - Angeles Corp. (AMEX: ANG) has announced a major reorganization of its manufactured home communities division which oversees development, operations and home sales for 21 communities throughout the United States.

Restructuring to increase management effectiveness was brought about by changes in the industry, according to Colin M. Coyne, a six- year Angeles employee who is the new divisional vice president. "These changes were particularly necessary in Florida," Coyne said, "where we believe greater sensitivity to both residents and public policy will be constructive for all. We took a close look at the industry and our own operation, and made the changes we believe are necessary to provide our residents with the lifestyle they desire and to maintain our position as an industry leader."

Coyne's management team includes several other long-time Angeles employees. Gordon Meyer, who has been involved in all facets of the division over the past decade, continues his association on a consulting basis.

Angeles first entered the manufactured home industry in 1980. Today the firm manages more than 11,000 developed home spaces.

Angeles Corp. subsidiaries manage in excess of $4 billion in both real estate and securities assets for corporations and institutions, and for more than 130,000 individual investors.

#90205p8216 07/24/1990 ~PR Newswire

RALEIGH, NC (JULY 24) PR NEWSWIRE - RS Financial Corp. (NASDAQ-NMS: RFBK) announced the results of operations for the six months and quarter ended June 30, 1990. For the six months ended, June 30, 1990, net income was $1,423,000 or $0.42 per share compared to $2,038,000 or $0.59 per share in 1989.

Net income for the second quarter of 1990 was $494,000 or $0.15 per share compared to $925,000 or $0.27 per share for the second quarter of 1989.

In 1990, interest income and net income have been impacted by classified loans and investments. These classified assets were $23.8 million at June 30, 1990, compared to $24.7 million at March 31, 1990, and $15.7 million at December 31, 1989. In the first six months of 1990,

$940,000 was added as a general provision for loan loss expense of which $300,000 was added in the second quarter. Also, an addition to a specific valuation allowance of $500,000 reduced net income for the quarter and six months ended June 30, 1990.

Total assets were $787.6 million at June 30, 1990, and total deposits were $670.9 million. Shareholders' equity was $66.0 million or $19.66 per share.

Mr. F. Guy Walker, President and Chief Executive Officer of RS Financial Corp, died on July 18, 1990. The board of directors has named Stanley E. Wright as acting Chief Executive Officer.

Raleigh Federal Savings Bank, RS Financial Corp's wholly owned subsidiary, is a full service financial institution with 32 locations throughout central and eastern North Carolina.

RS Financial Corp's common stock is traded on the NASDAQ National Market System under the symbol RFBK.

AKRON/CANTON, OH (JULY 24) PR NEWSWIRE - USAir will inaugurate new nonstop service between Akron/Canton and Charlotte, N.C., with two daily roundtrip flights Sept. 5, giving local air travelers access to USAir's largest connecting hub.

"Having the option of selecting connections over Charlotte, USAir's largest hub, will greatly facilitate travel planning for people flying from Akron/Canton," said Randall Malin, USAir executive vice president - marketing.

New nonstop flights to Charlotte, where USAir and its USAir Express affiliates offer 469 daily departures, will leave Akron/Canton at 7:50 a.m. and 6:50 p.m. and arrive Charlotte at 9:20 a.m. and 8:20 p.m., respectively. Returning to Akron/Canton, flights will depart Charlotte at 4:30 p.m. and 7:30 p.m. and arrive here at 6 p.m. and 9 p.m., respectively. This new service will be operated with 68-passenger Fokker 28-4000 jet aircraft with first and coach class seating.

#90205p8220 07/24/1990 ~PR Newswire

NEWPORT BEACH, Calif. (JULY 24) PR NEWSWIRE - The Hammond Company (NASDAQ: THCO) today announced for the first quarter ended June 30, 1990 the company had a loss of $534,174 or $.42 per share. For the previous first quarter the company had a loss of $504,801 or $.25 cents per share before the cumulative effect of accounting changes and net income of $30,199 or $.01 per share after the accounting changes. The company's first quarter losses are attributable to the nominal amount of loan servicing sales which are typically consummated later in the fiscal year. At this time, the company anticipates a bulk sale of servicing to be completed in the second quarter which should eliminate the first quarter loss and return the company to profitability.

Loan originations for the first quarter ended June 30, 1990 were $84.5 million compared to $92.2 million for the previous first quarter of fiscal 1990 which is a reduction of 8 percent.

The Hammond Company is continuing to adjust to an adverse real estate market with careful control of operating expenses and the introduction of loan products designed to assist realtors and developers to sell their homes. Our ability to operate profitably for the balance of fiscal 1991 depends upon several external factors primarily related to the volume of the loans we can originate, and the market value of mortgage servicing rights.

The Hammond Company originates, sells, and services mortgage loans in the states of California, Arizona, Hawaii and Washington.

The Hammond Company's common stock is traded over the counter under the NASDAQ symbol "THCO."

MIDDLEBURY, CONN. (JULY 24) PR NEWSWIRE - UCC Investors Holding, Inc. ("UCC Investors"), a corporation formed in connection with the October 1989 management-led buyout of Uniroyal Chemical Company, Inc. ("Uniroyal Chemical"), announced today that Uniroyal Chemical has completed its previously announced private placement of $270 million of Senior Secured Notes due March 31, 1997.

The Senior Secured Notes consist of $162 million of 12.22 percent per annum fixed rate notes and $108 million variable rate notes with a coupon equal to three-month LIBOR plus 2.50 percent. The Senior Secured Notes were issued in connection with the refinancing of $260 million of the Senior Secured Increasing Rate Notes and $40 million of term loans due 1994 of Uniroyal Chemical Acquisition Corporation. The Increasing Rate Notes have been called for redemption today and will be paid on July 30, 1990, and the term loans have been paid today. Citibank, N.A., acted as placement advisor to Uniroyal Chemical.

In addition, Uniroyal Chemical announced that it has entered into a credit facility for working capital purposes of up to $100 million with a group of banks, with Citibank as agent.

Uniroyal Chemical is a specialty chemical company whose principal business lines include rubber chemicals, specialty chemical additives, elastomers, crop protection chemicals and urethane pro-polymers with world-wide sales in 1989 of approximately $805 million.

RALEIGH/DURHAM, NC (JULY 24) PR NEWSWIRE - USAir will inaugurate new nonstop service between Raleigh/Durham and New York's LaGuardia Airport with two daily roundtrip flights beginning Sept. 5.

"The addition of these new flights to LaGuardia will increase USAir's Raleigh/Durham departures to 27, which illustrates USAir's growth commitment to the Triangle area," said Randall Malin, USAir's executive vice president - marketing. "USAir's schedule has been designed for the business traveler who wants same-day, roundtrip service."

New nonstop flights will depart Raleigh/Durham at 7:10 a.m. and 5 p.m. and arrive LaGuardia at 8:40 a.m. and 6:30 p.m. Returning flights will depart LaGuardia at 1:55 p.m. and 7:15 p.m. and arrive here at 3:35 p.m. and 8:55 p.m., respectively. The new service will be operated with 108-passenger DC-9 jet aircraft with first and coach class seating.

SAN FRANCISCO (JULY 24) PR NEWSWIRE - Chevron U.S.A. Inc. announced a change in the posted prices it will pay for crude oil from California and Alaska fields. Postings are increased by varying amounts.

The change was effective today at 7:00 a.m. Chevron will now pay:
for:
35 API -- Cook Inlet -- $15.65
26 API -- Buena Vista -- $14.65
19 API -- Huntington Beach -- $13.05
13 API -- Kern River -- $11.00
27 API -- Long Beach -- $15.15
13 API -- Midway Sunset -- $11.00
17 API -- Wilmington -- $12.55

The gravity adjustment scale is as follows:

Above 40.0 deg. -- $0.000 per tenth degree API
34.0 to 40.0 -- $0.010 per tenth degree API
20.0 to 34.0 -- $0.025 per tenth degree API
Below 20.0 -- $0.025 per tenth degree API

New prices for all fields are reflected in Chevron's California and Alaska Crude Oil Price Bulletin 90-CA23. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

#90205p8233 07/24/1990 ~PR Newswire

EDISON, NJ (JULY 24) PR NEWSWIRE - Crestmont Federal Savings and Loan Association (Crestmont) (NASDAQ: CRES) reported today that in its first fiscal quarter ended June 30, 1990, earnings were $73,000 or $0.02 per share compared with $1,792,000 or $0.47 per share in the corresponding period a year earlier. The company's tangible book value was $14.10.

The company had reported non-performing assets of $65.3 million at March 31, 1990, and approximately $64.0 million at May 31, 1990. At June 30, 1990, this figure was $59.1 million due to net pay-offs and pay-downs totaling $5.8 million and charge-offs of $407,000. Crestmont's results of operations are largely dependent on economic and market conditions and a continuing weakness in the real estate market would likely result in further depressing the carrying value of assets and an increase in non-performing assets. As such, analysis and classification of assets is an ongoing activity and reserves will be added in the future as needed, depending on such conditions.

While future performance could be uneven because of existing market conditions and the level of Crestmont's non-performing assets, the new management team continues its efforts to restructure and improve Crestmont's operations. As part of its restructure and ongoing review process, Crestmont will probably realize additional non-recurring income of approximately $550,000 in the near term. In addition, Crestmont will close its loan production offices in Collingswood and Freehold next month, and realize estimated savings at an annual rate of $500,000.

This is in addition to previously announced economies expected to be $2.5 million at an annual rate. The decision to close such loan production offices was a result of a reduced level of loan originations and the expectation that this will continue. Thus far in the calendar year, loan closings have totaled $99,423,000 compared to $116,085,000 in the same period last year. In the last quarter, closings were $52,673,000 compared to $62,422,000 a year ago. However, Crestmont continues as an active mortgage lender in Northern and Central New Jersey through its loan production offices in Westfield and Parsippany.

Crestmont calculated its tangible, core and risk-based capital ratios as of June 30, 1990 at 3.21 percent, 3.32 percent and 6.15 percent compared to requirements of 1.5 percent, 3.0 percent and currently 6.4 percent, respectively. As previously announced, Crestmont has disputed the loss classification of one loan resulting from its recent regulatory examination and a final resolution has not yet been made. The loan in question amounts to $4.7 million against which Crestmont has reserved $3.1 million last quarter instead of charging it off. This action of reserving $3.1 million, as compared to fully providing for and charging-off $4.7 million, had no impact on earnings due to the tax deductibility of loan charge-offs that is not available for general provisions made to the loan loss reserves. If this loan had been fully provided for and charged-off the tangible and core capital ratios would be unchanged, but the risk-based capital ratio would have been 5.90 percent at June 30, 1990.

As a result of its risk-based capital ratio, Crestmont has said in prior releases that it is required to file a capital plan with the Office of

Thrift Supervision (OTS). The plan was approved by Crestmont's board of directors on June 26, 1990, and filed with the OTS on July 5, 1990. There has, to date, been no action taken. The capital plan details Crestmont's proposed strategies and timetable for bringing the risk-based capital level into compliance. Until such time as the capital plan is approved by the OTS, Crestmont may not (1) increase its total assets during any quarter in excess of an amount equal to net interest credited on deposits, subject to certain exceptions, or (2) make any capital distributions.

Crestmont has been delayed in the filing of its annual report and Form 10-K for the fiscal year ended March 31, 1990, and anticipates that this filing may not occur until as late as July 31, 1990. This delay in filing along with the delay in announcing the results for the fiscal year ended March 31, 1990, was due to Crestmont's awaiting the results of an extended normal regulatory examination and the corresponding delay in producing audited financial statements and accompanying information.

Crestmont Federal Savings and Loan Association, with $1.6 billion in assets, has 23 branch locations and four loan production offices serving Burlington, Camden, Gloucester, Essex, Middlesex, Morris, Ocean, Monmouth, Somerset and Union Counties in the state of New Jersey.

#90205p8234 07/24/1990 ~PR Newswire

MINNEAPOLIS (JULY 24) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR), today reported revenue of $227,015,000 and net earnings of $42,580,000, or $1.49 per share, for the second quarter ended June 30, 1990. This compares with revenue of $128,259,000, net earnings of $4,414,000, and earnings per share of $.15, in the second quarter of 1989.

Revenue for the first six months of 1990 was $362,884,000, compared with $244,398,000, for the first half of 1989. Net earnings were $52,058,000, or $1.82 per share, compared with $5,923,000, or $.20 per share for the same period a year ago.

John A. Rollwagen, chairman and chief executive officer, said, "We continue to expect flat revenues for 1990 with opportunities for earnings improvements over last year. Our operating expenses are also in line with expectations.

Order signing activity improved in the second quarter. Contract value of orders was approximately $180 million, compared with approximately $150 million for the second quarter of 1989. Our backlog at the end of the quarter was about $295 million vs. $300 million at the end of the first quarter 1990 and $340 million at the end of second quarter 1989."

Customers accepted systems and upgrades during the quarter with a contract value of about $186 million. Of the systems installed at customer sites in the second quarter, 13 were new systems and four were used systems.

Cray Research, Inc., designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

CHICAGO, (JULY 24) PR NEWSWIRE - UNR Industries, Inc. (NASDAQ: UNRI) reported that sales in the second quarter of 1990 were $105.3 million, up 10 percent from the $96.0 million reported in the second quarter of 1989. This is the highest second-quarter sales in the company's history. Operating income for the quarter was $7.4 million, up 27 percent from the $5.8 million reported in 1989.

Sales for the six months ended June 30, 1990, were $204.3 million, up 10 percent from $185.7 million reported for the same period in the prior year. Operating income for the period was $12.8 million, up 21 percent from $10.6 million reported in the first half of 1989. Net income comparisons between 1990 and 1989 are not meaningful due to asbestos-related insurance recoveries of $45.5 million and reorganization charges of $109.6 million recorded in 1989.

(a) Net of reserve for LIFO valuation of inventories of $14.9 million and $15.1 million at June 30, 1990, and Dec. 31, 1989, respectively.

UNR INDUSTRIES, INC. AND SUBSIDIARIES
Notes to Financial Statements

(1) -- On July 29, 1982, UNR Industries, Inc. and certain subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the Bankruptcy Code. The filings were precipitated by contingent liabilities resulting from litigation arising out of asbestos-related operations owned by UNR's predecessor corporations. On June 2, 1989, the company's Plan of Reorganization (the "Plan") was confirmed by the Bankruptcy Court following acceptance of the Plan by the company's creditors and stockholders. The Plan relieves the company of the burden of defending and settling thousands of asbestos lawsuits. This was accomplished through the creation of the UNR Asbestos-Disease Claims Trust, which will assume responsibility for, administer, settle and pay all asbestos-related claims. In lieu of bringing actions against the company, asbestos claimants must assert their claims against this trust, which owns 29,437,004 shares of common stock of the company. The Order confirming the Plan of Reorganization, the Injunction Order and the Federal Bankruptcy Code prohibit all persons from taking any actions against the company with respect to any past, present or future asbestos-related liabilities.

On June 9, 1989, an appeal was filed from the order confirming the Plan of Reorganization. A motion is pending in the U.S. District Court to dismiss the appeal as moot. The company and its counsel expect the company to prevail on the motion. Requests for stays of the effect of the confirmation order have been denied by the Bankruptcy Court, the U.S. District Court and the U.S. Court of Appeals for the Seventh Circuit.

By another order, effective June 2, 1989, the Bankruptcy Court permanently enjoined any actions against the company by asbestos-disease claimants and others. An appeal from the injunction order is pending. The company and its counsel believe that the appeal has no merit and the company expects to prevail.

(2) -- For financial reporting purposes, the company has net operating loss carryforwards of over $150 million, for which no tax benefit has been recorded. The extraordinary reorganization charges included in the 1989 Statement of Income are not deductible for income tax purposes until the year distributions are actually made by the UNR Asbestos-Disease Claims Trust to claimants. However, the timing of future distributions is undeterminable. The related deductions will result in a reduction of that year's current tax liability and may also generate tax loss carrybacks or carryforwards. Net operating losses resulting from the payment of tort claims could be subject to the limitations of Section 382 of the Internal Revenue Code.

(3) -- The interim determination of inventories under the LIFO method is based on the management's estimates of the expected year-end inventory levels and costs and as such, interim financial results are subject to final year-end inventory amounts.

ST. LOUIS (JULY 24) PR NEWSWIRE - McDonnell Douglas Corp. (NYSE: MD) today honored 32 employees who are the first recipients of the company's newly inaugurated Spirit of Excellence award.

Among the winners is Gerald Martinez of Pueblo, Colo., who was honored for his work on the Delta launch vehicle program and the Titan II fairing assembly operation.

In recognition of their outstanding accomplishments, the employees will receive a crystal award and McDonnell Douglas stock at a dinner held here tonight at the corporation's world headquarters.

The award was established this year to recognize employees, who through their achievements, display a deep commitment to continuous improvement, first-time quality and customer satisfaction.

"These teammates are truly winners in every sense of the word," said John F. McDonnell, the company's chairman and chief executive officer. "They embody the spirit of excellence that is within each of us."

Martinez, an employee of McDonnell Douglas Space Systems Co., has repeatedly demonstrated a commitment to teamwork and first- time quality. For example, in less than four months after assuming responsibility for the Delta second stage guidance section, his team was the first to build a guidance section without a single defect. This achievement continues to be a benchmark for other McDonnell Douglas assembly teams in Pueblo.

#90205p8240 07/24/1990 ~PR Newswire

WORCESTER, MA (JULY 24) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX) today announced that the Securities and Exchange Commission has completed its review of the Form S-4 registration statement for shares to be issued in connection with Biotech Research Laboratories (NASDAQ: BTRL) proposed merger, and has authorized the registration statement to become effective this date.

The registration statement accompanied by proxy material, will be mailed this week to the shareholders of both CBCX and BTRL for consideration and vote at their respective shareholder meetings to be held early in September 1990. If both shareholder groups approve the proposed merger, the transaction will be consummated soon after the shareholder approvals have occurred.

The transaction will be a tax-free exchange of approximately six million shares of CBCX common stock for all of the 6,292,613 shares of BTRL outstanding. The actual number of CBC's shares to be exchanged at the close may be adjusted within a narrow range pursuant to a formula based on the average price of CBCX shares 10 days prior to the closing.

For the year ended Dec. 31, 1989, CBCX reported revenues of $8,572,049, and BTRL reported revenues of $17,050,629.

Commenting on the merger, Patrick J. Leonard, president of Cambridge BioScience Corporation, said, "The merger with BTRL is strategically important. The combination of Cambridge's recombinant technology, with its strength in delivery systems and its patent portfolio, with Biotech's strength in viral lysates and Western blot technology puts us in a strong

position in the worldwide market of HIV/HTLV diagnostics. The merging of both technologies will lead to significant new products in the rapidly expanding area of HIV and HTLV screening confirmatory testing. This will accelerate achievement of critical mass in terms of product range and sales volume, which are crucial to achieving profitability."
